

# Space-Time Wireless Systems

From Array Processing to  
MIMO Communications

Edited by **Helmut Bölcskei,**  
**David Gesbert,**  
**Constantinos B. Papadias, and**  
**Alle-Jan van der Veen**

<i>Introduction</i>	xxi

## Part I

### Multiantenna basics

<b>1</b>	<b>Propagation aspects of MIMO channel modeling</b>	
	<i>J. Bach Andersen</i>	3
<b>2</b>	<b>Beamforming techniques</b>	
	<i>J. Winters</i>	23
<b>3</b>	<b>Diversity in wireless systems</b>	
	<i>A. F. Naguib and A. R. Calderbank</i>	44
<b>4</b>	<b>Fundamentals of MIMO channel capacity</b>	
	<i>E. Biglieri and G. Taricco</i>	66
<b>5</b>	<b>Multiantenna capacity: myths and realities</b>	
	<i>A. Lozano, A. M. Tulino, and S. Verdú</i>	87
<b>6</b>	<b>The role of feedback, CSI, and coherence in MIMO systems</b>	
	<i>G. Barriac, N. Jacobsen, and U. Madhow</i>	108

## Part II

### Space-time modulation and coding

<b>7</b>	<b>Introduction to space-time codes</b>	
	<i>A. R. Calderbank and A. F. Naguib</i>	133

<b>8</b>	<b>Perspectives on the diversity-multiplexing trade-off in MIMO systems</b>	
	<i>H. Yao, L. Zheng, and G. W. Wornell</i>	154
<b>9</b>	<b>Linear precoding for MIMO channels</b>	
	<i>A. Scaglione and P. Stoica</i>	178
<b>10</b>	<b>Space-time coding for noncoherent channels</b>	
	<i>J.-C. Belfiore and A. M. Cipriano</i>	198
<b>11</b>	<b>Space-time coding for time- and frequency-selective MIMO channels</b>	
	<i>X. Ma and G. B. Giannakis</i>	218

### Part III

#### Receiver algorithms and parameter estimation

<b>12</b>	<b>Array signal processing</b>	
	<i>A. B. Gershman</i>	241
<b>13</b>	<b>Optimal subspace techniques for DOA estimation</b>	
	<i>M. Jansson, B. Ottersten, M. Viberg, and A. L. Swindlehurst</i>	261
<b>14</b>	<b>Blind and semiblind MIMO channel estimation</b>	
	<i>D. Slock and A. Medles</i>	279
<b>15</b>	<b>MIMO receive algorithms</b>	
	<i>T. Kailath, H. Vikalo, and B. Hassibi</i>	302
<b>16</b>	<b>Space-time turbo coding</b>	
	<i>S. ten Brink</i>	322
<b>17</b>	<b>Training for MIMO communications</b>	
	<i>Y. Sung, T. E. Sung, B. M. Sadler, and L. Tong</i>	342

### Part IV

#### System-level issues of multiantenna systems

<b>18</b>	<b>MIMO Gaussian multiple access channels</b>	
	<i>M. Mohseni, M. Brady, and J. Cioffi</i>	365
<b>19</b>	<b>On information-theoretic aspects of MIMO broadcast channels</b>	
	<i>G. Caire, S. Shamai (Shitz), Y. Steinberg, and H. Weingarten</i>	385
<b>20</b>	<b>Multiuser MIMO systems</b>	
	<i>H. V. Poor, D. Reynolds, and X. Wang</i>	406

<b>21</b>	<b>Opportunistic communication: a system view</b>	
	<i>P. Viswanath</i>	426
<b>22</b>	<b>System level performance of MIMO systems</b>	
	<i>N. Marina, O. Tirkkonen, and P. Pasanen</i>	443

**Part V**

**Implementations, measurements, prototypes, and standards**

<b>23</b>	<b>What we can learn from multiantenna measurements</b>	
	<i>E. Bonek and W. Weichselberger</i>	467
<b>24</b>	<b>Experiments in space-time modulation and demodulation</b>	
	<i>W. Zhu, H. Lee, D. Liu, D. Browne, and M. P. Fitz</i>	487
<b>25</b>	<b>Multiple antenna techniques in 3G wireless systems</b>	
	<i>R. A. Soni and R. M. Buehrer</i>	509
<b>26</b>	<b>MIMO wireless local area networks</b>	
	<i>K. Gosse, M. de Courville, M. Muck, S. Rouquette, and S. Simoens</i>	531
<b>27</b>	<b>VLSI implementation of MIMO detection</b>	
	<i>A. Burg and D. Garrett</i>	554
