# Stochastic Integration and Differential Equations

Second Edition, Version 2.1

Springer

---

# Contents

<b>Introduction .....</b>	<b>1</b>
<b>I Preliminaries .....</b>	<b>3</b>
1 Basic Definitions and Notation .....	3
2 Martingales .....	7
3 The Poisson Process and Brownian Motion .....	12
4 Lévy Processes .....	20
5 Why the Usual Hypotheses? .....	34
6 Local Martingales .....	37
7 Stieltjes Integration and Change of Variables .....	39
8 Naïve Stochastic Integration is Impossible .....	43
Bibliographic Notes .....	44
Exercises for Chapter I .....	45
<b>II Semimartingales and Stochastic Integrals .....</b>	<b>51</b>
1 Introduction to Semimartingales .....	51
2 Stability Properties of Semimartingales .....	52
3 Elementary Examples of Semimartingales .....	54
4 Stochastic Integrals .....	56
5 Properties of Stochastic Integrals .....	60
6 The Quadratic Variation of a Semimartingale .....	66
7 Itô's Formula (Change of Variables) .....	78
8 Applications of Itô's Formula .....	84
Bibliographic Notes .....	92
Exercises for Chapter II .....	94
<b>III Semimartingales and Decomposable Processes .....</b>	<b>101</b>
1 Introduction .....	101
2 The Classification of Stopping Times .....	104
3 The Doob-Meyer Decompositions .....	106
4 Quasimartingales .....	117

5	Compensators . . . . .	119
6	The Fundamental Theorem of Local Martingales . . . . .	126
7	Classical Semimartingales . . . . .	129
8	Girsanov's Theorem . . . . .	133
9	The Bichteler-Dellacherie Theorem . . . . .	146
	Bibliographic Notes . . . . .	149
	Exercises for Chapter III . . . . .	150
<b>IV</b>	<b>General Stochastic Integration and Local Times . . . . .</b>	<b>155</b>
1	Introduction . . . . .	155
2	Stochastic Integration for Predictable Integrands . . . . .	155
3	Martingale Representation . . . . .	180
4	Martingale Duality and the Jacod-Yor Theorem on Martingale Representation . . . . .	195
5	Examples of Martingale Representation . . . . .	203
6	Stochastic Integration Depending on a Parameter . . . . .	208
7	Local Times . . . . .	213
8	Azéma's Martingale . . . . .	232
9	Sigma Martingales . . . . .	237
	Bibliographic Notes . . . . .	240
	Exercises for Chapter IV . . . . .	241
<b>V</b>	<b>Stochastic Differential Equations . . . . .</b>	<b>249</b>
1	Introduction . . . . .	249
2	The $\underline{H}^p$ Norms for Semimartingales . . . . .	250
3	Existence and Uniqueness of Solutions . . . . .	255
4	Stability of Stochastic Differential Equations . . . . .	263
5	Fisk-Stratonovich Integrals and Differential Equations . . . . .	277
6	The Markov Nature of Solutions . . . . .	297
7	Flows of Stochastic Differential Equations: Continuity and Differentiability . . . . .	307
8	Flows as Diffeomorphisms: The Continuous Case . . . . .	317
9	General Stochastic Exponentials and Linear Equations . . . . .	328
10	Flows as Diffeomorphisms: The General Case . . . . .	335
11	Eclectic Useful Results on Stochastic Differential Equations . . . . .	345
	Bibliographic Notes . . . . .	354
	Exercises for Chapter V . . . . .	355
<b>VI</b>	<b>Expansion of Filtrations . . . . .</b>	<b>363</b>
1	Introduction . . . . .	363
2	Initial Expansions . . . . .	364
3	Progressive Expansions . . . . .	378
4	Time Reversal . . . . .	385
	Bibliographic Notes . . . . .	391
	Exercises for Chapter VI . . . . .	392
