Transportation Decision Making

Principles of Project Evaluation and Programming

KUMARES C. SINHA AND SAMUEL LABI

CONTENTS

	Preface		xxi
CHAPTER 1	INTRODUCTORY CONCEPTS IN TRANSPORTATION DECISION MAKING		1
	Introduction		1
1.1	Overall Transportation Program Development		1
	1.1.1	Network-Level Planning	1
	1.1.2	Project Development	2
	1.1.3	Programming	2
	1.1.4	Budgeting	2
	1.1.5	Financial Planning	2
1.2	The Process of Transportation Project Development		2
	1.2.1	PDP Steps	3
	1.2.2	Federal Legislation That Affects Transportation Decision Making	5
1.3	Impacts of Transportation System Stimuli		6
	1.3.1	Types of Transportation Stimuli	6
	1.3.2	Impact Categories and Types	7
	1.3.3	Dimensions of the Evaluation	9
1.4	Other Ways of Categorizing Transportation System Impacts		11
1.5	Role of Evaluation in PDP and Basic Elements of Evaluation		12
	1.5.1	Role of Evaluation in PDP	12
	1.5.2	Reasons for Evaluation	12
	1.5.3	Measures of a Project's Worth	12
1.6	Procedure for Transportation System Evaluation		13
	1.6.1	Good Practices in Evaluation	18
	Summary		18
	Exercises		19
	References		19
CHAPTER 2	PERFORMANCE MEASURES IN TRANSPORTATION EVALUATION		21
	Introduction		21
2.1	Transportation System Goals, Objectives, and Performance Measures		21

2.2 Performance Measures at the Network and Project Levels 22
2.3 Properties of a Good Performance Measure 24
2.4 Dimensions of Performance Measures 25
2.5 Performance Measures Associated with Each Dimension 25
2.5.1 Overall Goals 25
2.5.2 System Objectives 26
2.5.3 Sector Concerns and Interests 29
2.5.4 Flow Entity (Passenger and Freight) 29
2.5.5 Type of Transportation Mode 29
2.5.6 Number of Transportation Modes Involved 30
2.5.7 Entity or Stakeholder Affected 32
2.5.8 Spatial Scope 33
2.5.9 Level of Agency Responsibility 33
2.5.10 Time Frame and Level of Refinement 33
2.6 Linking Agency Goals to Performance Measures: State of Practice 33
2.7 Benefits of Using Performance Measures 33
Summary 34
Exercises 34
References 35

CHAPTER 3 ESTIMATING TRANSPORTATION DEMAND 37

Introduction 37
3.1 Transportation Demand 37
3.1.1 Basic Concepts in Transportation Demand Estimation 37
3.1.2 Causes of Shifts in the Transportation Demand Curve 39
3.1.3 Categorization of Demand Estimation Models 39
3.1.4 Aggregate Methods for Project-Level Transportation Demand Estimation 39
3.2 Transportation Supply 48
3.2.1 Concept of Transportation Supply 48
3.2.2 Causes of Shifts in the Transportation Supply Curve 49
3.3 Equilibration and Dynamics of Transportation Demand and Supply 49
3.3.1 Demand–Supply Equilibration 49
3.3.2 Simultaneous Equation Bias in Demand–Supply Equilibration 49
3.3.3 Dynamics of Transportation Demand and Supply 50
3.4 Elasticities of Travel Demand 50
3.4.1 Classification of Elasticities by the Method of Computation 51
3.4.2 Classification of Elasticities by the Attribute Type 52
3.4.3 Classification of Elasticities by the Relative Direction of Response: Direct and Cross-Elasticities 52
3.4.4 Examples of Elasticity Values Used in Practice 53
3.4.5 Application of the Elasticity Concept: Demand Estimation 56
3.4.6 Consumer Surplus and Latent Demand 57
3.5 Emerging Issues in Transportation Demand Estimation 58
Summary 59
Exercises 59
References 61
Additional Resources 63

CHAPTER 4 TRANSPORTATION COSTS 65

Introduction 65
4.1 Classification of Transportation Costs 65
4.1.1 Classification by the Incurring Party 65
4.1.2 Classification by the Nature of Cost Variation with Output 65
4.1.3 Classification by the Expression of Unit Cost 66
4.1.4 Classification by Position in the Facility Life Cycle 69
4.1.5 Other Classifications of Transportation Costs 69
4.2 Transportation Agency Costs 69
4.2.1 Agency Costs over the Facility Life Cycle 70
4.2.2 Techniques for Estimating Agency Costs 70
4.2.3 Risk as an Element of Agency Cost 72
4.3 Transportation User Costs 72
4.3.1 User Cost Categories 72
4.3.2 Impacts of Demand Elasticity, Induced Demand, and Other Exogenous Changes on User Costs 73
4.4 General Structure and Behavior of Cost Functions 74
4.4.1 Components of a Transportation Cost Function 74
4.4.2 Economies and Diseconomies of Scale 75
4.5 Historical Cost Values and Models for Highway Transportation Systems 76
4.5.1 Highway Agency Cost Models 76
4.5.2 Transit Cost Values and Models 76
4.5.3 Relationships between Transit Operating Costs, System Size, Labor Requirements, and Technology 89
4.5.4 Air Transportation Costs 89
4.6 Issues in Transportation Cost Estimation 90
4.6.1 Aggregated Estimates for Planning vs. Detailed Engineering Estimates for Projects 90
4.6.2 Adjustments for Temporal and Spatial Variations (How to Update Costs) 90
4.6.3 Adjustments for Economies of Scale 91
4.6.4 Problem of Cost Overruns 92
4.6.5 Relative Weight of Agency and User Cost Unit Values 93
Summary 93
Exercises 94
References 94

CHAPTER 5 TRAVEL-TIME IMPACTS 97

Introduction 97
5.1 Categorization of Travel Time 97
5.1.1 Trip Phase 97
5.1.2 Other Bases for Travel-Time Categorization 98
5.2 Procedure for Assessing Travel-Time Impacts 98
5.3 Issues Relating to Travel-Time Value Estimation 104
5.3.1 Conceptual Basis of Time Valuation 104
5.3.2 Factors Affecting the Travel-Time Value 104

		5.3.3 Methods for Valuation of Travel Time	107
	5.4	Concluding Remarks	115
		Summary	115
		Exercises	116
		References	117
		Additional Resources	118
		Appendix A5.1: Estimation of Roadway Capacity Using the HCM Method (TRB, 2000)	118
		Appendix A5.2: Estimation of Roadway Operating Speeds Using the HCM Method (TRB, 2000)	120
		Appendix A5.3: Travel Times Used in World Bank Projects	123
CHAPTER 6	EVALUATION OF SAFETY IMPACTS		127
		Introduction	127
	6.1	Basic Definitions and Factors of Transportation Safety	128
		6.1.1 Definition of a Crash	128
		6.1.2 Transportation Crashes Classified by Severity	128
		6.1.3 Categories of Factors Affecting Transportation Crashes	128
	6.2	Procedure for Safety Impact Evaluation	131
	6.3	Methods for Estimating Crash Reduction Factors	141
		6.3.1 Before-and-After Studies	141
		6.3.2 Cross-Sectional Studies	142
		6.3.3 Comparison of the Before-and-After and Cross-Sectional Methods	143
		6.3.4 Elasticity of Crash Frequency	143
	6.4	Safety-Related Legislation	144
	6.5	Software Packages for Safety Impact Evaluation of Transportation Investments	144
		6.5.1 Interactive Highway Safety Design Model	144
		6.5.2 Indiana's Safety Management System	144
	6.6	Considerations in Safety Impact Evaluation	144
		Summary	145
		Exercises	146
		References	147
		Additional Resources	148
		Appendix A6: Crash Reduction and Accident Modification Factors	149
CHAPTER 7	VEHICLE OPERATING COST IMPACTS		157
		Introduction	157
	7.1	Components of Vehicle Operating Cost	157
		7.1.1 Fuel	157
		7.1.2 Shipping Inventory	157
		7.1.3 Lubricating Oils for Mechanical Working of the Drivetrain	158
		7.1.4 Preservation of the Vehicle–Guideway Contact Surface	158
		7.1.5 Vehicle Repair and Maintenance	158
		7.1.6 Depreciation	158
		7.1.7 VOC Data Sources and Average National VOC Rates	158
	7.2	Factors that Affect Vehicle Operating Cost	159
		7.2.1 Vehicle Type	159
		7.2.2 Fuel Type	160

7.2.3 Longitudinal Grade 161
7.2.4 Vehicle Speed 161
7.2.5 Delay 164
7.2.6 Speed Changes 166
7.2.7 Horizontal Curvature 166
7.2.8 Road Surface Condition 167
7.2.9 Other VOC Factors 169
7.3 Procedure for Assessing VOC Impacts 169
7.3.1 Steps for Assessing the Impacts 169
7.3.2 Implementation of Steps 4 to 6 Using the HERS Method 172
7.4 Special Case of VOC Estimation: Work Zones 176
7.5 Selected Software Packages that Include A VOC Estimation Component 176
7.5.1 AASHTO Method 176
7.5.2 HERS Package: National and State Versions 176
7.5.3 HDM-4 Road User Effects 176
7.5.4 Surface Transportation Efficiency Analysis Model 177
7.5.5 Other Models That Include a VOC Estimation Component 177
7.6 Comparison of VOC Estimation Methods and Software 177
7.6.1 Levels of Detail 177
7.6.2 Data Sources 177
Summary 178
Exercises 178
References 179
Additional Resources 180
Appendix A7.1: FHWA (2002) HERS Models for VOC Computation 180
Appendix A7.2: VOC Component Unit Costs 194
Appendix A7.3: Pavement Condition Adjustment Factors 194

CHAPTER 8 ECONOMIC EFFICIENCY IMPACTS 197

Introduction 197
8.1 Interest Equations and Equivalencies 197
8.1.1 Cash Flow Illustrations 197
8.1.2 The Concept of Interest 197
8.1.3 Types of Compounding and Interest Rates 198
8.1.4 Interest Equations and Key Variables 199
8.1.5 Special Cases of Interest Equations 202
8.2 Criteria for Economic Efficiency Impact Evaluation 204
8.2.1 Present Worth of Costs 204
8.2.2 Equivalent Uniform Annual Cost 204
8.2.3 Equivalent Uniform Annual Return 204
8.2.4 Net Present Value 205
8.2.5 Internal Rate of Return 205
8.2.6 Benefit–Cost Ratio 205
8.2.7 Evaluation Methods Using Incremental Attributes 206
8.2.8 General Discussion of Economic Efficiency Criteria 207
8.3 Procedure for Economic Efficiency Analysis 207
8.4 Software Packages for Economic Efficiency Analysis 209
8.4.1 Surface Transportation Efficiency Analysis Model 209
8.4.2 MicroBenCost Model 209
8.4.3 Highway Development and Management Standards Model 210

	8.4.4 Highway Economic Requirements system	210
	8.4.5 California DOT'S Cal-B/C System	210
8.5	Life-Cycle Cost Analysis	210
8.6	Case Study: Economic Efficiency Impact Evaluation	210
8.7	Final Comments on Economic Efficiency Analysis	212
	Summary	213
	Exercises	213
	References	215
	Additional Resources	216
	Appendix A8	216
CHAPTER 9	ECONOMIC DEVELOPMENT IMPACTS	229
	Introduction	229
9.1	Economic Development Impact Types	229
	9.1.1 Economic Development Impact Types	229
	9.1.2 Economic Development Impact Mechanisms	230
	9.1.3 Selection of Appropriate Measures of Economic Impact	230
9.2	Tools for Economic Development Impact Assessment	231
	9.2.1 Surveys and Interviews	232
	9.2.2 Market Studies	235
	9.2.3 Comparative Analysis Tools: Case Studies	235
	9.2.4 Economic Multiplier/Input–Output Models	237
	9.2.5 Statistical Analysis Tools	239
	9.2.6 Economic Simulation Models	240
9.3	Estimation of Long-term Regional Economic Development Impacts	241
9.4	Case Study: Economic Development Impact Assessment	244
	Summary	246
	Exercises	246
	References	247
	Additional Resources	249
CHAPTER 10	AIR QUALITY IMPACTS	251
	Introduction	251
10.1	Air Pollution Sources and Trends	251
	10.1.1 Pollutant Types, Sources, and Trends	251
	10.1.2 Categories of Air Pollution	254
10.2	Estimating Pollutant Emissions	254
	10.2.1 Some Definitions	254
	10.2.2 Factors Affecting Pollutant Emissions from Motor Vehicles	254
	10.2.3 Approaches for Estimating Pollutant Emissions from Highways	256
	10.2.4 Procedure for Estimating Highway Pollutant Emissions	258
	10.2.5 Software for Estimating Pollutant Emissions	261
10.3	Estimating Pollutant Concentration	265
	10.3.1 Factors Affecting Pollutant Dispersion	265
	10.3.2 Pollutant Dispersion Models	266
	10.3.3 Software for Estimating Pollutant Dispersion and Concentrations	270

10.4 Air Pollution from Other Modes 271
10.4.1 Air Transportation 271
10.4.2 Rail Transportation 273
10.4.3 Marine Transportation 273
10.4.4 Transit (Various Modes) 273
10.5 Monetary Costs of Air Pollution 274
10.5.1 Methods of Air Pollution Cost Estimation 274
10.5.2 Air Pollution Cost Values 275
10.6 Air Quality Standards 276
10.7 Mitigating Air Pollution from Transportation Sources 276
10.8 Air Quality Legislation and Regulations 277
10.8.1 National Legislation 277
10.8.2 Global Agreements 278
Summary 278
Exercises 278
References 279
Additional Resources 280
Appendix A10.1: Using MOBILE6 to Estimate Emissions 280
Appendix A10.2: Values of the Gaussian Distribution Function 284

CHAPTER 11 NOISE IMPACTS 287

Introduction 287
11.1 Fundamental Concepts of Sound 287
11.1.1 General Characteristics 287
11.1.2 Addition of Sound Pressure Levels from Multiple Sources 288
11.2 Sources of Transportation Noise 290
11.3 Factors Affecting Transportation Noise Propagation 290
11.3.1 Nature of Source, Distance, and Ground Effects 291
11.3.2 Effect of Noise Barriers 292
11.4 Procedure for Estimating Noise Impacts for Highways 292
11.5 Application of the Procedure using the FHWA Model Equations 293
11.5.1 Reference Energy Mean Emission Level 295
11.5.2 Traffic Flow Adjustment 295
11.5.3 Distance Adjustment 295
11.5.4 Adjustment for Finite-Length Roadways 295
11.5.5 Shielding Adjustment 296
11.5.6 Combining Noises from Various Vehicle Classes 299
11.6 Application of the Procedure Using the Traffic Noise Model (TNM) Software Package 300
11.6.1 The Traffic Noise Model 300
11.7 Estimating Noise Impacts for Other Modes 301
11.7.1 Transit Noise and Vibration 301
11.7.2 Air Transportation 301
11.7.3 Rail Transportation 301
11.7.4 Marine Noise 303
11.7.5 General Guidelines for Noise Impact Evaluation of New Transportation Improvements 303
11.8 Mitigation of Transportation Noise 304
11.8.1 Noise Barrier Cost Estimates 305

11.9	Legislation and Regulations Related to Transportation Noise	306
	Summary	308
	Exercises	308
	References	309
	Additional Resources	310
	Appendix A11: Noise Attenuation Charts by Barriers Defined by N_0, ϕ_L, and ϕ_R	310
CHAPTER 12	IMPACTS ON WETLANDS AND OTHER ECOSYSTEMS	313
	Introduction	313
12.1	Basic Ecological Concepts	313
	12.1.1 Concept of Ecosystems	313
	12.1.2 Physical Base	314
	12.1.3 Wetland Ecosystems	314
12.2	Mechanisms of Ecological Impacts	315
	12.2.1 Direct vs. Indirect Mechanisms	315
	12.2.2 Impact Mechanism by Species Type	315
12.3	Ecological Impacts of Activities at Various PDP Phases	315
	12.3.1 Locational Planning and Preliminary Field Surveys	316
	12.3.2 Transportation System Design	319
	12.3.3 Construction	319
	12.3.4 Operations	319
	12.3.5 Maintenance	320
12.4	Performance Goals for Ecological Impact Assessments	320
	12.4.1 Diversity of the Physical Base of the Ecosystem	320
	12.4.2 State of Habitat Fragmentation	320
	12.4.3 Significant Species and Habitats	321
	12.4.4 Diversity of Species	321
	12.4.5 Ecosystem Stability	321
	12.4.6 Ecosystem Quality or Productivity	322
12.5	Procedure for Ecological Impact Assessment	322
12.6	Key Legislation	329
	12.6.1 Endangered Species Act of 1973	329
	12.6.2 Laws Related to Wetlands and Other Habitats	329
12.7	Mitigation of Ecological Impacts	329
	12.7.1 Mitigation at Various Phases of the Project Development Process	331
12.8	Methods and Software Packages for Ecological Impact Assessment	332
	12.8.1 Wetland Functional Analysis	332
	12.8.2 Hydrogeomorphic Classification Method	333
	12.8.3 Habitat Evaluation Procedures Software	334
	Summary	334
	Exercises	334
	References	335
	Additional Resources	336
CHAPTER 13	IMPACTS ON WATER RESOURCES	337
	Introduction	337
13.1	Categories of Hydrological Impacts	337
	13.1.1 Source of Impacts	337

13.1.2 Impact Types 338
13.1.3 Water Source Affected 338
13.1.4 Transportation Mode and Activity 338
13.2 Hydrological Impacts by Transportation Mode 338
13.2.1 Highway Impacts 338
13.2.2 Railway Impacts 339
13.2.3 Air Transportation Impacts 339
13.2.4 Marine Transportation Impacts 341
13.3 Performance Measures for Hydrological Impact Assessment 341
13.3.1 Measures Related to Water Quantity and Flow Patterns 342
13.3.2 Measures Related to Water Quality 342
13.4 Procedure for Water Quality Impact Assessment 343
13.5 Methods for Predicting Impacts on Water Resources 345
13.5.1 Impacts on Water Quantity 345
13.5.2 Impacts on Water Quality 348
13.6 Mitigation of Water Resource Impacts 353
13.6.1 Mitigation Measures by Impact Criterion 353
13.6.2 Mitigation Measures by Nature of Water Source 353
13.6.3 Mitigation Measures by PDP Phase 354
13.6.4 Discussion of Mitigation 354
13.7 Water Quality Standards 354
13.8 Legislation Related to Water Resource Conservation 354
13.9 Software for Water Resources Impact Assessment 355
Summary 355
Exercises 356
References 357
Additional Resources 358

CHAPTER 14 VISUAL IMPACTS 359

Introduction 359
14.1 Principles of Visual Performance 359
14.1.1 General Principles 359
14.1.2 Performance Measures for Visual Performance Assessment 360
14.2 Factors Affecting Visual Performance and Impact Mechanisms 361
14.2.1 Factors 361
14.2.2 Impact Mechanisms 363
14.3 Procedure for Visual Impact Assessment 363
14.4 Legislation Related to Visual Impact 371
14.5 Mitigation of Poor Visual Performance of Existing Facilities 371
14.6 Visual Performance Enhancement: State of Practice 372
14.6.1 Context-Sensitive Design Practices 373
14.6.2 Policies and Guidelines for Visual Performance Preservation and Enhancement 373
14.6.3 Cost of Visual Performance Enhancements 375
Summary 375
Exercises 376
References 376
Additional Resources 377

CHAPTER 15 IMPACTS ON ENERGY USE 379

Introduction 379
15.1 Factors that Affect Transportation Energy Consumption 381
15.1.1 Fuel Prices and Taxes 381
15.1.2 Fuel Economy Regulation 381
15.1.3 Vehicle Sales by Class 381
15.1.4 Vehicle Technology 381
15.1.5 Road Geometry 381
15.1.6 Transportation Intervention 382
15.1.7 Other Factors 383
15.2 Energy Intensity 383
15.3 Framework for Energy Impact Analysis 383
15.3.1 Direct Consumption 384
15.3.2 Indirect Consumption 384
15.4 Procedures for Estimating Energy Consumption 386
15.4.1 Macroscopic Assessment: Approach A 386
15.4.2 Project Screening Level Model: Approach B 388
15.4.3 Microscopic Simulation: Approach C 393
15.5 The National Energy Modeling System 397
15.6 Approaches to Energy Consumption Estimation–a Comparison 399
15.7 Energy and Transportation: What the Future Holds 399
Summary 400
Exercises 400
References 401
Additional Resources 401

CHAPTER 16 LAND-USE IMPACTS 403

Introduction 403
16.1 The Transportation–Land-Use Relationship 404
16.1.1 Land-Use Impacts on Transportation 404
16.1.2 Transportation Impacts on Land Use 406
16.1.3 Land-Use Impacts in terms of Monetary Costs 406
16.2 Tools for Analyzing Land-Use Changes 407
16.2.1 Qualitative Tools 408
16.2.2 Quantitative Tools 409
16.3 Procedure for Land-Use Impact Assessment 413
16.4 Case Studies: Land-Use Impact Assessment 419
16.4.1 Evansville-Indianapolis I-69 Highway Project 419
16.4.2 Light-Rail Transit Project 420
Summary 422
Exercises 422
References 423

CHAPTER 17 SOCIAL AND CULTURAL IMPACTS 427

Introduction 427
17.1 Mechanisms of Transportation Impacts on the Social and Cultural Environments 428
17.1.1 Direct Impacts 428

17.1.2 Indirect Impacts 428
17.1.3 Cumulative Impacts 429
17.2 Target Facilities and Groups, and Performance Measures 429
17.2.1 Target Facilities and Groups 429
17.2.2 Performance Measures 429
17.2.3 The Issue of Poverty Alleviation in Developing Countries 431
17.3 Equity and Environmental Justice Concerns 431
17.3.1 An Example of the Distribution of Project Costs and Benefits 434
17.4 Procedure for Social and Cultural Impact Assessment 435
17.5 Tools for Sociocultural Impact Assessment 439
17.5.1 Qualitative Tools 439
17.5.2 Quantitative Tools 441
17.6 Mitigation of Adverse Sociocultural Impacts 442
17.6.1 Sociocultural Impact Mitigation: State of Practice 442
17.7 Legislation Related to Sociocultural Impacts 443
Summary 444
Exercises 445
References 446
Additional Resources 447

CHAPTER 18 EVALUATION OF TRANSPORTATION PROJECTS AND PROGRAMS USING MULTIPLE CRITERIA 449

Introduction 449
18.1 Establishing Weights of Performance Criteria 449
18.1.1 Equal Weighting 449
18.1.2 Direct Weighting 450
18.1.3 Regression-Based Observer-Derived Weighting 450
18.1.4 Delphi Technique 451
18.1.5 Gamble Method 452
18.1.6 Pairwise Comparison of the Performance Criteria 453
18.1.7 Value Swinging Method 455
18.2 Scaling of Performance Criteria 456
18.2.1 Scaling Where Decision Making Is under Certainty 456
18.2.2 Scaling Where Decision Making Is under Risk 458
18.3 Combination of Performance Criteria 462
18.3.1 Combined Mathematical Functions of Value, Utility, or Cost-Effectiveness 462
18.3.2 Ranking and Rating Method 464
18.3.3 Maxmin Approach 465
18.3.4 Impact Index Method 466
18.3.5 Pairwise Comparison of Transportation Alternatives Using AHP 467
18.3.6 Mathematical Programming 469
18.3.7 Pairwise Comparison of Alternatives Using the Outranking Method 472
18.4 Case Study: Evaluating Alternative Projects for a Transportation Corridor Using Multiple Criteria 473
18.5 General Considerations of Risk and Uncertainty in Evaluation 475
18.5.1 The Case of Certainty: Using Sensitivity Analysis 475

18.5.2 The Case of Objective Risk: Using Probability Distributions and Simulation 476
18.5.3 The Case of Uncertainty 477
Summary 479
Exercises 479
References 481
Additional Resources 481

CHAPTER 19 USE OF GEOGRAPHICAL AND OTHER INFORMATION SYSTEMS 483

Introduction 483
19.1 Hardware for Information Management 483
19.2 Software and Other Tools for Information Management 483
19.2.1 Non-GIS Relational Database Management Systems 483
19.2.2 Geographical Information Systems 484
19.2.3 Internet GIS 486
19.2.4 Video Log Information Management Systems 487
19.3 GIS Applications in Transportation Systems Evaluation 487
19.3.1 Query, Display, and Visualization of Initial Data 488
19.3.2 Buffer Analysis 488
19.3.3 Overlay Analysis 489
19.3.4 Analysis of Transportation Operations 489
19.3.5 Public Input in Transportation System Evaluation 489
19.3.6 Multicriteria Decision Making 490
19.4 Existing Databases and Information Systems 490
19.4.1 Information Systems and Data Items Available by Transportation Mode 490
19.4.2 General Databases Useful for Transportation Systems Evaluation 494
19.5 GIS-Based Software Packages for Information Management 495
Summary 495
Exercises 496
References 496

CHAPTER 20 TRANSPORTATION PROGRAMMING 497

Introduction 497
20.1 Roles of Programming 497
20.1.1 Optimal Investment Decisions 498
20.1.2 Trade-off Considerations 498
20.1.3 Linkage to Budgeting 498
20.1.4 Efficiency in Program and Project Delivery 498
20.1.5 Monitoring and Feedback 498
20.2 Procedure for Programming Transportation Projects 499
20.3 Programming Tools 504
20.3.1 Priority Setting 504
20.3.2 Heuristic Optimization 506
20.3.3 Mathematical Programming 506
20.4 Case Studies: Transportation Programming 512
20.4.1 Programming Process at a State Transportation Agency 513
20.4.2 Programming Process at a Metropolitan Area Level 515
20.5 Keys to Successful Programming and Implementation 518
