

WOODHEAD PUBLISHING IN ENVIRONMENTAL MANAGEMENT

# The automotive industry and the environment

Paul Nieuwenhuis  
and Peter Wells

WP

# Contents

<i>Abbreviations and glossary</i> .....	viii
<b>1 Introduction</b> .....	1
1.1 Background .....	1
1.2 Change and complexity – can business really afford to keep things simple? .....	2
1.3 Identifying the problem .....	4
1.4 Roots of the problem .....	6
1.5 The CO <sub>2</sub> issue – agenda for change .....	13
1.6 References .....	14
<b>2 The structure of the automotive industry</b> .....	15
2.1 The automotive industry: a profile .....	15
2.2 The vehicle manufacturers .....	16
2.3 Material and component suppliers .....	22
2.4 Distribution and retailing .....	25
2.5 Financial performance, structure and the future .....	28
2.6 The direction of the industry: the case of Ford .....	29
2.7 Conclusions .....	32
2.8 References .....	32
<b>3 Markets and the demand for cars</b> .....	34
3.1 Introduction .....	34
3.2 The structure of production and markets .....	35
3.3 Fragmentation .....	37
3.4 Brands and the market for alternative technology vehicles .....	41

- 3.5 Environment, technology and the creation of new market segments: the example of the THINK @bout London project ..... 45
- 3.6 Conclusions ..... 48
- 3.7 References ..... 48
  
- 4 From manufacturers to responsible mobility providers ..... 50**
  - 4.1 Background ..... 50
  - 4.2 The EU ELV directive – forcing manufacturers to take a whole-life view ..... 51
  - 4.3 Selling the package: a wider view of costs ..... 51
  - 4.4 The car industry responds to the new agenda ..... 55
  - 4.5 Corporate social and environmental responsibility ..... 58
  - 4.6 Conclusions ..... 60
  - 4.7 References ..... 60
  
- 5 Sector shift, inter-sector dynamics and futures studies ..... 62**
  - 5.1 Introduction: the question of sector shift ..... 62
  - 5.2 Futures and multi-discipline thinking ..... 64
  - 5.3 Sustainability and multi-discipline thinking ..... 66
  - 5.4 Management science, business strategy and the cult of the guru ..... 67
  - 5.5 The automotive industry: an illustration ..... 68
  - 5.6 Micro factory retailing: a futures studies vision of the automotive industry ..... 69
  - 5.7 Conclusions ..... 70
  - 5.8 References ..... 70
  
- 6 Powertrain and fuel ..... 73**
  - 6.1 How petrol and diesel came to rule the world ..... 73
  - 6.2 The gaseous alternative ..... 75
  - 6.3 Liquefied petroleum gas vs. compressed natural gas ..... 78
  - 6.4 Dimethyl Ether (DME) and biodiesel: diesel’s future? ..... 79
  - 6.5 Whatever happened to the electric car? ..... 82
  - 6.6 The Air Car – a green car at last? ..... 84
  - 6.7 References ..... 86
  
- 7 Fuel cells and the hydrogen economy ..... 87**
  - 7.1 The car industry goes for the hard cell ..... 87
  - 7.2 The role of Ballard ..... 89
  - 7.3 Fuelling the cell ..... 90
  - 7.4 AUTonomy – reinventing the chassis to fit the cell ..... 94
  - 7.5 A future for the cell? ..... 97
  - 7.6 References ..... 98

<b>8</b>	<b>High volume car production: Budd and Ford</b>	100
8.1	Introduction and background	100
8.2	History	101
8.3	Budd and Ford	106
8.4	ZIS: Budd goes East	107
8.5	Monocoque construction	107
8.6	<i>Buddism fraying at the edges</i>	110
8.7	Steel fights back	111
8.8	References	114
<b>9</b>	<b>Alternatives to high volume car production</b>	116
9.1	Introduction	116
9.2	Alternative approaches to car production	117
9.3	Sports cars: niche vs. mainstream vehicle manufacturers	121
9.4	Examples of low volume car production	124
9.5	Conclusions	127
9.6	References	128
<b>10</b>	<b>Sustainability</b>	129
10.1	The sustainability concept	129
10.2	An ethical and spiritual dimension	134
10.3	Nature and the closed-loop economy	137
10.4	References	139
<b>11</b>	<b>Sustainable mobility</b>	141
11.1	Making cars sustainable: a blueprint	141
11.2	Product durability and scrappage incentives	143
11.3	New product niches	148
11.4	Closed-loop recycling	152
11.5	References	154
<b>12</b>	<b>Practical steps towards sustainability</b>	156
12.1	Introduction	156
12.2	Alternative approaches to evaluating the environmental <i>burden of cars</i>	156
12.3	Official and unofficial vehicle emissions and fuel economy guides	160
12.4	The Volvo environmental product declaration (EPD)	162
12.5	Vehicle assembly plant rating systems	163
12.6	Car environmental rating systems	164
12.7	Conclusion	172
12.8	References	172

<b>13</b>	<b>Automobility 2050 – the vision</b> .....	174
13.1	Introduction .....	174
13.2	A sustainable world: the context for automobility 2050 .....	176
13.3	Automobility 2050: making cars .....	179
13.4	Automobility 2050: the car itself .....	180
13.5	Automobility 2050: cars in use .....	181
13.6	Conclusions: a vision of the future .....	182
13.7	References .....	186
<b>14</b>	<b>The distributed economy</b> .....	188
14.1	Introduction .....	188
14.2	Centralisation, economies of scale and globalisation .....	189
14.3	The distributed economy: an outline of basic ideas .....	193
14.4	The significance of scale and production .....	194
14.5	Conclusion .....	195
14.6	References .....	195
<b>15</b>	<b>The shape of the future</b> .....	197
15.1	Introduction .....	197
15.2	Alternative 1: the traditional assembly plant .....	198
15.3	Alternative 2: the modular assembly plant .....	200
15.4	Alternative 3: the global production network .....	201
15.5	Alternative 4: the eco-park .....	205
15.6	Alternative 5: decentralised manufacturing .....	206
15.7	Different shapes to the automotive industry .....	207
15.8	Conclusions .....	211
15.9	References .....	211
<b>16</b>	<b>The roadmap</b> .....	212
16.1	Roadmaps .....	213
16.2	The sustainable automobility roadmap: basic principles .....	215
16.3	The Bellagio Principles – a known agenda .....	220
16.4	The mechanics of change .....	222
16.5	Strategic niche management (SNM) .....	224
16.6	Conclusions .....	225
16.7	References .....	225
<b>17</b>	<b>Micro factory retailing</b> .....	227
17.1	Introduction .....	227
17.2	Micro factory retailing: a delineation of the basic idea .....	228
17.3	Barriers and opportunities for micro factory retailing .....	232
17.4	Case study: the Air Car .....	233
17.5	Conclusions .....	235
17.6	References .....	236

<b>18</b>	<b>Conclusions and implications</b> .....	237
18.1	Summary .....	237
18.2	Our future .....	239
18.3	The UK – a special case? .....	241
18.4	Conclusions .....	243
18.5	References .....	244
	<i>Index</i> .....	245
