Contents

Chapter 1	The Atmosphere and Its Contaminants	1
History of Air Pollution		1
Medieval Experiences		1
Industrialization		2
The Early 20th Century		2
The Great London Smog Disaster — December 1952		3
Late 20th and Early 21st Centuries		4
Terms and Definitions		4
Ambient Air		4
Criteria and Noncriteria Air Pollutants		5
Emissions		6
The Epidemiologic Model		7
Components of the Atmosphere		7
Physical Characteristics		8
Standard Conditions		9
Dew Point and Humidity		9
States of Air Pollutants		10
Pollutant Gas Features		10
Particulate Features		10
Contaminant Classifications		13
Primary Contaminants		13
Natural Emissions		14
Anthropogenic Emissions		14
Secondary Contaminants		14
Photochemical Smog		14
Air Quality Management Aspects of Photochemical Reactions		18
Chapter 2	Effects of Air Pollution	21
Time Effects and Sensitivities		21
Acute versus Chronic		21
Sensitive Populations		22
Criteria versus Noncriteria Air Pollutants		22
Criteria Air Pollutant Effects		23
Ozone		23
Sulfur Dioxide		24
Particulate Matter		26
Nitrogen Dioxide		26
Carbon Monoxide		27
Lead		27

Basic Principles of Toxicology	28
Sources of Health Effects Information	28
Dose–Response	29
Routes of Exposure	30
Inhalation.....	30
Response to Airborne Chemicals	30
The Lungs	31
The Central Nervous System.....	33
The Liver.....	33
The Kidneys	33
The Blood.....	33
The Reproductive System.....	33
The Cardiovascular System	34
The Skeletal System.....	34
Other Factors to Consider.....	34
Classes of Health Effects.....	35
Latency	36
Carcinogens.....	36
Mutagens	36
Teratogens	36
Effects on the Ecosystem	37
Effects on Vegetation	37
Plant Structure.....	37
Leaf Structure.....	37
Plant Injury.....	38
Acid Precipitation Effects	38
Pollutant Interactions	39
Economic Losses Caused by Vegetation Effects.....	39
Effects on Materials	39
Textiles	40
Building Materials.....	40
Metal Corrosion	41
Surface Coatings	42
Documents and Manuscripts.....	42
Rubber	42
Effects on Animals.....	43
Economic Losses	43
Chapter 3 Air Quality Standards and Monitoring.....	45
Standards.....	45
Acceptable Levels	46
Ambient Air Standards and Exposures	48
National	48
International Air Pollution Levels	50

The Pollution Standard Index.....	51
Episodic Standards.....	52
Noncriteria Air Contaminant Standards.....	53
Occupational Derived Standards.....	53
Risk Assessment.....	54
The Risk Assessment Process.....	54
Hazard Identification.....	54
Dose-Response Assessment.....	55
Exposure Assessment.....	56
Risk Characterization.....	57
Uncertainties.....	57
Uncertainties in Toxicity.....	57
Uncertainties in Modeled Exposures.....	58
Screening Level Approaches.....	58
Carcinogen Hazards.....	58
Acceptable Air Quality.....	61
Monitoring Ambient Air Quality.....	61
Measurement Techniques.....	63
Cumulative Samplers.....	64
Continuous Analyzers.....	66
Chapter 4 Sources and Measurement Methodologies.....	69
Global Sources.....	70
Geogenic.....	70
Biogenic.....	70
Anthropogenic.....	71
Global Emissions.....	72
Air Pollution Sinks.....	74
Biological Sinks.....	74
Mechanical Sinks.....	74
Photochemical Sinks.....	75
Anthropogenic Air Emissions.....	76
Combustion.....	76
Fuels for Combustion Reactions.....	77
Coal.....	77
Liquid Fuels.....	79
Natural Gas.....	80
Efficiency and Emissions.....	81
Enthalpy Considerations.....	81
Air and Fuel Considerations.....	82
Combustion Chemistry.....	82
Air-to-Fuel Ratio Considerations.....	83
Combustion Systems.....	84

Evaporative Emissions.....	85
Evaporative Classes.....	87
Fugitive Emissions.....	88
Waste-Related Emissions.....	89
Landfills.....	89
Treatment-Related Emissions	91
Criteria Air Pollutant Formation	91
Source Inventories of Criteria Pollutants	92
Transportation	93
Fuel Combustion.....	93
Industrial Processes.....	94
Miscellaneous.....	95
Comparisons by Category.....	95
Hazardous Air Emissions	96
Quantification of Emissions	97
Source Testing.....	97
Continuous Emissions Monitoring	97
Carbon Balance.....	98
Composition	98
Emission Factors.....	98
Fugitives	99
Accuracy and Applicability	99

Chapter 5 Meteorology, Dispersion, and Modeling 101

Earth's Energy and Radiation.....	101
Temperature and Global Air Movements	103
Global Circulation Cells	104
Jet Streams	105
Surface Effects	105
Other Forces.....	107
Patterns of High and Low Pressure.....	107
Friction	111
Horizontal and Vertical Air Patterns.....	111
Atmospheric Stability	111
Vertical Mixing	113
Horizontal Air Movements	113
Regional Air Pollution Meteorology.....	115
Inversions	115
Types of Inversions	115
Southern California — The Classic Example.....	117
Sea and Land Breezes.....	117
Other Dispersive Characteristics of the Atmosphere	119
Valley Effects	119
Chimney Effect	121
Vegetation Effects	121

Mountain Effects.....	122
Urban Heat Island Effects.....	122
Local Air Pollutant Dispersion.....	123
Point Sources and Plume Dispersion	123
Plume Rise	124
Plume Shape.....	125
Line Sources.....	127
Area Sources	128
Dispersion Modeling	128
Point-Source Modeling	129
Model Averaging Time	131
Plume Model Modifications.....	131
Line-Source Models	133
Area Modeling	133
Catastrophic Releases	133
Visibility.....	134
Mathematical Models	134
Planning Based.....	134
Receptor Based	136
Statistical Based	136
Chapter 6 Stationary-Source Control Approaches	139
Source Reduction.....	139
Management and Operational Changes	140
Fugitive Emissions	141
Product Storage Control.....	142
Materials Changes.....	144
Process-Optimizing Actions	145
Combustion Modifications.....	146
Fuels and Fuel Modification.....	151
Efficiency.....	151
Secondary Utilization.....	151
Fuel Switching	152
Fuel Blending	152
Fuel Cleaning	153
Additives.....	154
Fuel Modifications	154
Fuel Refining.....	156
Planning and Design.....	156
Geographic Location.....	156
Lower-Emission Systems.....	157
Greater Efficiency	158
Repowering	158
Emissions Characterization	158
Collection of Air Contaminants	159

Air Pollution Control Approaches.....	162
Gas Control Technologies.....	162
Absorbers	163
Adsorbers	164
Condensers	165
Thermal Oxidation	166
Particulate Control Technologies.....	167
Mechanical Collectors.....	168
Fabric Filters	169
Wet Scrubbers	171
Electrostatic Precipitators	172
Combination Units	173
Combustion Gas Control Technologies.....	174
Carbon Monoxide and Combustible Carbon Gases.....	174
Sulfur Dioxide.....	174
Oxides of Nitrogen.....	174
Selective Catalytic Reduction.....	176
Selective Noncatalytic Reduction.....	176
Oxidative Systems.....	177
Technology Comparisons	177
Control System Hardware Considerations	178
Chapter 7 Mobile Sources and Control Approaches.....	179
Engines and Air Pollutant Emissions.....	179
Pollutant Formation in Spark-Ignited Engines	181
Bulk Gas Pollutant-Formation Region.....	181
Surface Pollutant-Formation Region.....	182
Four-Stroke Pollutant Mechanisms.....	183
Lesser Sources of Carbon Gas Pollutant Emissions	183
Fuel Composition and Exhaust Emissions	185
Diesel Ignition Emission Characteristics	185
Pollutant Patterns	188
Hydrocarbon Emissions from Trip Cycles.....	188
Engine Thermodynamic Cycles.....	189
Hybrid Internal Combustion Engines.....	192
ICE Emission-Control Options	193
Effects of Operating Conditions.....	193
Spark Timing.....	193
Compression Ratio.....	193
Engine Speed.....	194
Engine Power	194
Engine Temperatures.....	195
Engine Cleanliness.....	195
Design Influences on ICEs.....	196
Two-Stage Combustion	197

External Control Approaches	198
Fuel Recapture Systems.....	198
Catalyst Systems	198
Diesel Particulate Controls	200
Fuel Change Effects	200
Diesel Fuels.....	204
Alternatives and the Future	205
Alternative Fuels	205
Alternative Mechanical Design and Efficiency Approaches.....	206
Alternative Power Systems	206
Chapter 8 Global Concerns.....	209
The Challenge.....	210
Data and Records	210
Intercontinental Pollutant Transport.....	211
The Data	212
Conclusions	213
Stratospheric Ozone.....	213
Radiation Primer	213
Stratospheric Ozone Formation	215
Early Observations	216
The Response	216
Other Sources and Variations.....	216
Lab Studies.....	217
Antarctic Studies	217
UV Data and Other Impacts	218
Alternatives.....	219
Acid Deposition	220
Water Plus Air.....	220
Water Plus Soils	220
Acid Rain Studies	221
The NAPAP Findings.....	222
Conclusions	224
Global Climate Change	224
Historical Perspective.....	225
Current Concerns	227
Measurements.....	231
Other Considerations.....	235
Feedbacks	235
Models	236
Recent Findings.....	237
Alternative Views.....	238
Increased Yields	239
Other Agricultural Effects.....	240

Chapter 9	Air Quality Laws and Regulations	243
General Law Approaches		243
Public Nuisance		243
Private Nuisance		244
Recent Approaches		244
The Process of Regulation		245
Role of the Public in Rule Making		245
Environmental Justice		246
Levels of Authority		246
Federal Preemption		246
Federal Laws Affecting Air Quality Management		247
Pre-1990 Air Quality Acts and Effects		247
Implementation Plans		248
Monitoring and Limiting Emissions		248
Prevention of Significant Deterioration		248
Emergency Episodes		249
Hazardous Air Pollutants		250
Global Concerns		250
Federal Environmental Statutes		250
Toxic Substances Control Act		250
Resource Conservation and Recovery Act		250
Comprehensive Emergency Response, Compensation, and Liability Act		251
The Clean Air Act		252
Title I — Attainment and Maintenance of the NAAQS		253
Ozone Nonattainment Requirements		254
Additional Ozone Strategies		256
Carbon Monoxide Nonattainment Provisions		258
PM10 Nonattainment Areas		259
PM2.5 Nonattainment Areas		260
Title II — Mobile Source Provisions		260
Light-Duty Vehicle Standards		260
Tailpipe Toxics		261
Emissions Control		261
Reformulated Gasoline Fuel Requirements		262
Phase II Reformulated Gasoline Performance Standards		262
California Low-Emission Vehicle II Regulations		263
Title III — Hazardous Air Pollutant Program		263
Toxic Release Inventory Program		264
HAP Sources		264
Area Sources: Urban Air Toxics Strategy		266
SIP Revisions		266
HAP Permits		266
Special Studies		266
Clean Air Mercury Rule		266

Prevention of Accidental Releases.....	267
Solid Waste Combustion.....	268
Title IV — Acid Deposition Program.....	268
SO ₂ Provisions — Clean Air Interstate Rule 2005 Effect.....	268
Market-Based Allowance Program.....	269
NO _x Provisions — Budget Trading Program.....	269
Other Provisions.....	270
Title V — Operating Permits.....	270
Permit Program Requirements.....	271
Fees.....	271
Other Provisions.....	272
Valid Permits.....	273
Title VI — Stratospheric Ozone Protection.....	273
Recapture and Recycling.....	274
Labeling.....	274
Title VII — Enforcement Provisions.....	274
Clean Air Crimes.....	274
Title VIII — Miscellaneous Provisions.....	275
Visibility and Source Receptor Concepts.....	275
Grand Canyon Visibility Transport Commission.....	275
International Treaties.....	276
Montreal Protocol.....	276
Kyoto Accords.....	276
The Influence of Nonregulatory Governmental Actions.....	277
Court Decisions.....	278
Chapter 10 Management, Trends, and Indoor Air Quality.....	279
Elements of Air Quality Management.....	280
Nonregulatory Air Quality Management Approaches.....	281
Trends.....	282
Trends in Emissions.....	282
Trends in the Extreme Ozone Area.....	283
Trends in Strategy.....	286
Fuels and Transportation.....	286
Small Sources.....	287
Governance.....	287
Hazardous Air Pollutants.....	288
Lifestyle Impacts.....	289
Stationary Sources.....	289
Natural Sources.....	290
The Outlook.....	290
Indoor Air Quality.....	291
Environmental Tobacco Smoke.....	294
Radon.....	295

Radon in Building Sources	297
Soil	297
Water	298
Building Materials.....	299
Measurement and Action Levels	299
House Characteristics and Radon Gas Entry	300
Mitigation	300
Other Indoor Air Contaminant Concerns	302
Public Buildings	304
Indoor Air Pollution in Developing Countries.....	305
List of Acronyms	307
Glossary	311
Bibliography	325
Index	331
