

Materials Fundamentals of Gate Dielectrics

Edited by
Alexander A. Demkov and
Alexandra Navrotsky

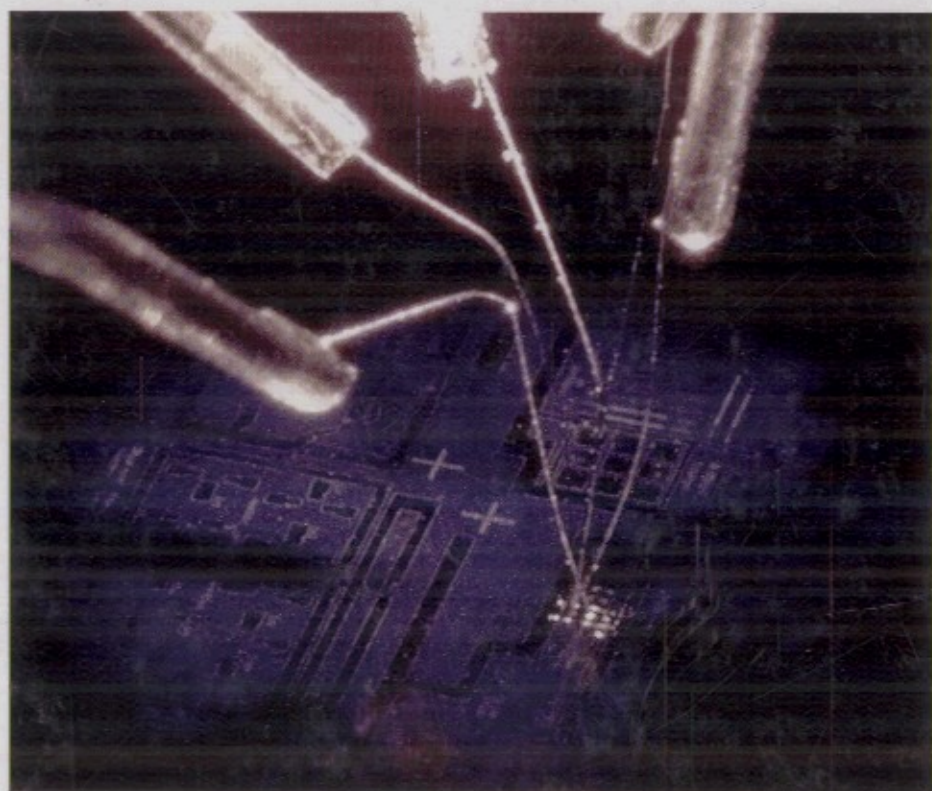

TABLE OF CONTENTS

Preface	vii
Chapter 1. Materials and Physical Properties of High-K Oxide Films, <i>Ran Liu</i>	1
Chapter 2. Device Principles of High-K Dielectrics, <i>Kurt Eisenbeiser</i>	37
Chapter 3. Thermodynamics of Oxide Systems Relevant to Alternative Gate Dielectrics, <i>Alexandra Navrotsky and Sergey V. Ushakov</i>	57
Chapter 4. Electronic Structure and Chemical Bonding in High-K Transition Metal and Lanthanide Series Rare Earth Alternative Gate Dielectrics: Applications to Direct Tunneling and Defects at Dielectric Interfaces, <i>Gerald Lucovsky</i>	109
Chapter 5. Atomic Structure, Interfaces and Defects of High Dielectric Constant Gate Oxides, <i>J. Robertson and P.W. Peacock</i>	179
Chapter 6. Dielectric Properties of Simple and Complex Oxides from First-Principles, <i>U.V. Waghmare and K.M. Rabe</i>	215
Chapter 7. IVb Transition Metal Oxides and Silicates: An Ab Initio Study, <i>Gian-Marco Rignanese</i>	249
Chapter 8. The Interface Phase and Dielectric Physics for Crystalline Oxides on Semiconductors, <i>Rodney Mckee</i>	291
Chapter 9. Interfacial Properties of Epitaxial Oxide/Semiconductor Systems, <i>Y. Liang and A.A. Demkov</i>	313
Chapter 10. Functional Structures, <i>Matt Copel</i>	349
Chapter 11. Mechanistic Studies of Dielectric Growth on Silicon, <i>Martin M. Frank and Yves J. Chabal</i>	367

Chapter 12. Methodology for Development of High- κ Stacked Gate Dielectrics on III–V Semiconductors, <i>Matthias Passlack</i>	403
Index.....	469
