

# CONTENTS

Preface .....	I
<b>1. Introduction .....</b>	<b>1</b>
1.1 Matched Filter .....	1
1.2 Automatic Target Recognition .....	3
1.3 Organization of the Book .....	5
References .....	7
<b>2. Linear System Fundamentals .....</b>	<b>9</b>
2.1 Linear Space-Invariant Systems .....	10
2.2 Convolution Operation .....	13
2.3 Correlation Operation .....	19

References .....	29
Problems .....	30
<b>3. Coherent Optical Systems .....</b>	<b>33</b>
3.1 Diffraction Theory .....	34
3.2 Phase Transformation by a Thin Lens .....	38
3.3 Optical Fourier Transform .....	39
3.4 Optical Correlation System .....	42
3.5 Matched Spatial Filter .....	44
3.6 Measures of Correlation Performance .....	46
3.7 Spatial Light Modulators .....	49
References .....	56
Problems .....	58
<b>4. VanderLugt Correlation .....</b>	<b>61</b>
4.1 Synthesis of the VanderLugt Filters .....	62
4.1.1 Spatial-Multiplexed Filter .....	66
4.1.2 Angular-Multiplexed Filter .....	66
4.2 Target Detections .....	72
4.3 Characteristics of the VLC .....	74
4.3.1 Correlation Output .....	74

4.3.2 Bandwidth Requirement .....	75
4.3.3 Correlation Degradations .....	76
4.4. Applications of the VLC .....	77
4.4.1 Character Recognition .....	78
4.4.2 Associative Memory .....	80
4.4.3 Characterization of Microscopic Objects .....	86
4.4.4 Internet Protocol Address Recognition .....	89
4.5 Real-time Implementations .....	97
References .....	101
Problems .....	105
<b>5. Joint Transform Correlation .....</b>	<b>107</b>
5.1 Synthesis of Complex Spatial Filter .....	108
5.2 Target Detections .....	111
5.3 Characteristics of the JTC .....	112
5.3.1 Correlation Output .....	114
5.3.2 Bandwidth Requirement .....	115
5.3.3 Correlation Degradations .....	117
5.4 Real-Time Implementations .....	117
5.4.1 All-Optical Architecture .....	119
5.4.2 Hybrid Architecture .....	124

5.4.3 Hybrid Architecture Using Compressed References .....	131
5.5 Applications of the JTC .....	134
5.5.1 Motion Detection .....	134
5.5.2 Speckle Metrology and Particle Velocimetry .....	139
5.5.3 Biometric Recognition Using Compressed References .....	147
References .....	161
Problems .....	166
<b>6. Wavelet Transform Correlation .....</b>	<b>167</b>
6.1 Wavelet Transform .....	168
6.2 Wavelet Transform Correlation .....	173
6.3 Optical Implementations .....	177
6.3.1 Wavelet-Based VLC .....	178
6.3.2 Wavelet Based JTC .....	179
6.4 Applications of the WTC .....	182
6.4.1 Associative Memory .....	182
6.4.2 Speckle Metrology and Particle Velocimetry .....	184
6.4.3 Holographic Particle Sizing .....	187
References .....	189

Problems .....	192
<b>A. Fourier Transform .....</b>	<b>193</b>
<b>B. Dirac Delta Function .....</b>	<b>197</b>
<b>C. JPEG Image Compression .....</b>	<b>201</b>
<b>Index .....</b>	<b>207</b>
