

Second Edition

# SIGNALING IN TELECOMMUNICATION NETWORKS

JOHN G. VAN BOSSE • FABRIZIO U. DEVETAK

*Wiley Series in Telecommunications and Signal Processing • John G. Proakis, Series Editor*

---

# CONTENTS

<b>Preface to the Second Edition</b>	<b>xiii</b>
<b>Chapter 1 Introduction to Telecommunications</b>	<b>1</b>
1.1 Telecommunication Networks	2
1.2 Numbering Plans	9
1.3 Digit Analysis and Routing	13
1.4 Analog Transmission	17
1.5 Digital Transmission	23
1.6 Special Transmission Equipment	28
1.7 Exchanges	34
1.8 Access Networks and Line Concentrators	38
1.9 Acronyms	40
1.10 References	41
<b>Chapter 2 Introduction to Signaling</b>	<b>43</b>
2.1 Overview	43
2.2 Standards for Signaling Systems	49
2.3 Acronyms	51
2.4 References	52
<b>Chapter 3 Subscriber Signaling</b>	<b>55</b>
3.1 Basic Subscriber Signaling	55
3.2 Signaling Components in Telephones	57
3.3 Signaling Equipment at the Local Exchange	60
3.4 Tones, Announcements, and Ringing	64
3.5 Subscriber Signaling for Supplementary Services	67

3.6	Other Applications of DTMF Signaling	69
3.7	Dialing Plans	71
3.8	Acronyms	73
3.9	References	74
<b>Chapter 4 Channel-Associated Interexchange Signaling</b>		<b>75</b>
4.1	Introduction	75
4.2	Bell System Multifrequency Signaling	80
4.3	Signaling System No. 5	90
4.4	MFC-R2 Signaling	91
4.5	Acronyms	107
4.6	References	108
<b>Chapter 5 Introduction to Common-Channel Signaling</b>		<b>111</b>
5.1	Signaling Networks	112
5.2	Signaling Links and Signal Units	119
5.3	Acronyms	125
5.4	References	126
<b>Chapter 6 Signaling in Access Networks</b>		<b>129</b>
6.1	Overview of Signaling for Access Systems	129
6.2	The GR-303 Standard	131
6.3	The V5 Standards	139
6.4	The V5.1 Standard	140
6.5	The V5.2 Standard	147
6.6	Acronyms	153
6.7	References	154
<b>Chapter 7 Introduction to Signaling System No. 7</b>		<b>157</b>
7.1	SS7 Structure	158
7.2	Identification of Signaling Points and Trunks	160
7.3	SS7 Signal Units and Primitives	162
7.4	Acronyms	165
7.5	References	166
<b>Chapter 8 SS7 Message Transfer Part</b>		<b>167</b>
8.1	Introduction to MTP	167
8.2	MTP Level 1	169
8.3	Overview of MTP Level 2	170

8.4	Basic Error Correction	175
8.5	Preventive Cyclic Retransmission	178
8.6	Signaling Link Management	180
8.7	Overview of MTP Level 3	182
8.8	MTP3 Signaling Message Handling	184
8.9	MTP3 Signaling Network Management	190
8.10	Acronyms	198
8.11	References	200
<b>Chapter 9 Telephone User Part</b>		<b>201</b>
9.1	Messages and Primitives	202
9.2	Call-Control Messages and Signals	203
9.3	Basic Signaling Sequences	211
9.4	TUP Support of Additional Services	217
9.5	Other TUP Procedures, Messages, and Signals	221
9.6	Versions of TUP Signaling	225
9.7	Acronyms	226
9.8	References	229
<b>Chapter 10 Digital Subscriber Signaling System No. 1</b>		<b>231</b>
10.1	Introduction to ISDN and DSS1	231
10.2	Data Link Layer (LAPD)	237
10.3	Q.931 Call-Control Messages	247
10.4	Introduction to Call-Control Signaling	260
10.5	Call-Control Examples	265
10.6	Failed ISDN Setups	269
10.7	Acronyms	273
10.8	References	275
<b>Chapter 11 ISDN User Part</b>		<b>277</b>
11.1	Introduction	277
11.2	ISUP Messages, Formats, and Parameters	279
11.3	Signaling for Calls Between ISDN Users	296
11.4	Calls Involving Analog Subscribers	301
11.5	End-to-End Signaling	305
11.6	Other Signaling Procedures	309
11.7	Signaling Procedures for Failed Setups	316
11.8	ISUP Signaling in the International Network	319
11.9	ISUP Signaling in the United States	320

11.10	Acronyms	323
11.11	References	325
<b>Chapter 12 Signaling in Cellular Mobile Telecommunications</b>		<b>327</b>
12.1	Introduction to Cellular Mobile Networks	327
12.2	AMPS Tone Signals and Message Words	336
12.3	Introduction to AMPS Signaling	338
12.4	AMPS Message Formats and Parameters	343
12.5	AMPS Signaling Procedures	352
12.6	Signaling in IS-54 Cellular Systems	356
12.7	Introduction to the GSM Cellular System	364
12.8	Signaling Between Mobile and Network	372
12.9	Layer 3 Messages on the Um Interface	380
12.10	Acronyms	384
12.11	References	386
<b>Chapter 13 Air Interface Signaling in CDMA Networks</b>		<b>389</b>
13.1	Introduction	389
13.2	IS-95 Air Interface	398
13.3	cdma2000 Air Interface	409
13.4	UTRAN Air Interface	436
13.5	Acronyms	452
13.6	References	455
<b>Chapter 14 Introduction to Transactions</b>		<b>459</b>
14.1	Definitions and Applications	459
14.2	SS7 Architecture for Transactions	460
14.3	Acronyms	462
14.4	References	463
<b>Chapter 15 Signaling Connection Control Part</b>		<b>465</b>
15.1	Introduction	465
15.2	SCCP Messages and Parameters	468
15.3	Connectionless SCCP	476
15.4	Connection-Oriented SCCP	484
15.5	SCCP Management	489
15.6	Acronyms	494
15.7	References	495

<b>Chapter 16 Transaction Capabilities Application Part</b>	<b>497</b>
16.1 Introduction	497
16.2 TCAP Formats and Coding	504
16.3 Transaction and Invoke Identities	510
16.4 U.S. National TCAP	512
16.5 ETSI TCAP	514
16.6 Acronyms	515
16.7 References	516
<b>Chapter 17 Transactions in Intelligent Networks</b>	<b>517</b>
17.1 Introduction to Intelligent Networks	517
17.2 Call Models and Triggers	521
17.3 AIN Messages and Transactions	528
17.4 AIN 0.1 Parameters	534
17.5 Coding of Data Elements	541
17.6 Messages and Parameters	543
17.7 AIN Services	549
17.8 Acronyms	554
17.9 References	555
<b>Chapter 18 Intelligent Network Application Part</b>	<b>557</b>
18.1 Introduction	557
18.2 Call Models and Triggers	561
18.3 Capability Sets	562
18.4 INAP Signaling	564
18.5 ETSI INAP	571
18.6 Acronyms	571
18.7 References	573
<b>Chapter 19 Mobile Application Part</b>	<b>577</b>
19.1 Introduction to IS-MAP	578
19.2 Transactions for Registration and Authentication	582
19.3 Calls to Mobile Stations	588
19.4 Operations for Intersystem Handoff	593
19.5 IS-MAP Formats and Codes	599
19.6 Introduction to GSM-MAP	606
19.7 Operations Related to Location Updating	613
19.8 Operations for Calls Terminating at MS	619

19.9	Operations and Procedures for Originating Calls	625
19.10	Acronyms	627
19.11	References	629
<b>Chapter 20 Introduction to Packet Networks and VoIP</b>		<b>631</b>
20.1	Packet-Based Communication	631
20.2	The TCP/IP Protocol Suite	642
20.3	Introduction to VoIP	650
20.4	Lower Layer Protocols for VoIP	658
20.5	Acronyms	665
20.6	References	667
<b>Chapter 21 Signaling for VoIP</b>		<b>669</b>
21.1	Introduction	669
21.2	The H.323 Protocol	671
21.3	The Session Initiation Protocol (SIP)	680
21.4	The Gateway Control Protocol	691
21.5	The Signaling Transport (SIGTRAN) Protocols	698
21.6	The Bearer Independent Call-Control (BICC) Protocols	707
21.7	Acronyms	716
21.8	References	718
<b>Chapter 22 Signaling in ATM Networks</b>		<b>721</b>
22.1	Introduction to ATM Networks and Interfaces	721
22.2	ATM Layers and Protocol Stack	727
22.3	Lower Layers	729
22.4	Introduction to ATM Signaling	733
22.5	Signaling at the UNI Interface	735
22.6	The PNNI Protocol	739
22.7	The B-ISUP Signaling Protocol	743
22.8	Other NNI Signaling Protocols	746
22.9	ATM Addressing	747
22.10	Acronyms	748
22.11	References	750
