

# WASTE MANAGEMENT PRACTICES

*Municipal, Hazardous, and Industrial*

**John Pichtel**

# Table of Contents

## Part I

Historical and Regulatory Development .....	1
---	---

### Chapter 1

Introduction .....	3
1.1 Definition of a Solid Waste .....	5
1.2 Categories of Wastes .....	6
1.2.1 Municipal Solid Waste .....	6
1.2.2 Hazardous Waste .....	8
1.2.3 Industrial Waste .....	8
1.2.4 Medical Waste .....	9
1.2.5 Universal Waste .....	9
1.2.6 Construction and Demolition Debris .....	10
1.2.7 Radioactive Waste.....	10
1.2.8 Mining Waste.....	11
1.2.9 Agricultural Waste.....	12
1.3 Generation of MSW .....	13
1.4 Solid Waste Management.....	13
1.4.1 Source Reduction .....	16
1.4.2 Recycling.....	17
1.4.3 Incineration.....	17
1.4.4 Land Disposal.....	17
1.4.5 Goals at the Federal Level.....	18
References .....	18
Suggested Readings and Web Sites.....	19
Questions.....	19

### Chapter 2

A Brief History of Waste Management.....	21
2.1 Introduction .....	21
2.2 Earliest Civilizations .....	21
2.3 Greece.....	22
2.4 Rome .....	22
2.5 Europe .....	23
2.6 United States .....	28
2.7 Recent Waste Management Initiatives .....	36
2.8 Solid Waste Incineration and other Thermal Processes.....	38
2.9 Land Disposal and the Sanitary Landfill .....	42
2.10 Recycling/Reuse.....	44
References .....	45
Questions.....	46

### Chapter 3

Regulatory Development.....	47
3.1 Introduction .....	47
3.2 Significant U.S. Legislation .....	47
3.2.1 The Solid Waste Disposal Act.....	47
3.2.2 The Resource Recovery Act.....	48
3.2.3 The Resource Conservation and Recovery Act.....	48
3.2.4 Solid Waste Management under RCRA.....	48
3.2.5 Regulation of Hazardous Waste under RCRA.....	49
3.2.6 Underground Storage Tank Management.....	51
3.2.7 Amendments to RCRA.....	51
3.2.7.1 The 1980 Amendments.....	51
3.2.7.2 The Comprehensive Environmental Response, Compensation and Liability Act of 1980.....	51
3.2.7.3 The Hazardous and Solid Waste Amendments of 1984.....	52
3.2.7.4 The Medical Waste Tracking Act.....	52
3.2.7.5 The Federal Facility Compliance Act.....	53
3.2.7.6 The 1996 Amendments.....	53
3.3 Other Recent Laws Affecting MSW Management.....	54
3.3.1 The Public Utility Regulation and Policy Act of 1978.....	54
3.3.2 Sanitary Food Transportation Act.....	54
3.3.3 Clean Air Act.....	54
3.3.4 Pollution Prevention Act.....	54
3.3.5 Indian Lands Open Dump Cleanup Act.....	55
3.3.6 Mercury-Containing and Rechargeable Battery Management Act.....	55
3.4 Relationship of RCRA with other Environmental Statutes.....	55
3.5 Laws, Regulations and other Actions at the Federal Level.....	56
3.5.1 The Lawmaking Process.....	56
3.5.2 Regulations.....	57
3.5.3 Guidance and Policy.....	58
3.5.4 Public Involvement in RCRA.....	59
References.....	59
Suggested Readings.....	59
Questions.....	60

## Part II

Municipal Solid Wastes.....	61
-----------------------------	----

### Chapter 4

Characterization of Solid Waste.....	63
4.1 Introduction.....	63
4.2 Sampling Protocols for MSW.....	63
4.2.1 Direct Sampling.....	63
4.2.2 Material Flows.....	64
4.2.3 Surveys.....	64
4.2.4 Multipliers for Projecting Waste Quantities.....	64
4.3 Variability Affecting Waste Sampling.....	66
4.3.1 Seasonal.....	66
4.3.2 Regional.....	67
4.3.3 Household.....	67
4.3.4 National Economy.....	68

4.4	Common Components in Municipal Solid Waste.....	68
4.4.1	Paper Products.....	68
4.4.2	Glass.....	68
4.4.3	Aluminum.....	71
4.4.4	Ferrous Metals.....	71
4.4.5	Other Nonferrous Metals.....	71
4.4.6	Plastics.....	71
4.4.7	Rubber and Leather.....	72
4.4.8	Textiles.....	72
4.4.9	Food Wastes.....	73
4.4.10	Yard Waste.....	74
4.4.11	Household Hazardous Wastes.....	74
4.4.11.1	Toxic Metals.....	76
4.4.11.2	Organic Compounds.....	76
4.5	Chemical Properties of MSW.....	78
4.5.1	Ultimate Analysis of Solid Waste Components.....	80
4.5.2	Proximate Analysis of MSW.....	82
4.5.3	Energy Content of MSW.....	84
4.5.4	Fusion Point of Ash.....	87
4.5.5	Content of Nutrients and other Substrates.....	88
4.5.6	Carbohydrates.....	89
4.5.7	Crude Fibers.....	90
4.5.8	Proteins.....	90
4.5.9	Lipids.....	90
4.5.10	Biodegradability of MSW Fractions.....	90
4.6	Physical Properties of MSW.....	92
4.6.1	Density.....	92
4.6.2	Moisture Content.....	95
4.6.3	Particle Size Distribution.....	96
4.6.4	Field Capacity.....	98
4.6.5	Hydraulic Conductivity of Compacted Waste.....	98
	References.....	99
	Suggested Readings and Web Sites.....	100
	Questions.....	100
	Excel Exercise.....	103

## Chapter 5

	Municipal Solid Waste Collection.....	105
5.1	Introduction.....	105
5.2	Developing a Waste Collection System.....	105
5.2.1	Characterization of Wastes.....	105
5.2.2	Service Area and Level of Service.....	106
5.2.3	Public vs. Private Collection.....	106
5.2.4	Funding the Collection System.....	106
5.2.5	Labor Contracts.....	107
5.3	Logistics of the Collection Program.....	107
5.3.1	Storage Container Requirements.....	107
5.3.2	Set-Out Requirements.....	107
5.3.3	Waste Separation.....	108
5.3.4	Frequency of Collection.....	108
5.3.5	Waste Pickup Locations.....	109
5.3.6	Collection Equipment.....	110

5.3.7	Automated Waste Collection .....	111
5.3.8	Developing Collection Routes.....	114
5.3.9	Route Development .....	115
5.3.10	Computer-Assisted Routing .....	116
5.3.11	Waste Transfer.....	116
5.3.12	Types of Transfer Stations.....	117
	5.3.12.1 Small to Medium Transfer Stations (capacity of less than 100 to 500 tons/day).....	119
	5.3.12.2 Large Transfer Stations.....	119
5.3.13	Transfer Vehicles .....	123
	5.3.13.1 Trucks and Semitrailers.....	123
	5.3.13.2 Rail Cars .....	123
	References .....	124
	Suggested Readings .....	124
	Questions.....	126

## Chapter 6

	Recycling Solid Wastes .....	127
6.1	Introduction .....	127
6.2	Recycling Terminology .....	128
6.3	Recycling Progress and Statistics .....	129
6.4	Recovery and Markets for Components of the Waste Stream .....	130
6.5	Market Issues.....	130
6.6	Purity of Materials .....	131
6.7	Paper.....	131
	6.7.1 Paper Manufacture.....	131
	6.7.2 Paper Recycling.....	133
	6.7.3 Other Paper Markets.....	135
	6.7.4 Benefits of Paper Recycling .....	136
6.8	Glass.....	136
	6.8.1 Glass Manufacture.....	136
	6.8.2 Glass Recycling.....	137
	6.8.3 The Glass Recycling Process .....	137
	6.8.4 Color.....	138
	6.8.5 Contamination .....	138
	6.8.6 Glass Markets .....	139
	6.8.7 Container Glass .....	139
	6.8.8 Other Uses for Recycled Glass .....	140
	6.8.9 Benefits of Glass Recycling .....	140
6.9	Aluminum.....	141
	6.9.1 Aluminum Manufacturing .....	141
	6.9.2 Aluminum Recycling.....	142
	6.9.3 Specifications for Recovered Aluminum Cans .....	144
	6.9.4 Benefits of Aluminum Recycling .....	144
	6.9.5 One Final Note on Aluminum .....	145
6.10	Ferrous Metals.....	145
	6.10.1 Steel Manufacture.....	145
	6.10.2 Ferrous Recycling.....	146
	6.10.3 Benefits of Ferrous Recycling.....	151

6.11	Plastics.....	151
6.11.1	Plastics Manufacture .....	152
6.11.2	Extrusion.....	152
6.11.3	Blow Molding.....	153
6.11.4	Injection Molding.....	154
6.11.5	Compression Molding.....	154
6.11.6	Plastics Recycling.....	154
6.11.7	Processing for Recycling.....	155
6.12	Yard Waste.....	157
6.13	Food Waste .....	157
6.14	Tires and Rubber .....	157
6.14.1	Design and Manufacture .....	158
6.14.2	Disposal and Recycling.....	158
6.14.3	Recycling.....	160
6.14.4	Crumb Rubber.....	161
6.14.5	Retreaded Tires.....	161
6.15	Goals for the Nation.....	164
	References .....	164
	Suggested Readings .....	165
	Questions.....	166

## Chapter 7

	Municipal Solid Waste Processing; Materials Recovery Facilities.....	169
7.1	Introduction .....	169
7.2	The Materials Recovery Facility.....	169
7.2.1	Unit Operations .....	171
7.2.2	Weigh station .....	172
7.2.3	Receiving Area .....	172
7.2.4	Storage Area .....	172
7.2.5	Mobile Equipment in the MRF.....	175
7.2.6	Fixed Equipment in the MRF.....	175
7.2.7	Conveyors.....	175
7.2.8	Scales.....	178
7.3	Materials Recovery at MRF Unit Operations.....	178
7.4	Materials Separation and Processing at the MRF.....	180
7.4.1	Hand-Sorting .....	180
7.4.2	Screening.....	181
7.4.2.1	Trommel Screens.....	182
7.4.2.2	Disk Screens.....	186
7.4.2.3	Vibrating Screens .....	186
7.4.3	Size Reduction.....	187
7.4.3.1	Densifiers.....	187
7.4.3.2	Compactors.....	187
7.4.3.3	Baler .....	188
7.4.3.4	Shredders.....	189
7.4.3.5	Hammermills.....	190
7.4.3.6	Horizontal-Shaft Hammermills .....	190
7.4.3.7	Vertical-Shaft Hammermills.....	191
7.4.3.8	Flail Mill.....	193

7.4.3.9	Rotary Shear.....	194
7.4.3.10	Hammer Wear.....	194
7.4.3.11	Safety Issues Related to Size Reduction.....	194
7.4.4	Magnetic Separation.....	196
7.4.5	Eddy Current Device.....	199
7.4.6	Air Classifier.....	200
7.4.7	Efficiency of Separation in an Air Classifier.....	204
7.4.8	Miscellaneous Processing.....	205
7.4.8.1	Dryers.....	205
7.5	Materials Flow in the MRF.....	206
7.6	The Contamination Issue.....	207
7.7	Environmental Control.....	208
7.7.1	Dust Collection.....	208
7.7.2	Odors and their Control.....	209
7.7.3	Noise Suppression.....	209
7.7.4	Aesthetics.....	209
References	.....	210
Suggested Readings	.....	211
Questions	.....	211

## Chapter 8

Composting MSW.....	213
8.1 Introduction.....	213
8.2 Benefits of Composting.....	213
8.3 Overview of the Composting Process.....	214
8.4 The Role of Microorganisms in Composting.....	214
8.5 Factors Affecting the Composting Process.....	216
8.5.1 Preprocessing of the Feedstock.....	217
8.5.2 Environmental Factors.....	217
8.5.3 Nutrients.....	218
8.5.4 C:N Ratio.....	218
8.5.5 Aeration.....	219
8.5.6 Moisture Content.....	221
8.5.7 Temperature.....	222
8.5.8 pH.....	223
8.6 The Composting Stage.....	223
8.6.1 Turned Piles.....	223
8.6.2 Turned Windrows.....	224
8.6.3 Aerated Static Piles.....	225
8.6.4 In-Vessel Systems.....	226
8.7 The Curing Stage.....	226
8.8 Environmental Concerns During Composting.....	227
8.8.1 Air Quality.....	227
8.8.2 Odor.....	227
8.8.3 Noise.....	228
8.8.4 Toxins Within the Pile.....	229
8.8.5 Leachate.....	231
8.8.6 Runoff.....	232
8.8.7 Vectors.....	233
8.8.8 Fires.....	233
8.8.9 Litter.....	234

8.9	Occupational Health and Safety Concerns During Composting .....	234
8.9.1	Bioaerosols .....	234
8.9.2	Potentially Toxic Chemicals .....	235
8.10	Facility Siting .....	235
8.10.1	Topography .....	235
8.10.2	Land Area Requirements .....	236
8.10.3	Other Factors Affecting Siting Decisions .....	236
8.11	Design .....	236
8.11.1	Preprocessing Area .....	237
8.11.2	Processing Area .....	237
8.11.3	Buffer Zone .....	237
8.11.4	Site Facilities and Security .....	237
8.12	MSW Composting by Anaerobic Processes .....	238
8.12.1	Process Description .....	239
8.12.2	Subsystems .....	239
	References .....	241
	Suggested Readings .....	243
	Questions .....	243
	Excel Exercise .....	245

## Chapter 9

	Incineration of MSW .....	247
9.1	Introduction .....	247
9.2	Combustion Concepts .....	248
9.3	The Mass-Burn Incinerator .....	250
9.4	Environmental Considerations of Mass Burn .....	254
9.4.1	Fuel Quality .....	254
9.4.2	Resource Recovery .....	254
9.4.3	Air Quality .....	254
9.4.4	Particulates .....	255
9.4.5	Acid Gases .....	256
9.4.6	Trace Gases .....	257
9.4.7	Toxic Metals .....	261
9.4.8	Aesthetics .....	262
9.5	Air Pollution Control .....	263
9.5.1	The Electrostatic Precipitator .....	263
9.5.2	Fabric Filters (Baghouses) .....	265
9.5.3	Gas Washing .....	267
9.6	Ash Quality from Mass Burn .....	270
9.6.1	Metals .....	270
9.6.2	Health Effects of Metals in Incinerator Ash .....	272
9.6.3	Leachability of Metals in Incinerator Ash .....	273
9.6.4	Ash Management .....	273
9.7	MSW Incineration in the United States: The Future .....	274
9.8	Refuse-Derived Fuel .....	275
9.8.1	Overview of RDF Preparation .....	275
9.8.2	Grades of RDF .....	276
9.8.3	Properties of RDF .....	276
9.8.4	Utilization of RDF: Practical Issues .....	278
9.8.5	Gaseous Emissions and Corrosion Issues .....	279
9.8.6	Properties of RDF Ash .....	281

9.8.7	Plastics-Derived Fuels .....	281
9.8.8	Tire-Derived Fuel (TDF) .....	282
	References .....	283
	Suggested Readings .....	285
	Questions .....	286
	Excel Exercise .....	288

## Chapter 10

	The Sanitary Landfill .....	289
10.1	Introduction .....	289
10.2	Relevant Definitions under the RCRA Regulations .....	289
10.3	Siting the Landfill .....	290
10.3.1	Airport Safety .....	290
10.3.2	Floodplains .....	290
10.3.3	Wetlands .....	291
10.3.4	Fault Areas .....	291
10.3.5	Seismic Impact Zones .....	291
10.3.6	Unstable Areas .....	291
10.4	Requirements of Operation .....	292
10.4.1	Receipt of Hazardous Waste .....	292
10.4.2	Inspections .....	293
10.4.3	Training .....	294
10.4.4	Landfill Design .....	294
10.4.5	Clay Liners .....	295
10.4.6	Hydraulic Conductivity .....	296
10.4.7	Geomembrane Liners .....	298
10.4.8	Compatibility of Liners with Wastes .....	299
10.4.9	Survivability Tests .....	301
10.4.10	Permeability .....	301
10.4.11	Stress .....	303
10.4.12	Geomembrane Liner Handling and Placement .....	304
10.4.13	Construction Quality Assurance .....	305
10.4.14	Daily Operations and Issues .....	305
10.4.14.1	Filling Sequences .....	305
10.4.14.2	Cover Materials .....	307
10.4.14.3	Disease Vector Control .....	308
10.4.14.4	Biological Control of Pests .....	308
10.4.14.5	Generation of Landfill Gases .....	310
10.4.14.6	Predicting Gas Production .....	313
10.4.14.7	Control of Explosive Gases .....	316
10.4.15	Trace Gases .....	319
10.4.16	Landfill Gas Control .....	319
10.4.16.1	Passive Systems .....	320
10.4.16.2	Active Systems .....	320
10.4.17	Gas Utilization .....	321
10.4.18	Other Air Criteria .....	324
10.4.19	Public Access .....	324
10.4.20	Control of Run-on and Runoff .....	325
10.4.21	Management of Surface Water .....	325
10.4.22	Restrictions on Liquids in Landfills .....	326
10.4.23	Leachate Formation .....	326

10.4.23.1	Estimation of Leachate Volume Produced.....	327
10.4.23.2	The Leachate Collection and Removal System.....	332
10.4.23.3	Area Collector.....	332
10.4.24	Geosynthetic Materials.....	333
10.4.25	Collection Laterals.....	334
10.4.26	Sumps.....	336
10.4.27	Leachate Treatment.....	336
10.4.28	Groundwater Monitoring and Corrective Action.....	337
10.4.29	Record Keeping.....	338
10.5	Closure.....	338
10.5.1	Low Permeability (Barrier) Layer.....	339
10.5.2	Drainage Layer.....	339
10.5.3	Erosion Control Layer.....	339
10.5.4	Gas Collection System.....	340
10.5.5	The Landfill Cap.....	340
10.5.6	Subsidence Effects.....	340
10.5.7	Weather Effects.....	340
10.6	Postclosure.....	341
10.7	The Bioreactor Landfill.....	343
10.7.1	Anaerobic Bioreactors.....	343
10.7.2	Aerobic Bioreactor.....	344
10.7.3	Anaerobic vs. Aerobic.....	345
10.7.4	Hybrid Bioreactors (Sequential Aerobic–Anaerobic).....	345
10.7.5	Practical Operational Issues.....	345
10.7.5.1	Waste Preprocessing.....	345
10.7.5.2	Daily Cover.....	346
10.7.5.3	Liquid Addition and Recirculation.....	346
10.7.5.4	Alternative Liquid Sources.....	346
10.7.5.5	Fires.....	346
10.7.6	Other Considerations.....	347
10.7.6.1	Leachate Strength Reduction.....	347
10.7.6.2	Waste Mass Shear Strength.....	347
10.7.6.3	Waste Settlement.....	347
10.7.6.4	Metals.....	347
10.7.6.5	Advantages of Bioreactor Landfills.....	348
10.7.6.6	Summary of Bioreactor Landfills.....	348
10.8	Landfill Reclamation.....	349
	References.....	350
	Suggested Readings.....	352
	Questions.....	354
A.10.1	Appendix: Landfill Gas Emissions Model.....	356
A.10.1.1	Overview.....	356
A.10.1.2	How to Use the Model.....	356
A.10.1.2.1	Entering MSW Data for a Site.....	356
A.10.1.2.2	Forecasting Landfill Emissions.....	358
A.10.1.2.3	Emissions Forecasting Example.....	358
A.10.1.3	The Hydrologic Evaluation of Landfill Performance Model.....	359
A.10.1.3.1	Using the HELP Model.....	360
A.10.1.3.2	Inputs to the Model.....	361
A.10.1.3.3	Relevant Terms and Their Values in HELP.....	362
	Excel Exercise.....	369

## Part III

### Hazardous Waste Management.....371

#### Chapter 11

Identification of Hazardous Waste .....	373
11.1 Introduction .....	373
11.2 The RCRA Subtitles.....	373
11.3 Subtitle C: The Hazardous Waste Management Program.....	375
11.3.1 Definition of a Solid Waste .....	375
11.3.2 What is a Hazardous Waste .....	376
11.3.3 Exemptions and Exclusions.....	376
11.3.4 Hazardous Waste Lists .....	377
11.3.4.1 Hazardous Waste from Nonspecific Sources.....	377
11.3.4.2 Hazardous Wastes from Specific Sources .....	377
11.3.4.3 Discarded Commercial Products, Off-Specification Materials, Container Residues, and Spill Residues .....	377
11.3.5 The Characteristic Tests .....	378
11.3.6 Ignitability .....	378
11.3.7 Corrosivity .....	378
11.3.8 Reactivity.....	379
11.3.9 Toxicity.....	379
11.3.10 Mixtures of Hazardous Wastes with Other Materials .....	381
11.3.11 The Mixture Rule .....	381
11.3.12 The Contained-In Rule .....	382
11.3.13 The Derived-From Rule .....	382
11.4 Generation of Hazardous Wastes .....	382
11.4.1 Quantities of Toxics Release Inventory Chemicals in Waste by Industry .....	383
11.4.2 Quantities of TRI Chemicals in Waste by Chemical .....	384
References .....	384
Suggested Readings and Web Sites.....	385
Questions.....	385

#### Chapter 12

Hazardous Waste Generator Requirements.....	391
12.1 Introduction .....	391
12.2 Determining the Generator Category .....	391
12.3 Generator Types .....	392
12.3.1 The Large Quantity Generator .....	392
12.3.2 The Small Quantity Generator .....	393
12.3.3 EPA Waste codes for common SQG wastes .....	394
12.3.4 The Conditionally Exempt SQG .....	398
12.3.5 Episodic Generators .....	399
12.4 Requirements for LQs and SQGs.....	399
12.4.1 The EPA Identification Number .....	399
12.4.2 Managing Hazardous Waste On-Site .....	400
12.4.3 Requirements for New Tank Systems .....	403
12.4.4 Containment Buildings.....	403
12.4.5 Emergency Preparation .....	404
12.4.6 Emergency Response.....	404
12.4.7 Personnel Training.....	405

12.4.8	Emergency Response Requirements for SQGs.....	405
12.4.9	Reporting .....	406
12.4.10	Shipment of Wastes Off-site .....	406
12.4.11	The Uniform Hazardous Waste Manifest.....	406
12.4.12	Record Keeping .....	406
12.4.13	Management of Empty Containers.....	407
12.4.14	Hazardous Waste at Satellite Accumulation Points.....	413
12.5	Requirements of CESQGs .....	413
	References .....	413
	Suggested Readings and Web Sites.....	414
	Questions.....	414
A.12.1	Appendix: Hazardous Waste Management Scenarios.....	416
A.12.1.1	Introduction .....	416
A.12.1.2	The Scenarios .....	416
A.12.1.3	Responses to Questions about Scenarios .....	422

## Chapter 13

	Hazardous Waste Transportation.....	427
13.1	Introduction .....	427
13.2	Modes of Hazardous Waste Transportation .....	428
13.3	Transportation Requirements .....	429
13.3.1	Shipping Papers.....	429
13.3.2	The Uniform Hazardous Waste Manifest.....	429
13.3.3	Hazard Communication.....	429
13.3.3.1	Identification of the Waste being Transported.....	429
13.3.3.2	The Hazardous Materials Table.....	431
13.3.3.3	Hazardous Material Classes .....	431
13.3.3.4	Packing Groups.....	434
13.3.3.5	Identification Numbers .....	437
13.3.3.6	Placards, Labels, and Markings.....	438
13.3.3.7	Hazard Warning Labels .....	438
13.3.3.8	Marking.....	439
13.3.3.9	Packaging.....	442
13.5	Emergency Response Information .....	446
13.6	Segregation (49 CFR Part 177, Subpart C).....	446
13.7	Hazardous Materials Incidents (49 CFR Part 171).....	447
13.7.1	Immediate Notice of Certain Hazardous Materials Incidents (49 CFR 171.15).....	450
13.7.2	Hazardous Materials Incidents Reports (49 CFR 171.16).....	451
	References .....	454
	Suggested Reading.....	454
	Questions .....	455
A.13.1	Appendix: Hazardous Waste Management Scenarios.....	457
A.13.1.1	Introduction .....	457
A.13.1.2	The Scenarios .....	457
A.13.1.3	Responses to Scenarios .....	458

## Chapter 14

	Treatment, Storage, and Disposal Facility Requirements.....	461
14.1	Introduction .....	461
14.2	Subpart A — General Issues Regarding Treatment, Storage and Disposal.....	462

14.3	Subpart B — General Facility Standards.....	463
14.3.1	Notification of Hazardous Waste Activity.....	463
14.3.2	Waste Analysis.....	463
14.3.3	Security.....	463
14.3.4	Inspections.....	464
14.3.5	Reactive and Ignitable Wastes.....	464
14.3.6	Training.....	465
14.4	Subpart C — Preparedness and Prevention.....	465
14.4.1	Facility Design and Operation.....	466
14.4.2	Arrangements with Local Authorities.....	466
14.5	Subpart D — Contingency Plan and Emergency Procedures.....	467
14.5.1	Contingency Plan.....	467
14.5.2	Emergency Procedures.....	467
14.6	Subpart E — Manifest System, Record Keeping, and Reporting.....	468
14.6.1	Manifest Discrepancies.....	468
14.6.2	Operating Record.....	468
14.6.3	Biennial Report.....	469
14.7	Subpart F — Releases from Solid Waste Management Units.....	469
14.7.1	Groundwater Protection Standard.....	469
14.7.2	Groundwater Monitoring Requirements.....	470
14.7.3	Detection Monitoring Program.....	470
14.7.4	Corrective Action Program.....	471
14.8	Subpart G — Closure and Postclosure.....	471
14.8.1	Closure Plan (264.112).....	471
	References.....	472
	Suggested Reading and Web Sites.....	472
	Questions.....	473
A.14.1	Appendix: Hazardous Waste Management Scenarios.....	473
A.14.1.1	Introduction.....	473
A.14.1.2	The Scenarios.....	473
A.14.1.3	Responses to Scenarios.....	476

## Chapter 15

	Incineration of Hazardous Wastes.....	477
15.1	Introduction.....	477
15.2	Combustion and its Residues.....	478
15.3	Overview of Regulatory Requirements.....	479
15.4	Combustion Standards under RCRA, Subpart O.....	479
15.4.1	Organic Compounds.....	479
15.4.2	Hydrogen Chloride HCl.....	480
15.4.3	Particulate Matter.....	480
15.4.4	Fugitive Emissions.....	482
15.4.5	Metals.....	482
15.4.6	Waste Analysis.....	482
15.4.7	Operating Conditions and the RCRA Permit.....	482
15.4.8	Obtaining the RCRA Permit.....	484
15.4.9	Monitoring and Inspections (40 CFR Part 264.347).....	484
15.4.10	Management of Residues.....	484
15.4.11	Closure.....	484
15.5	MACT Standards under the CAA.....	485
15.5.1	Organics.....	485

15.5.2	Hydrogen Chloride and Chlorine Gas.....	485
15.5.3	Particulate Matter .....	485
15.5.4	Metals .....	485
15.5.5	Operating Requirements.....	485
15.5.6	Additional Requirements.....	486
15.6	Incineration Devices.....	486
15.6.1	Liquid Injection .....	487
15.6.2	Air Requirements in Liquid Injectors .....	489
15.6.3	Overview of Liquid Injection .....	490
15.6.4	Rotary Kilns .....	490
15.6.5	Overview of Rotary Kiln Incineration .....	494
15.6.6	Boilers and Industrial Furnaces.....	494
15.6.7	Industrial Boilers .....	494
15.6.8	Cement Kilns.....	495
15.7	Air Pollution and its Control.....	497
15.7.1	Atmospheric Products from Combustion .....	497
15.7.2	Products of Incomplete Combustion .....	497
15.7.3	Air Pollution Control.....	500
	References .....	501
	Suggested Readings .....	502
	Questions .....	503

## Chapter 16

	Hazardous Waste Treatment.....	505
16.1	Introduction .....	505
16.2	Land Disposal Restrictions .....	505
16.3	Waste Treatment Prior to Land Disposal .....	506
16.3.1	Neutralization .....	506
16.3.2	Chemical Precipitation .....	510
16.3.3	Oxidation and Reduction.....	512
16.3.4	Sorption .....	514
16.3.5	Sorption Systems .....	515
16.3.6	Stabilization.....	516
	References .....	517
	Suggested Readings .....	518
	Questions .....	519

## Chapter 17

	Land Disposal of Hazardous Waste .....	521
17.1	Introduction .....	521
17.2	The Land Disposal Restrictions Revisited .....	521
17.2.1	General Requirements .....	522
17.3	The Secure Landfill.....	522
17.3.1	Regulatory Requirements .....	522
17.3.2	Secure Landfill Design, Construction, and Operation .....	524
17.3.3	Liner Materials .....	524
17.3.3.1	Clay Liners.....	524
17.3.3.2	Synthetic Liner Materials .....	524
17.3.3.3	Composite Liners.....	525

17.3.4	Compatibility of Liners with Wastes.....	526
17.3.5	Leachate Management.....	527
17.3.6	Drainage Materials .....	527
17.3.7	Leachate Removal Systems.....	528
17.3.8	Closure of the Secure Landfill .....	528
17.3.9	Geomembrane Caps .....	528
17.3.10	Surface Water Collection and Removal System.....	529
17.3.11	Gas Control Layer .....	530
17.3.12	Biotic Barrier.....	530
17.3.13	Vegetative Layer.....	531
17.4	Deep Well Injection of Hazardous Wastes.....	531
17.4.1	The Underground Injection Control Program.....	531
17.4.2	Well System Design .....	532
17.4.3	The Classes of Injection Wells .....	532
17.4.3.1	Deep Wells (Class I).....	532
17.4.3.2	Oil and Gas Injection Wells (Class II) .....	536
17.4.3.3	Mining Wells (Class III).....	537
17.4.3.4	Shallow Hazardous and Radioactive Injection Wells (Class IV).....	537
17.4.3.5	Shallow Injection Wells (Class V) .....	537
17.4.4	Practical Considerations of Deep-Well Injection.....	538
References	.....	539
Suggested Readings	.....	540
Questions	.....	541

## **Part IV**

<b>Special Categories of Waste.....</b>	<b>543</b>
---	------------

### **Chapter 18**

Universal Wastes .....	545
18.1 Introduction .....	545
18.2 Universal Wastes Defined .....	546
18.3 Categories of Universal Waste Handlers.....	547
18.3.1 Large-Quantity Handlers of Universal Waste .....	547
18.3.2 Small-Quantity Handlers.....	547
18.4 Management of Universal Wastes.....	547
18.4.1 Universal Waste Batteries.....	547
18.4.2 Lead Acid Battery Recycling .....	548
18.4.3 Nickel-Cadmium Battery Recycling.....	548
18.4.4 Universal Waste Pesticides .....	550
18.4.5 Universal Waste Thermostats .....	550
18.4.6 Universal Waste Lamps .....	551
18.5 Response to Releases .....	553
18.6 Tracking Universal Waste Shipments .....	554
18.7 Small-Quantity Handlers of Universal Waste .....	554
18.8 Universal Waste Transporters.....	554
18.9 Destination Facilities.....	556
18.10 Responsibility of the States.....	556
References .....	558
Further Readings and Web Sites .....	558
Questions.....	559

## Chapter 19

Management of Used Oil .....	561
19.1 Introduction .....	561
19.2 Production and Properties of Lubricating Oils .....	561
19.3 Chemical Composition of Used Motor Oil.....	562
19.4 Chemical and Physical Changes of Oil During Engine Operation.....	564
19.5 Potential Hazards with Used Oil.....	564
19.6 History of Used Oil Management .....	565
19.7 Requirements of the Used Oil Management Standards .....	566
19.7.1 Used Oil Generators .....	566
19.7.2 Used Oil Collection Centers.....	567
19.7.3 Marketers of Used Oil.....	567
19.7.4 Transporters and Transfer Facilities .....	567
19.7.5 DOT Requirements.....	568
19.7.6 Used Oil Recycling .....	568
19.8 Used Oil Recycling Methods .....	569
19.8.1 Re-Refining .....	569
19.8.2 Slipstreaming.....	570
19.8.3 Processing.....	570
19.8.4 Direct Burning.....	570
19.8.5 Off-vs. on-specification used oil .....	571
19.9 Disposal.....	572
19.9.1 Prohibitions.....	573
19.9.2 Exemption from Comprehensive Emergency Response, Compensation and Liability Act Liability.....	573
References .....	573
Suggested Reading .....	575
Questions .....	576
A.19.1 Appendix: Scenarios .....	577
A.19.1.2 Responses to Scenarios .....	578

## Chapter 20

Medical and Infectious Wastes.....	579
20.1 Introduction .....	579
20.2 The Medical Waste Tracking Act.....	579
20.3 Definitions and Sources of Medical Waste .....	580
20.3.1 Potentially Infectious Waste .....	581
20.3.2 Regulated Medical Waste (40 CFR Part 259.30).....	581
20.3.3 Exemptions to the Definition of Regulated Medical Waste.....	582
20.3.4 RCRA Hazardous Waste .....	582
20.3.5 Radioactive Waste.....	583
20.3.6 Mixtures.....	583
20.4 Management of Medical Wastes Prior to Transport .....	583
20.4.1 Handling and Packaging.....	583
20.4.2 Labeling and Marking Medical Waste .....	584
20.4.3 Generator Requirements.....	585
20.4.4 Transporter Requirements .....	585
20.4.5 Treatment and Disposal of Medical Waste.....	587
20.4.6 Requirements for the Destination Facility .....	587
20.4.7 Record Keeping .....	588
20.4.8 Disposal Options for Medical Waste.....	588

20.4.9	Incineration of Medical Waste .....	588
20.4.10	Regulatory Requirements for Medical Waste Incinerators .....	588
20.4.11	Siting Requirements .....	588
20.4.12	Operator Training and Qualification Requirements .....	588
20.5	Facility Operations .....	589
20.5.1	Waste Management Plan .....	589
20.5.2	Compliance and Performance Testing .....	589
20.5.3	Emission Limits .....	590
20.5.4	Monitoring Requirements .....	590
20.5.5	Documentation .....	590
20.5.6	Reporting and Record Keeping .....	591
20.6	Types of Medical Waste Incinerators .....	593
20.6.1	Rotary Kiln .....	593
20.6.2	The Multiple-Chamber Incinerator .....	594
20.6.3	Controlled-Air Incinerators .....	594
20.7	Modes of Incinerator Operation .....	595
20.8	Advantages and Disadvantages of Incineration .....	597
20.9	Microbial Inactivation .....	597
20.9.1	Autoclaving (Steam Sterilization) .....	598
20.9.2	Operational Issues .....	599
20.9.3	Testing the Efficiency of Sterilization by Autoclaving .....	600
20.9.4	Health Considerations with Autoclaving .....	601
20.9.5	Advantages and Disadvantages of Autoclaving .....	601
20.9.6	Chemical Disinfection .....	601
20.9.7	Types of Disinfection Agents .....	602
20.9.8	Testing the Efficiency of Chemical Disinfection .....	602
20.9.9	Operational Issues .....	604
20.9.10	FIFRA Registration .....	605
20.9.11	Advantages and Disadvantages of Chemical Disinfection .....	605
20.9.12	Microwave Irradiation .....	605
	References .....	605
	Suggested Reading .....	607
	Questions .....	608

## Chapter 21

	Construction and Demolition Debris .....	609
21.1	Introduction .....	609
21.2	Characteristics of C&D Debris .....	609
21.3	Management of C&D Debris .....	613
21.4	Management of Selected C&D Waste Components .....	613
21.4.1	Aggregate .....	613
21.4.2	Drywall (Sheetrock, Gypsum) .....	614
21.4.3	Wood Waste Recycling .....	616
21.4.4	Metals Recycling .....	616
21.4.5	Asphalt Shingles .....	616
21.4.6	Asbestos Shingles .....	617
21.5	Reduction of C & D Debris .....	617
21.6	Deconstruction .....	618
20.7	Hazardous Materials .....	619
	References .....	620

Suggested Reading .....	620
Questions .....	621

## Chapter 22

Electronics Waste .....	623
22.1 Introduction .....	623
22.2 Major Types of Electronic Equipment .....	626
22.2.1 Personal Computers .....	626
22.2.2 Computer Monitors .....	626
22.2.3 Computer Central Processing Units .....	626
22.2.4 Computer Peripherals .....	626
22.2.5 Handheld and Desktop Telecommunications Equipment (Telephones, Fax Machines) .....	626
22.2.6 Mainframe Computers and High-End Telecommunications Equipment .....	626
22.2.7 Televisions .....	627
22.3 Hazards of E-Waste .....	627
22.4 Cathode Ray Tubes .....	628
22.5 RCRA and E-Wastes .....	628
22.5.1 Hazardous Waste .....	630
22.5.2 The U.S. EPA Proposed CRT Rule .....	631
22.5.3 Circuit Boards .....	631
22.6 Electronics Recycling .....	632
22.6.1 Residential Collection Programs .....	633
22.6.2 Reuse and Resale .....	634
22.6.3 Deconstruction .....	635
22.6.4 Processing and Recycling E-Waste Components .....	635
22.6.4.1 CRT Glass .....	636
22.6.5 Metals .....	639
22.6.6 Circuit Boards .....	639
22.7 International Issues in Electronics Management .....	640
22.8 Barriers to Recycling E-waste .....	640
22.9 Product Stewardship and Electronics .....	640
22.10 Conclusions .....	642
References .....	642
Suggested Reading and Web Sites .....	643
Questions .....	644

List of Acronyms .....	647
------------------------	-----

Index .....	651
-------------	-----
