

COMPOSITES MANUFACTURING

Materials, Product,
and Process Engineering

Sanjay K. Mazumdar, Ph.D.

Contents

1	Introduction	1
1.1	Conventional Engineering Materials.....	1
1.1.1	Metals	2
1.1.2	Plastics.....	3
1.1.3	Ceramics	3
1.1.4	Composites.....	3
1.2	What Are Composites?	4
1.3	Functions of Fibers and Matrix	5
1.4	Special Features of Composites.....	6
1.5	Drawbacks of Composites.....	9
1.6	Composites Processing	10
1.7	Composites Product Fabrication.....	11
1.8	Composites Markets.....	13
1.8.1	The Aerospace Industry	14
1.8.2	The Automotive Industry	17
1.8.3	The Sporting Goods Industry	18
1.8.4	Marine Applications	18
1.8.5	Consumer Goods.....	19
1.8.6	Construction and Civil Structures	19
1.8.7	Industrial Applications.....	19
1.9	Barriers in Composite Markets	20
	References	20
	Questions.....	20
2	Raw Materials for Part Fabrication	23
2.1	Introduction.....	23
2.2	Reinforcements.....	23
2.2.1	Glass Fiber Manufacturing.....	27
2.2.2	Carbon Fiber Manufacturing.....	27
2.2.3	Aramid Fiber Manufacturing.....	28
2.3	Matrix Materials.....	28
2.3.1	Thermoset Resins	29
2.3.1.1	Epoxy	30
2.3.1.2	Phenolics.....	31
2.3.1.3	Polyesters	31
2.3.1.4	Vinylesters.....	32
2.3.1.5	Cyanate Esters	32
2.3.1.6	Bismaleimide (BMI) and Polyimide	32
2.3.1.7	Polyurethane.....	32

2.3.2	Thermoplastic Resins.....	33
2.3.2.1	Nylons.....	34
2.3.2.2	Polypropylene (PP).....	35
2.3.2.3	Polyetheretherketone (PEEK).....	35
2.3.2.4	Polyphenylene Sulfide (PPS)	35
2.4	Fabrics.....	36
2.4.1	Woven Fabrics.....	36
2.4.2	Noncrimp Fabrics.....	37
2.5	Prepregs.....	40
2.5.1	Thermoset Prepregs	43
2.5.2	Thermoplastic Prepregs.....	43
2.6	Preforms	44
2.7	Molding Compound.....	47
2.7.1	Sheet Molding Compound	48
2.7.2	Thick Molding Compound (TMC).....	49
2.7.3	Bulk Molding Compound (BMC).....	51
2.7.4	Injection Moldable Compounds	52
2.8	Honeycomb and Other Core Materials.....	52
	References	55
	Questions.....	55
3	Material Selection Guidelines	57
3.1	Introduction	57
3.2	The Need for Material Selection	57
3.3	Reasons for Material Selection	58
3.4	Material Property Information	59
3.5	Steps in the Material Selection Process.....	60
3.5.1	Understanding and Determining the Requirements.....	60
3.5.2	Selection of Possible Materials.....	60
3.5.3	Determination of Candidate Materials.....	61
3.5.4	Testing and Evaluation.....	62
3.6	Material Selection Methods	63
3.6.1	Cost vs. Property Analysis	63
3.6.2	Weighted Property Comparison Method.....	66
3.6.2.1	Scaling for Maximum Property Requirement.....	67
3.6.2.2	Scaling for Minimum Property Requirement	67
3.6.2.3	Scaling for Nonquantitative Property	67
3.6.3	Expert System for Material Selection.....	68
	Bibliography	69
	Questions.....	69
4	Product Development.....	71
4.1	Introduction.....	71
4.2	What Is the Product Development Process.....	72
4.3	Reasons for Product Development.....	72
4.4	Importance of Product Development.....	73

4.5	Concurrent Engineering	74
4.6	Product Life Cycle	76
4.7	Phases of Product Development	77
4.7.1	Concept Feasibility Phase	77
4.7.2	Detailed Design Phase	78
4.7.3	Prototype Development and Testing Phase	78
4.7.4	Preproduction Demonstration, or Pilot-Scale Production	79
4.7.5	Full-Scale Production and Distribution	80
4.7.6	Continuous Improvement	80
4.8	Design Review	80
4.9	Failure Modes and Effects Analysis (FMEA)	81
	Reference	83
	Bibliography	83
	Questions	83

5	Design for Manufacturing	85
5.1	Introduction	85
5.2	Design Problems	86
5.3	What Is DFM?	87
5.4	DFM Implementation Guidelines	88
5.4.1	Minimize Part Counts	88
5.4.2	Eliminate Threaded Fasteners	89
5.4.3	Minimize Variations	89
5.4.4	Easy Serviceability and Maintainability	90
5.4.5	Minimize Assembly Directions	90
5.4.6	Provide Easy Insertion and Alignment	90
5.4.7	Consider Ease for Handling	90
5.4.8	Design for Multifunctionality	91
5.4.9	Design for Ease of Fabrication	91
5.4.10	Prefer Modular Design	91
5.5	Success Stories	92
5.5.1	Composite Pickup Box	92
5.5.2	Laser Printer	92
5.5.3	Black & Decker Products	93
5.6	When to Apply DFM	93
5.7	Design Evaluation Method	93
5.8	Design for Assembly (DFA)	94
5.8.1	Benefits of DFA	95
5.8.2	Assembly-Related Defects	95
5.8.3	Guidelines for Minimizing Assembly Defects	97
	References	98
	Questions	98

6	Manufacturing Techniques	99
6.1	Introduction	99

6.2	Manufacturing Process Selection Criteria	100
6.2.1	Production Rate/Speed	100
6.2.2	Cost	101
6.2.3	Performance	101
6.2.4	Size	101
6.2.5	Shape	101
6.3	Product Fabrication Needs	103
6.4	Mold and Tool Making	104
6.4.1	Mold Design Criteria	104
6.4.1.1	Shrinkage Allowance	104
6.4.1.2	Coefficient of Thermal Expansion of Tool Material and End Product	104
6.4.1.3	Stiffness of the Mold	105
6.4.1.4	Surface Finish Quality	105
6.4.1.5	Draft and Corner Radii	105
6.4.2	Methods of Making Tools	105
6.4.2.1	Machining	105
6.4.2.2	FRP Tooling for Open Molding Processes	106
6.4.3	Tooling Guidelines for Closed Molding Operations	108
6.5	Basic Steps in a Composites Manufacturing Process	115
6.5.1	Impregnation	116
6.5.2	Lay-up	116
6.5.3	Consolidation	116
6.5.4	Solidification	117
6.6	Advantages and Disadvantages of Thermoset and Thermoplastic Composites Processing	117
6.6.1	Advantages of Thermoset Composites Processing	117
6.6.2	Disadvantages of Thermoset Composites Processing	118
6.6.3	Advantages of Thermoplastic Composites Processing	118
6.6.4	Disadvantages of Thermoplastic Composites Processing	118
6.7	Composites Manufacturing Processes	118
6.8	Manufacturing Processes for Thermoset Composites	119
6.8.1	Prepreg Lay-Up Process	119
6.8.1.1	Major Applications	120
6.8.1.2	Basic Raw Materials	122
6.8.1.3	Tooling Requirements	122
6.8.1.4	Making of the Part	122
6.8.1.5	Methods of Applying Heat and Pressure	126
6.8.1.6	Basic Processing Steps	127
6.8.1.7	Typical Manufacturing Challenges	127
6.8.1.8	Advantages of the Prepreg Lay-Up Process	128
6.8.1.9	Limitations of the Prepreg Lay-Up Process	128
6.8.2	Wet Lay-Up Process	128
6.8.2.1	Major Applications	128
6.8.2.2	Basic Raw Materials	131
6.8.2.3	Tooling Requirements	131

6.8.2.4	Making of the Part.....	131
6.8.2.5	Methods of Applying Heat and Pressure.....	134
6.8.2.6	Basic Processing Steps.....	134
6.8.2.7	Advantages of the Wet Lay-Up Process	135
6.8.2.8	Limitations of the Wet Lay-Up Process	135
6.8.3	Spray-Up Process	135
6.8.3.1	Major Applications	135
6.8.3.2	Basic Raw Materials	136
6.8.3.3	Tooling Requirements	136
6.8.3.4	Making of the Part.....	139
6.8.3.5	Methods of Applying Heat and Pressure.....	139
6.8.3.6	Basic Processing Steps.....	139
6.8.3.7	Advantages of the Spray-Up Process.....	140
6.8.3.8	Limitations of the Spray-Up Process.....	140
6.8.4	Filament Winding Process	140
6.8.4.1	Major Applications	141
6.8.4.2	Basic Raw Materials	143
6.8.4.3	Tooling	143
6.8.4.4	Making of the Part.....	144
6.8.4.5	Methods of Applying Heat and Pressure.....	146
6.8.4.6	Methods of Generating the Desired Winding Angle.....	147
6.8.4.7	Basic Processing Steps.....	148
6.8.4.8	Advantages of the Filament Winding Process.....	149
6.8.4.9	Limitations of the Filament Winding Process.....	150
6.8.5	Pultrusion Process.....	150
6.8.5.1	Major Applications	150
6.8.5.2	Basic Raw Materials	152
6.8.5.3	Tooling	154
6.8.5.4	Making of the Part.....	154
6.8.5.4.1	Wall Thickness	156
6.8.5.4.2	Corner Design	157
6.8.5.4.3	Tolerances, Flatness, and Straightness	157
6.8.5.4.4	Surface Texture.....	157
6.8.5.5	Methods of Applying Heat and Pressure.....	157
6.8.5.6	Basic Processing Steps.....	158
6.8.5.7	Advantages of the Pultrusion Process	158
6.8.5.8	Limitations of the Pultrusion Process	158
6.8.6	Resin Transfer Molding Process	159
6.8.6.1	Major Applications	159
6.8.6.2	Basic Raw Materials	161
6.8.6.3	Tooling	162
6.8.6.4	Making of the Part.....	164
6.8.6.5	Methods of Applying Heat and Pressure.....	169
6.8.6.6	Basic Processing Steps.....	170
6.8.6.7	Advantages of the Resin Transfer Molding Process	173

6.8.6.8	Limitations of the Resin Transfer Molding Process.....	174
6.8.6.9	Variations of the RTM Process	175
6.8.6.9.1	VARTM.....	175
6.8.6.9.2	SCRIMP	175
6.8.7	Structural Reaction Injection Molding (SRIM) Process	175
6.8.7.1	Major Applications.....	176
6.8.7.2	Basic Raw Materials.....	176
6.8.7.3	Tooling.....	178
6.8.7.4	Making of the Part	178
6.8.7.5	Methods of Applying Heat and Pressure	178
6.8.7.6	Basic Processing Steps	179
6.8.7.7	Advantages of the SRIM Process.....	179
6.8.7.8	Limitations of the SRIM Process.....	179
6.8.8	Compression Molding Process	179
6.8.8.1	Major Applications.....	180
6.8.8.2	Basic Raw Materials.....	181
6.8.8.3	Making of the Part	181
6.8.8.4	Mold Design.....	186
6.8.8.5	Methods of Applying Heat and Pressure	187
6.8.8.6	Basic Processing Steps	187
6.8.8.7	Advantages of the Compression Molding Process.....	188
6.8.8.8	Limitations of the Compression Molding Process.....	188
6.8.9	Roll Wrapping Process	188
6.8.9.1	Major Applications.....	188
6.8.9.2	Basic Raw Materials.....	189
6.8.9.3	Tooling.....	189
6.8.9.4	Making of the Part	189
6.8.9.5	Methods of Applying Heat and Pressure	194
6.8.9.6	Basic Processing Steps	194
6.8.9.7	Advantages of the Roll Wrapping Process	196
6.8.9.8	Limitations of the Roll Wrapping Process	196
6.8.9.9	Common Problems with the Roll Wrapping Process.....	196
6.8.10	Injection Molding of Thermoset Composites	197
6.8.10.1	Major Applications.....	197
6.8.10.2	Basic Raw Materials.....	197
6.8.10.3	Tooling.....	198
6.8.10.4	Making of the Part	198
6.9	Manufacturing Processes for Thermoplastic Composites	200
6.9.1	Thermoplastic Tape Winding	201
6.9.1.1	Major Applications.....	202
6.9.1.2	Basic Raw Materials.....	202
6.9.1.3	Tooling	202

6.9.1.4	Making of the Part.....	203
6.9.1.5	Methods of Applying Heat and Pressure.....	206
6.9.1.6	Advantages of the Thermoplastic Tape Winding Process	207
6.9.1.7	Limitations of the Thermoplastic Tape Winding Process	207
6.9.2	Thermoplastic Pultrusion Process	208
6.9.2.1	Major Applications	208
6.9.2.2	Basic Raw Materials	208
6.9.2.3	Tooling	208
6.9.2.4	Making of the Part.....	209
6.9.2.5	Methods of Applying Heat and Pressure.....	209
6.9.2.6	Advantages of the Thermoplastic Pultrusion Process	210
6.9.2.7	Limitations of the Thermoplastic Pultrusion Process	210
6.9.3	Compression Molding of GMT.....	210
6.9.3.1	Major Applications	210
6.9.3.2	Basic Raw Materials	211
6.9.3.3	Tooling	213
6.9.3.4	Part Fabrication.....	213
6.9.3.5	Methods of Applying Heat and Pressure.....	214
6.9.3.6	Advantages of Compression Molding of GMT	214
6.9.3.7	Limitations of Compression Molding of GMT	215
6.9.4	Hot Press Technique	215
6.9.4.1	Major Applications	215
6.9.4.2	Basic Raw Materials	215
