Industrial Control Electronics:

Devices, Systems & Applications

Lab.source

3rd Edition

Bartelt

Section 1 Industrial Control Overview

Chapter 1 Introduction to Industrial Control Systems	3
Introduction	3
1-1 Industrial Control Classifications	4
Motion and Process Controls	4
Open- and Closed-Loop Systems	5
1-2 Elements of Open- and Closed-Loop Systems	8
1-3 Feedback Control	10
1-4 Practical Feedback Application	12
1-5 Dynamic Response of a Closed-Loop System	13
1-6 Feed-Forward Control	13
Problems	15
Chapter 2 Interfacing Devices	17
Introduction	17
2-1 Fundamental Operational Amplifiers	17
Operational Amplifier Comparator	18
Inverting Op Amp	19
Summing Amplifier	20
Noninverting Amplifier	21
Difference Operational Amplifier	21
2-2 Signal Processors	22
Integrator Operational Amplifier	22
Differentiator Operational Amplifier	23
Wave-Shaping Schmitt Trigger	24
2-3 Comparator Devices	26
Digital Magnitude Comparator	26
2-4 Optoelectronic Interface Devices	27
Photodiodes	29
Phototransistors	29
Photo SCR	29
Photo Triac	30
Optoelectronic Packaging	30
2-5 Digital-to-Analog Converters	31
Integrated-Circuit Digital-to-Analog Converter	33
2-6 Analog-to-Digital Converters	34
Integrated-Circuit Analog-to-Digital Converter	36
2-7 Timing Devices	37
555 Astable Multivibrator	39
555 Monostable Multivibrator	40
Problems	43

Chapter 3 Thyristors	45
Introduction	45
3-1 Silicon-Controlled Rectifiers	46
SCR Construction	46
SCR Operation	46
SCR Equivalent Circuit	46
Current–Voltage Characteristics of an SCR	47
Triggering Methods of an SCR	48
Phase Control SCR Circuit	50
Temperature-Operated Alarms	51
3-2 Unijunction Transistors	53
Current–Voltage Characteristics of a UJT	53
Relaxation Oscillator	56
3-3 Diac	56
Diac Operation	56
Current–Voltage Characteristics of a Diac	57
3-4 Triac	58
Current–Voltage Characteristics of a Triac	61
Gate Control of a Triac	62
3-5 IGBTs	64
Turn-On	64
Turn-Off	65
Problems	65

Section 2 The Controller

Chapter 4 The Controller Operation	69
Introduction	69
4-1 Control Modes	70
4-2 On-Off Control	70
4-3 Proportional Control	73
Controller Amplification	75
Steady-State Error	76
4-4 Proportional-Integral Control	79
4-5 Proportional-Integral-Derivative Control	81
4-6 Time-Proportioning Control	85
4-7 Time-Proportioning Circuit	86
Problems	88

Section 3 Electric Motors

Chapter 5 DC Motors	91
Introduction	91
5-1 Principles of Operation	91
5-2 Rotary Motion	93
5-3 Practical DC Motors	96

5-4	Control of Field Flux	96
5-5	Counterelectromotive Force	96
5-6	Armature Reaction	97
	Interpoles	98
5-7	Motor Selection	98
	Speed Regulation	99
	Work	101
	Power	101
	Kilowatt (kW) Rating of a Motor	102
	Motor Efficiency	102
5-8	Interrelationships	103
5-9	Basic Motor Construction	103
5-10	Motor Classifications	105
	The Shunt Motor	105
	The Series Motor	109
	The Compound Motor	110
	Reversing DC Motors	112
5-11	Coil Terminal Identification	113
	Problems	113
 Chapter 6 AC Motors		115
	Introduction	115
6-1	Fundamental Operation	115
	Alternating Field	116
	Rotary Field	117
6-2	Stator Construction and Operation	118
	Stator Construction	118
6-3	Types of AC Motors	122
	Rotor	122
	Rotor Construction	122
6-4	Single-Phase Induction Motors	124
6-5	Resistance-Start Induction-Run Motor	124
	Operating Characteristics	125
6-6	Capacitor-Start Induction-Run Motor	126
6-7	Shaded-Pole Motor	127
6-8	Troubleshooting Split-Phase AC Motors	129
	Thermal Protection	129
6-9	Universal Motors	130
6-10	Three-Phase Motors	131
6-11	Induction Motor	132
6-12	Wound-Rotor Motor	133
	Start-Up	134
	Speed Control	135
6-13	Synchronous Motor	135
	Starting Synchronous Motors	136
	Reaching Synchronous Speed	136
	Power Factor Correction	137
6-14	Motor Nameplate	139

NEMA Standards	139
The Nameplate	139
Problems	142
Chapter 7 Servo Motors	143
Introduction	143
7-1 DC Servo Motors	143
7-2 Wound Armature PM Motor	144
7-3 Moving Coil Motor	144
7-4 Brushless DC Motors	146
7-5 Stepper Motors	148
7-6 Permanent Magnet Stepper Motor	149
Half-Stepping	151
7-7 Variable Reluctance Stepper Motor	153
Stepper Motor Terminology	154
Microstepping	155
7-8 AC Servo Motors	157
AC Brushless Servo Motor	157
Problems	158

Section 4 Variable Speed Drives

Chapter 8 DC Drives	161
Introduction	161
8-1 DC Drive Fundamentals	162
Operator Control	162
Drive Controller	162
DC Motor	162
Speed Regulator (Feedback Method)	162
8-2 Variable Voltage DC Drive	163
Motor Speed Control	164
Speed Regulation	165
IR Compensation	165
Current Limiting	166
High Speed/Low Speed Adjustment	167
Acceleration/Deceleration Adjustment	167
Methods Used to Adjust Parameters	167
Field Current Speed Control	168
Load Characteristics	168
8-3 Motor Braking	170
Dynamic Braking	170
Regenerative Braking	171
Problems	172
Chapter 9 AC Drives	175
Introduction	175
9-1 AC Drive Fundamentals	176
9-2 AC Drive System	177

9-3	Drive Controller Internal Circuitry	178
	Converter	178
	The Intermediate Circuit	179
	Inverter	179
	Control Circuit	179
9-4	Circuit Operation of the AC Drive	179
	The Converter	179
	The Inverter Operation	180
9-5	Flux Vector Control	185
9-6	PWM Control Methods	188
	Volts/Hertz Control	188
	AC Closed-Loop Vector	190
	Sensorless Vector Drives	190
9-7	Control Panel Inputs and Drive Functions	191
	Input Options	192
	Drive Functions	194
9-8	Inverter Self-Protection Function	195
9-9	Motor Braking	196
	Regenerative Braking	196
	Common Bussing	196
9-10	Four-Quadrant Operation of AC Motors	197
9-11	AC Drive Selection	198
	Torque Requirements	198
	Programming Capability Requirements	199
	Multimotor Application	200
9-12	Motors Driven by AC Drives	200
	Problems	201

Section 5 Process Control and Instrumentation

Chapter 10	Pressure Systems	207
	Introduction	207
10-1	Pressure Laws	208
10-2	Properties of a Liquid	208
	Height	208
	Weight	209
	Temperature	209
	Atmospheric Pressure	209
	Mechanical Machines	210
10-3	Properties of a Gas	210
	Temperature of the Gas	210
	Volume of the Gas Container	210
	Gas Removal from a Container	211
10-4	Pressure Measurement Scales	211
	Gage Pressure Scale	211
	Absolute Pressure Scale	212
	Differential Pressure Scale	213
	Vacuum Pressure Scale	213

10-5	Pressure Measurement Instruments	214
10-6	Nonelectrical Pressure Sensors	214
	Liquid Column Gauges	214
	Mechanical Gauges	216
10-7	Electronic Pressure Sensors	218
	Semiconductor Strain Gauges	218
	Transverse Voltage Strain Gauge	218
	Variable Capacitor Pressure Detector	220
10-8	Pressure Control Systems	220
	Hydraulic Systems	220
	Pneumatic Systems	222
	Vacuum Systems	222
	Static Pressure Systems	223
	Steam Pressure Systems	224
	Problems	225
Chapter 11 Temperature Control		227
	Introduction	227
11-1	Fundamentals of Temperature	228
11-2	Thermal Control Systems	228
11-3	Thermodynamic Transfer	228
11-4	Thermal Energy Source	229
	Industrial Furnaces	229
	Cooling Systems	230
11-5	Temperature Measurements	231
	Temperature Scales	232
11-6	Temperature Indicating Devices	232
	Crayons	232
	Paints	233
	Pellets	233
	Labels	233
	Liquid Crystal Indicator	233
	Liquid Filled Thermometers	233
11-7	Electronic Sensors	234
	Thermistor	234
	Resistance Temperature Detectors	236
	Thermocouple	237
	Probe Assemblies	242
	Radiation Thermometry	243
	Problems	246
Chapter 12 Flow Control		247
	Introduction	247
12-1	Systems Concepts	248
	Reasons for Control	249
12-2	Flow Units of Measurement	249
	Volumetric Flow Rate	249
	Mass Flow Rate	250

12-3	Solid Flow Measurement	250
12-4	Fluid Flow Measurement	251
	Pipe Flow Principles	251
	Fluid Flowmeter Classification	252
12-5	Electronic Sensors	257
	Coriolis Meters	257
	Rotor Flow Detectors	257
	Electromagnetic Flow Detectors	257
	Thermal Flowmeters	258
	Vortex Flowmeters	258
	Ultrasonic Flowmeters	259
	Time-of-Flight Flowmeter	260
12-6	Flowmeter Placement	261
12-7	Selecting a Flowmeter	262
	Problems	262
 Chapter 13 Level Control Systems		263
	Introduction	263
13-1	A Level Control System	264
	Power Sources	265
	Transfer Systems	265
13-2	Methods of Measurement	265
	Point Level Measurements	266
	Continuous Level Measurements	266
13-3	Level Measurement Methods	266
	Visual Methods	266
	Float and Displacement Methods	267
13-4	Electronic Sensors	271
	Conductive Probes	271
	Capacitive Probes	272
	Ultrasonic Sensors	272
13-5	Selecting a Level Sensor	273
	Problems	274
 Chapter 14 Analytical Instrumentation		275
	Introduction	275
14-1	pH Measurement and Control	276
	pH Measurements	278
	Controlling pH	280
14-2	Conductivity	282
	Conductivity Electrode Probe	283
	Conductivity Inductive Probe	284
	Conductivity Applications and Control	284
14-3	Combustion Analyzers and Control	286
	Combustible Gases	286
	Hydrocarbon Gases	287
	Controlling Combustion	288
14-4	Humidity	289

Quantitative Measures of Humidity	289
Absolute Humidity Sensor	290
Relative Humidity Detectors	291
Dew Point Measurements	293
Controlling Humidity	294
14-5 Sampling Measurement System	295
Problems	295
Chapter 15 Industrial Process Techniques and Instrumentation	297
Introduction	298
15-1 Batch Processes	298
Control Requirements	299
Types of Batch Processes	300
15-2 Continuous Processes	301
Control Requirements	301
15-3 Instrumentation	304
15-4 Measurement Devices (Sensors)	305
Dynamic	305
Static	305
15-5 Feedback Loop Interface Instruments	308
Transmitters	308
Transducers	309
15-6 Controllers	312
Pneumatic Controllers	312
Panel-Mounted Controllers	313
Personal Computers	313
Programmable Logic Controllers	314
Distributed Control Systems (DCS)	314
15-7 Monitoring Instruments	315
Indicators	315
Alarms	316
Recorders	316
15-8 Manipulation Devices (The Final Control Element)	317
The Control Valve	317
DC and AC Motors	324
15-9 Instrumentation Symbolology	324
General Instrument Symbols	324
Tag Numbers	325
Line Symbols	328
Valve and Actuator Symbols	329
Reading a Single Loop	330
Information Block	331
Problems	332
Chapter 16 Process Control Methods	335
Introduction	336
16-1 Open-Loop Control	336
16-2 Closed-Loop Control	336

	Process Behavior	337
16-3	Single-Variable Control Loop	338
	Response Time of the Instruments	339
	Pure Lag of the Controlled Variable	339
	Dead Time	339
16-4	Selecting a Controller	340
16-5	On-Off Control	341
	Case Studies—Using Different Control Modes	343
16-6	Continuous Control	345
	Proportional Mode	345
	Integral Mode	351
	Derivative Mode	354
16-7	Tuning the Controller	357
	Trial-and-Error Tuning Method	358
	Ziegler-Nichols Tuning Methods	359
	Ziegler-Nichols Continuous Cycling Method	359
	Ziegler-Nichols Reaction Curve Tuning Method	365
	Controller Autotuning	370
16-8	Advanced Control Techniques	370
	Cascade Control	370
	Feed-Forward Control	372
	Ratio Control	374
	Adaptive Control	375
	Problems	377

Section 6 Detection Sensors

Chapter 17	Industrial Detection Sensors and Interfacing	383
	Introduction	383
17-1	Limit Switches	384
17-2	Proximity Detectors	385
17-3	Inductive Proximity Switches	385
	Parts of an Inductive Proximity Switch	385
	Operation of an Inductive Proximity Switch	387
	Analog Inductive Sensor	391
17-4	Capacitive Proximity Switches	391
	Operation of a Capacitive Proximity Switch	392
17-5	Hall-Effect Sensor	395
	Linear Hall-Effect Sensors	397
	Digital Hall-Effect Sensor	397
17-6	Photoelectric Sensors	398
	Light Source	399
	Light Sensor	400
	The Sensor Circuitry	400
17-7	Methods of Detection	402
	Opposed Sensing Method	402
	Retroreflective Scanning Method	403
	Diffuse Sensing Method	404

	Convergent Sensing Method	405
	Specular Sensing Method	405
	Color Mark Sensing Method	406
17-8	Photoelectric Package Styles	407
17-9	Operating Specifications	409
	Sensitivity	409
	Excess Gain	409
	Field-of-View	411
	Sensor Response	412
17-10	Ultrasonic Sensors	413
17-11	Sensor Interfacing	414
	Switched Signal	415
	Analog Signal	424
	Problems	424

Section 7 Programmable Controllers

Chapter 18	Introduction to Programmable Controllers	429
	Introduction to PLC Functions	429
18-1	Industrial Motor Control Circuits	429
	Wiring	431
	Mechanical Connections	431
	Components Used as Input Devices	431
	Components Used as Output Devices	434
18-2	Relay Ladder Logic Circuits	436
	<i>AND</i> Function	436
	<i>OR</i> Function	436
	<i>NOT</i> Function	437
	<i>NAND</i> Function	437
	<i>NOR</i> Function	437
	START/STOP Interlocking Circuit	437
18-3	Building a Ladder Diagram	438
	Modification 1	438
	Modification 2	439
	Modification 3	439
	Modification 4	439
	Multi-Rung Control	440
	Labeling Components and Connections in a Ladder Circuit	440
18-4	Motor Control Starter Circuits	441
	Control Circuitry Section	443
	Introduction to PLC Components	445
18-5	Rack Assembly	446
18-6	Power Supply	447
18-7	PLC Programming Units	448
	Handheld Programmers	448
	Dedicated Terminals	448
	Microcomputers	448
18-8	Input/Output Sections	449

	Output Modules	451
	Module Termination	452
18-9	Processor Unit	453
	Central Processing Unit	453
	Arithmetic Logic Unit	453
	Memory	453
18-10	Addressing	457
	Word Address	457
	Element Address	458
	Bit Address	458
	Input/Output Address	459
18-11	Relationship of Data File Addresses to I/O Modules	460
	Problems	462

Chapter 19 Fundamental PLC Programming 465

	Introduction	465
19-1	PLC Program Execution	465
19-2	Ladder Diagram Programming Language	467
19-3	Ladder Diagram Programming	467
19-4	Relay Logic Instructions	468
19-5	Timer Instructions	471
	Cascading Timers	475
19-6	Counter Instructions	476
19-7	Data Manipulation Instructions	479
	Data Transfer	479
	Data Conversion	481
	Data Compare	483
19-8	Arithmetic Operations	484
19-9	Writing a Program	487
	Problems	488

Chapter 20 Advanced Programming, PLC Interfacing, and Troubleshooting 491

	Introduction	491
20-1	Jump Commands	491
20-2	Data Manipulation	494
	Shift Registers	494
	Sequencers	499
	Programmable Controller Interfacing	503
20-3	Discrete Input/Output Modules	503
	Discrete Input Modules	503
	Discrete Output Modules	506
20-4	Troubleshooting I/O Interfaces	509
	Discrete Interface Testing	509
20-5	Analog Input and Output Signals	511
	Analog Input Module	512
	Analog Output Module	514

20-6	Special Purpose Modules	517
	Bar Code Modules	517
	Radio Frequency Module	518
	Vision System Modules	519
	PID Control Modules	519
	Fuzzy Logic Modules	519
	Stepper Motor Module	520
	Thermocouple Modules	520
20-7	Troubleshooting Programmable Controllers	520
	Problems	521

Section 8 Motion Control

Chapter 21	Motion Control Feedback Devices	525
	Introduction	525
21-1	Angular Velocity Feedback Devices	526
	Tachometers	526
21-2	Angular Displacement Feedback Devices	527
	Potentiometers	527
	Optical Encoders	529
	Resolvers	537
21-3	Linear Displacement Feedback Devices	541
	Inductosyn	541
	Linear Displacement Transducer	544
	Wire Rope Transducer	547
	Problems	548
Chapter 22	Elements of Motion Control	549
	Introduction	549
22-1	Motion Control Parameters	549
	Position Control	550
	Velocity Control	550
	Acceleration/Deceleration Control	550
	Torque Control	550
22-2	Motion Control Elements	550
	Operator Interface	551
	Controller	551
	Amplifier	551
	Actuator	551
	Feedback	551
22-3	Terminology	551
22-4	Operator Interface Block	552
22-5	Controller Block	553
22-6	Amplifier Block	554
22-7	Actuator Block	555
	Electric Motors	556
	Actuator Transmission Systems	559

Positioning Movements	562
22-8 Feedback Transducer Block	564
Presence Indicators	564
Position Transducers	564
Problems	565
Chapter 23 Fundamentals of Servomechanisms	567
Introduction	567
23-1 Open-Loop and Closed-Loop Systems	567
Open-Loop Systems	567
Closed-Loop Systems	568
23-2 Closed-Loop Velocity Servo	568
23-3 Bang-Bang Position Servo	570
23-4 Proportional Position Servomechanisms	571
Analog Position Servo	571
23-5 Digital Position Control	572
Digital Position Control Operation	574
Electrohydraulic Linear Position Servo	575
23-6 Characteristics of a Servomechanism	576
23-7 Designing a Position Servo	577
Point-to-Point	577
Contouring	580
23-8 Digital Controller	580
Current Loop	581
Velocity Loop	581
Position Loop	582
23-9 Tuning a Servomechanism	584
23-10 Master-Slave Servosystem	585
Problems	587
Chapter 24 Functional Industrial Systems	
Please see the CD that accompanies this textbook.	
Answers to Odd-Numbered Problems	589
Glossary	595
Index	607
