# CREATING MUSIC AND SOUND FOR GAMES

G.W. Childs IV

# TABLE OF } Contents

|                  |   |          |
|------------------|---|----------|
| <b>CHAPTER 1</b> | <b>Meetings .....</b>                           | <b>1</b> |
|                  | Who's Who in Game Design Meetings .....         | 2        |
|                  | Producers .....                                 | 2        |
|                  | Level Designers .....                           | 3        |
|                  | Art Team .....                                  | 3        |
|                  | Quality Assurance Team .....                    | 4        |
|                  | Marketing .....                                 | 4        |
|                  | Questions to Ask the Design Team .....          | 5        |
|                  | What's the Timeline? .....                      | 5        |
|                  | Do You Have a Design Document? .....            | 7        |
|                  | What Are the Sound Engine's Capabilities? ..... | 7        |
| <b>CHAPTER 2</b> | <b>Sound Database .....</b>                     | <b>9</b> |
|                  | Project Database .....                          | 10       |
|                  | Status .....                                    | 12       |
|                  | Assigned To .....                               | 12       |
|                  | Sound Class .....                               | 12       |
|                  | Character Name .....                            | 12       |
|                  | Character Code .....                            | 12       |
|                  | Level .....                                     | 13       |
|                  | Milestone Delivery .....                        | 13       |
|                  | Filename .....                                  | 13       |
|                  | Description .....                               | 13       |
|                  | Notes .....                                     | 13       |
|                  | Filename(s) .....                               | 14       |

| <b>Reverb</b> .....   | 67  |
| <b>Chorus</b> .....   | 69  |
| <b>Delay</b> .....  | 70  |
| <b>Distortion</b> .....                                       | 71  |
| <b>Compression</b> .....                                      | 71  |
| <b>Equalizer (EQ)</b> .....                                   | 73  |
| <br>  |     |
| <b>CHAPTER 6      Advanced Tools and Techniques</b> .....     | 75  |
| <b>Return of the Robot</b> .....                              | 76  |
| <b>Manipulating the Robot</b> .....                           | 77  |
| <b>The Robot Thus Far</b> .....                               | 85  |
| <b>When You Need Inspiration</b> .....                        | 87  |
| <b>Canned Sound</b> .....                                     | 87  |
| <b>Existing Sound FX Libraries</b> .....                      | 88  |
| <br>  |     |
| <b>CHAPTER 7      Software Instruments and Samplers</b> ..... | 89  |
| <b>Using Reason for Sound Design</b> .....                    | 90  |
| <b>The Malström</b> .....                                     | 91  |
| <b>Enter the NN-XT</b> .....                                  | 99  |
| <b>If You Don't Use Reason</b> .....                          | 106 |
| <br>  |     |
| <b>CHAPTER 8      Batch Converting</b> .....                  | 109 |
| <b>What Is a Batch Converter?</b> .....                       | 110 |
| <b>Batch File Renaming</b> .....                              | 111 |
| <b>Batch Processing</b> .....                                 | 116 |
| <b>Quick Keys</b> .....                                       | 128 |

## CONTENTS

|                   |   |            |
|-------------------|---|------------|
| <b>CHAPTER 9</b>  | <b>Mixing Cut Scenes .....</b>                    | <b>129</b> |
|                   | The First Cut Scene .....                         | 130        |
|                   | The Stage .....                                   | 130        |
|                   | Music .....                                       | 132        |
|                   | Ambience .....                                    | 133        |
|                   | Foley .....                                       | 134        |
|                   | Sound FX .....                                    | 136        |
|                   | Voice .....                                       | 137        |
|                   | Effects—Adding Plug-ins .....                     | 137        |
|                   | The Final Mix .....                               | 138        |
| <b>CHAPTER 10</b> | <b>Composing: The Game Design .....</b>           | <b>141</b> |
|                   | The Audition .....                                | 142        |
|                   | Music in Video Games—A Small Bit of History ..... | 143        |
|                   | The Team’s Needs .....                            | 144        |
|                   | Demo for E3 .....                                 | 144        |
|                   | Portable Recorder .....                           | 146        |
|                   | Proactivity .....                                 | 148        |
|                   | How the Game Uses Your Music .....                | 149        |
|                   | Internal Looping in the Game Engine .....         | 149        |
|                   | Cut Scenes .....                                  | 150        |
|                   | Interactivity .....                               | 150        |
|                   | Beat-Synchronous Instructions .....               | 151        |
| <b>CHAPTER 11</b> | <b>Composing: Tools of the Trade .....</b>        | <b>153</b> |
|                   | Multi-Track Programs .....                        | 154        |
|                   | Nuendo/Cubase SX for PC and Mac .....             | 156        |
|                   | Apple Logic Pro for Mac .....                     | 157        |
