FedoraTM 5 and Red Hat Enterprise Linux 4

BONUS DVD

Includes the complete Fedora Core 5
installation packages!

TWO BONUS CD-ROMs

CD 1 includes Fedora Live CD that doubles
as a Fedora network install CD

CD 2 includes hundreds of popular
Fedora Extras software packages

Bible

Technical review by Eric Foster-Johnson

Contents

Part I: Getting Started in Fedora and RHEL

Chapter 1: An Overview of Fedora and Red Hat Enterprise Linux3

Introducing Fedora Core 5 and Red Hat Enterprise Linux 4	4
What Is Linux?	5
Linux's Roots in UNIX.....	6
Common Linux Features	8
Primary Advantages of Linux.....	10
What Are Red Hat Enterprise Linux and Fedora?	11
Why Choose Fedora or Red Hat Enterprise Linux?.....	15
New Features in Fedora Core 5	17
The Culture of Free Software	20

Chapter 2: Installing Fedora 23

Quick Installation.....	23
Detailed Installation Instructions	26
Special Installation Procedures	45
Special Installation Topics.....	58
Troubleshooting Installation	82

Chapter 3: Getting Started with the Desktop85

Logging in to Fedora or RHEL	86
Getting Familiar with the Desktop.....	88
Using the GNOME Desktop	97
Switching Desktop Environments.....	112
Using the KDE Desktop	112
Troubleshooting Your Desktop.....	130

Chapter 4: Using Linux Commands 137

The Shell Interface.....	137
Understanding the Linux Shell	142
Using the Shell in Linux	143
Working with the Linux File System.....	164
Using the vi Text Editor.....	173

Part II: Using Fedora and RHEL

Chapter 5: Accessing and Running Applications 181

Getting and Installing Software Packages	182
--	-----

Managing RPM Packages	196
Using Fedora or RHEL to Run Applications	214
Running Microsoft Windows, DOS, and Macintosh Applications	223
Chapter 6: Publishing with Fedora and RHEL	235
Using OpenOffice.org	236
Other Word Processors	238
Using Traditional Linux Publishing Tools	242
Creating Documents in Groff or LaTeX	242
Printing Documents with Fedora and RHEL	262
Displaying PDF files with Adobe Acrobat Reader	264
Working with Graphics	265
Using Scanners Driven by SANE	269
Chapter 7: Gaming in Fedora and RHEL	271
Basic Linux Gaming Information	272
Running X Window Games	274
Commercial Linux Games	286
Chapter 8: Music, Video, and Images in Linux	297
Understanding Multimedia and Legal Issues in Linux	297
Listening to Music in Linux	298
Viewing TV and Webcams	326
Playing Video	333
Using a Digital Camera	342
Chapter 9: Using the Internet and the Web	345
Overview of Internet Applications and Commands	345
Browsing the Web	348
Communicating with E-mail	372
Participating in Newsgroups	383
Instant Messaging with Gaim	386
Sharing Files with Bittorrent	388
Using Remote Login, Copy, and Execution	389
Part III: Administering Fedora and RHEL	
Chapter 10: Understanding System Administration	405
Using the root user account	406
Becoming Super User (The su Command)	406
Learning about Administrative GUI Tools, Commands, Configuration Files, and Log Files	408
Administering Your Linux System	421
Configuring Hardware	421

Managing File Systems and Disk Space	425
Monitoring System Performance	443
Choosing Software Alternatives	447
Using Security Enhanced Linux	449
Understanding Security Enhanced Linux	450
Using SELinux in Fedora and RHEL	452
Learning More about SELinux	457
Chapter 11: Setting Up and Supporting Users	459
Creating User Accounts	459
Setting User Defaults	467
Creating Portable Desktops	474
Providing Support to Users	476
Modifying Accounts	477
Deleting User Accounts	480
Checking Disk Quotas	482
Sending Mail to All Users	488
Chapter 12: Automating System Tasks	491
Understanding Shell Scripts	491
System Initialization	505
System Startup and Shutdown	510
Scheduling System Tasks	522
Chapter 13: Backing Up and Restoring Files	529
Doing a Simple Backup with rsync	530
Choosing Backup Tools	533
Selecting a Backup Strategy	533
Selecting a Backup Medium	535
Backing Up to a Hard Drive	543
Backing Up Files with dump	544
Automating Backups with cron	547
Restoring Backed-Up Files	549
Configuring Amanda for Network Backups	553
Using the pax Archiving Tool	560
Chapter 14: Computer Security Issues	565
Linux Security Checklist	565
Using Password Protection	568
Securing Linux with iptables Firewalls	571
Controlling Access to Services with TCP Wrappers	586
Checking Log Files	589

Using the Secure Shell Package	596
Securing Linux Servers	599

Part IV: Fedora and RHEL Network and Server Setup

Chapter 15: Setting Up a Local Area Network 623

Understanding Local Area Networks	623
Setting Up a Wireless LAN	634
Understanding Internet Protocol Addresses	649
Troubleshooting Your LAN	654

Chapter 16: Connecting to the Internet 667

Understanding How the Internet Is Structured	668
Using Dial-up Connections to the Internet	673
Connecting Your LAN to the Internet	685
Setting Up Linux as a Router	686
Configuring a Virtual Private Network Connection	691
Setting Up Linux as a Proxy Server	694
Setting Up Proxy Clients	703

Chapter 17: Setting Up a Print Server 709

Common UNIX Printing Service	709
Setting Up Printers	710
Using Printing Commands	726
Configuring Print Servers	728

Chapter 18: Setting Up a File Server 733

Goals of Setting Up a File Server	733
Setting Up an NFS File Server	734
Setting Up a Samba File Server	749

Chapter 19: Setting Up a Mail Server 773

Introducing SMTP and sendmail	774
Installing and Running sendmail	774
Configuring sendmail	778
Introducing Postfix	790
Stopping Spam with SpamAssassin	792
Getting Mail from the Server (POP3 or IMAP)	795
Getting Mail from Your Browser with SquirrelMail	797
Administering a Mailing List with mailman	799

Chapter 20: Setting Up an FTP Server	803
Understanding FTP Servers	803
Using the Very Secure FTP Server	805
Getting More Information about FTP Servers	812
Chapter 21: Setting Up a Web Server	813
Introduction to Web Servers	814
Quick Starting the Apache Web Server	817
Configuring the Apache Server	819
Starting and Stopping the Server	856
Monitoring Server Activities	858
Chapter 22: Setting Up an LDAP Address Book Server	865
Understanding LDAP	866
Setting Up the OpenLDAP Server	869
Setting Up the Address Book	872
More ways to configure LDAP	877
Accessing an LDAP Address Book from Evolution	878
Chapter 23: Setting Up Boot Servers: DHCP and NIS	881
Using Dynamic Host Configuration Protocol	882
Setting Up a DHCP Server	882
Setting Up a DHCP Client	891
Understanding Network Information Service	892
Setting Up Fedora or RHEL as an NIS Client	894
Setting Up Fedora or RHEL as an NIS Master Server	898
Setting Up Fedora or RHEL as an NIS Slave Server	902
Chapter 24: Setting Up a MySQL Database Server	905
Finding MySQL Packages	906
Getting MySQL Extras Packages	907
Configuring the MySQL Server	908
Starting the MySQL Server	915
Checking That MySQL Server Is Working	916
Working with MySQL Databases	917
Understanding MySQL Tables	923
Displaying MySQL Databases	928
Making Changes to Tables and Records	931
Adding and Removing User Access	933
Backing Up Databases	935
Checking and Fixing Databases	936

Chapter 25: Making Servers Public with DNS.....	939
Determining Goals for Your Server	940
Connecting a Public Server.....	941
Configuring Your Public Server	946
Setting Up a Domain Name System Server	949
Getting More Information about BIND	964
Chapter 26: Using Linux Servers from a Mac	967
Looking Inside Mac OS X	967
Using Network Services from Mac OS X.....	968
Configuring an AppleTalk Server in Linux	973
Accessing NFS Servers from the Mac	987
Appendix A: About the Media	991
Fedora Core Source Code	992
Fedora Rescue CD	992
Appendix B: Running Network Services	995
Checklist for Running Networking Services.....	995
Networking Service Daemons.....	996
Choosing Alternatives.....	999
Referencing Network Services.....	1000
Appendix C: Red Hat Enterprise Linux 4 Features	1015
What's in RHEL4?.....	1015
Choosing an RHEL System	1016
Getting RHEL Evaluation Subscriptions	1017
Hardware Compatibility and Commercial Software	1018
Training and Certification.....	1018
Documentation and Support.....	1019
Managing RHEL Systems.....	1019
More Information on RHEL	1022
Index	1023
