DELMAR LEARNING

Animal Feeds, Feeding and Nutrition, and Ration Evaluation

with CD-ROM

DAVID TISCH

CONTENTS

1 INTRODUCTION 1

- Introduction 1
- Terminology 1
- Recycling in the Feed and Animal Nutrition Industries 2
- Stress, Strain, Animal Welfare, and Animal Nutrition 3
- Relationship of the Feed and Animal Nutrition Industries to Other Fields of Business and Study 4
 - Management 4
 - Quantitative Analysis 4
 - Agronomy 4
 - Computer Science 4
 - Animal Behavior 4
 - Environmental Policy 5
 - Agriculture Engineering 5
 - Animal Health 5
 - Genetics 5
 - Microbiology 6
- Careers in the Feed and Animal Nutrition Industries 6
- The Feed and Animal Nutrition Industries and Human Welfare 8
- The National Research Council 9
- The Association of American Feed Control Officials 10
- Summary 11

2 DIGESTION AND ABSORPTION 13

- Introduction 13
- The Digestive System 13
- Digestion 14
- Absorption 14
- Digestive Organs 16
 - The Mouth, Saliva Glands, and Esophagus 21
 - The Forestomachs of the Ruminant and the Crop of Poultry 22
 - The Crop 22
 - The Reticulum or Honeycomb 22
 - Rumen or Paunch 23
 - Omasum or Manyplies 24
 - The Abomasum, Proventriculus, or True Stomach 24
 - The Gizzard 24
 - The Pancreas 25
 - The Liver 25
 - The Small Intestine and Midgut 25
 - The Large Intestine 26
 - The Anus, Cloaca, and Vent 27
- Summary 27

3 FEEDSTUFFS 29

- Introduction 29
- Classification of Feedstuffs 29
- The Feedstuffs 31
 - Forages 31
 - Energy Concentrates 47
 - Protein Supplements 53
 - Mineral Supplements 58
 - Vitamin Supplements 58
 - Liquid Feeds 59
 - Additives 59
- Finished Feeds 63
- Summary 64

4 SAMPLING AND ANALYSIS 67

- Introduction 67
- Variation in Feedstuff Nutrient Content 67

Sampling Procedure	68
Hay	68
Silage	68
Pasture	68
Grains and Ingredients	68
Feed Microscopy	68
Analysis Procedures and Values	69
Proximate Analysis	69
Crude Protein	69
Carbohydrate	71
Lipids	72
Ash	72
Total Digestible Nutrients	73
Other Feed Analysis Issues and Values	74
Feed Laws and Labeling	77
Summary	77
5 DIETARY ENERGY	79
The Challenge of Energy in Nutrition	79
The Net Energy System	79
Energy and Appetite	82
Metabolic Body Size	83
How Energy Is Measured	84
Summary	84
6 CARBOHYDRATES	87
Introduction	87
Importance of Carbohydrate	87
Structure of Carbohydrates	88
Carbohydrate Absorption	91
The Sodium Pump	91
Carbohydrate Sources	93
Management of Carbohydrate Feeding	93
Summary	94
7 PROTEINS	96
Introduction	96
Importance of Protein	96
Structure of Protein	97
Amino Acids	98
Amino Acid Absorption	100
Management of Protein Feeding	100
The CNCPS 4.0/Beef NRC Level II Protein Pools	102
The Dairy NRC Protein Pools	102
Amino Acid Requirements	105
Protein Requirements	106
The Consequences of Feeding Excess Protein	107
Summary	108
8 LIPIDS	110
Introduction	110
Importance of Lipids	110
Structure of Triacylglycerols	111
Fat Terminology	112
Fat Quality	113
Describing Fatty Acids	114
The Requirement for Fatty Acids	115
Fat Content of Feed	115
Fat Absorption	118
Chylomicron Metabolism	118
Fat Storage in Monogastrics and Ruminants	119
Dietary Fat and Human Health	120
Summary	121

9 MINERALS 123

- Introduction 123
- Importance of Minerals 123
- Absorption of Minerals 124
- Major or Macrominerals 126
 - Calcium 126
 - Phosphorus 127
 - Sodium 130
 - Chloride 132
 - Potassium 133
 - Magnesium 134
 - Sulfur 135
- Trace or Microminerals 136
 - Cobalt 136
 - Copper 137
 - Iodine 138
 - Iron 139
 - Manganese 140
 - Selenium 141
 - Zinc 142
 - Chromium 144
- Buffers 144
- The Dietary Cation–Anion Difference and Electrolyte Balance 144
- Summary 145

10 VITAMINS 148

- Introduction 148
- Importance of Vitamins and Vitamin Supplementation 148
- Classification of Vitamins 149
- Vitamin Potency 149
- Vitamin Supplementation 150
- Vitamin Stability 150
- The Fat-Soluble Vitamins 151
 - Vitamin A 152
 - Vitamin D 153
 - Vitamin E 155
 - Vitamin K 156
- The Water-Soluble Vitamins 157
 - Thiamin (B₁) 157
 - Riboflavin (B₂) 158
 - Pyridoxine (B₆) 159
 - Cyanocobalamin (B₁₂) 160
 - Myoinositol 161
 - Pantothenic Acid (B₅) 161
 - Nicotinic Acid or Niacin (B₃) 162
 - Folacin, Folate, or Folic Acid (B₉) 163
 - Biotin (B₇) 164
 - Choline 164
 - Vitamin C (Ascorbic Acid) 166
- Factors Influencing the Vitamin Needs of Livestock 167
- Summary 167

11 WATER 169

- Introduction 169
- The Requirement for Water 169
- Functions of Water 169
- Feed, Metabolic Water, and Water Conservation 170
- Evaluating Water Intake 170
 - What to Do If a Water-Quality Problem Is Suspected 174
 - What to Do If a Water-Quality Problem Is Confirmed 176
- Two Final Notes Regarding Water for Livestock 176
- Summary 176

12 RATION EVALUATION AND FORMULATION 179

- Introduction 179
- Nutritional Phases in the Production Cycle 179
- The Concept of a "Balanced Nutrient" 179
- Voluntary Feed Intake 180
- Dry Matter Intake Versus As Fed Intake 180
- Dry Matter/Feed Intake and the Energy Density of the Ration 180
- Ration Evaluation 181
- Ration Formulation 182
 - Predicting the Dry Matter/Feed Intake Requirement to Formulate a Balanced Ration 182
 - Defining Performance Criteria 183
- Linear Programming in Ration Optimization 184
 - Setting Feedstuff Constraints or Restrictions 185
 - Setting Nutrient Constraints or Restrictions 185
 - Limitations of Linear Programming in Developing Least-Cost Rations 185
- Ration Formulation by Iteration 185
- Ration Formulation by Hand Calculation: The Square Method 186
- Proprietary Information: The Feed Analysis Versus the Feed Formula 189
- Presenting the Balanced Ration 189
- Summary 191

13 FEED MILLING 193

- Introduction 193
- Purchasing 193
 - Price of Commodities 194
 - Quasi-Commodities 194
 - Branded Products 195
- Process Flow 195
- Feed Conveying Equipment 195
 - Screw Conveyors 195
 - Belt Conveyors 197
 - Drag Conveyors 197
 - Pneumatic Conveyors 197
 - Bucket Elevators 197
 - Pumps 197
 - Gravity Flow 198
- Receiving 198
- Mycotoxins 198
- Proportioning and Mixing 202
 - Batch Mixing Systems 202
 - In-Line or Continuous Proportioning Systems 202
 - Comparison of Batch Mixing and In-Line Mixing Systems 203
 - Liquid Feeds 203
- Feedstuff Processing and Finished Feed Processing 204
 - Nonthermal Processing of Feedstuffs 204
 - Thermal Processing of Feedstuffs 205
- Medicated Feed 210
 - Medications Used in Livestock Feeds Described by Category 210
 - The Feed Products That Contain These Drugs, Described by Type 210
 - Avoiding Drug Carryover 210
- Organic Feed 211
- Feed Packaging 211
- Warehouse and Loadout 212
- Trucking 212
- Summary 212

14 FEEDING SWINE 214

- Breeding Herd 215
 - Lactating Sows 215
 - Breeding Swine 216
 - Gestating Swine 217
- Market Hogs 217
 - The Suckling Piglet 217

	The Nursery Pig	218
	The Growing Hog	218
	The Finishing Hog	218
	Swine Feeding and Nutrition Issues	219
	Nutrient Supplementation in Swine Nutrition	219
	The Energy Requirement	219
	Protein in Swine Nutrition	220
	True Ileal Digestibility	220
	Relating Anticipated Carcass Traits to Nutrient Requirements	221
	Predicting Performance	221
	Feedstuffs Used in Swine Diets	221
	Electrolyte Balance	223
	Phytase	223
	Feeding Antibiotics at Subtherapeutic Levels	223
	Repartitioning Agents	223
15	SWINE RATION FORMULATION	225
	Swine Ration Formulation	226
	<i>Input Pig</i> Procedure	226
	<i>Select Feeds</i> Procedure	228
	<i>Blend Feedstuffs</i> Procedure	229
	<i>View Blends</i> Procedure	230
	Selecting a Blended Feed with Other Feedstuffs	230
	<i>Make Ration</i> Procedure	231
	Making a Medicated Complete Feed	236
	<i>Print Ration or Blend</i> Procedure	238
16	FEEDING BEEF	240
	The Breeding Herd	240
	First Trimester	242
	Second Trimester	243
	Third Trimester	243
	The Postpartum Period	243
	Beef Brood Cow Feeding and Nutrition Issues	244
	Breeding Herd Replacements	247
	Growing/Finishing Cattle	248
	Urea	249
	Feed Additives	249
	Growing/Finishing Cattle Feeding and Nutrition Issues	250
17	BEEF RATION FORMULATION	253
	Beef Ration Formulation	254
	<i>Input Beef Animal</i> Procedure	254
	<i>Select Feeds</i> Procedure	259
	<i>Make Ration</i> Procedure	260
	<i>Blend Feedstuffs</i> Procedure	267
	<i>View Blends</i> Procedure	268
	Using the Blended Feed in the Balanced Ration	269
	<i>Print Ration or Blend</i> Procedure	269
18	FEEDING DAIRY	271
	Cows	271
	Fresh Cows	271
	Mid-Lactation and Late Lactation	274
	Early-Mid Dry and Close-Up Dry	275
	Calves and Heifers	276
	Liquid Feeding/Calf Starter	276
	Calf Starter	277
	Prebred Heifer and Postbred Heifer	277
	Dairy Feeding and Nutrition Issues	278
	Transition Cow Problems	278
	Excess Protein	280
	Milk Fever or Parturient Paresis	282
	Acidosis	283

- Prussic Acid Poisoning 283
- Tall Fescue Toxicosis 283
- 19 DAIRY RATION FORMULATION 285**
 - Dairy Ration Formulation 286
 - Input Dairy Animal* Procedure 286
 - Select Feeds* Procedure 289
 - Make Ration* Procedure 290
 - Blend Feedstuffs* Procedure 300
 - View Blends* Procedure 302
 - Using the Blended Feed in the Balanced Ration 302
 - Print Ration or Blend* Procedure 303
- 20 FEEDING SHEEP 305**
 - The Ewe and Ewe Lamb 305
 - Lactation 305
 - Ewe Lambs 306
 - Flushing/Breeding 306
 - Body Condition Scoring 307
 - Early/Mid-Gestation 307
 - Late Gestation 308
 - Accelerated Lambing 308
 - The Lamb 308
 - Colostrum 308
 - Creep Feed 309
 - Early Weaning 309
 - Growing and Finishing 310
 - Sheep Feeding and Nutrition Issues 310
 - Nutrition and Wool Production 310
 - Blocks for Pastured/Range Sheep 311
 - Copper 311
 - The Need for Vitamin D 311
 - Bloat 311
 - Processing Grains 311
 - Urinary Calculi 312
 - Feeder Space 312
 - Prussic Acid Poisoning 312
 - Nitrate Poisoning 312
 - Poisonous Plants 312
 - Ruminal Acidosis 313
 - Enterotoxemia 315
 - Grass Tetany 315
 - White Muscle Disease 316
 - Milk Fever or Parturient Paresis 316
 - Tall Fescue Toxicosis 316
 - Polioencephalomalacia 316
- 21 SHEEP RATION FORMULATION 318**
 - Sheep Ration Formulation 319
 - Input Sheep* Procedure 319
 - Select Feeds* Procedure 321
 - Make Ration* Procedure 321
 - Blend Feedstuffs* Procedure 328
 - View Blends* Procedure 329
 - Using the Blended Feed in the Balanced Ration 329
 - Print Ration or Blend* Procedure 330
- 22 FEEDING GOATS 332**
 - The Doe 332
 - Lactation 332
 - Flushing/Breeding 333
 - Gestation 334
 - The Kid 334
 - Liquid Feeding/Creep Feed 334
 - Growing 335

Goat Feeding and Nutrition Issues	335
State of Research into Goat Nutrient Requirements	335
Feed Passage Rate	335
Selective Feeding Behavior	335
Fiber Production by Goats	336
Activity Level and Nutrient Requirements	336
Feedstuffs Affecting Milk Flavor	337
Urinary Calculi	337
Poisonous Plants	337
Bloat	337
Acidosis	337
Prussic Acid Poisoning	337
Nitrate Poisoning	337
Parturient Paresis	338
Tall Fescue Toxicosis	338
Enterotoxemia	338
White Muscle Disease	338
23 GOAT RATION FORMULATION	340
Goat Ration Formulation	341
<i>Input Goat Procedure</i>	341
<i>Select Feeds Procedure</i>	342
<i>Make Ration Procedure</i>	343
Making a Medicated Complete Feed	351
<i>Print Ration or Blend Procedure</i>	353
24 FEEDING HORSES	355
The Breeding Herd	355
The Brood Mare	355
The Stallion	357
The Growing Horse	357
Suckling	357
Weanling	358
Yearling, Long Yearling, and 2-Year-Old	358
Horse Feeding and Nutrition Issues	359
The Working Horse	359
Fermentation in the Large Intestine	359
Group Feeding	360
General Feeding Guidelines	360
Colic	361
Laminitis and Founder	363
Azoturia	363
Heaves	364
Body Condition Scoring	364
Prussic Acid Poisoning	364
Endophyte-Infected Grasses	364
Feedstuffs Affecting Urinary Tract Health	366
Developmental Orthopedic Disease	366
Nutritional Needs of the Geriatric Horse	366
Feedstuffs Used in Horse Diets	366
25 HORSE RATION FORMULATION	368
Horse Ration Formulation	369
<i>Input Horse Procedure</i>	369
<i>Select Feeds Procedure</i>	371
<i>Make Ration Procedure</i>	372
<i>Blend Feedstuffs Procedure</i>	375
<i>View Blends Procedure</i>	376
Using the Blended Feed in the Balanced Ration	377
<i>Print Ration or Blend Procedure</i>	378
26 FEEDING CHICKENS	380
The Layer	380
Starter	380
Grower	380

- Developer 381
- Egg Production 381
- Molting 382
- Growing Flock Replacements 382
- The Broiler 383
 - Egg Incubation 384
 - Starter 384
 - Grower 384
 - Finisher 384
- Layer and Broiler Feeding and Nutrition Issues 384
 - Dry Matter/Feed Intake 384
 - The Energy Requirement 384
 - Amino Acids and Nitrogen Requirements 385
 - Enzymes 386
 - Xanthophylls and Carotenoids 386
 - Electrolyte Balance 386
 - Feeding Antibiotics at Subtherapeutic Levels 386
 - Grit 386
- 27 CHICKEN RATION FORMULATION 388**
 - Chicken Ration Formulation 389
 - Input Chicken* Procedure 389
 - Select Feeds* Procedure 391
 - Make Ration* Procedure 392
 - Making a Medicated Complete Feed 397
 - View Blends* Procedure 399
 - Using the Medicated Complete Feed in the Ration 400
 - Print Ration or Blend* Procedure 400
- 28 FEEDING DOGS 402**
 - The Bitch 402
 - Gestation 402
 - Lactation 402
 - Maintenance/Anestrous 402
 - The Puppy 403
 - Suckling/Creep Feeding 403
 - Growth 403
 - Adult 404
 - Dog Feeding and Nutrition Issues 404
 - Association of American Feed Control Officials 404
 - Feeding Programs 406
 - The Role of Meat 406
 - Dog Diets Compared to Human Diets 407
 - Dog Feeding and Public Health 407
 - Feed Form 407
 - Dog Body Condition 407
 - Carbohydrate 408
 - Protein 409
 - Fat 409
 - Vitamins 409
- 29 DOG RATION FORMULATION 411**
 - Dog Ration Formulation 412
 - Input Dog* Procedure 412
 - Select Feeds* Procedure 413
 - Make Ration* Procedure 414
 - Blend Feedstuffs* Procedure 420
 - View Blends* Procedure 420
 - Using the Blended Feed in the Balanced Ration 421
 - Print Ration or Blend* Procedure 421
- 30 FEEDING CATS 423**
 - The Queen 423
 - Gestation 423

Lactation	423
Maintenance/Anestrous	423
The Kitten	424
Suckling/Creep Feeding	424
Weaned Kittens	425
Adult	425
Cat Feeding and Nutrition Issues	425
Differences between Cats and Dogs	425
Energy	425
Fat	426
Carbohydrate	426
Protein	427
Vitamins	428
Feline Lower Urinary Tract Disease	428
Flavors	429
Feed Form	429
Requirements	429
31 CAT RATION FORMULATION	432
Cat Ration Formulation	433
<i>Input Cat</i> Procedure	433
<i>Select Feeds</i> Procedure	435
<i>Make Ration</i> Procedure	436
<i>Blend Feedstuffs</i> Procedure	440
<i>View Blends</i> Procedure	441
Using the Blended Feed in the Balanced Ration	441
<i>Print Ration or Blends</i> Procedure	442
32 FEEDING RABBITS	443
The Doe and Buck	443
The Young Rabbit	445
Rabbit Feeding and Nutrition Issues	445
The Rabbit Digestive Tract	445
Cecotrophy	446
Feeding Management	446
Watering and Feeding Equipment	447
Enteritis	447
Fur Block	447
Urolithiasis	447
33 RABBIT RATION FORMULATION	449
Rabbit Ration Formulation	450
<i>Input Rabbit</i> Procedure	450
<i>Select Feeds</i> Procedure	452
<i>Make Ration</i> Procedure	453
<i>Blend Feedstuffs</i> Procedure	457
Using the Blended Feed in the Balanced Ration	458
<i>Print Ration or Blend</i> Procedure	459
34 FEEDING FISH	461
Channel Catfish	461
Broodstock	461
Food Fish	461
Rainbow Trout	463
Broodstock	463
Food Fish	463
Fish Feeding and Nutrition Issues	464
Differences between the Nutrient Needs of Fish and Those of Terrestrial Livestock	464
National Research Council	466
The Role of Pelleted Feed in Fish Feeding	466
Amount to Feed	466
Protein Content of Fish Rations	468
Fat Content of Fish Rations	469
Types of Feed Delivery Systems	469

35 FISH RATION FORMULATION 471

Fish Ration Formulation 472

Input Fish Procedure 472

Select Feeds Procedure 474

Make Ration Procedure 475

Blend Feedstuffs Procedure 479

View Blends Procedure 480

Using the Blended Feed in the Balanced Ration 480

Print Ration or Blend Procedure 481
