AGRICULTURAL POLLUTION

Environmental Problems and Practical Solutions

Contents

<i>List of figures</i>	xi
<i>List of tables</i>	xiii
<i>Acknowledgements</i>	xv
1 Agriculture and pollution	1
1.1 <i>Setting the scene</i>	1
<i>Defining agricultural pollution</i>	3
1.2 <i>Solving the problem</i>	5
<i>Monitoring impacts</i>	5
<i>Cost – the driver for pollution control</i>	7
2 Nitrates and nitrogen loss	11
2.1 <i>Introduction</i>	11
<i>Nitrogen and agriculture</i>	11
2.2 <i>The nitrogen cycle</i>	13
<i>Atmospheric deposition</i>	13
<i>Biological fixation</i>	14
<i>Fertilisers</i>	15
<i>Animal manures</i>	16
2.3 <i>Nitrogen transformations</i>	16
<i>Nitrogen mineralisation</i>	17
<i>Nitrogen immobilisation</i>	17
<i>Nitrification</i>	18
<i>Adsorption and fixation</i>	18
<i>Nitrogen uptake and losses</i>	18
<i>Nitrate leaching</i>	19
<i>Nitrous oxide and nitric oxide emissions from nitrification and denitrification</i>	21
<i>Ammonia volatilisation</i>	22
2.4 <i>Nitrogen fertiliser use in agriculture</i>	22
2.5 <i>The causes of nitrate pollution</i>	24

2.6	<i>Problems caused by nitrate pollution</i>	28
	<i>Nitrate and drinking water quality</i>	28
	<i>Eutrophication</i>	29
	<i>Nitrates in food</i>	30
2.7	<i>Reducing nitrate losses from agriculture</i>	30
	<i>Source management – optimisation of fertiliser N use</i>	33
	<i>Cultivation and crop management</i>	34
3	Phosphorus	43
3.1	<i>Introduction</i>	43
	<i>Phosphorus and agriculture</i>	43
3.2	<i>The phosphorus cycle</i>	44
	<i>Phosphorus inputs and outputs</i>	45
	<i>Fertilisers</i>	46
	<i>Atmospheric inputs</i>	47
	<i>Animal manures</i>	48
	<i>P transformations in soil</i>	49
	<i>Distribution of P in soil</i>	49
	<i>P sorption</i>	52
3.3	<i>Phosphorus losses</i>	54
	<i>Surface run-off</i>	55
	<i>Leaching and drain flow</i>	57
3.4	<i>Environmental implications of P pollution</i>	58
	<i>N and P balance in natural waters</i>	58
3.5	<i>Environmental problems caused by P pollution</i>	60
	<i>P in ground and surface waters</i>	60
	<i>Eutrophication</i>	62
3.6	<i>Practical solutions</i>	63
	<i>Source management – optimisation of fertiliser P use</i>	64
	<i>Animal feeds</i>	65
	<i>P transfer management by soil conservation</i>	67
4	Soil erosion	73
4.1	<i>Introduction</i>	73
4.2	<i>Vulnerability of soil to erosion and degradation</i>	73
	<i>Extent of erosion</i>	73
	<i>Processes and products of erosion</i>	74
	<i>Water erosion</i>	75
	<i>Wind erosion</i>	78
	<i>Agricultural land management practices and accelerated erosion</i>	79
4.3	<i>Environmental impacts of soil erosion</i>	81
	<i>Impacts of sediment on aquatic environments</i>	81
	<i>Physical impacts</i>	81

- Chemical impacts* 82
- Impacts of sediments on land* 84
- 4.4 *Practical solutions to soil erosion* 84
 - Assessment of erosion risk* 85
 - Field and crop based erosion control strategies* 86
 - Farm and catchment based erosion control strategies* 88

5 Organic wastes

93

- 5.1 *Introduction* 93
 - Organic wastes and agriculture* 93
- 5.2 *Farm wastes* 95
 - Changes in farming systems* 96
 - Pollution risks from farm wastes* 98
 - Ammonia in watercourses* 99
 - Pathogens from farm wastes* 101
 - Veterinary products in farm wastes* 101
 - Water pollution incidents* 102
- 5.3 *Non-agricultural organic soil amendments* 103
 - Sewage sludge or biosolids* 103
 - Pollution risks from applying sewage sludge to agricultural land* 105
 - N and P pollution from sewage sludge* 109
 - Odours* 110
 - Pathogens* 110
 - Other non-agricultural organic wastes* 111
 - Detrimental effects of applying non-agricultural wastes to land* 112
- 5.4 *Practical solutions* 114
 - Farm waste handling, storage and disposal* 114
 - Solid manures* 115
 - Silage* 116
 - Slurry* 117
 - Dirty water* 118
 - Good agricultural practice* 119
- 5.5 *Non-agricultural organic wastes* 125
 - Avoiding pollution problems by potentially toxic elements in sewage sludge* 126
 - Avoiding crop contamination by pathogens* 127
- 5.6 *Alternative technologies for farm waste treatment* 128
 - Biogas production* 128
 - Reed bed treatment* 129

6	Gaseous emissions	135
6.1	<i>Introduction</i>	135
	<i>Agriculture and gaseous emissions</i>	135
6.2	<i>Ammonia emissions</i>	136
	<i>Pollution problems</i>	136
	<i>Sources of ammonia pollution</i>	137
	<i>Practical solutions</i>	138
	<i>Minimising ammonia emissions by good practice</i>	139
6.3	<i>Methane emissions</i>	140
	<i>Pollution problems</i>	140
	<i>Sources</i>	140
	<i>Practical solutions</i>	140
6.4	<i>Nitrous oxide emissions</i>	143
	<i>Pollution problems</i>	143
	<i>Sources of pollution</i>	143
	<i>Practical solutions</i>	145
6.5	<i>Carbon dioxide emissions</i>	146
	<i>Pollution problems</i>	146
	<i>Sources of pollution</i>	147
	<i>Practical solutions</i>	147
6.6	<i>Farm odours</i>	148
	<i>Sources of pollution</i>	148
	<i>Practical solutions</i>	150
	<i>The location and design of new livestock units</i>	151
	<i>Minimising odour nuisance by good management practice</i>	152
	<i>Technologies for reducing odour nuisance</i>	153
7	Pesticides	158
7.1	<i>Introduction</i>	158
	<i>Pesticide history</i>	158
	<i>Pesticide use</i>	158
7.2	<i>Pesticides and their application</i>	159
7.3	<i>Mode of action</i>	161
7.4	<i>Insecticides</i>	162
	<i>Organophosphates</i>	162
	<i>Carbamates</i>	163
	<i>Pyrethroids</i>	163
7.5	<i>Herbicides</i>	164
	<i>Triazines</i>	164
	<i>Phenoxyacetic acids</i>	164
	<i>Carbamates</i>	165
7.6	<i>Fungicides</i>	165

<i>Traditional inorganics</i>	165
<i>Phenylamides</i>	166
<i>Carboxamides or oxathins</i>	166
7.7 <i>The causes of pesticide pollution</i>	166
<i>Pesticides as pollutants</i>	166
<i>Resistance and resurgence</i>	167
7.8 <i>Behaviour and fate of pesticides in the environment</i>	169
<i>Persistence</i>	169
<i>The fate of pesticides in soil</i>	170
<i>Loss of pesticides from soil</i>	171
7.9 <i>Environmental problems caused by pesticide residues</i>	173
<i>Pesticides in surface and ground waters</i>	173
<i>Effects on non-farmed organisms</i>	175
7.10 <i>Practical solutions</i>	179
<i>Good practice</i>	179
<i>User training</i>	180
<i>Planning and preparation</i>	180
<i>Working with pesticides</i>	181
<i>Disposal of waste</i>	182
<i>Keeping records</i>	182
<i>Other considerations</i>	182
7.11 <i>New technology</i>	183
<i>Adjuvants</i>	184
<i>New formulations</i>	184
7.12 <i>Alternatives to synthetic pesticides</i>	185
<i>Naturally derived pesticides</i>	185
<i>Microbial pesticides</i>	185
<i>Non-chemical weed control</i>	186
<i>Non-chemical pest control</i>	187
8 Genetic modification	196
8.1 <i>Introduction</i>	196
8.2 <i>Risks and benefits</i>	200
<i>Herbicide-resistant crops</i>	200
<i>Insect-resistant crops</i>	206
8.3 <i>Assessing environmental risk</i>	209
8.4 <i>The future for GMOs</i>	211
9 Policy strategies for reducing pollution	215
9.1 <i>Introduction</i>	215
9.2 <i>The emergence of contemporary agri-environmental policy</i>	215
<i>Agri-environment regulation 2078/92</i>	216
<i>Rural development regulation 1297/1999</i>	218
