Contents

Chapter 1	From Human Genome to Rice Genome and Beyond BGI — A Success Story of Jumpstarting Genomic Projects	1
	<i>Bin Liu, Jun Yu, Jian Wang and Huanming Yang</i>	
Chapter 2	Rice Genomics and the Future of Publicly Funded Rice Research	13
	<i>Ronald P. Cantrell</i>	
Chapter 3	Rice Bioinformatics: From Sequences to Applications	27
	<i>B. A. Antonio, N. Namiki, T. Matsumoto and T. Sasaki</i>	
Chapter 4	Rice Microarray Project in Japan	45
	<i>Shoshi Kikuchi</i>	
Chapter 5	Rice Functional Genomics by T-DNA Insertional Mutagenesis	57
	<i>Gynheung An</i>	
Chapter 6	Rice Functional Genomics by Transposon Mutagenesis	65
	<i>Chang-deok Han</i>	
Chapter 7	Rice Gene Machine: A Vehicle for Finding Functions of Cereal Genes	79
	<i>Narayana M. Upadhyaya, Qianhao Zhu, Andrew Eamens and Elizabeth S. Dennis</i>	

Chapter 8	Hybrid Rice: The Future of Rice Cultivation <i>S. S. Virmani</i>	93
Chapter 9	Rice Biotech Research at Taiwan Agricultural Research Institute <i>Chang-Sheng Wang, Tong-Hai Tseng and Chien-Yih Lin</i>	111
Chapter 10	An International Campaign for Agricultural and Livestock Genomics (CALG) <i>Jun Yu, Jian Wang and Huanming Yang</i>	129
Chapter 11	Retrospective and Advance in Rice Improvement in China <i>Zhongxiu Sun, Defeng Zhu and Xiangqing Lin</i>	145
