SIXTH EDITION

Reinforced Concrete Design

**GEORGE F. LIMBRUNNER
ABI O. AGHAYERE**

Contents

CHAPTER 1 MATERIALS AND MECHANICS OF BENDING 1

- 1-1 Concrete 2
- 1-2 The ACI Building Code 2
- 1-3 Cement and Water 2
- 1-4 Aggregates 3
- 1-5 Concrete in Compression 3
- 1-6 Concrete in Tension 6
- 1-7 Reinforcing Steel 6
- 1-8 Beams: Mechanics of Bending Review 10
 - References 18
 - Problems 19

CHAPTER 2 RECTANGULAR REINFORCED CONCRETE BEAMS AND SLABS: TENSION STEEL ONLY 22

- 2-1 Introduction 23
- 2-2 Analysis and Design Method 24
- 2-3 Behavior Under Load 25
- 2-4 Strength Design Method Assumptions 27
- 2-5 Flexural Strength of Rectangular Beams 28
- 2-6 Equivalent Stress Distribution 30
- 2-7 Balanced, Brittle, and Ductile Failure Modes 34
- 2-8 Ductility Requirements 36

2-9	Strength Requirements	39
2-10	Rectangular Beam Analysis for Moment (Tension Reinforcement Only)	41
2-11	Summary of Procedure for Rectangular Beam Analysis for ϕM_n (Tension Reinforcement Only)	47
2-12	Slabs: Introduction	48
2-13	One-Way Slabs: Analysis for Moment	49
2-14	Rectangular Beam Design for Moment (Tension Reinforcement Only)	53
2-15	Summary of Procedure for Rectangular Reinforced Concrete Beam Design for Moment (Tension Reinforcement Only)	60
2-16	Design of One-Way Slabs for Moment (Tension Reinforcement Only)	62
2-17	Summary of Procedure for Design of One-Way Slabs for Moment (to Satisfy ACI Minimum h)	65
2-18	Slabs on Ground	65
	References	66
	Problems	67

CHAPTER 3 REINFORCED CONCRETE BEAMS: T-BEAMS AND DOUBLY REINFORCED BEAMS 73

3-1	T-Beams: Introduction	74
3-2	T-Beam Analysis	76
3-3	Analysis of Beams Having Irregular Cross Sections	83
3-4	T-Beam Design (for Moment)	85
3-5	Summary of Procedure for Analysis of T-Beams (for Moment)	92
3-6	Summary of Procedure for Design of T-Beams (for Moment)	94
3-7	Doubly Reinforced Beams: Introduction	95
3-8	Doubly Reinforced Beam Analysis for Moment (Condition I)	96
3-9	Doubly Reinforced Beam Analysis for Moment (Condition II)	101
3-10	Summary of Procedure for Analysis of Doubly Reinforced Beams (for Moment)	106
3-11	Doubly Reinforced Beam Design for Moment	108
3-12	Summary of Procedure for Design of Doubly Reinforced Beams (for Moment)	111
3-13	Additional Code Requirements for Doubly Reinforced Beams	113
	Problems	114

CHAPTER 4 SHEAR IN BEAMS 122

4-1	Introduction	122
4-2	Shear Reinforcement Design Requirements	125
4-3	Shear Analysis Procedure	129
4-4	Stirrup Design Procedure	131

- 4-5 Torsion: Introduction 142
- 4-6 Design of Torsion Reinforcement 143
- Problems 144

CHAPTER 5 DEVELOPMENT, SPLICES, AND SIMPLE-SPAN BAR CUTOFFS 149

- 5-1 Development Length: Introduction 150
- 5-2 Development Length: Tension Bars 151
- 5-3 Development Length: Compression Bars 160
- 5-4 Development Length: Standard Hooks in Tension 160
- 5-5 Development of Web Reinforcement 165
- 5-6 Splices 168
- 5-7 Tension Splices 168
- 5-8 Compression Splices 169
- 5-9 Simple-Span Bar Cutoffs and Bends 169
- 5-10 Code Requirements for Development of Positive Moment Steel at Simple Supports 178
- Problems 181

CHAPTER 6 CONTINUOUS CONSTRUCTION DESIGN CONSIDERATIONS 187

- 6-1 Introduction 187
- 6-2 Continuous-Span Bar Cutoffs 189
- 6-3 Design of Continuous Floor Systems 192
- Problems 213

CHAPTER 7 SERVICEABILITY 216

- 7-1 Introduction 216
- 7-2 Deflections 217
- 7-3 Calculation of I_{cr} 218
- 7-4 Immediate Deflection 223
- 7-5 Long-Term Deflection 224
- 7-6 Deflections for Continuous Spans 228
- 7-7 Crack Control 229
- Problems 232

CHAPTER 8 WALLS 235

- 8-1 Introduction 235
- 8-2 Lateral Forces on Retaining Walls 238
- 8-3 Design of Reinforced Concrete Cantilever Retaining Walls 242

- 8-4 Design Considerations for Bearing Walls 273
- 8-5 Design Considerations for Basement Walls 277
- Problems 278

CHAPTER 9 COLUMNS 281

- 9-1 Introduction 282
- 9-2 Strength of Reinforced Concrete Columns: Small Eccentricity 283
- 9-3 Code Requirements Concerning Column Details 286
- 9-4 Analysis of Short Columns: Small Eccentricity 288
- 9-5 Design of Short Columns: Small Eccentricity 290
- 9-6 Summary of Procedure for Analysis and Design of Short Columns with Small Eccentricities 295
- 9-7 The Load–Moment Relationship 295
- 9-8 Columns Subjected to Axial Load at Large Eccentricity 296
- 9-9 ϕ Factor Considerations 297
- 9-10 Analysis of Short Columns: Large Eccentricity 298
- 9-11 The Slender Column 314
- References 318
- Problems 319

CHAPTER 10 FOOTINGS 322

- 10-1 Introduction 322
- 10-2 Wall Footings 324
- 10-3 Wall Footings Under Light Loads 334
- 10-4 Individual Reinforced Concrete Footings for Columns 335
- 10-5 Square Reinforced Concrete Footings 339
- 10-6 Rectangular Reinforced Concrete Footings 346
- 10-7 Eccentrically Loaded Footings 356
- 10-8 Combined Footings 357
- 10-9 Cantilever or Strap Footings 361
- Problems 364

CHAPTER 11 PRESTRESSED CONCRETE FUNDAMENTALS 366

- 11-1 Introduction 367
- 11-2 Design Approach and Basic Concepts 367
- 11-3 Stress Patterns in Prestressed Concrete Beams 370
- 11-4 Prestressed Concrete Materials 372
- 11-5 Analysis of Rectangular Prestressed Concrete Beams 373
- 11-6 Alternative Methods of Elastic Analysis: Internal Couple Method 378
- 11-7 Alternative Methods of Elastic Analysis: Load Balancing Method 381

11-8	Flexural Strength Analysis	389
11-9	Notes on Prestressed Concrete Design	392
	References	392
	Problems	393

CHAPTER 12 CONCRETE FORMWORK 396

12-1	Introduction	396
12-2	Formwork Requirements	397
12-3	Formwork Materials and Accessories	398
12-4	Loads and Pressures on Forms	402
12-5	The Design Approach	404
12-6	Design of Formwork for Slabs	413
12-7	Design of Formwork for Beams	424
12-8	Wall Form Design	431
12-9	Forms for Columns	440
	References	445
	Problems	445

CHAPTER 13 DETAILING REINFORCED CONCRETE STRUCTURES 448

13-1	Introduction	449
13-2	Placing Drawings	450
13-3	Marking Systems and Bar Marks	453
13-4	Schedules	455
13-5	Fabricating Standards	455
13-6	Bar Lists	461
13-7	Extras	461
13-8	Bar Supports and Bar Placement	463
13-9	Computer Detailing	463
	References	466

APPENDIX A TABLES AND DIAGRAMS 467

APPENDIX B SUPPLEMENTARY AIDS AND GUIDELINES 487

B-1	Accuracy for Computations for Reinforced Concrete	487
B-2	Flow Diagrams	488

APPENDIX C METRICATION 493

C-1	The International System of Units (SI)	493
-----	--	-----

C-2	SI Style and Usage	496
C-3	Conversion Factors	499
	References	510

APPENDIX D ANSWERS TO SELECTED PROBLEMS 511**INDEX 515**
