SCHAECHTER'S

# Mechanisms of Microbial Disease

FOURTH EDITION

*N. Cary Engleberg*  
*Victor DiRita*  
*Terence S. Dermody*

Lippincott Williams & Wilkins  
a Wolters Kluwer business

# Table of Contents

Preface	v
Acknowledgments	vii
Contributors	ix
Figure Credits	xv

## Part I: Principles 1

1	Establishment of Infectious Diseases	3
2	Normal Microbial Flora	11
3	Biology of Infectious Agents	18
4	Genetic Approaches to Studying Bacterial Pathogenesis	39
5	Biological Basis for Antibacterial Action	56
6	Innate Immunity	66
7	Adaptive Immunity	90
8	The Parasite's Way of Life	116
9	Damage by Microbial Toxins	126

## Part II: Infectious Agents 139

### SECTION 1 BACTERIA

10	Introduction to the Pathogenic Bacteria	141
11	Staphylococci: Abscesses and Toxin-Mediated Diseases	147
12	Streptococci and Enterococci: Sore Throats and Beyond	156
13	Pneumococcus and Bacterial Pneumonia	164
14	Neisseriae: Gonococcus and Meningococcus	173
15	<i>Bacteroides</i> and Abscesses	183
16	Enteric Bacteria: Secretory Diarrhea	190
17	Invasive and Tissue-Damaging Enteric Bacterial Pathogens: Bloody Diarrhea and Dysentery	200
18	<i>Pseudomonas aeruginosa</i> : A Ubiquitous Pathogen	215
19	<i>Bordetella pertussis</i> and Whooping Cough	223
20	Clostridia: Diarrheal Disease, Tissue Infection, Botulism, and Tetanus	230
21	<i>Legionella</i> : Parasite of Amebas and Macrophages	236
22	<i>Helicobacter pylori</i> : Pathogenesis of a "Slow" Bacterial Infection	243
23	Mycobacteria: Tuberculosis and Leprosy	251
24	<i>Treponema pallidum</i> and Syphilis: A Disease With a History	263
25	<i>Borrelia burgdorferi</i> and Lyme Disease	271
26	Cat Scratch Disease, Bacillary Angiomatosis, and Other Bartonelloses	280

27	Chlamydiae: Genital, Ocular, and Respiratory Pathogens	284
28	Rocky Mountain Spotted Fever and Other Rickettsioses	292
29	<i>Mycoplasma</i> : Curiosity and Pathogen	300
30	Strategies to Combat Bacterial Infections	305

## SECTION 2 VIRUSES

31	Biology of Viruses	312
32	Picornaviruses and Coronaviruses	330
33	Arthropodborne Viruses	340
34	Paramyxoviruses: Measles Virus and Respiratory Syncytial Virus	347
35	Rabies	357
36	Influenza and Its Viruses	363
37	Rotaviruses, Noroviruses, and Other Viral Agents of Gastroenteritis	370
38	Human Retroviruses: AIDS and Other Diseases	376
39	Adenoviruses	389
40	Human Papillomaviruses and Warts	399
41	Alphaherpesviruses: Herpes Simplex Virus and Varicella-Zoster Virus	406
42	Betaherpesviruses and Gammaherpesviruses: Cytomegalovirus and Epstein-Barr Virus	415
43	Viral Hepatitis	424
44	Antiviral Treatment Strategies	435
45	Vaccines and Antisera for the Prevention and Treatment of Infectious Diseases	445

## SECTION 3 FUNGI

46	Introduction to the Fungi and Mycoses	451
47	Endemic Mycoses	455
48	Opportunistic Fungal Infection	463
49	Subcutaneous, Cutaneous, and Superficial Mycoses	472
50	Antifungal Agents	477

## SECTION 4 PARASITES

51	Introduction to Parasitology	480
52	Blood and Tissue Protozoa	489
53	Intestinal and Vaginal Protozoa	504
54	Intestinal Helminths	513
55	Tissue and Blood Helminths	523

## SECTION 5 MISCELLANEOUS PATHOGENS

56	Prion Diseases	534
57	Biological Agents of Warfare and Terrorism	541

## Part III: Pathophysiology of Infectious Diseases 553

- 58** Diagnostic Principles 555
- 59** Principles of Epidemiology 566
- 60** Digestive System Infections 572
- 61** Infections of the Central Nervous System 588
- 62** Respiratory System Infections 603
- 63** Urinary Tract Infections 615
- 64** Infections of the Skin and Soft Tissue 624
- 65** Infections of the Bones, Joints, and Muscles 634
- 66** Sepsis 643
- 67** Intravascular Infection 650
- 68** Head and Neck Infections 659
- 69** Sexually Transmitted Diseases 666
- 70** Infections of the Immunocompromised Patient 673
- 71** Acquired Immunodeficiency Syndrome 679
- 72** Congenital and Perinatal Infections 691
- 73** Zoonoses 697
- 74** Fever: A Clinical Sign of Infection 707
- 75** Health Care-Associated Infections 713
- 76** Foodborne Diseases 719
- Index 727
