

Robert Bosch GmbH

Gasoline-Engine Management

Systems and
Components

New: Bifuel-Motronic 3rd Edition

BOSCH

Invented for life

 **WILEY**

10 History of the automobile	88 Electric fuel pump
10 Development history	91 Gasoline filter
12 Pioneers of automotive technology	93 High-pressure pumps for gasoline direct injection
14 Robert Bosch's life's work	100 Fuel rail
	101 Pressure-control valve
	101 Pressure-limiting valve
	102 Fuel-pressure regulator
	103 Fuel-pressure damper
16 Basics of the gasoline (SI) engine	104 Manifold fuel injection
16 Method of operation	104 Overview
20 Cylinder charge	105 Method of operation
24 Torque and power	108 Instants of injection
26 Engine efficiency	109 Mixture formation
28 Specific fuel consumption	113 Ignition of homogeneous air/fuel mixtures
30 Combustion knock	114 Electromagnetic fuel injectors
32 Fuels	118 Gasoline direct injection
32 Fuels for spark-ignition engines (gasoline)	118 Overview
37 Alternative fuels	118 Method of operation
	119 Combustion process
	122 Operating modes
	125 Mixture formation
	127 Ignition
	128 High-pressure injector
40 Cylinder-charge control systems	130 Operation of gasoline engines on natural gas
40 Electronic throttle control (ETC)	130 Overview
44 Variable valve timing	132 Design and method of operation
47 Dynamic supercharging	133 Mixture formation
50 Mechanical supercharging	135 Natural gas injector NGI2
52 Exhaust-gas turbocharging	138 Natural-gas rail
55 Intercooling	138 Combined natural-gas pressure and temperature sensor
56 Controlled charge flow	139 DS-HD-KV4 high-pressure sensor
57 Exhaust-gas recirculation (EGR)	140 TV-NG1 tank shutoff valve
	141 PR-NG1 pressure-control module
58 Gasoline injection systems over the years	
58 Overview	
60 Beginnings of mixture formation	
68 Evolution of gasoline injection systems	
84 Fuel supply	
84 Fuel delivery with manifold injection	
86 Fuel delivery with gasoline direct injection	
87 Evaporative-emissions control system	

144 Ignition systems over the years	220 Motronic systems
144 Overview	220 Open- and closed-loop electronic control
146 Early ignition evolution	226 Motronic versions
154 Battery ignition systems over the years	232 System structure
	234 Subsystems and main functions
160 Inductive ignition system	242 Sensors
160 Design	242 Automotive applications
161 Function and method of operation	243 Temperature sensors
163 Ignition parameters	244 Engine-speed sensors
167 Voltage distribution	246 Hall-effect phase sensors
168 Ignition driver stage	248 Hot-film air-mass meter
169 Connecting devices and interference-suppressors	251 Piezoelectric knock sensors
	252 Micromechanical pressure sensors
	254 High-pressure sensors
170 Ignition coils	256 Two-step lambda oxygen sensors
170 Function	260 LSU4 planar broad-band lambda oxygen sensor
171 Requirements	
172 Design and method of operation	262 Electronic control unit (ECU)
178 Types	262 Operating conditions
182 Ignition-coil electronics	262 Design
183 Electrical parameters	262 Data processing
185 Simulation-based development of ignition coils	
	268 Exhaust emissions
186 Spark plugs	268 Combustion of the air/fuel mixture
186 Function	269 Main constituents of exhaust gas
187 Usage	270 Pollutants
188 Requirements	272 Factors affecting untreated emissions
189 Design	
192 Electrode materials	276 Catalytic emission control
193 Spark-plug concepts	276 Overview
194 Electrode gap	277 Three-way catalytic converter
195 Spark position	280 NO _x accumulator-type catalytic converter
196 Spark-plug heat range	282 Catalytic-converter configurations
198 Adaptation of spark plugs	284 Catalytic-converter heating
202 Spark-plug performance	288 Lambda control loop
204 Types	
211 Spark-plug type designations	
212 Manufacture of spark plugs	
214 Simulation-based spark-plug development	
215 Handling spark plugs	

292 Emissions-control legislation

- 292 Overview
- 294 CARB legislation
- 297 EPA legislation
- 299 EU legislation
- 302 Japanese legislation
- 302 US test cycles
- 304 European test cycle
- 305 Japanese test cycles

306 Exhaust-gas measuring techniques

- 306 Exhaust-gas test for type approval
- 308 Exhaust-gas analyzers
- 311 Evaporative-emissions test

312 Diagnosis

- 312 Monitoring during vehicle operation (on-board diagnosis)
- 315 On-board diagnosis system for passenger cars and light-duty trucks
- 332 Diagnosis in the workshop

334 ECU development

- 334 Hardware development
- 338 Function development
- 340 Software development
- 344 Application-related adaptation
- 351 Quality management

352 Index of technical terms

- 352 Technical terms
- 358 Abbreviations

Background information

- 51 History of compressor-engine automobiles
- 59 The story of fuel injection
- 143 Real-world fuel economy
- 153 Magneto ignition applications
- 166 Danger of accident
- 201 100 years of spark plugs – product variety
- 225 Motronic systems in motorsport
- 247 Miniaturization
- 255 Micromechanics
- 267 Performance of electronic control units
- 271 Greenhouse effect
- 287 Catalysis
- 291 Ozone and smog
- 331 Global service
