

# Methods of Soil Analysis

## Part 1—Physical and Mineralogical Methods

SSSA BOOK SERIES 5

# **METHODS OF SOIL ANALYSIS**

## **Part 1**

### **Physical and Mineralogical Methods**

#### **Second Edition**

**Arnold Klute, *Editor***

*Editorial Committee*

**G. S. Campbell**

**D. R. Nielsen**

**R. D. Jackson**

**A. Klute, chair**

**M. M. Mortland**

*Senior Managing Editor:* RICHARD C. DINAUER

*Editor-in-Chief ASA Publications:* DWAYNE R. BUXTON

*Editor-in-Chief SSSA Publications:* JOHN J. MORTVEDT

Number 9 (Part 1) in the series

## **AGRONOMY**

**American Society of Agronomy, Inc.**

**Soil Science Society of America, Inc.**

**Publisher**

**Madison, Wisconsin USA**

**1986**

# CONTENTS

	Page
DEDICATION . . . . .	xvii
FOREWORD . . . . .	xix
PREFACE . . . . .	xix
CONTRIBUTORS . . . . .	xxi
CONVERSION FACTORS FOR SI UNITS . . . . .	xxv

## 1 Errors and Variability of Observations

OSCAR KEMPTHORNE AND R. R. ALLMARAS

1-1 Introduction . . . . .	1
1-2 Classification of Measurement Errors . . . . .	2
1-3 Scientific Validity of Measurements . . . . .	4
1-4 Characterization of Variability . . . . .	4
1-5 The Estimation of Precision . . . . .	15
1-6 Precision of Derived Observations . . . . .	17
1-7 The Roles of Bias and Precision . . . . .	22
1-8 How to Study Errors of Observation . . . . .	25
1-9 Role of Errors of Observation in the Study of Relationships . . . . .	26
1-10 A Note on Terminology . . . . .	28
1-11 Statistical Problems and Techniques in General . . . . .	29
1-12 References . . . . .	30

## 2 Sampling

R. G. PETERSEN AND L. D. CALVIN

2-1 Introduction . . . . .	33
2-2 Variation of Soils . . . . .	33
2-3 Sampling Plans . . . . .	35
2-4 Sources of Errors . . . . .	44
2-5 Subsampling . . . . .	45
2-6 Composite Samples . . . . .	48
2-7 References . . . . .	50

## 3 Geostatistical Methods Applied to Soil Science

A. W. WARRICK, D. E. MYERS, AND D. R. NIELSEN

3-1 Introduction . . . . .	53
3-2 Quantification of Spatial Interdependence . . . . .	54
3-3 Punctual Kriging . . . . .	61
3-4 Block Kriging . . . . .	70
3-5 Sampling Strategies for Specified Estimation Error . . . . .	72
3-6 Further Application . . . . .	74
3-7 Discussion . . . . .	79
3-8 References . . . . .	80

**4 Extraneous Values**

W. J. DIXON

4-1 Introduction .....	83
4-2 The Problem of Estimation (Use of the Median and Range) ..	84
4-3 Confidence Limits as Estimates .....	86
4-4 The Problem of Designating Extraneous Values .....	87
4-5 Recommended Rules for Designating Extraneous Values .....	88
4-6 Recommended Rules for Estimation in the Presence of Extraneous Values .....	89
4-7 Test of Hypotheses (Trimmed and Winsorized <i>t</i> -Tests) .....	89
4-8 References .....	90

**5 Pretreatment for Mineralogical Analysis**

G. W. KUNZE AND J. B. DIXON

5-1 General Introduction .....	91
5-2 Removal of Soluble Salts and Carbonates .....	92
5-3 Removal of Organic Matter .....	95
5-4 Removal of Free Iron Oxides .....	97
5-5 Particle-size Separations .....	99
5-6 References .....	99

**6 Oxides, Hydroxides, and Aluminosilicates**

MARION L. JACKSON, CHIN H. LIM, AND LUCIAN W. ZELAZNY

6-1 Introduction .....	101
6-2 Quartz and Feldspars .....	104
6-3 Noncrystalline Aluminosilicates and Hydrous Oxides by Acid Ammonium Oxalate in the Dark .....	113
6-4 Free Iron-Aluminum Oxides and Hydroxides .....	118
6-5 Poorly Crystalline Aluminosilicates .....	124
6-6 Smectite, Vermiculite, and CEC Hysteresis .....	131
6-7 Rutile and Anatase .....	138
6-8 References .....	142

**7 Thermal Analysis Techniques**

K. H. TAN, B. F. HAJEK, AND I. BARSHAD

7-1 Introduction .....	151
7-2 Principles of Reactions and Analysis .....	152
7-3 Methods .....	157
7-4 References .....	181

**8 Petrographic Microscope Techniques**

JOHN G. CADY, L. P. WILDING, AND L. R. DREES

8-1 General Introduction .....	185
8-2 Grains .....	186
8-3 Thin Sections .....	198

8-4 Applications .....	211
8-5 Glossary of Micromorphology Terms .....	213
8-6 References .....	215
<b>9 Magnetic Methods</b>	
	M. B. MC BRIDE
9-1 Introduction .....	219
9-2 Magnetic Susceptibility .....	220
9-3 Electron Spin Resonance (ESR) .....	234
9-4 Nuclear Magnetic Resonance (NMR) .....	252
9-5 References .....	268
<b>10 Electron Microprobe Analysis</b>	
	B. L. SAWHNEY
10-1 Introduction .....	271
10-2 Principles .....	271
10-3 Instrument .....	272
10-4 Specimen Preparation .....	278
10-5 Quantitative Analysis .....	280
10-6 Monte Carlo Method .....	283
10-7 Applications in Soil Analysis .....	283
10-8 Reference Books .....	290
10-9 References .....	290
<b>11 Infrared Spectrometry</b>	
	JOE L. WHITE AND CHARLES B. ROTH
11-1 General Introduction .....	291
11-2 Principles .....	293
11-3 Sample Preparation .....	302
11-4 Functional-group and Qualitative Analysis of Organic Compounds .....	313
11-5 Identification and Characterization of Amorphous and Crystal- line Inorganic or Mineral Phases .....	315
11-6 Quantitative Analysis .....	321
11-7 Spectral Data Collection and Manipulation .....	325
11-8 References .....	326
<b>12 X-Ray Diffraction Techniques</b>	
	L. D. WHITTIG AND W. R. ALLARDICE
12-1 General Introduction .....	331
12-2 Principles of X-ray Diffraction .....	331
12-3 Preparation of Samples .....	336
12-4 X-ray Examination of Samples .....	349
12-5 Criteria For Differentiation of Phyllosilicate Species .....	351
12-6 Qualitative Interpretation of Diffraction Patterns .....	354
12-7 Quantitative Interpretation of Diffraction Patterns .....	356
12-8 References .....	359

**13 Bulk Density**

G. R. BLAKE AND K. H. HARTGE

13-1 General Introduction .....	363
13-2 Core Method .....	364
13-3 Excavation Method .....	367
13-4 Clod Method .....	371
13-5 Radiation Methods .....	373
13-6 References .....	375

**14 Particle Density**

G. R. BLAKE AND K. H. HARTGE

14-1 Introduction .....	377
14-2 Principles .....	377
14-3 Pycnometer Method .....	378
14-4 Submersion Method .....	379
14-5 Comments .....	380
14-6 References .....	381

**15 Particle-size Analysis**

G. W. GEE AND J. W. BAUDER

15-1 Introduction .....	383
15-2 Principles .....	385
15-3 Sample Preparation .....	398
15-4 Pipet Method .....	399
15-5 Hydrometer Method .....	404
15-6 Other Methods .....	408
15-7 References .....	409

**16 Specific Surface**

D. L. CARTER, M. M. MORTLAND, AND W. D. KEMPER

16-1 Introduction .....	413
16-2 Principles .....	414
16-3 Method .....	419
16-4 References .....	422

**17 Aggregate Stability and Size Distribution**

W. D. KEMPER AND R. C. ROSENAU

17-1 Introduction .....	425
17-2 Principles .....	427
17-3 Methods .....	434
17-4 References .....	441

**18 Porosity**

R. E. DANIELSON AND P. L. SUTHERLAND

18-1 Introduction .....	443
18-2 Total Porosity .....	444
18-3 Pore Size Distribution .....	450
18-4 References .....	460

**19 Penetrability**

J. M. BRADFORD

19-1 Introduction .....	463
19-2 Principles .....	463
19-3 Pocket Penetrometer .....	466
19-4 Cone Penetrometer .....	468
19-5 Small-diameter Friction-sleeve Cone Penetrometer .....	472
19-6 References .....	477

**20 Compressibility**

J. M. BRADFORD AND S. C. GUPTA

20-1 Introduction .....	479
20-2 Principles .....	480
20-3 Methods .....	486
20-4 References .....	491

**21 Water Content**

WALTER H. GARDNER

21-1 General Introduction .....	493
21-2 Direct Methods .....	495
21-3 Indirect Methods .....	512
21-4 References .....	541

**22 Water Potential: Piezometry**

R. C. REEVE

22-1 Introduction .....	545
22-2 Principles .....	546
22-3 Methods of Installing Piezometers by Driving .....	550
22-4 Method of Installing Piezometers by Jetting .....	552
22-5 Method of Flushing and Testing Piezometers .....	554
22-6 Method of Measuring Water Levels in Piezometers .....	556
22-7 Method of Installing Tensiometers .....	556
22-8 Interpretation of Hydraulic-head Readings .....	558
22-9 References .....	560

**23 Water Potential: Tensiometry**

D. K. CASSEL AND A. KLUTE

23-1 Introduction .....	563
23-2 Principles .....	563
23-3 Field Tensiometry .....	570
23-4 Laboratory Tensiometry .....	587
23-5 References .....	594

**24 Water Potential: Thermocouple Psychrometry**

STEPHEN L. RAWLINS AND GAYLON S. CAMPBELL

24-1 Introduction .....	597
24-2 Principles of Operation .....	598
24-3 Methods .....	604
24-4 Appendix .....	616
24-5 References .....	617

**25 Water Potential: Miscellaneous Methods**

GAYLON S. CAMPBELL AND GLENDON W. GEE

25-1 Introduction .....	619
25-2 Water Potential Measurements With Electrical Resistance Sensors .....	620
25-3 Water Potential Measurement With Heat Dissipation Sensors .....	625
25-4 Water Potential Measurement Using the Filter Paper Technique .....	628
25-5 Water Potential Measurement Using Vapor Equilibration .....	631
25-6 References .....	632

**26 Water Retention: Laboratory Methods**

A. KLUTE

26-1 General Introduction .....	635
26-2 Samples .....	641
26-3 Wetting Fluid .....	643
26-4 Wetting of Samples .....	643
26-5 Temperature Effects .....	644
26-6 Method .....	644
26-7 Comments .....	651
26-8 Other Methods .....	657
26-9 References .....	660

**27 Water Retention: Field Methods**

R. R. BRUCE AND R. J. LUXMOORE

27-1 Introduction .....	663
27-2 Principles .....	664
27-3 Method .....	667
27-4 Data Handling .....	675
27-5 Error Analysis .....	680

27-6	Spatial Heterogeneity .....	681
27-7	Comments .....	683
27-8	References .....	684
<b>28</b>	<b>Hydraulic Conductivity and Diffusivity: Laboratory Methods</b>	
	A. KLUTE AND C. DIRKSEN	
28-1	Introduction .....	687
28-2	General Principles .....	688
28-3	Samples and Test Fluid .....	691
28-4	Hydraulic Conductivity of Saturated Soils .....	694
28-5	Conductivity and Diffusivity of Unsaturated Soils .....	703
28-6	Alternative Methods .....	729
28-7	References .....	732
<b>29</b>	<b>Hydraulic Conductivity of Saturated Soils: Field Methods</b>	
	A. AMOOZEGAR AND A. W. WARRICK	
29-1	Introduction .....	735
29-2	Shallow Water Table Methods .....	735
29-3	Deep Water Table Methods .....	752
29-4	Comments .....	767
29-5	References .....	768
<b>30</b>	<b>Hydraulic Conductivity, Diffusivity, and Sorptivity of Unsaturated Soils: Field Methods</b>	
	R. E. GREEN, L. R. AHUJA, AND S. K. CHONG	
30-1	Introduction .....	771
30-2	Unsteady Drainage-flux Method .....	772
30-3	Simplified Unsteady Drainage-flux Method .....	780
30-4	Crust-Imposed Steady Flux Method .....	785
30-5	Sprinkler-imposed Steady Flux Method .....	789
30-6	Sorptivity by Pondered Infiltration .....	791
30-7	Sorptivity by Infiltration at Negative Matric Pressure .....	793
30-8	References .....	796
<b>31</b>	<b>Hydraulic Conductivity of Unsaturated Soils: Prediction and Formulas</b>	
	YECHZKEL MUALEM	
31-1	Introduction .....	799
31-2	Theory and Computation Formulas .....	800
31-3	Recommendations .....	819
31-4	References .....	821
<b>32</b>	<b>Intake Rate: Cylinder Infiltrometer</b>	
	HERMAN BOUWER	
32-1	Introduction .....	825
32-2	Principles .....	826

32-3 Method .....	834
32-4 Comments .....	840
32-5 References .....	843
<b>33 Intake Rate: Sprinkler Infiltrometer</b>	
ARTHUR E. PETERSON AND GARY D. BUBENZER	
33-1 Introduction .....	845
33-2 Design Parameters .....	846
33-3 Simulator Systems .....	849
33-4 A Recommended Sprinkling Infiltration System .....	857
33-5 Comments .....	864
33-6 Conclusions .....	867
33-7 References .....	867
<b>34 Intake Rate: Border and Furrow</b>	
D. C. KINCAID	
34-1 Introduction .....	871
34-2 The Volume Balance Advance Method .....	872
34-3 The Inflow-outflow Method .....	880
34-4 Recirculating Flow Method .....	884
34-5 References .....	886
<b>35 Evaporation from Bare Soil Measured with High Spatial Resolution</b>	
C. W. BOAST	
35-1 Introduction .....	889
35-2 First-stage Evaporimeter Method .....	891
35-3 Microlysimeter Method .....	893
35-4 References .....	899
<b>36 Field Capacity and Available Water Capacity</b>	
D. K. CASSEL AND D. R. NIELSEN	
36-1 General Introduction .....	901
36-2 Field Capacity .....	902
36-3 Container Capacity .....	915
36-4 Permanent Wilting Point .....	918
36-5 Available Water Capacity .....	922
36-6 References .....	924
<b>37 Temperature</b>	
STERLING A. TAYLOR AND RAY D. JACKSON	
37-1 General Introduction .....	927
37-2 Kinds of Thermometers Used in Soils Work .....	928
37-3 Calibration of Thermometers .....	932
37-4 Field Measurements .....	936
37-5 References .....	939

**38 Heat Capacity and Specific Heat**

STERLING A. TAYLOR AND RAY D. JACKSON

38-1 Introduction .....	941
38-2 Principles .....	941
38-3 Method .....	942
38-4 References .....	944

**39 Thermal Conductivity and Diffusivity**

RAY D. JACKSON AND STERLING A. TAYLOR

39-1 General Introduction .....	945
39-2 General Principles .....	947
39-3 Thermal Conductivity .....	947
39-4 Thermal Diffusivity .....	952
39-5 References .....	955

**40 Heat Flux**

M. FUCHS

40-1 Introduction .....	957
40-2 Calorimetric Method .....	958
40-3 The Gradient Method .....	961
40-4 The Combination Method .....	962
40-5 Soil Heat Flux Plate Method .....	964
40-6 Further Comments .....	967
40-7 References .....	967

**41 Heat of Immersion**

D. M. ANDERSON

41-1 Introduction .....	969
41-2 Principles .....	971
41-3 Method .....	976
41-4 References .....	984

**42 Solute Content**

J. D. RHOADES AND J. D. OSTER

42-1 Introduction .....	985
42-2 Collection of Soil Water Samples Using In Situ Samplers .....	986
42-3 Measuring Soluble Salts With In Situ or Remote Monitors .....	990
42-4 References .....	1004

**43 Solute Diffusivity**

W. D. KEMPER

43-1 Introduction: Solutes in Water .....	1007
43-2 Diffusion Concepts .....	1008

43-3	Steady-state Method .....	1014
43-4	Transient-state Methods .....	1017
43-5	Radial Transient Conditions .....	1021
43-6	General Comments .....	1023
43-7	References .....	1023
<b>44</b>	<b>Solute Dispersion Coefficients and Retardation Factors</b>	
	M. Th. VAN GENUCHTEN AND P. J. WIERENGA	
44-1	Introduction .....	1025
44-2	Theoretical Principles .....	1026
44-3	Experimental Principles .....	1036
44-4	Method I: Trial and Error .....	1039
44-5	Method II: From the Slope of an Effluent Curve .....	1040
44-6	Method III: From A Log-normal Plot of the Effluent Curve ...	1042
44-7	Method IV: Least-square Analysis of the Effluent Curve .....	1049
44-8	Method V: From Concentration-distance Curves .....	1050
44-9	Other Transport Models .....	1050
44-10	General Comments .....	1051
44-11	Appendix .....	1052
44-12	References .....	1053
<b>45</b>	<b>Water and Solute Flux</b>	
	R. J. WAGENET	
45-1	General Introduction .....	1055
45-2	Water Flux .....	1056
45-3	Solute Flux .....	1067
45-4	Summary .....	1084
45-5	References .....	1085
<b>46</b>	<b>Gas Diffusivity</b>	
	D. E. ROLSTON	
46-1	Introduction .....	1089
46-2	Laboratory Method .....	1090
46-3	Field Method .....	1098
46-4	References .....	1102
<b>47</b>	<b>Gas Flux</b>	
	D. E. ROLSTON	
47-1	Introduction .....	1103
47-2	Flux Calculated From Fick's Law .....	1104
47-3	Closed Chamber Method .....	1108
47-4	Flow-through Chamber Method .....	1112
47-5	Comments on Mechanisms Causing Mass Flow .....	1117
47-6	References .....	1118

**48 Air Permeability**

A. T. COREY

48-1 Introduction .....	1121
48-2 Principles .....	1122
48-3 Methods .....	1123
48-4 Limitations .....	1135
48-5 References .....	1136

**49 Oxygen Electrode Measurement**

C. J. PHENE

49-1 Introduction .....	1137
49-2 Platinum Electrode Method .....	1138
49-3 Membrane Electrode Method .....	1150
49-4 References .....	1158

**50 Air Pressure Measurement**

H. FLÜHLER, A. J. PECK, AND L. H. STOLZY

50-1 Introduction .....	1161
50-2 Principles .....	1163
50-3 Methods .....	1170
50-4 References .....	1171

SUBJECT INDEX .....	1173
---------------------	------
