

Advances in UML and XML-Based Software Evolution

HONGJI YANG

Advances in UML and XML-Based Software Evolution

Table of Contents

Preface	vi
<i>Hongji Yang, De Montfort University, England</i>	
Chapter I.	
Design Recovery of Web Application Transactions	1
<i>Scott Tilley, Florida Institute of Technology, USA</i>	
<i>Damiano Distanto, University of Lecce, Italy</i>	
<i>Shihong Huang, Florida Atlantic University, USA</i>	
Chapter II.	
Using a Graph Transformation System to Improve the Quality Characteristics of UML-RT Specifications	20
<i>Lars Grunske, University of Potsdam, Germany</i>	
Chapter III.	
Version Control of Software Models	47
<i>Marcus Alanen, Åbo Akademi University, Finland</i>	
<i>Ivan Porres, Åbo Akademi University, Finland</i>	
Chapter IV.	
Support for Collaborative Component-Based Software Engineering	71
<i>Cornelia Boldyreff, University of Lincoln, UK</i>	
<i>David Nutter, University of Lincoln, UK</i>	
<i>Stephen Rank, University of Lincoln, UK</i>	
<i>Phyo Kyaw, University of Durham, UK</i>	
<i>Janet Lavery, University of Durham, UK</i>	
Chapter V.	
Migration of Persistent Object Models Using XMI	92
<i>Rainer Frömming, 4Soft GmbH, Germany</i>	
<i>Andreas Rausch, Technische Universität Kaiserslautern, Germany</i>	

Chapter VI.

PRAISE: A Software Development Environment to Support Software Evolution 105

William C. Chu, Tunghai University, Taiwan

Chih-Hung Chang, Hsiuping Institute of Technology, Taiwan

Chih-Wei Lu, Hsiuping Institute of Technology, Taiwan

Yi-Chun Peng, Tunghai University, Taiwan

Don-Lin Yang, Feng Chia University, Taiwan

Chapter VII.

Developing Requirements Using Use Case Modeling and the Volere Template:

Establishing a Baseline for Evolution 141

Paul Crowther, Sheffield Hallam University, UK

Chapter VIII.

Formalizing and Analyzing UML Use Case View Using Hierarchical Predicate

Transition Nets 154

Xudong He, Florida International University, USA

Chapter IX.

Formal Specification of Software Model Evolution Using Contracts 184

Claudia Pons, Universidad Nacional de La Plata, Argentina

Gabriel Baum, Universidad Nacional de La Plata, Argentina

Chapter X.

Visualising COBOL Legacy Systems with UML: An Experimental Report 209

Steve McRobb, De Montfort University, UK

Rich Millham, De Montfort University, UK

Jianjun Pu, De Montfort University, UK

Hongji Yang, De Montfort University, UK

Chapter XI.

XML-Based Analysis of UML Models for Critical Systems Development 257

Jan Jürjens, TU München, Germany

Pasha Shabalin, TU München, Germany

Chapter XII.

Augmenting UML to Support the Design and Evolution of User Interfaces 275

Chris Scogings, Massey University, New Zealand

Chris Phillips, Massey University, New Zealand

Chapter XIII.

A Reuse Definition, Assessment, and Analysis Framework for UML 286

Donald Needham, United States Naval Academy, USA

Rodrigo Caballero, United Technologies Research Center, USA

Steven Demurjian, The University of Connecticut, USA

Felix Eickhoff, The University of Connecticut, USA

Yi Zhang, The University of Connecticut, USA

Chapter XIV.

Complexity-Based Evaluation of the Evolution of XML and UML Systems 308

Ana Isabel Cardoso, University of Madeira, DME, Portugal

Peter Kokol, University of Maribor, FERI, Slovenia

Mitja Lenic, University of Maribor, FERI, Slovenia

Rui Gustavo Crespo, Technical University of Lisbon, DEEC, Portugal

Chapter XV.

Variability Expression within the Context of UML: Issues and Comparisons 322

Patrick Tessier, CEA/List Saclay, France

Sébastien Gérard, CEA/List Saclay, France

François Terrier, CEA/List Saclay, France

Jean-Marc Geib, Université des Sciences et Technologies de Lille, France

About the Authors 350
