# SYSTEMS ENGINEERING AND ANALYSIS

FOURTH EDITION

Benjamin S. Blanchard  
Wolter J. Fabrycky

PRENTICE HALL INTERNATIONAL SERIES IN  
INDUSTRIAL AND SYSTEMS ENGINEERING

W. J. FABRYCKY and J. H. MIZE, editors

# Contents

<b>Preface</b>	<b>xi</b>
<b>Part I Introduction to Systems</b>	<b>1</b>
<b>Chapter 1 System Science and Engineering</b>	<b>2</b>
1.1 System Definitions and Elements	3
1.2 A Classification of Systems	6
1.3 Science and System Science	8
1.4 Technology and Technical Systems	11
1.5 Transition to the Systems Age	14
1.6 Systems Engineering	17
1.7 Summary and Extensions	19
Questions and Problems	21
<b>Chapter 2 Bringing Systems Into Being</b>	<b>22</b>
2.1 The Engineered System	23
2.2 System Life-Cycle Engineering	26
2.3 The Systems Engineering Process	30
2.4 System Design Considerations	32
2.5 System Synthesis, Analysis, and Evaluation	38
2.6 Implementing Systems Engineering	44
2.7 A Generic System Example	49
2.8 Summary and Extensions	50
Questions and Problems	51
<b>Part II The System Design Process</b>	<b>53</b>
<b>Chapter 3 Conceptual System Design</b>	<b>54</b>
3.1 Problem Definition and Need Identification	55
3.2 Advanced System Planning	56
3.3 System Feasibility Analysis	58
3.4 System Operational Requirements	59
3.5 Maintenance and Support Concept	69

3.6	Technical Performance Measures	75
3.7	Functional Analysis and Allocation	78
3.8	System Trade-off Analyses	86
3.9	System Specification	86
3.10	Conceptual Design Review	89
3.11	Summary and Extensions	90
	Questions and Problems	91
<b>Chapter 4</b>	<b>Preliminary System Design</b>	<b>93</b>
4.1	Subsystem Design Requirements	94
4.2	Development, Product, Process, and Material Specifications	94
4.3	Functional Analysis and Allocation (Subsystem)	96
4.4	Detailed Design Requirements	103
4.5	Engineering Design Tools and Technologies	107
4.6	Trade-off Studies and Design Definition	111
4.7	Design Review, Evaluation, and Feedback	111
4.8	Summary and Extensions	116
	Questions and Problems	117
<b>Chapter 5</b>	<b>Detail Design and Development</b>	<b>119</b>
5.1	Detail Design Requirements	120
5.2	Design Engineering Activities	121
5.3	Integrating System Elements and Activities	123
5.4	Design Tools and AIDS	126
5.5	Design Data, Information, and Integration	128
5.6	Development of Engineering Models	130
5.7	System Prototype Development	133
5.8	Design Review, Evaluation, and Feedback	133
5.9	Incorporation of Design Changes	137
5.10	Summary and Extensions	138
	Questions and Problems	140
<b>Chapter 6</b>	<b>System Test, Evaluation, and Validation</b>	<b>142</b>
6.1	Requirements for System Test, Evaluation, and Validation	143
6.2	Categories of System Test and Evaluation	146
6.3	Planning for System Test and Evaluation	149
6.4	Preparation for System Test and Evaluation	152
6.5	Conducting System Test, Data Collection, and Test Reporting	154
6.6	System Modifications	155
6.7	Summary and Extensions	158
	Questions and Problems	159
<b>Part III</b>	<b>Systems Analysis and Design Evaluation</b>	<b>161</b>
<b>Chapter 7</b>	<b>Alternatives and Models in Decision Making</b>	<b>162</b>
7.1	Alternatives in Decision Making	163
7.2	Models in Decision Making	164
7.3	Decision Evaluation Theory	169

7.4	Decisions Involving Multiple Criteria	173
7.5	The Decision Evaluation Display	180
7.6	Decisions Under Risk and Uncertainty	182
7.7	Summary and Extensions	192
	Questions and Problems	194
<b>Chapter 8</b>	<b>Models For Economic Evaluation</b>	<b>199</b>
8.1	Interest and Interest Formulas	200
8.2	Determining Economic Equivalence	205
8.3	Evaluating a Single Alternative	209
8.4	Evaluating Multiple Alternatives	217
8.5	Evaluation Involving Multiple Criteria	219
8.6	Multiple Alternatives with Multiple Futures	221
8.7	Break-Even Economic Evaluations	224
8.8	Break-Even Evaluation Under Risk	230
8.9	Summary and Extensions	231
	Questions and Problems	232
<b>Chapter 9</b>	<b>Optimization in Design and Operations</b>	<b>236</b>
9.1	Classical Optimization Theory	237
9.2	Unconstrained Classical Optimization	244
9.3	Constrained Classical Optimization	266
9.4	Optimization Involving Multiple Criteria	271
9.5	Constrained Optimization by Linear Programming	273
9.6	Summary and Extensions	282
	Questions and Problems	284
<b>Chapter 10</b>	<b>Queuing Theory and Analysis</b>	<b>289</b>
10.1	The Queuing System	290
10.2	Monte Carlo Analysis of Queuing	293
10.3	Single-Channel Queuing Models	297
10.4	Multiple-Channel Queuing Models	307
10.5	Queuing with Nonexponential Service	309
10.6	Finite Population Queuing Models	312
10.7	Summary and Extensions	320
	Questions and Problems	322
<b>Chapter 11</b>	<b>Control Concepts and Methods</b>	<b>325</b>
11.1	Some Basic Control Concepts	326
11.2	Statistical Process Control	328
11.3	Optimum Policy Control	340
11.4	Project Control with CPM and PERT	343
11.5	Total Quality Control Methods	354
11.6	Summary and Extensions	360
	Questions and Problems	361

<b>Part IV Design for Operational Feasibility</b>	<b>367</b>
<b>Chapter 12 Design for Reliability</b>	<b>369</b>
12.1 Definition and Explanation of Reliability	370
12.2 Measures of Reliability	371
12.3 Reliability in the System Life Cycle	382
12.4 Reliability Analysis Methods	394
12.5 Reliability Test and Evaluation	405
12.6 Summary and Extensions	413
Questions and Problems	414
<b>Chapter 13 Design for Maintainability</b>	<b>418</b>
13.1 Definition and Explanation of Maintainability	419
13.2 Measures of Maintainability	420
13.3 Availability and Effectiveness Measures	434
13.4 Maintainability in the System Life Cycle	437
13.5 Maintainability Analysis Methods	445
13.6 Maintainability Demonstration	467
13.7 Summary and Extensions	474
Questions and Problems	475
<b>Chapter 14 Design For Usability (Human Factors)</b>	<b>479</b>
14.1 Definition and Explanation of Human Factors	480
14.2 The Measures of Human Factors	493
14.3 Human Factors in the System Life Cycle	494
14.4 Human Factors Analysis Methods	499
14.5 Personnel and Training Requirements	505
14.6 Personnel Test and Evaluation	507
14.7 Summary and Extensions	507
Questions and Problems	508
<b>Chapter 15 Design for Supportability (Serviceability)</b>	<b>510</b>
15.1 Definition and Explanation of Logistics and Supportability	511
15.2 The Elements of Logistics and System Support	516
15.3 The Measures of Logistics and Supportability	519
15.4 Logistics and Maintenance Support in the System Life Cycle	538
15.5 Supportability Analysis	545
15.6 Supportability Test and Evaluation	547
15.7 Summary and Extensions	550
Questions and Problems	552
<b>Chapter 16 Design for Producibility and Disposability</b>	<b>554</b>
16.1 Introduction to Producibility and Disposability	555
16.2 Producibility and Disposability in the System Life Cycle	558
16.3 Design for Producibility and Manufacturability	562
16.4 Modeling Manufacturing Progress	566
16.5 Design for Disposability	570

16.6	A Life Cycle Value-Cost Diagram	572
16.7	Summary and Extensions	574
	Questions and Problems	577
<b>Chapter 17</b>	<b>Design for Affordability (Life-cycle Costing)</b>	<b>578</b>
17.1	Introduction to Life-Cycle Costing	579
17.2	Cost Considerations in the System Life Cycle	582
17.3	The Generic Life-Cycle Costing Process	587
17.4	Life-Cycle Costing by Money-Flow Modeling	606
17.5	Life-Cycle Costing by Economic Optimization	632
17.6	Applications and Benefits of Life-Cycle Costing	645
17.7	Summary and Extensions	647
	Questions and Problems	649
<b>Part V</b>	<b>Systems Engineering Management</b>	<b>657</b>
<b>Chapter 18</b>	<b>Systems Engineering Planning and Organization</b>	<b>659</b>
18.1	Systems Engineering Program Planning	660
18.2	Systems Engineering Management Plan (SEMP)	660
18.3	Organization for Systems Engineering	678
18.4	Summary and Extensions	691
	Questions and Problems	692
<b>Chapter 19</b>	<b>Program Management, Control, and Evaluation</b>	<b>694</b>
19.1	Organizational Goals and Objectives	695
19.2	Outsourcing and the Identification of Suppliers	696
19.3	Program Leadership and Direction	698
19.4	Program Evaluation and Feedback	701
19.5	Risk Management	710
19.6	Summary and Extensions	712
	Questions and Problems	713
<b>Part VI</b>	<b>Appendices</b>	<b>715</b>
<b>Appendix A</b>	<b>Functional Analysis</b>	<b>716</b>
A.1	Functional Flow Block Diagrams	716
A.2	Some Examples of Application	718
<b>Appendix B</b>	<b>Design and Management Checklists</b>	<b>726</b>
B.1	Design Review Checklist	727
B.2	Management Review Checklist	728
<b>Appendix C</b>	<b>Probability Theory and Analysis</b>	<b>732</b>
C.1	Probability Concepts and Theory	732
C.2	Probability Distribution Models	735
C.3	Monte Carlo Analysis	744

<b>Appendix D Probability and Statistical Tables</b>	<b>747</b>
Table D.1 Random Rectangular Variates	747
Table D.2 Cumulative Poisson Probabilities	747
Table D.3 Cumulative Normal Probabilities	747
<b>Appendix E Interest Factor Tables</b>	<b>755</b>
Tables E.1 to E.10 Interest Factors for Annual Compounding	755
<b>Appendix F Finite Queuing Tables</b>	<b>766</b>
Tables F.1 to F.3 Finite Queuing Factors	766
<b>Appendix G Selected Bibliography</b>	<b>774</b>
G.1 Systems, Systems Analysis, and Systems Engineering	774
G.2 Concurrent and Simultaneous Engineering	776
G.3 Software and Computer-Aided Systems	776
G.4 Reliability Engineering	777
G.5 Maintainability Engineering and Maintenance	777
G.6 Human Factors and Safety Engineering	778
G.7 Production, Manufacturing, Quality Control and Assurance	778
G.8 Logistics, Supply Chain Management, and Supportability	780
G.9 Operations Research and Operations Management	781
G.10 Engineering Economy and Life-Cycle Cost Analysis	781
G.11 Management and Supporting Areas	782
<b>Appendix H Selected Web Sites</b>	<b>783</b>
<b>Index</b>	<b>788</b>
