

A large red tower crane is the central focus, lifting a massive, rectangular concrete slab into the air. The crane's lattice structure is clearly visible against a blue sky with scattered white clouds. Below the slab, a construction site is visible with a large, light-colored concrete wall under construction. Several workers in safety gear are standing on a platform or scaffolding near the base of the wall. In the background, other construction elements like a smaller crane and a tall, narrow structure are visible.

Principles of Construction Safety

Foreword	vii	The contractor and CDM	41
Abbreviations	viii	The Principal Contractor and CDM	42
Introduction	ix	The Planning Supervisor and CDM	42
		Competence, qualification and selection under CDM	43
Part 1 Construction Safety Management	1	The Health and Safety File	44
1. Fundamentals	3	5. The Safety Policy	46
What is 'safety'	3	Legal requirements	46
Basic terms	3	The policy in practice	46
What causes accidents?	4	Manuals and QA systems	47
Techniques of accident prevention	5	Policy contents	47
Benefits of accident prevention	6	Other safety policy considerations	49
2. Where are We Now?	8	'Off the shelf' safety policies	49
Types of injury	8	6. Assessing the Risks	50
Accident causes	9	Benefits	50
Occupational health and hygiene	9	Types of risk assessment	50
Dangerous occurrences	10	Contents of risk assessment	51
Reference	12	Hazard evaluation	51
3. Measuring Performance and Recording		Job safety analysis	52
Information	13	Ranking hazards by risk	52
Behaviour-based safety	13	Decision-making	53
'No injuries – no problems!'	14	Controlling the risks	53
'All I want to know is the facts!'	14	Monitoring	54
Calculating rates	14	Health surveillance	54
Other performance measures	15	Information to others	54
Accident investigation and recording	15	Format of risk assessments	54
Principles of accident investigation	16	Project risk assessments	54
Inspections and audits	18	Practical compliance	56
Techniques of inspection	19	COSHH assessments	56
Reference	20	Manual handling assessments	58
4. Techniques of Construction Safety		Display screen equipment assessments	63
Management	35	7. Control Strategies for Construction Work	71
Objectives	35	Designing for safety and health	71
Benefits	35	Planning the work	72
Key elements	36	Emergency procedures	73
And if companies do not do all this?	38	Setting up the site	75
Is it all just a pile of paperwork?	38	Safe place of work	75
World best practice	39	References	86
The role of the client	40		

8. The Health and Safety Plan	96	Control of substances hazardous to health	138
Pre-tender Health and Safety Plan	96	Measurement and reduction of energy consumption	139
Developing the construction phase Health and Safety Plan	97	Environmental objectives and targets	139
Project safety management commitment statement	97	Environmental policies	139
Roles and responsibilities of project staff	97	References	140
