

Breeding FIELD CROPS

FIFTH EDITION

David Allen Sleper
John Milton Poehlman

Blackwell
Publishing

Contents

<i>Preface</i>	vii
Section I: What Is Plant Breeding?	
1 Plant Breeders and Their Work	03
Section II: The Genetic Basis of Plant Breeding	
2 Reproduction in Crop Plants	19
3 Gene Recombination in Plant Breeding	35
4 Quantitative Inheritance in Plant Breeding	53
Section III: Tools of the Plant Breeder	
5 Variations in Chromosome Number	73
6 Mutation	91
7 Fertility-Regulating Mechanisms and Their Manipulation	101
8 Biotechnology and Plant Breeding	115
Section IV: Methods in Plant Breeding	
9 Breeding Self-Pollinated Crops	137
10 Breeding Cross-Pollinated and Clonally Propagated Crops	155
11 Breeding Hybrid Cultivars	171
12 Breeding Objectives and Techniques	185
Section V: Germplasm Resources for Breeding Crop Plants	
13 Germplasm Resources and Conservation	207
Section VI: Applications: Breeding Field Crops That Are Self-Pollinated	
14 Breeding Wheat	221
15 Breeding Rice	239
16 Breeding Soybean	259

Section VII: Applications: Field Crops Utilizing Hybrid Breeding Procedures

- | | | |
|----|-----------------------|-----|
| 17 | Breeding Corn (Maize) | 277 |
| 18 | Breeding Sorghum | 297 |

Section VIII: Applications: Field Crops with Miscellaneous Breeding Procedures

- | | | |
|----|--|-----|
| 19 | Breeding Cotton | 319 |
| 20 | Breeding Cross-Pollinated Forage Crops | 335 |

Section IX: Applications: Field Crops That Are Vegetatively Propagated

- | | | |
|----|--------------------|-----|
| 21 | Breeding Potato | 363 |
| 22 | Breeding Sugarcane | 377 |

Section X: Maintenance and Seed Production of Improved Cultivars

- | | | |
|----|---|-----|
| 23 | Cultivar Increase, Maintenance, and Seed Production | 393 |
|----|---|-----|

Glossary 407

Index 417
