

Economics and Ecological Risk Assessment

Applications to Watershed Management

Edited by
Randall J. F. Bruins
Matthew T. Heberling

CRC PRESS

Table of Contents

Chapter 1	
Introduction.....	1
Randall J.F. Bruins and Matthew T. Heberling	
 <i>PART I Background, Concepts, and Methods</i>	
Chapter 2	
Watershed Planning and Management in the United States.....	11
Richard A. Cole, Timothy D. Feather, and Joy D. Muncy	
Chapter 3	
Introduction to Ecological Risk Assessment in Watersheds.....	43
Randall J.F. Bruins and Matthew T. Heberling	
Chapter 4	
A Framework for Risk Analysis for Ecological Restoration Projects in the U.S. Army Corps of Engineers.....	57
Appendix 4-A: Example Application of Risk Analysis to a USACE Ecological Restoration Project.....	93
Heida L. Diefenderfer, Ronald M. Thom, and Keith Hofseth	
Chapter 5	
Introduction to Economic Analysis in Watersheds.....	107
Appendix 5-A: Discussion of Stated Preference Methods Used in Three Case Studies.....	123
Matthew T. Heberling and Randall J.F. Bruins	
Chapter 6	
Ecological and Economic Analysis for Water Quality Standards.....	127
Appendix 6-A: Using Multimetric Indices to Define the Integrity of Stream Biological Assemblages and Instream Habitat.....	137
Randall J.F. Bruins and Matthew T. Heberling	
Chapter 7	
Decision-Making and Uncertainty in Ambient Water Quality Management.....	143
Leonard A. Shabman	
Chapter 8	
Scaling Environmental Restoration to Offset Injury Using Habitat Equivalency Analysis.....	165
P. David Allen II, David J. Chapman, and Diana Lane	

Chapter 9	
Conceptual Approach for Integrated Watershed Management	185
Appendix 9-A: Discussion of Existing Frameworks that Have Been Applied To Watershed Management	207
Appendix 9-B: Sociocultural Assessment Methods.....	217
Randall J.F. Bruins, Matthew T. Heberling, and Tara A. Maddock	

PART II Applications

Chapter 10	
Evaluating Development Alternatives for a High-Quality Stream Threatened by Urbanization: Big Darby Creek Watershed.....	227
O. Homer Erektion, Ori L. Loucks, Steven R. Elliott, Donna S. McCollum, Marc Smith, and Randall J.F. Bruins	

Chapter 11	
Valuing Biodiversity in a Rural Valley: Clinch and Powell River Watershed.....	253
Appendix 11-A: Random Utility Model.....	285
Appendix 11-B: Excerpt from Survey Administered by the University of Tennessee: Explanation of Hypothetical Agricultural Policies and their Potential Impacts.....	287
Steve Stewart, James A. Kahn, Amy Wolfe, Robert V. O'Neill, Victor B. Serveiss, Randall J.F. Bruins, and Matthew T. Heberling	

Chapter 12	
Seeking Solutions for Interstate Conflict over Water and Endangered Species: Platte River Watershed.....	291
Appendix 12-A: Summary of Survey Response Information Used to Calculate Utility of Environmental Management Policy Options for the Central Platte River Floodplain.....	337
Raymond J. Supalla, Osei Yeboah, Bettina Klaus, John C. Allen, Dennis E. Jelinski, Victor B. Serveiss, and Randall J.F. Bruins	

Chapter 13	
An Ecological Economic Model for Integrated Scenario Analysis: Anticipating Change in the Hudson River Watershed.....	341
Jon D. Erickson, Caroline Hermans, John Gowdy, Karin Limburg, Audra Nowosielski, John Polimeni, and Karen Stainbrook	

Chapter 14	
Determining Economic Tradeoffs among Ecological Services: Planning for Ecological Restoration in the Lower Fox River and Green Bay.....	371
Jeffery K. Lazo, P. David Allen II, Richard C. Bishop, Douglas Beltman, and Robert D. Rowe	

Chapter 15

The Habitat-Based Replacement Cost Method: Building on Habitat Equivalency Analysis to Inform Regulatory or Permit Decisions under the Clean Water Act..... 401
P. David Allen II, Robert Raucher, Elizabeth Strange, David Mills, and Douglas Beltman

PART III Conclusions

Chapter 16
Conclusions..... 423
Randall J.F. Bruins and Matthew T. Heberling

Index 439
