

PLASTICS FAILURE

Analysis and Prevention

John Moalli, Editor

Society of Plastics Engineers

Plastics Design Library

Table of Contents

Preface	vi
<i>John Moalli</i>	
Chapter 1. Failure Mechanisms	1
Plastics Failure Due to Oxidative Degradation in Processing and Service	1
<i>Myer Ezrin, Amanda Zepke, John Helwig, Gary Lavigne and Mark Dudley</i>	
Durability Study of Conductive Copper Traces Within Polyimide Based Substrates	9
<i>Elena Martynenko, Wen Zhou, Alexander Chudnovsky Ron Li and Larry Poglitsch</i>	
Fatigue Behavior of Discontinuous Glass Fiber Reinforced Polypropylene	17
<i>Mustafa Sezer and Ahmet Aran</i>	
Ductile Failure and Delayed Necking in Polyethylene	25
<i>W. Zhou, D. Chen, Y. Shulkin, A. Chudnovsky, N. Jivraj, K. Sehanobish, and S. Wu</i>	
Chapter 2. Processing and Assembly	31
The Role of a Heat Affected Zone (HAZ) on Mechanical Properties in Thermally Welded Low Density Polyethylene Blown Film	31
<i>Timothy E. Weston and Ian R. Harrison</i>	
Effects of Processing Conditions on the Failure Mode of an Aliphatic Polyketone Terpolymer	39
<i>Nicole R. Karttunen and Alan J. Lesser</i>	
Orientation Effects on the Weldability of Polypropylene Strapping Tape	45
<i>MJ Oliveira and DA Hemsley</i>	
Joint Performance of Mechanical Fasteners under Dynamic Load - Self-Tapping Screws in Comparison with Threaded Inserts in Brass and Plastic	53
<i>Axel Tome, Gottfried W. Ehrenstein, and Frank Dratschmidt</i>	
Defect Cost Analysis	63
<i>Christoph Roser and David Kazmer</i>	

Chapter 3. Environmental Effects	73
Environmental Stress Cracking (ESC) of ABS (II)	73
<i>Takafumi Kawaguchi, Hiroyuki Nishimura, and Fumiaki Miwa,</i> <i>Takashi Kuriyama, and Ikuo Narisawa</i>	
Residual Stress Development in Marine Coatings Under Simulated Service Conditions	79
<i>Gu Yan & J R White</i>	
Estimation of Long-term Properties of Epoxies in Body Fluids	89
<i>Steven W. Bradley</i>	
Mechanical Performance of Polyamides with Influence of Moisture and Temperature – Accurate Evaluation and Better Understanding	95
<i>Nanying Jia and Val A. Kagan</i>	
Temperature-Moisture-Mechanical Response of Vinyl Ester Resin and Pultruded Vinyl Ester/E-Glass Laminated Composites	105
<i>S. P. Phifer, K. N. E. Verghese, J. J. Lesko, and J. Haramis</i>	
Freeze-thaw Durability of Composites for Civil Infrastructure	113
<i>J. Haramis, K.N.E. Verghese, and J. J. Lesko</i>	
Chapter 4. Morphology and Fractography	121
Fractography of ABS	121
<i>Hiromi Kita, Masatoshi Higuchi, Atsushi Miura</i>	
Fractography of Metals and Plastics	127
<i>Ronald J. Parrington</i>	
Crack Propagation in Continuous Glass Fiber/Polypropylene Composites: Matrix Microstructure Effect	135
<i>M. N. Bureau and J. Denault, F. Perrin, and J. I. Dickson</i>	
Fracture Behavior of Polypropylene Modified with Metallocene Catalyzed Polyolefin	143
<i>Laura A. Fasce and Patricia M. Frontini, Shing-Chung Wong, and Yiu-Wing Mai</i>	
Morphology and Mechanical Behavior of Polypropylene Hot Plate Welds	149
<i>MJ Oliveira, CA Bernardo, and DA Hemsley</i>	
The Influence of Morphology on the Impact Performance of an Impact Modified PP/PS Alloy	159
<i>S. P. Bistany</i>	
Morphological Study of Fatigue Induced Damage in Semi-crystalline Polymers	165
<i>Nathan A. Jones and Alan J. Lesser</i>	

Chapter 5. Modeling of Failures and Failure processes	173
Failure Analysis Models for Polyacetal Molded Fittings in Plumbing Systems	173
<i>L.J. Broutman, D.B. Edwards, and P.K. So</i>	
Progressive Failure Analysis of Fiber Composite Structures	179
<i>Matt H. Triplett</i>	
Calculating Thermally Induced Stresses Using a Nonlinear Viscoelastic Material Model	187
<i>N. Schoeche and E. Schmachtenberg</i>	
Evaluation of a Yield Criteria and Energy Absorbing Mechanisms of Rubber Modified Epoxies in Multiaxial Stress States	193
<i>Robert S. Kody and Alan J. Lesser</i>	
Chapter 6. Design and Life Prediction	201
Shelf Life Failure Prediction Considerations for Irradiated Polypropylene Medical Devices	201
<i>Michael T. K. Ling, Samuel Y. Ding, Atul Khare, and L. Woo</i>	
Determining Etch Compensation Factors for Printed Circuit Boards	209
<i>Anthony DeRose, Richard P. Theriault and Tim A. Osswald, and Jose M. Castro</i>	
Activation Energies of Polymer Degradation	219
<i>Samuel Ding, Michael T. K. Ling, Atul Khare and Lecon Woo</i>	
Estimation of Time-temperature-collectives at Describing Ageing of Polymer Materials	227
<i>D. Blaese and E. Schmachtenberg</i>	
Chapter 7. Test Methods	233
Standard Test Procedures for Relevant Material Properties for Structural Analysis	233
<i>Gerald G. Trantina and Joseph T. Woods</i>	
Factors Affecting Variation in Gardner Impact Testing	241
<i>Mark Lavach</i>	
Radiation Resistance of Multilayer Films by Instrumented Impact Testing	247
<i>Robert Wojnarowski, Michael T. K. Ling, Atul Khare, and L. Woo</i>	
Aspects of the Tensile Response of Random Continuous Glass/Epoxy Composites	253
<i>Okenwa I. Okoli, G.F. Smith</i>	

Comparing the Long Term Behavior of Tough Polyethylenes by Craze Testing <i>KC Pandya and JG Williams</i>	259
Chapter 8. Failure Prevention	267
Design Aids for Preventing Brittle Failure in Polycarbonate and Polyetherimide <i>Joseph T. Woods And Ronald P. Nimmer</i>	267
10 Common Pitfalls in Thin-Wall Plastic Part Design <i>Timothy A. Palmer</i>	275
Defect Analysis and High Density Polyethylene Pipe Durability <i>Shaofu Wu, Kalyan Sehanobish, and Noor Jivraj</i>	281
Practical Risk Analysis - As a Tool for Minimizing Plastic Product Failures <i>Subodh Medhekar, John Moalli, Robert Caligiuri</i>	289
Attachment Design Analysis of a Plastic Housing Joined with Snap-fits <i>Dean Q. Lewis and Gary A. Gabriele, and Bob Brown</i>	297
Avoiding the GIGO Syndrome – Combining the Real and Virtual Worlds in Analysis of Polymer Product Failures <i>John Moalli, Steven Kurtz, Robert Sire, Sanjeev Srivastav, Ming Wu</i>	307
Chapter 9. Case studies	313
Case Studies of Inadvertent Interactions Between Polymers and Devices in Field Applications <i>Joseph H. Groeger, Jeffrey D. Nicoll, Joyce M. Riley, Peter T. Wronski</i>	313
Case Studies of Plastics Failure Related to Improper Formulation <i>Myer Ezrin and Gary Lavigne</i>	323
Translating Failure Into Success – Lessons Learned From Product Failure Analysis <i>John E. Moalli</i>	329
Index	337
