

Principles *of* Toxicology

Second Edition

Karen E. Stine
Thomas M. Brown

Taylor & Francis
Taylor & Francis Group

Contents

1 Measuring Toxicity and Assessing Risk	1
Introduction	1
Chemistry of Toxicants	1
Toxicity Testing Methods.....	2
Factors to Be Considered in Planning Toxicity Testing.....	2
Routes of Exposure	3
Determining the Responses to Varying Doses of a Substance.....	3
Timing of Exposure.....	4
The LD ₅₀ Experiment.....	5
Testing	5
Analysis.....	6
Alternative Tests	7
Categories of Toxicity	9
Mixtures.....	9
Toxicity, Hazard, and Risk	10
Toxicity and Hazard	10
The Role of Laboratory Testing in Estimation of Hazard	10
Epidemiological Data	11
Risk Assessment and Risk Management.....	12
References.....	13
2 Toxicokinetics	15
Introduction	15
Pharmacokinetics and Toxicokinetics	15
Absorption	16
The Oral Route of Absorption	17
Respiratory Route of Absorption	18
Dermal Route of Absorption.....	18
Distribution.....	18
Elimination.....	19
Toxicokinetic Models.....	20
Mathematical Models of Elimination	20
Absorption and Bioavailability.....	23
Contrasting Kinetics of Lipophilic Substances	24
References.....	26
3 Biotransformation	27
Introduction	27

Primary Biotransformation (Phase I Reactions): Hydrolysis	28
Serine Hydrolases	29
Primary Biotransformation (Phase I Reactions): Oxidation	33
The Role of Cytochrome P450.....	33
Other Enzymes Carrying Out Oxidation.....	40
Primary Biotransformation (Phase I Reactions): Reduction.....	41
Secondary Metabolism (Phase II Reactions)	41
Glucuronidation	42
Glutathione Conjugation.....	44
Acetylation and Other Phase II Reactions	46
Factors That Influence Metabolism.....	47
References.....	47
4 Cellular Sites of Action	49
Introduction	49
Interaction of Toxicants with Proteins.....	49
Effects of Toxicants on Enzymes	51
Effects of Toxicants on Receptors and Ion Channels	57
Effects of Toxicants on Voltage-Activated Ion Channels.....	62
Effects of Toxicants on Transport Proteins.....	63
Effects of Toxicants on Lipids.....	64
Effects of Toxicants on Nucleic Acids	66
Mechanisms of Cell Death	67
Apoptosis.....	67
Necrosis.....	68
Stress, Repair, and Recovery	69
Case Study: Cyclooxygenase Inhibitors.....	70
References.....	72
5 Genomics and New Genetics in Toxicology.....	75
Introduction	75
The Human Genome Project.....	75
Model Organisms and Comparative Genomics.....	76
Toxicogenomics	79
Monitoring Transcription: Gene Expression and	
Microarrays	79
Other Roles for RNA	83
SNPs	84
Metabolomics.....	86
Personalized Susceptibility and Tailored Therapeutics.....	87
Race, Ethics, and Genomics	90
Systems Toxicology.....	92
Case Study: Using GenBank and Online Tools in Genomics.....	92
References.....	95

6	Carcinogenesis	97
	Cancer	97
	The Epidemiology of Cancer	97
	Environmental Factors in Cancer	98
	Genetic Factors in Cancer	99
	Carcinogenesis.....	99
	The Mutational Theory of Carcinogenesis.....	99
	Competing Theories.....	100
	Chemical Carcinogens.....	100
	Genetic Carcinogens	101
	Consequences of Mutagenesis	103
	Epigenetic Carcinogens and Promotion	103
	Oncogenes and Tumor Suppressor Genes.....	105
	The Discovery of Oncogenes.....	105
	An Example of an Oncogene: The Philadelphia Chromosome	106
	The Role of Protooncogenes in Cell Function.....	106
	Examples of Protooncogenes.....	107
	Tumor Suppressor Genes.....	108
	Protection against the Development of Cancer.....	110
	Testing Compounds for Carcinogenicity	110
	Critiques of Strategies in Cancer Research.....	112
	Carcinogenesis: A Complex Process.....	112
	Case Study: Predicting Carcinogenesis Based upon Chemistry (QSAR).....	113
	References.....	115
7	Reproductive Toxicology and Teratology	117
	Introduction	117
	Basic Processes in Reproduction and Development: Cell Division	117
	The Cell Cycle and Mitosis	117
	Meiosis	120
	Cloning.....	122
	The Male Reproductive System	123
	The Female Reproductive System.....	124
	The Effects of Toxicants on the Male and Female Reproductive Systems.....	125
	Protective Mechanisms: The Blood-Testis Barrier.....	125
	Interference with Cell Division.....	126
	Cytotoxicity and Infertility	126
	Interference with Hormonal Controls	127
	The Process of Development	129
	Embryogenesis and Developmental Genetics.....	131
	Effects of Toxicants on Development: Teratogens and Teratogenesis	133
	Effects of Dose or Exposure Level on Teratogenicity	133

Effects of Timing of Exposure on Teratogenicity.....	134
Examples of Teratogens	134
Mechanisms of Teratogenicity.....	136
Testing for Reproductive and Developmental Toxicity.....	137
Human Assessment	137
Testing of Laboratory Animals: General Principles	137
<i>In Vitro</i> Testing.....	138
Established Procedures for Testing	138
Case Study: Thalidomide	139
References.....	141

8 Respiratory Toxicology.....	143
Function of the Respiratory System	143
Anatomy and Physiology of the Respiratory System	143
Respiratory Anatomy	143
Pulmonary Ventilation.....	146
Gas Exchange.....	147
Control of Respiration.....	149
Effects of Toxicants on the Respiratory System: General Principles.....	150
Defense Mechanisms of the Respiratory System	150
Exposure to Respiratory Toxicants	151
Measuring Exposure Levels	151
Deposition of Gases	152
Deposition of Particulates.....	152
Immediate Responses to Respiratory Toxicants	153
Free Radical-Induced Damage.....	153
The Irritant Response	154
Involvement of the Immune System	154
Immediate Responses: Upper Airway Effects.....	154
Immediate Responses: Lower Airway Effects.....	155
Delayed and Cumulative Responses to Respiratory Toxicants	155
Asthma and Immune-Related Chronic Conditions.....	156
Chronic Obstructive Pulmonary Disease: Bronchitis and Emphysema	156
Fibrosis and Pneumoconioses	157
Lung Cancer.....	158
Inhalation Studies	160
References.....	160

9 Cardiovascular Toxicology.....	163
Function of the Cardiovascular System.....	163
Anatomy and Physiology of the Heart.....	163
Effects of Toxicants on the Heart.....	166
Arrhythmias.....	166

Cardiomyopathies and Other Effects on Cardiac Muscle.....	168
Myocardial Infarctions	169
The Vascular System	170
Effects of Toxicants on the Vascular System	172
Atherosclerosis.....	172
Vascular Spasms and Blood Pressure	173
The Blood	174
Effects of Toxicants on the Blood.....	175
Anemias, Hemolysis, and Related Disorders.....	175
Effects of Toxicants on Hemoglobin	177
References.....	178
10 Neurotoxicology	181
Function of the Nervous System.....	181
Anatomy and Physiology of the Nervous System.....	181
Effects of Toxicants on the Nervous System: General Principles.....	183
The Blood-Brain Barrier.....	184
Effects of Toxicants on the Nervous System: General Categories	185
Effects of Toxicants on Electrical Conduction.....	186
Effects of Toxicants on Synaptic Function	190
Acetylcholine.....	192
Biogenic Amines.....	196
Amino Acid Neurotransmitters	199
Neuroactive Peptides.....	200
Axonopathies.....	201
Axon Transport Systems	201
Proximal Axonopathies	203
Distal Axonopathies.....	203
Myelinopathies	205
Effects of Toxicants Directly on Neurons	207
Excitotoxicity.....	208
Other Cytotoxic Compounds	210
Other Neurotoxicants.....	211
Effects on Special Sensory Organs.....	212
Developmental Effects	212
Methods in Neurotoxicology	213
Case Study: Botulinum Toxin.....	215
References.....	217
11 Hepatic Toxicology.....	219
Anatomy and Physiology of the Liver.....	219
Liver Structure.....	219
Function of the Liver.....	221
Types of Toxicant-Induced Liver Injury.....	223
Fatty Liver	223

Liver Cell Death: Necrosis and Apoptosis.....	225
Cirrhosis.....	228
Carcinogenesis.....	228
Miscellaneous Effects.....	228
Response to Liver Injury.....	229
Evaluating Liver Injury and Treating Disease.....	229
Case Study: Reye's Syndrome.....	230
References.....	231

12 Renal Toxicology.....	233
Function of the Kidneys.....	233
Anatomy and Physiology of the Kidneys.....	233
Effects of Toxicants on the Kidney: General Principles.....	235
Damage to the Glomerulus.....	235
Damage to the Proximal Tubule.....	237
The Remainder of the Tubule.....	242
Measurement of Kidney Function <i>In Vivo</i>	242
Measurement of Kidney Function <i>In Vitro</i>	244
Références.....	245

13 Immunotoxicology.....	247
Function of the Immune System.....	247
Nonspecific Defense Mechanisms.....	247
The Skin and Mucus Membranes.....	247
Phagocytosis.....	248
The Complement System and Interferons.....	248
Fever.....	248
The Inflammatory Response.....	249
Specific Defense Mechanisms.....	250
Cellular Immunity.....	251
Humoral Immunity.....	252
Development of Immunity.....	253
Effects of Toxicants on the Immune System.....	254
Toxicant-Induced Allergies.....	254
Toxicant-Induced Autoimmunity.....	255
Toxicant-Induced Immunosuppression.....	256
AIDS and Antiviral Drugs.....	258
Methods for Studying Immunotoxicity.....	259
References.....	260

14 Ecological Toxicology.....	261
Introduction.....	261
Effects of Toxicants at the Population Level.....	261
Population Genetics.....	261
Natural Selection.....	262

Natural Selection, Toxicants, and Resistance	263
Recombinant Organisms	264
Population Growth and Dynamics	265
Effects of Toxicants at the Community Level	266
Effects of Toxicants at the Ecosystem Level.....	268
Energy Flow in Ecosystems.....	268
Material Cycling in Ecosystems.....	269
Examples of Ecosystems and Vulnerability to Impact by Toxicants.....	271
Marine Ecosystems	271
Freshwater Ecosystems	273
Terrestrial Ecosystems	275
Ecotoxicological Testing Methods.....	276
Single Species Testing.....	276
Microcosms.....	277
Field Studies.....	278
Mathematical Modeling	278
Molecular and Cellular Ecotoxicology: A New Direction.....	279
References.....	279
15 Applications: Pharmacology and Toxicology.....	281
Basic Principles of Pharmacology	281
Pharmacokinetics and Drug Delivery	281
The Magic Bullet: Mechanisms of Action and Side Effects	283
Drug Development and the Role of Toxicology.....	284
Preclinical Studies	285
Clinical Studies	286
Toxicogenomics and Drug Safety	287
The Return of Natural Products: Regulatory Issues	288
References.....	288
16 Applications: Forensic Toxicology	291
Analytical Toxicology.....	291
Thin-Layer Chromatography	292
Gas Chromatography–Mass Spectrometry	293
High-Performance Liquid Chromatography	294
Immunoassays	296
Forensic Toxicology and Alcohol Use	297
Forensic Toxicology and Illegal Drug Use	298
The Controlled Substances Act.....	298
Drug Identification.....	299
Major Categories of Illegal Drugs: Neuroactive Drugs.....	299
Anabolic Steroids	300
Criminal Poisonings	301
References.....	303

17 Applications: Environmental Toxicology and Pollution	305
Air Pollution	305
Types and Sources of Air Pollutants	305
General Effects of Air Pollutants	305
Carbon Oxides	306
Sulfur Oxides and Nitrogen Oxides	308
Hydrocarbons and the Formation of Secondary Pollutants (Including Ozone).....	310
Chlorofluorocarbons	310
Particulates	311
Airborne Toxicants	312
Indoor Air Pollution	312
Control of Air Pollution	313
Water Pollution.....	313
Water in the Ecosystem.....	314
Organic Wastes as Water Pollutants	315
Petroleum Products as Water Pollutants.....	316
Pesticides	318
Other Organic Compounds.....	322
Phosphorus and Nitrogen	323
Metals	324
Other Pollutants	326
Regulation and Control of Water Pollution.....	326
Toxic Wastes.....	327
Sources of Toxic Wastes.....	327
Categories of Waste.....	328
Love Canal and Hazardous Waste Legislation.....	328
Waste Management: Reduce, Recycle, Treat, Store	330
References.....	332

Appendix

List of Selected Toxicants.....	335
References.....	351

Index.....	353
