## Part I Tissue Growth and Remodelling

---

<b>Towards a Theory of Vascular Growth and Remodeling</b> <i>J.D. Humphrey</i> .....	3
<b>Complementary Roles of Theoretical Modeling and Computer-controlled Experimentation in Vascular Growth and Remodeling</b> <i>R.L. Gleason, E. Wilson, J.D. Humphrey</i> .....	17
<b>On the Modeling of Growth and Adaptation</b> <i>S.C. Cowin</i> .....	29
<b>Growth in Soft Biological Tissue and Residual Stress Development</b> <i>A. Guillou, R.W. Ogden</i> .....	47
<b>Characterization and Modeling of Growth and Remodeling in Tendon and Soft Tissue Constructs</b> <i>E.M. Arruda, S.C. Calve, K. Garikipati, K. Grosh, H. Narayanan</i> .....	63
<b>Modeling and Simulation of Remodeling in Soft Biological Tissues</b> <i>E. Kuhl, A. Menzel, K. Garikipati, E. M. Arruda, K. Grosh</i> .....	77
<b>Anisotropic Remodelling of Biological Tissues</b> <i>A. Menzel</i> .....	91
<b>A Mechanobiological Formulation of Bone Healing</b> <i>M. Doblaré, J.M. García-Aznar, M.J. Gómez-Benito</i> .....	105

**Continuum Models of Growth with Emphasis on Articular Cartilage**  
*S.M. Klisch* ..... 119

---

**Part II Micromechanics, Cells and Matrix**

---

**Tensile Properties and Local Stiffness of Cells**  
*K. Hayashi* ..... 137

**Microfluid-dynamics in Three-dimensional Engineered Cell Systems**  
*F. Boschetti, M.T. Raimondi, F. Migliavacca, M. Cioffi, R. Pietrabissa* . 153

**Nonlinear Constitutive Models for Cochlear Outer Hair Cells**  
*K. Grosh, N. Deo* ..... 165

**Prediction of Changes in Cell-substrate Contact under Cyclic Substrate Deformation Using Cohesive Zone Modelling**  
*J.P. McGarry, B.P. Murphy, P.E. McHugh* ..... 177

**Micromechanics and Macromechanics of the Tensile Deformation of Nacre**  
*H.J. Qi, B.J.F. Bruet, J.S. Palmer, C. Ortiz, M.C. Boyce* ..... 189

---

**Part III Arteries in Health and Disease**

---

**Mechanical Properties of Atherosclerotic Tissues**  
*P.D. Richardson* ..... 207

**Towards a Computational Methodology for Optimizing Angioplasty Treatments with Stenting**  
*G.A. Holzapfel, M. Stadler, Th.C. Gasser* ..... 225

**Computational Modeling of Stented Arteries: Considerations for Evolving Stent Designs**  
*M.R. Moreno, J. Bedoya, C. Meyer, J.E. Moore Jr.* ..... 241

**Simulation of In-stent Restenosis for the Design of Cardiovascular Stents**  
*C. Lally, P.J. Prendergast*..... 255

**Material Property Alterations with Early Atheroma in an Animal Model**  
*K.B. Chandran, H. Kim, D.D. McPherson* ..... 269

**Microscopic Analysis of Residual Stress and Strain in the Aortic Media Considering Anisotropy of Smooth Muscle Layer**  
*T. Matsumoto, T. Furukawa, K. Nagayama* ..... 283

**Parameter Identification in Arteries Using Constraints**  
*J. Stålhand, A. Klarbring* ..... 295

**Collagen Organization and Biomechanics of the Arteries and Aneurysms of the Human Brain**  
*P.B. Canham, R.M. Korol, H.M. Finlay, R.R. Hammond, D.W. Holdsworth, G.G. Ferguson, A.R. Lucas* ..... 307

**Image-based Simulation of Blood Flow and Arterial Wall Interaction for Cerebral Aneurysms**  
*M. Oshima, R. Torii, T. Takagi* ..... 323

---

**Part IV Biological Tissues**

---

**A Framework for Soft Tissue and Musculo-skeletal Modelling: Clinical Uses and Future Challenges**  
*J.W. Fernandez, H. Schmid, P.J. Hunter* ..... 339

**Invariant Formulation for Dispersed Transverse Isotropy in Tissues of the Aortic Outflow Tract**  
*D.R. Einstein, A.D. Freed, I. Vesely* ..... 355

**Mathematical Modelling of Cardiac Mechanoenergetics**  
*J. Engelbrecht, M. Vendelin* ..... 369

**Creep and Relaxation in Ligament: Theory, Methods and Experiment**  
*A.L. Oza, R. Vanderby, R.S. Lakes* ..... 379

**Viscoelastic Constitutive Law Based on the Time Scale of the Mechanical Phenomena**  
*D.P. Pioletti* ..... 399

**A Coupled FE Analysis of the Intervertebral Disc Based on a Multiphasic TPM Formulation**  
*W. Ehlers, B. Markert, N. Karajan, A. Acartürk* ..... 405

**Is the Free Energy of Hydrogel the Sum of Elastic Energy and Ionic Energy?**  
*R.W. Roos, J.M. Huyghe, F.P.T. Baaijens* ..... 421

**In Vivo Experiments to Characterize the Mechanical Behavior of the Human Uterine Cervix**  
*E. Mazza, A. Nava, M. Bauer, R. Winter, M. Bajka, G.A. Holzapfel* ... 431

**Viscoelastic Response of Vocal Fold Tissues and Scaffolds at High Frequencies**  
*R.J. Clifton, X. Jia, T. Jiao, C. Bull, M.S. Hahn* ..... 445

**An Alternative Fabric-based Yield and Failure Criterion for Trabecular Bone**  
*Ph. Zysset, L. Rincón* ..... 457

---

**Part V Image-based Analysis**

---

**Functional Micro-imaging at the Interface of Bone Mechanics and Biology**  
*R. Müller, A. Nazarian, P. Schneider, M. Stauber, P. Thurner, G.H. van Lenthe, R. Voide* ..... 473

**Strain Measurement Using Deformable Image Registration**  
*J.A. Weiss, A.I. Veress, G.T. Gullberg, N.S. Phatak, Q. Sun, D. Parker, R.D. Rabbitt* ..... 489

**Image-based Hierarchical Analysis and Design of Tissue Engineering Scaffolds**  
*S.J. Hollister, C.Y. Lin, C.Y. Lin*..... 503

**Index** ..... 517
