

SECOND EDITION

APPLIED BODY COMPOSITION ASSESSMENT

VIVIAN H. HEYWARD
DALE R. WAGNER

Contents

Preface ix

Acknowledgments xi

PART I	Body Composition Methods	1
CHAPTER 1	Body Composition Definitions, Classification, and Models	3
	Definitions and Classification of Body Fatness	4
	Body Composition Models	6
	Review Material	12
CHAPTER 2	Use of Regression Analysis in Body Composition	15
	Basic Statistical Concepts	15
	Bivariate Regression Analysis	16
	Multiple Regression Analysis	17
	Polynomial Regression	18
	Cross-Validation Techniques	18
	Criteria for Evaluating Methods and Prediction Equations for Groups	19
	Criteria for Evaluating Methods and Prediction Equations for Individuals	21
	Review Material	23
CHAPTER 3	Body Composition Reference Methods	27
	Hydrodensitometry	27
	Air Displacement Plethysmography	33
	Hydrometry	37
	Dual-Energy X-Ray Absorptiometry	40
	A Combined-Methods Approach for Reference Measures	43
	Additional Reference Methods	44
	Summary	44
	Review Material	45
CHAPTER 4	Skinfold Method	49
	Assumptions and Principles of the Skinfold Method	49
	Skinfold Prediction Models	50
	Using the Skinfold Method	51
	Skinfold Technique	51
	Sources of Measurement Error	57
	Review Material	65

CHAPTER 5	Additional Anthropometric Methods	67
	Assumptions and Principles of the Anthropometric Method	67
	Using the Anthropometric Method to Estimate Body Composition	68
	Using Anthropometric Indices for Classification of Disease Risk	75
	Using Anthropometric Measures for Frame Size Classification and Anthropometric Profiles	79
	Review Material	82
CHAPTER 6	Bioelectrical Impedance Analysis Method	87
	Assumptions and Principles of the BIA Method	88
	BIA Models and Approaches	89
	Using the BIA Method	92
	BIA Technique	93
	Sources of Measurement Error	94
	Review Material	97
CHAPTER 7	Near-Infrared Interactance Method	99
	Assumptions and Principles of the NIR Method	99
	NIR Prediction Models	101
	Using the NIR Method	102
	NIR Technique	102
	Sources of Measurement Error	103
	Review Material	105
PART II	Body Composition Methods and Equations for Healthy Populations	107
CHAPTER 8	Body Composition and Children	109
	Fat-Free Body Composition of Children	110
	Body Composition Models and Reference Methods	110
	Field Methods and Prediction Equations	112
	Review Material	120
CHAPTER 9	Body Composition and Older Adults	123
	Fat-Free Body Composition of Older Adults	124
	Body Composition Models and Reference Methods	124
	Field Methods and Prediction Equations	126
	Review Material	133
CHAPTER 10	Body Composition and Ethnicity	135
	Body Composition Models and Reference Methods	136
	Assessing Body Composition of African Americans	137
	Assessing Body Composition of American Indians	142

	Assessing Body Composition of Asians	145
	Assessing Body Composition of Caucasians	149
	Assessing Body Composition of Hispanics	152
	Review Material	155
CHAPTER 11	Body Composition and Athletes	159
	Fat-Free Body Composition of Athletes	160
	Body Composition Models and Reference Methods	161
	Field Methods and Prediction Equations	162
	Low Body Fat and Health Risks	169
	Review Material	172
PART III	Body Composition Methods and Equations for Clinical Populations	175
CHAPTER 12	Body Composition and Cardiopulmonary Diseases	177
	Coronary Artery Disease and Heart Failure	177
	Heart and Lung Transplants	179
	Chronic Obstructive Pulmonary Disease and Restrictive Pulmonary Disease	180
	Cystic Fibrosis	182
	Review Material	183
CHAPTER 13	Body Composition and Metabolic Diseases	185
	Obesity	186
	Diabetes Mellitus	190
	Thyroid Diseases	191
	Review Material	192
CHAPTER 14	Body Composition and Wasting Diseases and Disorders	195
	Anorexia Nervosa	195
	HIV and AIDS	197
	Cancer	200
	Kidney Failure and Dialysis	200
	Cirrhosis and Other Liver Diseases	201
	Spinal Cord Injury	202
	Neuromuscular Diseases	204
	Review Material	205
CHAPTER 15	Assessing Body Composition Changes	209
	Reference Methods	209
	Field Methods and Prediction Equations	210
	Summary	212
	Review Material	213

APPENDIX A	Derivation of Constants for 2-C Model Conversion Formulas	215
APPENDIX B	Field Method and Prediction Equation Finders	217
	B.1 Field Method and Prediction Equation Finder for Healthy Adults	217
	B.2 Field Method and Prediction Equation Finder for Children and Older Adults	218
	B.3 Field Method and Prediction Equation Finder for Athletes	219
	B.4 Field Method and Prediction Equation Finder for Clinical Populations	220
APPENDIX C	Sources for Body Composition Equipment	221
	Abbreviations and Symbols	225
	Glossary	227
	References	233
	Index	260
	About the Authors	268
