MICROBIAL PROTEOMICS

Functional Biology
of Whole Organisms

IAN HUMPHERY-SMITH
MICHAEL HECKER

CONTENTS

PREFACE	ix
ACKNOWLEDGMENTS	xi
CONTRIBUTORS	xiii
PART I GENERAL PROTEOMICS OF MICROORGANISMS/MODEL ORGANISMS	1
1. Holistic Biology of Microorganisms: Genomics, Transcriptomics, and Proteomics	3
<i>Valerie Wasinger</i>	
2. Strategies for Measuring Dynamics: The Temporal Component of Proteomics	15
<i>Robert J. Beynon and Julie M. Pratt</i>	
3. Quest for Complete Proteome Coverage	27
<i>C. David O'Connor, Ian N. Clarke, and Paul Skipp</i>	
4. Proteome of <i>Mycoplasma pneumoniae</i>	39
<i>Richard Herrmann and Thomas Ruppert</i>	
5. Proteomics of Archaea	57
<i>Ricardo Cavicchioli, Amber Goodchild, and Mark Raftery</i>	
PART II PROTEOMICS AND CELL PHYSIOLOGY	73
6. Elucidation of Mechanisms of Acid Stress in <i>Listeria monocytogenes</i> by Proteomic Analysis	75
<i>Luu Phan-Thanh and Lothar Jänsch</i>	
7. Oxidation of Bacterial Proteome in Response to Starvation	89
<i>Thomas Nyström</i>	
8. Tale of Two Metal Reducers: Comparative Proteome Analysis of <i>Geobacter sulfurreducens</i> PCA and <i>Shewanella oneidensis</i> MR-1	97
<i>Carol S. Giometti</i>	
9. AMT Tag Approach to Proteomic Characterization of <i>Deinococcus radiodurans</i> and <i>Shewanella oneidensis</i>	113
<i>Mary S. Lipton, Margaret F. Romine, Matthew E. Monroe, Dwayne A. Elias, Ljiljana Pasa-Tolic, Gordon A. Anderson, David J. Anderson, Jim Fredrickson, Kim K. Hixson, Christophe Masselon, Heather Mottaz, Nikola Tolic, and Richard D. Smith</i>	

PART III	PHYSIOLOGICAL PROTEOMICS OF INDUSTRIAL BACTERIA	135
10.	Proteomics of <i>Corynebacterium glutamicum</i>: Essential Industrial Bacterium	137
	<i>Andreas Burkovski</i>	
11.	Proteomics of <i>Lactococcus lactis</i>: Phenotypes for a Domestic Bacterium	149
	<i>Mogens Kilstrup</i>	
12.	Proteomic Survey through Secretome of <i>Bacillus subtilis</i>	179
	<i>Haike Antelmann, Jan Maarten van Dijl, Sierd Bron, and Michael Hecker</i>	
PART IV	PROTEOMICS OF PATHOGENIC MICROORGANISMS	209
13.	Analyzing Bacterial Pathogenesis at Level of Proteome	211
	<i>Phillip Cash</i>	
14.	Unraveling <i>Edwardsiella tarda</i> Pathogenesis Using the Proteomics Approach	237
	<i>P. S. Srinivasa Rao, Yuen Peng Tan, Jun Zheng, and Ka Yin Leung</i>	
15.	Structural Proteomics and Computational Analysis of a Deadly Pathogen: Combating <i>Mycobacterium tuberculosis</i> from Multiple Fronts	245
	<i>Michael Strong and Celia W. Goulding</i>	
16.	Proteomic Studies of Plant-Pathogenic Oomycetes and Fungi	271
	<i>Catherine R. Bruce, Pieter van West, and Laura J. Grenville-Briggs</i>	
17.	<i>Candida albicans</i> Biology and Pathogenicity: Insights from Proteomics	285
	<i>Aida Pitarch, César Nombela, and Concha Gil</i>	
18.	Contributions of Proteomics to Diagnosis, Treatment, and Prevention of Candidiasis	331
	<i>Aida Pitarch, César Nombela, and Concha Gil</i>	
19.	Identification of Protein Candidates for Developing Bacterial Ghost Vaccines against <i>Brucella</i>	363
	<i>Vito G. Delvecchio, Tim Alefantis, Rodolfo A. Ugalde, Diego Comerci, Maria Ines Marchesini, Akbar Khan, Werner Lubitz, and Cesar V. Mujer</i>	
20.	Genomics and Proteomics in Reverse Vaccines	379
	<i>Guido Grandi</i>	
PART V	PROTEOME DATABASES, BIOINFORMATICS, AND BIOCHEMICAL MODELING	395
21.	Databases and Resources for in silico Proteome Analysis	397
	<i>Manuela Pruess, Paul Kersey, Tamara Kulikova, and Rolf Apweiler</i>	

22. Interspecies and Intraspecies Comparison of Microbial Proteins: Learning about Gene Ancestry, Protein Function, and Species Life Style	415
<i>Bernard Labedan and Olivier Lespinet</i>	
23. Cellular Kinetic Modeling of the Microbial Metabolism	437
<i>Igor I. Goryanin, Galina V. Lebedeva, Ekaterina A. Mogilevskaya, Eugeny A. Metelkin, and Oleg V. Demin</i>
