

The background of the cover is an abstract composition. It features a profile of a woman's face in shades of blue and green, looking towards the right. Overlaid on this are various geometric shapes, including a large red semi-circle and a yellow triangle. The overall color palette is dominated by blues, greens, and reds, with a textured, painterly quality.

<b>Introduction: A Distinctive Voice for Health Promotion</b>	<b>1</b>
Defining health and its determinants	1
The ideology of health promotion	2
The case for critical health promotion	3
Effective programme planning	3
The key role of theory	3
Understanding the factors governing health choices	4
The resurrection and revitalization of health education	4
Methods and strategies	5
Evaluation	6
<b>1 Health and Health Promotion</b>	<b>8</b>
Health as a contested concept	8
Defining health: contrasting and conflicting conceptualizations	8
Health, adaptation and actualization	9
Coherence, commitment and control: health as empowerment	10
Health: a working model	11
Promoting health: competing ideologies	13
Defining health promotion	13
The contribution of the World Health Organization (WHO) to the definition of health promotion	14
Ideology, social construction and competing discourses	17
Medical discourse and the preventive model	19
Education and the discourse of voluntarism	24
Health promotion and the discourse of empowerment	30
An empowerment model of health promotion	38
<b>2 Health and its Determinants: Issues of Assessment</b>	<b>41</b>
Introduction	41
Epidemiological perspectives	42
Descriptive epidemiology	42
Analytic epidemiology	49
The need for alternative perspectives	52
Official health data – reality or myth?	53
The lay perspective	54

Pathogenesis or salutogenesis	55
Whose voice counts?	56
<b>Determinants of health</b>	<b>58</b>
Lifestyle and environment	60
Social capital	63
<b>Inequality and social exclusion</b>	<b>68</b>
<b>Summary and conclusions</b>	<b>73</b>
<b>3 Determinants of Health Actions</b>	<b>75</b>
Change at the macro level – the adoption of innovations	75
Social systems and social change	75
Communication of innovations theory	75
Change at the micro level – influences on individual health actions	77
The health action model	77
The belief system	80
Belief hierarchies and the notion of salience	81
The motivation system	83
The normative system	85
Beliefs, motivations and normative pressures – interaction effects	88
Empowerment: a critical review of the dynamics	89
Defining the self concept	89
Empowerment and health	92
Indirect effects of empowerment on health – beliefs about control	93
Personality and behavioural intention	96
Translating intention into practice: removing barriers and empowering communities	97
Facilitating health actions – knowledge and skills	98
Empowerment – the role of the environment	99
Empowerment and the avoidance of relapse	100
Programme planning and the determinants of action	105
<b>4 A Systematic Approach to Health Promotion Planning</b>	<b>107</b>
Introduction	107
Horizontal and vertical programmes	108
Planning models	109
Precede-proceed	111
Logical frameworks	112
The PABCAR model	115
A five-stage community organization model	117
Community empowerment	118
Health promotion planning – reflections	119
A systems checklist for health promotion planning	122
Quality health promotion	129
Alliances and partnerships for health	133
Investment for health	139
Summary and conclusions	141

<b>5 Information Needs</b>	<b>143</b>
Introduction	143
Needs assessment	144
The nature of health needs	144
Doyal and Gough's theory of human needs	146
Needs, wants and demands	150
A reductionist approach to needs assessment	151
Participation in needs assessment	151
Rapid assessment and appraisal	155
Critical reflections on participatory appraisal	159
Community profiles	161
Solution generation	164
The role of theory	165
Evidence-based practice	168
Professional judgement and context	172
Summary	173
<b>6 Healthy Public Policy</b>	<b>175</b>
Introduction	175
Healthy public policy – the WHO position	176
Healthy public policy – meanings and scope	178
Choice and control	181
Health education and health promotion – lifestyle and structure	183
Developing policy – from rhetoric to reality	183
Rational and incremental approaches	185
Conflict and consensus models	186
The players – terminology	188
Policy making	191
Agenda setting	192
Advocacy	194
Defining advocacy	194
Strategies	196
Adoption and implementation	200
Health impact assessment	201
Stages in HIA	206
Conclusion	207
<b>7 Education for Health – the Conditions of Learning</b>	<b>208</b>
Ideological and technical dimensions	208
The communication process	209
Key features of the communication process	210
Reflections on literacy	211
Education – creating the conditions for learning	213
A taxonomy of types of health learning	214
Affective learning – influencing emotions, values and attitudes	218
Conditioning and related interventions	218
Persuasion and attitude change	219

Affective hierarchies and attitude change	219
The Yale approach to attitude change	220
Source factors	221
Message factors	221
Audience factors	224
Channels and methods for attitude change	227
Critical health education – strategies for social and political change	227
Social action	228
Critical consciousness raising – the Freirean perspective	229
Life skills, action competences and health – education as a subversive activity	235
The primacy of education	239
<b>8 Mass Communication and Community Action</b>	<b>240</b>
Introduction	240
Mass communication and health promotion	240
Issues for health promotion	241
Media varieties and learning resources	241
Mass media theory – capabilities and functions	241
The broader context of media effects – normative theory	242
Analytical theories of mass media operation	242
Implementing policy by means of consultative collaboration	245
Mass media campaigns – persuasion and social marketing	246
Mass media campaigns – examples of effectiveness	247
Social marketing and health promotion	248
Advocacy for healthy public policy – the role of mass media	251
Key principles and generalizations about mass media	257
Working with communities – organization, development and social action	258
CD – definitions and history	258
Devising community programmes for development and social action	264
<b>9 Settings and Methods</b>	<b>269</b>
Introduction	269
The settings approach	269
The nature of the approach	269
Carrots and sticks	275
The health promoting school	277
Implementation of the concept	281
Concluding remarks	286
Methods for facilitating learning	287
Type of learning	288
Characteristics of the learner	296
Characteristics of the teacher	299
Other factors	303
Summary	304
Overview and concluding comments	304

<b>10 Evaluation</b>	<b>305</b>
Introduction	305
Why evaluate?	306
Whose values?	306
The political dimension	307
Health promotion values – the seal of approval	307
Evaluation and programme design	308
Paradigm wars – positivism and its alternatives	309
The positivist paradigm	309
Interpretivism – an alternative to positivism	310
Effectiveness, efficiency and efficacy	314
The efficacy paradox	315
On cost-effectiveness	315
Disentangling complexity – selecting indicators of success	317
Reliability, validity and the RCT	320
The RCT – strengths and limitations	320
Health promotion, ideological imperatives and the RCT – an overview	327
A new gold standard – the judicial principle	327
Reliability, replicability, dependability and validity	327
The judicial principle – assessing the validity of evidence	329
Evidence-based health promotion	330
What is evidence?	331
Access to evidence of effectiveness	334
Evidence into practice	338
