

# Global Warming

THE COMPLETE BRIEFING

THIRD EDITION

John Houghton

CAMBRIDGE

# Contents

List of figures	<i>page</i> xiv
List of SI unit prefixes	xxi
List of chemical symbols	xxii
Preface to the First Edition	xxiii
Preface to the Second Edition	xxvii
Preface to the Third Edition	xxix
<b>1 Global warming and climate change</b>	<b>1</b>
Is the climate changing?	1
The remarkable last decades of the twentieth century	2
El Niño events	5
The effect of volcanic eruptions on temperature extremes	7
Vulnerable to change	8
The problem of global warming	9
Adaptation and mitigation	10
Uncertainty and response	12
Questions	12
Notes	13
<b>2 The greenhouse effect</b>	<b>14</b>
How the Earth keeps warm	14
The greenhouse effect	16
Mars and Venus	21
The ‘runaway’ greenhouse effect	22
The enhanced greenhouse effect	23
Questions	25
Notes	26
<b>3 The greenhouse gases</b>	<b>28</b>
Which are the most important greenhouse gases?	28
Radiative forcing	29

Carbon dioxide and the carbon cycle	29
Future emissions of carbon dioxide	39
Other greenhouse gases	42
Gases with an indirect greenhouse effect	47
Particles in the atmosphere	48
Estimates of radiative forcing	51
Questions	53
Notes	54
<b>4 Climates of the past</b>	<b>56</b>
The last hundred years	56
The last thousand years	64
The past million years	66
How stable has past climate been?	71
Questions	75
Notes	75
<b>5 Modelling the climate</b>	<b>77</b>
Modelling the weather	77
Seasonal forecasting	85
The climate system	88
Feedbacks in the climate system	90
Models for climate prediction	95
Validation of the model	100
Comparison with observations	102
Is the climate chaotic?	106
Regional climate modelling	107
The future of climate modelling	109
Questions	110
Notes	111
<b>6 Climate change in the twenty-first century and beyond</b>	<b>115</b>
Emission scenarios	115
Model projections	118
Projections of global average temperature	120
Regional patterns of climate change	124
Changes in climate extremes	128
Regional climate models	133
Longer-term climate change	135

Changes in the ocean thermohaline circulation	136
Other factors that might influence climate change	137
Questions	140
Notes	140
<b>7 The impacts of climate change</b>	<b>143</b>
A complex network of changes	143
How much will sea level rise?	145
The impacts of sea level rise	150
Increasing human use of fresh water resources	155
The impact of climate change on fresh water resources	157
Impact on agriculture and food supply	164
The impact on ecosystems	167
The impact on human health	176
Adaptation to climate change	178
Costing the impacts: extreme events	179
Costing the total impacts	184
The overall impact of global warming	188
Questions	190
Notes	191
<b>8 Why should we be concerned?</b>	<b>197</b>
Earth in the balance	197
Exploitation	198
'Back to nature'	199
The technical fix	200
Future generations	200
The unity of the Earth	201
Environmental values	205
Stewards of the Earth	208
The will to act	209
Questions	211
Notes	212
<b>9 Weighing the uncertainty</b>	<b>216</b>
The scientific uncertainty	216
The IPCC assessments	218
Narrowing the uncertainty	222
Sustainable development	225
Why not wait and see?	227

	The Precautionary Principle	228
	<i>Principles for international action</i>	230
	<i>Some global economics</i>	230
	Questions	239
	Notes	239
<b>10</b>	<b>A strategy for action to slow and stabilise climate change</b>	<b>242</b>
	The climate convention	242
	Stabilisation of emissions	244
	The Montreal Protocol	245
	The Kyoto Protocol	246
	Forests	249
	Reduction in the sources of methane	253
	Stabilisation of carbon dioxide concentrations	254
	The choice of stabilisation level	257
	Realising the Climate Convention Objective	261
	Summary of the action required	263
	Questions	264
	Notes	265
<b>11</b>	<b>Energy and transport for the future</b>	<b>268</b>
	World energy demand and supply	268
	Future energy projections	271
	Energy conservation and efficiency in buildings	278
	Energy savings in transport	283
	Energy savings in industry	284
	Capture and storage of carbon dioxide	289
	Renewable energy	289
	Hydro-power	291
	Biomass as fuel	293
	Wind energy	297
	Energy from the Sun	299
	Other renewable energies	305
	The support and financing of renewable energy	306
	Nuclear energy	308
	Technology for the longer term	310
	Summary	314
	Questions	315
	Notes	317

<b>12    The global village</b>	<b>322</b>
The challenges of global warming	322
Not the only global problem	326
The conception and conduct of environmental research	327
The goal of environmental stewardship	328
Questions	330
Notes	331
 Glossary	 333
Index	340
