

WORLD CONFERENCE ON  
TRANSPORT RESEARCH SOCIETY  
and  
INSTITUTE FOR TRANSPORT POLICY STUDIES

# Urban Transport and The Environment

An International Perspective

## CONTENTS

|  |           |
|--|-----------|
| <b>Introduction</b>  | <b>1</b>  |
| 1.1 The present state of transport-related environmental problems            | 3         |
| 1.2 The approaches required and the contents of this book                    | 4         |
| 1.3 The treatment of “urban transport and the environment” in this book      | 6         |
| <b>1 Overview of Urban Transport and the Environment</b>                     | <b>11</b> |
| 1.1 Development of motorised society   | 13        |
| 1.1.1 Transport and industrial revolution                                    | 13        |
| 1.1.2 Progress in motorisation   | 14        |
| 1.2 Environmental problems caused by urban transport                         | 17        |
| 1.2.1 Environmental problems caused by automobiles                           | 17        |
| 1.2.2 Attempts to eliminate environmental problems caused by urban transport | 19        |
| 1.2.3 Emergence of urban transport management policy                         | 22        |
| 1.2.4 Environmental degradation in developing countries                      | 24        |
| 1.3 Global environmental problems  | 27        |
| 1.3.1 Awareness of global environmental problems                             | 27        |
| 1.3.2 Contribution of transport to global environmental problems             | 32        |
| 1.4 Summary  | 35        |
| <b>2 The Urban Transport System</b>  | <b>37</b> |
| 2.1 Introduction   | 39        |
| 2.2 Trends in motorisation   | 39        |
| 2.2.1 Motorisation around the world  | 39        |
| 2.2.2 Vehicle fleet characteristics  | 45        |
| 2.2.3 Explaining motorisation trends   | 50        |
| 2.3 Travel patterns  | 55        |
| 2.3.1 Travel patterns around the world                                       | 55        |
| 2.3.2 Urban public transport   | 60        |
| 2.3.3 Freight transport  | 69        |
| 2.4 Urban structure: decentralisation and urban transport                    | 76        |
| 2.4.1 Decentralisation in the U.S., Europe and Asia                          | 77        |
| 2.4.2 Trends in travel   | 87        |
| 2.5 Urban transport in developing countries                                  | 89        |
| 2.5.1 Transition to a motorised transport system                             | 90        |
| 2.5.2 Motorisation trends and their determinants                             | 92        |
| 2.5.3 Determinants of variation between countries                            | 94        |
| 2.6 Conclusion   | 95        |
| <b>3 Environmental Impacts Due to Urban Transport</b>                        | <b>99</b> |
| 3.1 Introduction   | 101       |

|          |  |            |
|----------|--|------------|
| 3.2      | Source of emissions  | 104        |
| 3.2.1    | Combustion engines   | 104        |
| 3.2.2    | Emission control   | 108        |
| 3.3      | Local air environment  | 113        |
| 3.3.1    | Effect of air pollutants   | 113        |
| 3.3.2    | Mechanisms for the localised effects of pollutants on air quality  | 118        |
| 3.4      | Local air quality and transport in different cities                | 135        |
| 3.4.1    | Approaches and difficulties in comparing cities                    | 135        |
| 3.4.2    | Comparison of air pollution concentration                          | 137        |
| 3.4.3    | Comparison of the total amount of emission                         | 139        |
| 3.4.4    | Impact of travel conditions on pollutant emission levels           | 143        |
| 3.4.5    | Summary  | 147        |
| 3.5      | Global warming   | 147        |
| 3.5.1    | Status and effects of global warming                               | 147        |
| 3.5.2    | Strategies to reduce greenhouse gas emissions                      | 151        |
| 3.5.3    | Policy options   | 156        |
| 3.5.4    | Towards policy solutions   | 161        |
| 3.6      | Noise  | 162        |
| 3.6.1    | Impact and perception of noise                                     | 162        |
| 3.6.2    | Sources of transport noise   | 165        |
| 3.6.3    | Noise propagation  | 166        |
| 3.6.4    | Measurement of noise   | 166        |
| 3.6.5    | An international comparison of noise pollution                     | 168        |
| 3.6.6    | An international comparison of noise regulation                    | 173        |
| 3.6.7    | Countermeasures to the noise problem                               | 181        |
| 3.6.8    | Noise and sustainable mobility                                     | 184        |
| 3.6.9    | Conclusions  | 186        |
| <b>4</b> | <b>Transport and Land Use Instruments for A Better Environment</b> | <b>191</b> |
| 4.1      | Introduction   | 193        |
| 4.2      | Problems, objectives and strategies                                | 193        |
| 4.2.1    | The problems arising from urban transport                          | 193        |
| 4.2.2    | Potential objectives of urban transport policy                     | 196        |
| 4.2.3    | Possible strategies  | 198        |
| 4.3      | Classification of policy instruments                               | 201        |
| 4.3.1    | A comprehensive classification                                     | 201        |
| 4.3.2    | The potential impacts of individual transport policy instruments   | 203        |
| 4.3.3    | The interactions with land use                                     | 206        |
| 4.3.4    | Sources of evidence  | 207        |
| 4.4      | The performance of different types of policy instrument            | 209        |
| 4.4.1    | Technology: infrastructure provision                               | 209        |

|   |            |
|---|------------|
| 4.4.2 Regulation: management, control and services                                | 213        |
| 4.4.3 Information: information provision and enlightenment                        | 218        |
| 4.4.4 Economic: pricing and taxation  | 221        |
| 4.5 Technological countermeasures for gas emissions                               | 223        |
| 4.5.1 Emission control technology for combustion engines                          | 223        |
| 4.5.2 Alternative fuels and electric-drive technology                             | 225        |
| 4.6 Overall contribution to strategies and objectives                             | 233        |
| 4.6.1 Contribution to strategies  | 233        |
| 4.6.2 Contribution to objectives  | 234        |
| 4.7 Responsibilities and barriers   | 237        |
| 4.7.1 The range of actors in urban transport policy                               | 237        |
| 4.7.2 Barriers to implementation  | 238        |
| 4.8 Integrated strategies   | 240        |
| 4.8.1 The concept of integration  | 240        |
| 4.8.2 The use of integration to achieve greater benefits                          | 241        |
| 4.8.3 The design of optimal strategies  | 242        |
| 4.9 The use of causal loop diagrams to determine the most appropriate instruments | 243        |
| 4.9.1 More complex causal loop diagrams   | 243        |
| 4.9.2 Extraction of critical instruments using a causal loop diagram              | 245        |
| <b>5 Transport-Environment Issues and Countermeasures in Various Metropolises</b> | <b>253</b> |
| 5.1 Introduction  | 255        |
| 5.1.1 Aim of the case studies   | 255        |
| 5.1.2 Target cities   | 255        |
| 5.1.3 Description policy of the chapter   | 256        |
| 5.1.4 How to read the chapter   | 257        |
| 5.2 Berlin  | 257        |
| 5.2.1 Introduction  | 257        |
| 5.2.2 The state of transport  | 258        |
| 5.2.3 The environmental influences from transport                                 | 266        |
| 5.2.4 Transport and land use instruments for a better environment                 | 269        |
| 5.3 Budapest  | 273        |
| 5.3.1 Introduction  | 273        |
| 5.3.2 Car ownership trends  | 274        |
| 5.3.3 Present situation of public transport                                       | 274        |
| 5.3.4 Environmental situation   | 275        |
| 5.3.5 Transport policies and measures   | 277        |
| 5.3.6 Responsibilities for environmental matters                                  | 279        |
| 5.3.7 Conclusions   | 280        |
| 5.4 Istanbul  | 281        |

|        |   |     |
|--------|---|-----|
| 5.4.1  | Present land use and transport  | 281 |
| 5.4.2  | Crossing the Bosphorus  | 282 |
| 5.4.3  | Air and noise pollution   | 284 |
| 5.4.4  | Decision making process   | 285 |
| 5.5    | Lyon  | 285 |
| 5.5.1  | Introduction  | 285 |
| 5.5.2  | The mobility of Lyon city dwellers  | 286 |
| 5.5.3  | Air and noise pollution   | 288 |
| 5.5.4  | Which policies should be enacted?   | 290 |
| 5.6    | Nottingham  | 292 |
| 5.6.1  | Introduction  | 292 |
| 5.6.2  | Travel behaviour  | 293 |
| 5.6.3  | Public transport  | 293 |
| 5.6.4  | Environmental indicators and targets  | 293 |
| 5.6.5  | Solutions   | 294 |
| 5.6.6  | Conclusions   | 296 |
| 5.7    | Rome  | 297 |
| 5.7.1  | Introduction  | 297 |
| 5.7.2  | The environmental problems  | 298 |
| 5.7.3  | Rome's urban transport  | 300 |
| 5.7.4  | Social awareness and global warming   | 301 |
| 5.7.5  | Conclusions   | 302 |
| 5.8    | Cairo   | 303 |
| 5.8.1  | Introduction  | 303 |
| 5.8.2  | Car ownership and use   | 303 |
| 5.8.3  | Air and noise pollution   | 304 |
| 5.8.4  | Awareness   | 305 |
| 5.8.5  | Greenhouse effects  | 307 |
| 5.8.6  | Countermeasures   | 307 |
| 5.9    | Los Angeles   | 309 |
| 5.9.1  | Introduction  | 309 |
| 5.9.2  | Urban form and transport characteristics  | 309 |
| 5.9.3  | Transport system performance  | 313 |
| 5.9.4  | Improving air quality through increasingly stringent emission standards and advanced technologies | 315 |
| 5.9.5  | The road ahead  | 320 |
| 5.9.6  | Conclusions   | 322 |
| 5.10   | Bogotá  | 323 |
| 5.10.1 | Introduction  | 323 |
| 5.10.2 | The Transmilenio project, as an integrated public transport system                                | 324 |

|        |  |     |
|--------|--|-----|
| 5.10.3 | “Pico y placa” as a peak-period traffic restraint scheme based on license plates | 324 |
| 5.10.4 | Impacts on the environment   | 325 |
| 5.10.5 | Non motorized transport  | 325 |
| 5.10.6 | Parking pricing  | 325 |
| 5.10.7 | Conclusions  | 326 |
| 5.11   | Curitiba   | 326 |
| 5.11.1 | Introduction   | 326 |
| 5.11.2 | The master plan  | 327 |
| 5.11.3 | Integrated bus system  | 329 |
| 5.11.4 | Evaluation of the Curitiba’s strategies  | 329 |
| 5.11.5 | Future issues  | 330 |
| 5.12   | Mexico City  | 330 |
| 5.12.1 | Introduction   | 330 |
| 5.12.2 | Population and mobility trends   | 331 |
| 5.12.3 | Urban environment  | 332 |
| 5.12.4 | Urban transport  | 333 |
| 5.12.5 | Conclusions  | 335 |
| 5.13   | Santiago   | 335 |
| 5.13.1 | Introduction   | 335 |
| 5.13.2 | Transport market   | 336 |
| 5.13.3 | Air pollution  | 337 |
| 5.13.4 | Noise  | 341 |
| 5.13.5 | Social awareness   | 341 |
| 5.13.6 | Conclusions  | 342 |
| 5.14   | Nagoya   | 343 |
| 5.14.1 | The state of transport   | 343 |
| 5.14.2 | The state of transport and the environment                                       | 347 |
| 5.14.3 | Transport and land use instruments for a better environment                      | 349 |
| 5.15   | Adelaide   | 358 |
| 5.15.1 | Introduction   | 358 |
| 5.15.2 | Travel behaviour   | 359 |
| 5.15.3 | Public transport   | 360 |
| 5.15.4 | Environmental indicators and targets   | 360 |
| 5.15.5 | Solutions  | 361 |
| 5.15.6 | Conclusions  | 365 |
| 5.16   | Bangkok  | 365 |
| 5.16.1 | Introduction   | 365 |
| 5.16.2 | Traffic and transport situation  | 366 |

|        |   |     |

| 5.18.3 | Recent urban transport policy with potential environmental impact | 376 |
| 5.18.4 | Conclusions   | 378 |
| 5.19   | Kathmandu   | 378 |
| 5.19.1 | Introduction  | 378 |
| 5.19.2 | Air pollution trends  | 379 |
| 5.19.3 | Public awareness  | 380 |
| 5.19.4 | Motorisation trends   | 381 |
| 5.19.5 | Policy measures   | 382 |
| 5.19.6 | Awareness about global warming                                    | 383 |
| 5.20   | Manila  | 383 |
| 5.20.1 | Population growth, urban development and motorisation             | 383 |
| 5.20.2 | Deterioration in air quality                                      | 385 |
| 5.20.3 | People's air quality awareness                                    | 386 |
| 5.20.4 | Multi-sectoral initiative for clean air                           | 386 |
| 5.20.5 | Government measures to improve air quality                        | 386 |
| 5.20.6 | Greenhouse gas emissions from transport                           | 388 |
| 5.20.7 | Conclusions   | 388 |
| 5.21   | Seoul   | 389 |
| 5.21.1 | Introduction  | 389 |
| 5.21.2 | The state of transport  | 389 |
| 5.21.3 | Environmental quality   | 390 |
| 5.21.4 | Policy measures   | 391 |
| 5.21.5 | Conclusions   | 393 |
| 5.22   | Singapore   | 394 |
| 5.22.1 | Introduction  | 394 |
| 5.22.2 | Vehicle ownership and use   | 394 |
| 5.22.3 | Land transport policy   | 395 |

|   |            |
|---|------------|
| 5.22.4 Vehicular emissions and their control  | 399        |
| 5.22.5 Road traffic noise and their control   | 400        |
| 5.22.6 Conclusions  | 400        |
| <b>6 Political Climate for Environmental Policies and Proposals for International Mechanism</b>       | <b>403</b> |
| 6.1 Introduction  | 405        |
| 6.2 Typical political trends relating to transport environment policies and their transitions         | 407        |
| 6.2.1 Cases in the EU countries and Europe  | 407        |
| 6.2.2 Cases in the U.S.   | 410        |
| 6.2.3 Cases in Japan  | 412        |
| 6.3 Direction of ecological transport strategy in developed countries                                 | 414        |
| 6.3.1 Acceptability cycles  | 414        |
| 6.3.2 General idea: creation of the right incentives  | 416        |
| 6.3.3 Development of better environmental technology and appropriate policy instruments to promote it | 417        |
| 6.3.4 Technology development for the infrastructure and for new transport systems                     | 422        |
| 6.3.5 Restructuring the taxation and charging system  | 424        |
| 6.3.6 Introduction of tradable emission certificates for enterprises                                  | 426        |
