

Pearson International Edition

SIXTH EDITION

Statics and Strength of Materials

H. W. MORROW
ROBERT P. KOKERNAK

Contents

Application Sidebars **xiii**

List of Symbols **xiv**

Chapter 1 **BASIC CONCEPTS** **1**

- 1.1 Introduction, 1
- 1.2 Fundamental Quantities: Units, 2
- 1.3 SI Style and Usage, 3
- 1.4 Conversion of Units, 4
- 1.5 Numerical Computations, 5
- 1.6 Trigonometric Functions, 8
- 1.7 Trigonometric Formulas, 17
- 1.8 Linear Equations and Determinants, 24

Chapter 2 **RESULTANT OF CONCURRENT FORCES IN A PLANE** **41**

- 2.1 Introduction, 41
- 2.2 Graphical Representation of Forces: Vectors, 42
- 2.3 Resultant of Two Concurrent Forces: Vectors, 42
- 2.4 Resultant of Three or More Concurrent Forces, 49
- 2.5 Components of a Force Vector, 52
- 2.6 Resultant of Concurrent Forces by Rectangular Components, 57
- 2.7 Difference of Two Forces: Vector Differences, 62

Chapter 3 **EQUILIBRIUM OF CONCURRENT FORCES IN A PLANE** **66**

- 3.1 Conditions for Equilibrium, 66
- 3.2 Action and Reaction, 67
- 3.3 Space Diagram, Free-Body Diagram, 68
- 3.4 Construction of a Free-Body Diagram, 68

- 3.5 Three Concurrent Forces in Equilibrium, 77
- 3.6 Four or More Forces in Equilibrium, 85
- 3.7 Equilibrium by Rectangular Component Method, 87

Chapter 4 RESULTANT OF NONCONCURRENT FORCES IN A PLANE 96

- 4.1 Introduction, 96
- 4.2 Transmissibility, 97
- 4.3 Moment of a Force, 97
- 4.4 Theorem of Moments, 100
- 4.5 Resultant of Parallel Forces, 107
- 4.6 Resultant of Nonparallel Forces, 110
- 4.7 Moment of a Couple, 114
- 4.8 Resolution of a Force into a Force and Couple, 116
- 4.9 Resultant of Distributed Loading, 120

Chapter 5 EQUILIBRIUM OF A RIGID BODY 124

- 5.1 Introduction, 124
- 5.2 Support Conditions for Bodies in a Plane, 125
- 5.3 Construction of Free-Body Diagrams, 127
- 5.4 Equations for Equilibrium of a Rigid Body, 130
- 5.5 Equilibrium of a Two-Force Body, 145
- 5.6 Equilibrium of a Three-Force Body, 145
- 5.7 Statical Determinacy and Constraint of a Rigid Body, 149

Chapter 6 FORCE ANALYSIS OF STRUCTURES AND MACHINES 154

- 6.1 Introduction, 154
- 6.2 Simple Plane Trusses, 155
- 6.3 Members Under Special Loading, 160
- 6.4 Method of Joints, 160
- 6.5 Graphical Method of Joints, 175
- 6.6 Method of Sections, 175
- 6.7 Frames and Machines, 182

Chapter 7 FORCES IN SPACE 201

- 7.1 Introduction, 201
- 7.2 Components of a Force in Space, 202
- 7.3 Resultant of Concurrent Forces in Space, 205
- 7.4 Equilibrium of a Concurrent Force System in Space, 209
- 7.5 Moment of a Force About an Axis, 218
- 7.6 Resultant of Parallel Forces in Space, 219
- 7.7 Support Conditions for Bodies in Space, 221
- 7.8 Equilibrium of a Rigid Body in Space, 223

Chapter 8	FRICTION	234
	8.1 Introduction,	234
	8.2 Dry or Coulomb Friction,	235
	8.3 Angle of Friction,	238
	8.4 Wedges,	245
	8.5 Square-Threaded Screws: Screw Jacks,	246
	8.6 Axle Friction: Journal Bearings,	251
	8.7 Special Applications,	254
	8.8 Rolling Resistance,	258
Chapter 9	CENTER OF GRAVITY, CENTROIDS, AND MOMENTS OF INERTIA OF AREAS	263
	9.1 Introduction,	263
	9.2 Center of Gravity,	264
	9.3 Centroid of a Plane Area,	265
	9.4 Centroids by Inspection,	268
	9.5 Centroids of Composite Areas,	269
	9.6 Centroids of Structural Cross Sections,	274
	9.7 Moment of Inertia of a Plane Area,	286
	9.8 Parallel-Axis Theorem,	290
	9.9 Moment of Inertia of Composite Areas,	291
	9.10 Polar Moment of Inertia,	307
	9.11 Radius of Gyration,	308
	*9.12 Determination of Centroids by Integration,	309
	*9.13 Determination of Moments of Inertia by Integration,	314
Chapter 10	INTERNAL REACTIONS: STRESS FOR AXIAL LOADS	319
	10.1 Introduction,	319
	10.2 Internal Reactions,	323
	10.3 Stress,	329
	10.4 Stress in an Axially Loaded Member,	331
	10.5 Average Shear Stress,	336
	10.6 Bearing Stress,	337
	10.7 Problems Involving Normal, Shear, and Bearing Stress,	343
	10.8 Allowable Stress, Factor of Safety,	351
	10.9 Further Analysis of Axial Loads: Stresses on Oblique Sections,	358

Chapter 11	STRAIN FOR AXIAL LOADS: HOOKE'S LAW	364
11.1	Axial Strain, 365	
11.2	Tension Test and Stress–Strain Diagram, 366	
11.3	Hooke's Law, 372	
11.4	Axially Loaded Members, 376	
11.5	Statically Indeterminate Axially Loaded Members, 381	
11.6	Poisson's Ratio, 388	
11.7	Thermal Deformation: Thermally Induced Stress, 389	
11.8	Additional Mechanical Properties of Materials, 393	
11.9	Strain and Stress Distributions: Saint-Venant's Principle, 396	
11.10	Stress Concentrations, 398	
11.11	Repeated Loading, Fatigue, 402	
Chapter 12	SHEAR STRESSES AND STRAINS: TORSION	405
12.1	Introduction, 405	
12.2	Shearing Stress on Planes at Right Angles, 406	
12.3	Shearing Strains, 406	
12.4	Hooke's Law for Shear, 407	
12.5	Torsion of a Circular Shaft, 408	
12.6	Further Comments on the Torsion of a Circular Shaft, 412	
12.7	Problems Involving Deformation and Stress in a Circular Shaft, 414	
12.8	Torsion Test, 419	
12.9	Power Transmission, 420	
12.10	Flange Couplings, 427	
Chapter 13	SHEAR FORCES AND BENDING MOMENTS IN BEAMS	435
13.1	Introduction, 435	
13.2	Types of Beams, 436	
13.3	Beam Reactions, 437	
13.4	Shear Forces and Bending Moments in Beams, 439	
13.5	Shear-Force and Bending-Moment Diagrams, 449	
13.6	Relations Among Loads, Shear Forces, and Bending Moments, 453	
Chapter 14	BENDING AND SHEARING STRESSES IN BEAMS	469
14.1	Introduction, 469	
14.2	Pure Bending of a Symmetric Beam, 470	
14.3	Deformation Geometry for a Symmetric Beam in Pure Bending, 472	
14.4	Hooke's Law: Distribution of Bending Stress, 473	
14.5	Bending Stress Formula: Flexure Formula, 474	
14.6	Elastic Section Modulus, 476	

- 14.7 Problems Involving the Bending Stress Formula, 476
- 14.8 Shearing Stress in Beams, 489
- 14.9 Horizontal Shearing Stress Formula, 490
- 14.10 Shear Flow Formula, 503
- 14.11 Design of Beams for Strength, 508
- *14.12 Residential Design Using Tabulated Values, 524

Chapter 15 DEFLECTION OF BEAMS DUE TO BENDING 550

- 15.1 Introduction, 550
- 15.2 Bending-Moment Diagram by Parts, 551
- 15.3 Moment-Area Method, 560
- 15.4 Deflection of a Cantilever Beam by the Moment-Area Method, 565
- 15.5 Deflection of the Simply Supported Beam by the Moment-Area Method, 572
- 15.6 Superposition Method, 580
- 15.7 Beam Deflections Using Computer Software, 589
- 15.8 Statically Indeterminate Beams by the Superposition Method, 597
- *15.9 Deflection of Beams by Integration, 604
- *15.10 Singularity Functions, 613

Chapter 16 COMBINED STRESSES AND MOHR'S CIRCLE 625

- 16.1 Introduction, 625
- 16.2 Axial Forces and Bending Moments, 626
- 16.3 Unsymmetric Bending, 638
- 16.4 Eccentrically Loaded Members, 642
- 16.5 Plane Stress, 645
- 16.6 Stress Components on an Oblique Plane, 645
- 16.7 Mohr's Circle for Plane Stress, 647
- 16.8 Principal Stresses, 651
- 16.9 Maximum Shear Stress, 653
- 16.10 Axial Stress, 655
- 16.11 Biaxial Stress: Thin-Walled Pressure Vessel, 657
- 16.12 Pure Shear, 662
- 16.13 Combined Stress Problems, 663

Chapter 17 COLUMNS 670

- 17.1 Introduction, 670
- 17.2 Euler Column Formula, 672
- 17.3 Effective Length of Columns, 674
- 17.4 Further Comments on the Euler Column Formula, 675
- 17.5 Tangent Modulus Theory, 679
- 17.6 Empirical Column Formulas: Design Formulas, 680

Chapter 18 BOLTED, RIVETED, AND WELDED STRUCTURAL CONNECTIONS 690

18.1 Introduction, 690

18.2 Rivets and Bolts, 691

18.3 Methods of Failure for Bolted Joints, 691

18.4 Axially Loaded Bolted and Riveted Connections, 694

18.5 Shear Connections for Building Frames, 700

18.6 Welds, 704

18.7 Axially Loaded Welds, 707

Appendix 713

Answers to Even-Numbered Problems 751
