Tools and Equipment	xvii

CHAPTER 1 Electricity **1**

Theory Lesson: Electricity	1
Theory Lesson: Series Circuits	6
Practical Competency 1 Wiring Three Loads (Light Bulbs) and a Switch in a Series Circuit	8
Practical Competency 2 Wiring Two Loads (Light Bulbs) in Series Using a Switch to Turn Them Off and On, Keeping a Third Light in the Circuit On Continuously	11
Theory Lesson: Parallel Circuits	14
Practical Competency 3 Wiring Three Loads (Light Bulbs) in a Parallel Circuit and Using a Single-Pole, Single-Throw Switch to Control the Circuit	16
Practical Competency 4 Wiring Three Loads (Light Bulbs) in Parallel Using a Single-Pole, Single-Throw Switch to Turn Two Light Bulbs Off and Leave One Light Bulb On All the Time	19
Theory Lesson: Series-Parallel Circuits	22
Practical Competency 5 Wiring a Series-Parallel Circuit with a Single-Pole, Single-Throw Switch Controlling the Total Circuit, Where Three Loads (Light Bulbs) Are Wired in Parallel and Three Loads (Light Bulbs) Are Wired in Series	23
Practical Competency 6 Wiring a Series-Parallel Circuit with a Single-Pole, Single-Throw Switch Controlling the Series Circuit, Where Three Loads (Light Bulbs) Are Wired in Parallel	27
Theory Lesson: Electrical Meters and Usage	30
Practical Competency 7 Using a Voltmeter to Measure Voltage and Record Voltage Drop in a Series Circuit	33
Practical Competency 8 Using a Voltmeter to Measure Voltage and Record Voltage Drop in a Parallel Circuit	36
Practical Competency 9 Using a Clamp-On Ammeter to Measure Current in a Series Circuit	39
Practical Competency 10 Using a Clamp-On Ammeter to Measure Amperage in a Parallel Circuit	43
Practical Competency 11 Taking an In-Line Amperage Reading with a VOM	46
Practical Competency 12 Checking the Resistance of a Series Circuit with an Ohmmeter	49
Practical Competency 13 Using a VOM or OHM Meter to Measure Resistance and Calculate Resistance in a Parallel Circuit	52

CHAPTER 2 Electrical Controls	55
Theory Lesson: Transformers	55
Practical Competency 14 Connect a Step-Down Transformer to a Two-Pole Relay Contactor	59
Practical Competency 15 Evaluating the Condition of a Transformer with an Ohmmeter	62
Practical Competency 16 Evaluating a Transformer's Primary and Secondary Voltages	64
Practical Competency 17 Measuring the Volt-Amperes of a Control Transformer	67
Theory Lesson: Relay Contactor and General-Purpose Relay	70
Practical Competency 18 Wiring a Relay Contactor into a Circuit	73
Practical Competency 19 Checking a Relay Contactor with a Voltmeter	77
Practical Competency 20 Checking a Relay Contactor with an Ohmmeter	80
Theory Lesson: General-Purpose Relays	83
Practical Competency 21 Using a General Purpose Relay to Control Two Loads in a Circuit	86
Theory Lesson: Current Starting Relays	91
Practical Competency 22 Wiring a Current Relay into a Fractional Horsepower Hermetic Compressor Circuit	95
Practical Competency 23 Checking the Performance of a Current Relay in a Motor Circuit	98
Theory Lesson: Positive Temperature Coefficient Start Devices	102
Practical Competency 24 Installing a PTC Device into a PSC Motor Circuit	104
Practical Competency 25 Testing a PTC Device In and Out of a Motor Circuit	108
Theory Lesson: Overloads	111
Practical Competency 26 Checking an External Line-Breaking Overload Protector	114
Practical Competency 27 Testing the Operation of a Two-Wire Compressor Overload Protector	117
Theory Lesson: High- and Low-Pressure Switches	120
Practical Competency 28 Checking Calibration and Switch Activation of an Adjustable Low-Pressure Control	126
Practical Competency 29 Checking Calibration and Switch Activation of an Adjustable High-Pressure Control	131
Practical Competency 30 Calculating and Setting Cut-in, Differential, and Cut-out Pressures for Low-Pressure Control Used for Low-Charge Protection	135
Practical Competency 31 Calculating and Setting Cut-in, Differential, and Cut-out Pressures for a High-Pressure Control	139
Practical Competency 32 Water-Cooled Condenser, High-Pressure Control Calculation and Settings	144
Theory Lesson: Oil Pressure Safety Switch	147
Practical Competency 33 Oil Pressure Safety Control Performance Check in an Operational System	150
Practical Competency 34 Checking the Differential Function of an Oil Pressure Safety Switch	153
Theory Lesson: Heating and Cooling Thermostats	157
Practical Competency 35 Wiring a Low-Voltage Single-Stage Heating and Single-Stage Cooling Thermostat	162
Practical Competency 36 Checking the Control Operation of a Single-Stage Heating and Cooling Thermostat	167

Practical Competency 37	Checking Internal Switching Functions of a Honeywell Heating and Cooling Thermostat	172
Theory Lesson: Capacitors		177
Practical Competency 38	Using an Ohmmeter to Check Run and Start Capacitors	180
CHAPTER 3	Refrigeration Fundamentals	185
Theory Lesson: ACR Tubing		185
Practical Competency 39	Using a Tube Cutter	188
Practical Competency 40	Swaging Copper Tubing	191
Practical Competency 41	Flaring Copper Tubing	194
Theory Lesson: Air-Acetylene		197
Practical Competency 42	Setting Up an Air-Acetylene Outfit	199
Theory Lesson: Oxyacetylene Outfits		203
Practical Competency 43	Setting Up an Oxyacetylene Outfit	207
Practical Competency 44	Lighting an Oxyacetylene Torch Outfit	212
Theory Lesson: Proper Soldering Techniques		215
Practical Competency 45	Proper Soldering and Brazing Techniques	217
Theory Lesson: The Vapor Compression Refrigeration Cycle		221
Practical Competency 46	Learning the Vapor Compression Refrigeration Cycle	234
Practical Competency 47	Interpreting a Pressure–Temperature Chart	238
Theory Lesson: Refrigeration Manifold Gages		242
Practical Competency 48	Calibrating the Gage Manifold	246
Practical Competency 49	Interrupting Refrigerant Gage Manifold Readings	249
Practical Competency 50	Learning Valve Stem Service Valve Operation	253
Practical Competency 51	Using Manifold Gages to Interpret Sealed System Pressures	258
Practical Competency 52	Using a System’s High-Side Pressure and Valve Stem Service Valves to Purge Air from the Manifold Gage	262
Practical Competency 53	Proper Procedures for Installing Manifold Gages and Purging Air from Hoses on a Sealed System Equipped with Schrader Valves	266
Theory Lesson: Refrigerant Recovery, Recycling, and Reclaim		270
Practical Competency 54	Recovering Refrigerant from a System with an Operating Compressor	278
Practical Competency 55	Active Method of Recovery – Recovering Refrigerant from a System with a Self-Contained Recovery Unit	284
Practical Competency 56	System-Dependent Recovery from a Small Appliance	289
Theory Lesson: Leak-Testing Refrigerant Sealed Systems		294
Practical Competency 57	Using Nitrogen and R-22 for Leak-Checking a CFC or HCFC Sealed System	298
Practical Competency 58	Using Nitrogen to Check for Leaks in an HFC Sealed System	302
Theory Lesson: Evacuation		305
Practical Competency 59	Draining and Replacing Vacuum Pump Oil	308
Practical Competency 60	Evacuating an Air Conditioning System	312
Practical Competency 61	Evacuating a Sealed System That Has Valve Stem Service Valves	316
Practical Competency 62	Multiple Evacuation of a Sealed System	321

Theory Lesson: Sealed System Charging with Azeotropic and Near-Azeotropic Refrigerants	326
Practical Competency 63 Measuring the Dry-Bulb and Wet-Bulb Temperature and Relative Humidity of Air Using a Sling Psychrometer	333
Practical Competency 64 Liquid Charging a Split System Air Conditioning Unit Using Charging Scales	337
Practical Competency 65 Liquid Charging Central Air Conditioning System With Near-Azeotropic–Zeotropic Refrigerant Blends (R-410A/Puron)	341
Practical Competency 66 Adjusting the Charge of a Central Air Conditioning System by Adding Refrigerant Vapor	347
Theory Lesson: Evaporators and Evaporator Superheat	351
Practical Competency 67 Measuring the Amount of Superheat on an Air Conditioner or Heat Pump Evaporator Coil	357
Practical Competency 68 Measuring the Amount of Evaporator Superheat of an Air Conditioning or Heat Pump System Under Different Load Conditions	361
Practical Competency 69 Checking an Evaporator for Flood-Back Using the Hand-Touch Method	365
Practical Competency 70 Evaluating Evaporator Efficiency	369
Theory Lesson: Superheat and Sub-cooling Calculations for Systems with Near-Azeotropic (Zeotropic) Refrigerant Blends	373
Practical Competency 71 Measuring Superheat of a Sealed System with a Near-Azeotropic (Zeotropic) Refrigerant Blend	377
Practical Competency 72 Using Manufacturer’s Charging Chart to Check or Charge an Air Conditioning or Heat Pump Unit	380
Practical Competency 73 Using the Sub-cool Method of Charging R-22 Air Conditioning or Heat Pump Equipment Supplied with a Thermostatic Expansion Device (TXV)	384
Theory Lesson: The “Big Question”—Charging and Checking the Charge of Air Conditioning and Heat Pump Equipment	388
Theory Lesson: Procedures for Using an R-22 Superheat/Sub-cooling Charging Calculator	389
Practical Competency 74 Charging an R-22 Air Conditioning or Heat Pump by Using a Superheat/Sub-cooling Calculator—Superheat Method	395
Practical Competency 75 Charging an R-22 Air Conditioning or Heat Pump by Using a Superheat/Sub-cooling Calculator—Sub-cool Method	398
Practical Competency 76 Checking for Proper Airflow Range of a Split-System Air Conditioner or Heat Pump Using a Charging Calculator	401
Theory Lesson: Procedures for Using an R-410A Superheat/Sub-cooling Charging Calculator . . .	403
Practical Competency 77 Charging an R-410A Air Conditioning or Heat Pump by Using a Superheat/Sub-cooling Calculator—Superheat Method	409
Practical Competency 78 Charging an R-410A Air Conditioning or Heat Pump by Using a Superheat/Sub-cooling Calculator—Sub-cool Method	413
Practical Competency 79 Checking for Proper Airflow Range of a Split-System Air Conditioner or Heat Pump Using an R-410A Charging Calculator	416
Theory Lesson: Charging Procedures in the Field	418
Practical Competency 80 Field Charging or Checking the Charge of an Air Conditioner or Heat Pump System with a Fixed-Bore Metering Device	422
Practical Competency 81 Field Charging or Checking the Charge of an Air Conditioner or Heat Pump System with a TXV Metering Device	427
Theory Lesson: Electric Motors	431
Theory Lesson: Air Conditioning and Heat Pump Compressors and Motor Troubleshooting	443
Practical Competency 82 Checking Split-Phase Compressor Motor Windings	454

Practical Competency 83	Identifying Common, Run, and Start Terminals of a Split-Phase Compressor Motor	458
Practical Competency 84	Checking a Compressor for Open Motor Windings	462
Practical Competency 85	Checking a Compressor for a Shorted Motor Winding	466
Practical Competency 86	Short-to-Ground Compressor Motor Test	470
Practical Competency 87	Checking the Windings of a Three-Phase Compressor	474
Practical Competency 88	Compressor Compression Ratio Test	478
Practical Competency 89	Reciprocating Compressor Vacuum Test (Atmosphere as Head Pressure)	483
Practical Competency 90	Closed-Loop Compressor Running Bench Test	487
Practical Competency 91	Closed-Loop Compressor Running Field Test	493
Practical Competency 92	Compressor Running Test in the System	498
Practical Competency 93	Cleaning a Dirty Sealed System	502
Practical Competency 94	Procedures for Checking for Noncondensables Within a Sealed System	507
Theory Lesson: Expansion Devices		510
Practical Competency 95	Evaluating the Operation of a Sealed System with a Capillary Tube Metering Device	517
Practical Competency 96	Adjusting the Superheat Setting on a TXV Metering Device	522
Theory Lesson: Condensers		525
Practical Competency 97	Measuring the Sub-cooling of an Air-Cooled Condenser	530
Practical Competency 98	Standard Efficiency Air-Cooled Condenser Performance Evaluation	534
Practical Competency 99	High-Efficiency Air-Cooled Condenser Performance Evaluation	538
Practical Competency 100	Water-Cooled Condenser Performance Evaluation	542
Practical Competency 101	Determining Correct Operating High-Side Pressure for Refrigeration Equipment with a Standard Air-Cooled Condenser	546
Practical Competency 102	Determining the Correct High-Side Pressure of Air Conditioning or Heat Pump Equipment with a High-Efficiency Air-Cooled Condenser	550
Practical Competency 103	Determining the Correct Operating High-Side Pressure for Equipment with a Water-Cooled Condenser	554
Practical Competency 104	Testing an Air Conditioner for Low Charge Before Installing Manifold Gages	558
Practical Competency 105	Using the Sweat Line Method to Adjust the Charge on a Window Air Conditioner	561
Practical Competency 106	Using Air Temperature Measurements to Check the Charge on a Window Air Conditioner	565
CHAPTER 4 Heat Pumps		569
Theory Lesson: Heat Pump Theory of Operation		569
Practical Competency 107	Checking a Four-Way (<i>Reversing Valve</i>) Valve Holding Coil	584
Practical Competency 108	Mechanical Performance Check of a Four-Way Valve	588
Practical Competency 109	Checking a Four-Way Valve for Leaking from System High Side to System Low Side	592
Theory Lesson: Heat Pumps Using Scroll Compressors		596
Practical Competency 110	Single-Phase Scroll Compressor Motor Winding and Overload Protector Evaluation	601

Practical Competency 111	Identifying Common, Run, and Start Terminals of a Split-Phase Scroll Compressor	605
Practical Competency 112	Three-Phase Scroll Compressor Evaluation	609
Theory Lesson: Sealed-System Pump Down		612
Practical Competency 113	Performing a Pump Down on a Split-System Heat Pump	613
Theory Lesson: Heat Pump Low-Voltage Thermostats		616
Practical Competency 114	Checking Internal Operation of a Heat Pump Thermostat (Voltage Checks)	626
Practical Competency 115	Checking Internal Operation of a Heat Pump Thermostat (Continuity Check)	634
Practical Competency 116	Troubleshooting Mechanical Defrost Timers	642
Practical Competency 117	Troubleshooting Solid-State Defrost Circuit Board and Temperature Sensor	646
Practical Competency 118	Checking Heat Pump Auxiliary Heat—Electric Heating Elements (Limit Switch, Fuse Link, Heating Element, Sequencer)	650
Practical Competency 119	Using Manufacturer's Charging Chart to Check or Charge a Heat Pump	658
Practical Competency 120	Using the Sub-cool Method of Charging R-22 Heat Pumps Equipped with a Thermostatic Expansion Device (TXV)	662
Practical Competency 121	Charging an R-22 Heat Pump by Using an R-22 Superheat/Sub-cooling Calculator—Superheat Method	666
Practical Competency 122	Charging an R-22 Heat Pump Equipped with a TXV Metering Device by Using an R-22 Superheat/Sub-cooling Calculator—Sub-cool Method	669
Practical Competency 123	Checking for Proper Airflow Range of a Split-System Heat Pump Using an Airflow Range Charging Calculator	672
Practical Competency 124	Charging an R-410A Heat Pump by Using an R-410A Superheat/Sub-cooling Calculator—Superheat Method	674
Practical Competency 125	Charging an R-410A Heat Pump Equipped with a TXV by Using an R-410A Superheat/Sub-cooling Calculator—Sub-cool Method	678
Practical Competency 126	Checking for Proper Airflow Range of a Split-System Heat Pump Using an R-410A Proper Airflow Range Charging Calculator	681
Practical Competency 127	Field Charging or Checking the Charge of a Heat Pump System with a Fixed-Bore Metering Device Operating in Low Ambient Temperatures	683
Practical Competency 128	Field Charging or Checking the Charge of a Heat Pump System with a TXV Metering Device Operating in Low Ambient Temperatures	689
Practical Competency 129	Determining Correct Operating High-Side Pressure for Heat Pump Equipment with a Standard Air-Cooled Condenser	694
Practical Competency 130	Determining the Correct High-Side Pressure of Heat Pump Equipment with a High-Efficiency Air-Cooled Condenser	699
CHAPTER 5	Oil Heat	703
Theory Lesson: Oil Heat		703
Theory Lesson: Oil Furnace Sequence of Operation		715
Practical Competency 131	Oil Burner Motor Evaluation	719
Theory Lesson: Fuel Oil Pumps		723
Practical Competency 132	Checking and Adjust the Oil Pump's Discharge Pressure	727
Practical Competency 133	Oil Pump Standing Pressure Test	731
Practical Competency 134	Oil Pump Vacuum Test	734
Practical Competency 135	Bleeding a One-Pipe System	739

Practical Competency 136	Ignition Transformer (Screwdriver Method)	742
Practical Competency 137	Checking and Setting the Electrodes of an Oil Burner	745
Theory Lesson: Operation of Cad Cell Oil Primary Controls		749
Practical Competency 138	Wiring a Primary Control into an Oil Burner Assembly	751
Practical Competency 139	Cad Cell Primary Control Check Out	754
Practical Competency 140	Checking Low-Voltage Output of Cad Cell Primary Control	758
Theory Lesson: Fan and Limit Safety Switch		760
Practical Competency 141	Checking a Fan Limit Switch on a Fossil Fuel Furnace	765
Practical Competency 142	Setting and Checking a Fan Limit Temperature Switch	770
Theory Lesson: Stacked-Mounted Safety Control		774
Practical Competency 143	Checking the Operational Components of a Stack Switch Safety Control	777
Practical Competency 144	Measuring and Setting the Heat Anticipator	780
Theory Lesson: Smoke in Fossil Fuel Combustion		784
Practical Competency 145	Performing a Smoke Test on Fossil Fuel Equipment	787
Practical Competency 146	Overfire Draft Test	790
Practical Competency 147	Performing a Stack Draft or Breech Test on Fossil Fuel Equipment	795
Practical Competency 148	Determining Net-Stack Temperature on Fossil Fuel Equipment	798
Practical Competency 149	Performing a Carbon Dioxide (CO ₂) Test on Fossil Fuel Equipment	801
Practical Competency 150	Complete Combustion Test on Fossil Fuel Equipment	805

CHAPTER 6 Gas Heat 809

Theory Lesson: Gas Heat		809
Practical Competency 151	Threading Steel Pipe	835
Practical Competency 152	Standing Pilot Ignition Procedures	842
Practical Competency 153	Pilot Flame Adjustment—Standing Pilot Ignition System	845
Practical Competency 154	Checking a Thermocouple	847
Practical Competency 155	Checking for Correct Electrical Polarity	851
Practical Competency 156	Checking the Igniter of an HSI Ignition System	854
Practical Competency 157	Checking a Flame Sensing Rod	857
Practical Competency 158	Checking Draft or Combustion Blower Pressure Switch	860
Practical Competency 159	Checking a Furnace High-Limit Switch	865
Practical Competency 160	Checking the Draft Induced or Combustion Blower Motor	868
Practical Competency 161	Checking a Gas Valve	870
Practical Competency 162	Checking a Smart Valve Control System	873
Practical Competency 163	Checking and Adjusting Manifold Gas Pressure	877
Practical Competency 164	Checking Proper Airflow Using the Temperature Rise Method	879
