

TENTH EDITION

THE  
**Atmosphere**

---

FREDERICK K. LUTGENS • EDWARD J. TARBUCK

# CONTENTS

*Preface* xiv

## 1 INTRODUCTION TO THE ATMOSPHERE 1

---

Meteorology, Weather, and Climate	3
Atmospheric Hazard: Assault by the Elements	5
The Nature of Scientific Inquiry	6
Hypothesis	6
Theory	6
Scientific Methods	8
Observing the Atmosphere	8
The Atmosphere: A Part of the Earth System	10
Earth's Four Spheres	12
Earth System Science	14
Earth as a System	15
Composition of the Atmosphere	16
Major Components	16
Carbon Dioxide	17
Variable Components	17
Ozone Depletion—A Global Issue	20
The Ozone Hole	20
Effects of Ozone Depletion	22
Montreal Protocol	22
Extent of the Atmosphere	23
Thermal Structure of the Atmosphere	24
Troposphere	24
Stratosphere	25
Mesosphere	25
Thermosphere	25
Vertical Variations in Composition	26
Ionosphere	27
The Auroras	27

Chapter Summary	27
Vocabulary Review	29
Review Questions	29
Problems	30
Atmospheric Science Online	31

Box 1-1 Monitoring Earth From Space	11
Box 1-2 Earth's Atmosphere Evolves	18
Box 1-3 Important Reactions Involving Ozone in the Stratosphere	21

## 2 HEATING EARTH'S SURFACE AND ATMOSPHERE 32

---

Earth–Sun Relationships	34
Earth's Motions	34
The Seasons	35
Earth's Orientation	36
Solstices and Equinoxes	37
Energy Heat and Temperature	41
Forms of Energy	41
Temperature	42
Heat	42
Mechanisms of Heat Transfer	42
Conduction	42
Convection	44
Radiation	44
What Happens to Incoming Solar Radiation?	48
Reflection and Scattering	48
Absorption by Earth's Surface and Atmosphere	50
Radiation Emitted by Earth	51
Heating the Atmosphere	51
The Greenhouse Effect	53
Role of Clouds in Heating Earth	54
Heat Budget	55
Latitudinal Heat Balance	57
Chapter Summary	60
Vocabulary Review	61
Review Questions	61
Problems	62
Atmospheric Science Online	63

Box 2-1 When Are the Seasons?	40
Box 2-2 The Analemma	43
Box 2-3 Ultraviolet Index	46
Box 2-4 Radiation Laws	48
Box 2-5 Infrared Imaging	55
Box 2-6 Solar Power	56

## 3 TEMPERATURE 64

For the Record: Air-Temperature Data	65
Why Temperatures Vary: The Controls of Temperature	68
Land and Water	68
Ocean Currents	73
Altitude	74
Geographic Position	75
Cloud Cover and Albedo	75
World Distribution of Temperatures	77
Cycles of Air Temperature	80
Daily Temperature Variations	81
Magnitude of Daily Temperature Changes	82
Annual Temperature Variations	82
Temperature Measurement	82
Mechanical Thermometers	83
Electrical Thermometers	86
Instrument Shelters	86
Temperature Scales	87
Applications of Temperature Data	88
Heating Degree-Days	88
Cooling Degree-Days	89
Growing Degree-Days	89
Temperature and Comfort	89
Chapter Summary	91
Vocabulary Review	92
Review Questions	93
Problems	94
Atmospheric Science Online	95
Box 3-1 North America's Hottest and Coldest Places	69
Box 3-2 Atmospheric Hazard: Heat Waves—Deadly Events	70
Box 3-3 Latitude and Temperature Range	79
Box 3-4 How Cities Influence Temperature: The Urban Heat Island	84
Box 3-5 Windchill: The Cooling Power of Moving Air	92

## 4 MOISTURE AND ATMOSPHERIC STABILITY 96

Movement of Water Through the Atmosphere	98
Water's Changes of State	99
Ice, Liquid Water, and Water Vapor	99
Latent Heat	000
Humidity: Water Vapor in the Air	103
Vapor Pressure and Saturation	104
Relative Humidity	106
How Relative Humidity Changes	106
Natural Changes in Relative Humidity	109
Dew-Point Temperature	110
Humidity Measurement	111
Adiabatic Temperature Changes	113
Adiabatic Cooling and Condensation	114
Processes That Lift Air	114
Orographic Lifting	115
Frontal Wedging	116
Convergence	117
Localized Convective Lifting	118
The Critical Weathermaker: Atmospheric Stability	120
Types of Stability	120
Stability and Daily Weather	123
How Stability Changes	124
Temperature Changes and Stability	125
Vertical Air Movement and Stability	125
Chapter Summary	125
Vocabulary Review	127
Review Questions	127
Problems	128
Atmospheric Science Online	129
Box 4-1 Water: A Unique Substance	100
Box 4-2 Dry Air at 100 Percent Relative Humidity?	107
Box 4-3 Humidifiers and Dehumidifiers	108
Box 4-4 Atmospheric Hazard: Humidity and Heat Stress	112
Box 4-5 Precipitation Records and Mountainous Terrain	116
Box 4-6 Orographic Effects: Windward Precipitation and Leeward Rain Shadows	118

## 5 FORMS OF CONDENSATION AND PRECIPITATION 130

- Cloud Formation 132
  - Condensation Aloft 132
  - Growth of Cloud Droplets 132
- Cloud Classification 133
  - High Clouds 133
  - Middle Clouds 133
  - Low Clouds 136
  - Clouds of Vertical Development 136
  - Cloud Varieties 137
- Types of Fog 138
  - Fogs Formed by Cooling 139
  - Fogs Formed by Evaporation 142
- Dew and Frost 142
- How Precipitation Forms 143
  - Precipitation from Cold Clouds: The Bergeron Process 145
  - Precipitation from Warm Clouds: The Collision–Coalescence Process 147
- Forms of Precipitation 150
  - Rain 150
  - Snow 151
  - Sleet and Glaze 151
  - Hail 151
  - Rime 155
- Precipitation Measurement 155
  - Standard Instruments 155
  - Measuring Snowfall 156
  - Measurement Errors 156
  - Precipitation Measurement by Weather Radar 157
- Intentional Weather Modification 157
  - Cloud Seeding 158
  - Fog and Cloud Dispersal 159
  - Hail Suppression 160
  - Frost Prevention 161
- Understanding the Role of Clouds in the Climate System 162
- Chapter Summary 163
- Vocabulary Review 163

- Review Questions 164
- Problems 164
- Atmospheric Science Online 165

- Box 5-1 Aircraft Contrails and Cloudiness 138
- Box 5-2 Forces Acting on Cloud Droplets and Raindrops 144
- Box 5-3 Science and Serendipity 146
- Box 5-4 Atmospheric Hazard: Worst Winter Weather 152
- Box 5-5 The Hail Cannons of Europe 160

## 6 AIR PRESSURE AND WINDS 166

- Understanding Air Pressure 168
  - Measuring Air Pressure 169
  - Pressure Changes with Altitude 172
  - Horizontal Variations in Air Pressure 173
    - Influence of Temperature and Water Vapor on Air Pressure 174
    - Airflow and Pressure 174
  - Factors Affecting Wind 175
    - Pressure-Gradient Force 175
    - Coriolis Force 178
    - Friction 181
  - Winds Aloft and Geostrophic Flow 181
  - Curved Flow and the Gradient Wind 183
  - Surface Winds 186
  - How Winds Generate Vertical Air Motion 187
    - Vertical Airflow Associated with Cyclones and Anticyclones 188
    - Factors That Promote Vertical Airflow 189
  - Wind Measurement 190
  - Chapter Summary 194
  - Vocabulary Review 195
  - Review Questions 195
  - Problems 195
  - Atmospheric Science Online 195
- Box 6-1 Air Pressure and Aviation 171
  - Box 6-2 Pressure-Gradient Force 176
  - Box 6-3 Coriolis Force As a Function of Wind Speed and Latitude 180
  - Box 6-4 Do Baseballs Really Fly Farther at Denver's Coors Field? 185
  - Box 6-5 Wind Energy: An Alternative with Potential 192

## 7 CIRCULATION OF THE ATMOSPHERE 196

- Scales of Atmospheric Motion 198
  - Large- and Small-Scale Circulation 199
  - Structure of Wind Patterns 199
- Local Winds 200
  - Land and Sea Breezes 202
  - Mountain and Valley Breezes 202
  - Chinook (Foehn) Winds 203
  - Katabatic (Fall) Winds 203
  - Country Breezes 204
- Global Circulation 205
  - Single-Cell Circulation Model 205
  - Three-Cell Circulation Model 206
- Observed Distribution of Pressure and Winds 207
  - Idealized Zonal Pressure Belts 207
  - Semipermanent Pressure Systems: The Real World 208
- Monsoons 210
  - The Asian Monsoon 210
  - The North American Monsoon 211
- The Westerlies 212
  - Why Westerlies? 212
  - Jet Streams 213
  - Origin of the Polar Jet Stream 213
  - Subtropical Jet Stream 215
- Waves in the Westerlies 215
- Westerlies and Earth's Heat Budget 215
- Global Winds and Ocean Currents 217
  - The Importance of Ocean Currents 218
  - Ocean Currents and Upwelling 219
- El Niño and La Niña 219
- Global Distribution of Precipitation 222
  - Zonal Distribution of Precipitation 223
  - Distribution of Precipitation over the Continents 225
- Precipitation Regimes on a Hypothetical Continent 225
- Chapter Summary 229
- Vocabulary Review 230

- Review Questions 231
- Atmospheric Science Online 231

- Box 7-1 Dust Devils 201
- Box 7-2 Atmospheric Hazard: Santa Ana Winds and Wildfires 204
- Box 7-3 Monitoring Winds from Space 222
- Box 7-4 Tracking El Niño from Space 228

## 8 AIR MASSES 232

- What Is an Air Mass? 234
- Source Regions 235
- Classifying Air Masses 236
- Air-Mass Modification 237
- Properties of North American Air Masses 237
  - Continental Polar (cP) and Continental Arctic (cA) Air Masses 237
  - Lake-Effect Snow: Cold Air over Warm Water 239
  - Maritime Polar (mP) Air Masses 239
  - Maritime Tropical (mT) Air Masses 244
  - Continental Tropical (cT) Air Masses 245
- Chapter Summary 246
- Vocabulary Review 247
- Review Questions 247
- Problems 248
- Atmospheric Science Online 249

- Box 8-1 The Siberian Express 240
- Box 8-2 Atmospheric Hazard: An Extraordinary Lake-Effect Snowstorm 242

## 9 WEATHER PATTERNS 250

- Polar-Front Theory (Norwegian Cyclone Model) 253
- Fronts 254
  - Warm Fronts 255
  - Cold Fronts 257
  - Stationary Fronts 258
  - Occluded Fronts 258
  - Drylines 260
- Life Cycle of a Mid-latitude Cyclone 260
  - Formation: The Clash of Two Air Masses 260
  - Development of Cyclonic Flow 260
  - Occlusion: The Beginning of the End 262

Idealized Weather of a Mid-latitude Cyclone	262
Cyclone Formation	265
Cyclonic and Anticyclonic Circulation	265
Divergence and Convergence Aloft	266
Traveling Cyclones	267
Patterns of Movement	267
Flow Aloft and Cyclonic Migration	269
Anticyclonic Weather and Blocking Highs	269
Case Study of a Mid-latitude Cyclone	270
Violent Spring Weather	272
Weather in Peoria	278
A Modern View: The Conveyor Belt Model	279
Chapter Summary	281
Vocabulary Review	282
Review Questions	282
Atmospheric Science Online	283

Box 9-1 Winds As a Forecasting Tool 266

Box 9-2 Atmospheric Hazard: The Great Flood of 1993  
272

## 10 THUNDERSTORMS AND TORNADOES 284

What's in a Name?	286
Thunderstorms	287
Air-Mass Thunderstorms	287
Stages of Development	288
Occurrence	289
Severe Thunderstorms	290
Supercell Thunderstorms	291
Squall Lines and Mesoscale Convective Complexes	291
Microbursts	296
Lightning and Thunder	296
What Causes Lightning?	297
The Lightning Stroke	297
Thunder	300
Tornadoes	300
The Development and Occurrence of Tornadoes	302
Tornado Development	303
Tornado Climatology	303
Profile of a Tornado	305
Tornado Destruction	306
Tornado Forecasting	308
Tornado Watches and Warnings	308
Doppler Radar	310

Chapter Summary	313
Vocabulary Review	315
Review Questions	315
Problems	316
Atmospheric Science Online	317

Box 10-1 Atmospheric Hazard: Flash Floods—  
The Number One Thunderstorm Killer 292

Box 10-2 Atmospheric Hazard: Lightning Safety 299

Box 10-3 Atmospheric Hazard: Surviving a Violent  
Tornado 301

Box 10-4 Atmospheric Hazard: The April 1974 Super  
Tornado Outbreak 309

Box 10-5 The Doppler Effect 312

## 11 HURRICANES 318

Profile of a Hurricane	320
Hurricane Formation and Decay	325
Hurricane Formation	326
Hurricane Decay	327
Hurricane Destruction	327
Storm Surge	329
Wind Damage	330
Inland Flooding	331
Estimating the Intensity of a Hurricane	332
Detecting and Tracking Hurricanes	333
The Role of Satellites	338
Aircraft Reconnaissance	338
Radar and Data Buoys	338
Hurricane Watches and Warnings	339
Chapter Summary	341
Vocabulary Review	341
Review Questions	342
Problems	342
Atmospheric Science Online	343
Box 11-1 The Conservation of Angular Momentum	324
Box 11-2 Naming Tropical Storms and Hurricanes	328
Box 11-3 Atmospheric Hazard: Examining Hurricane Katrina from Space	334
Box 11-4 Atmospheric Hazard: A 3-D Look Inside a Hurricane	340

# 12 WEATHER ANALYSIS AND FORECASTING 344

---

The Weather Business: A Brief Overview	346
Weather Analysis	348
Gathering Data	348
Weather Maps: Pictures of the Atmosphere	350
Weather Forecasting	352
Numerical Weather Prediction: Forecasting by Computer	353
Other Forecasting Methods	356
Upper Airflow and Weather Forecasting	358
Upper-Level Maps	358
The Connection Between Upper-Level Flow and Surface Weather	360
Long-Range Forecasts	364
Forecast Accuracy	365
Satellites in Weather Forecasting	368
What Weather Satellites Provide	369
Satellite Measurements	370
Chapter Summary	372
Vocabulary Review	372
Review Questions	373
Problems	373
Atmospheric Science Online	375

Box 12-1 Atmospheric Hazard: Debris Flow in the San Francisco Bay Region	348
Box 12-2 Constructing a Synoptic Weather Chart	352
Box 12-3 Numerical Weather Prediction	354
Box 12-4 Precipitation Probability Forecasts	366
Box 12-5 What Is “Normal”?	368

# 13 AIR POLLUTION 376

---

A Brief Historical Perspective	376
Air Pollution: Not a New Problem	379
Some Historic Episodes	380

Sources and Types of Air Pollution	380
Primary Pollutants	381
Secondary Pollutants	386
Trends in Air Quality	387
Meteorological Factors Affecting Air Pollution	391
Wind As a Factor	391
The Role of Atmospheric Stability	391
Acid Precipitation	393
Extent and Potency of Acid Precipitation	393
Effects of Acid Precipitation	393
Chapter Summary	396
Vocabulary Review	397
Review Questions	397
Problems	397
Atmospheric Science Online	397

Box 13-1 Atmospheric Hazard: The Great Smog of 1952	382
Box 13-2 Air Pollution Changes the Climate of Cities	385
Box 13-3 Radon—An Example of Indoor Air Pollution	388

# 14 THE CHANGING CLIMATE 398

---

The Climate System	400
How Is Climate Change Detected?	400
Seafloor Sediment—A Storehouse of Climate Data	400
Oxygen Isotope Analysis	401
Climate Change Recorded in Glacial Ice	402
Tree Rings—Archives of Environmental History	403
Other Types of Proxy Data	405
Natural Causes of Climate Change	405
Plate Tectonics and Climate Change	406
Volcanic Activity and Climate Change	407
Orbital Variations	409
Solar Variability and Climate	412
Human Impact on Global Climate	413
Carbon Dioxide, Trace Gases, and Climate Change	413
CO <sub>2</sub> Levels Are Rising	414
The Atmosphere’s Response	415
The Role of Trace Gases	415
Climate-Feedback Mechanisms	417
How Aerosols Influence Climate	419
Some Possible Consequences of Global Warming	419
Water Resources and Agriculture	420
Sea-Level Rise	421
The Changing Arctic	421
The Potential for “Surprises”	424

Chapter Summary	426
Vocabulary Review	427
Review Questions	427
Atmospheric Science Online	427
Box 14-1 Cryosphere—The World of Ice	402
Box 14-2 A Possible Link Between Volcanism and Climate Change in the Geologic Past	410
Box 14-3 Computer Models of Climate: Important Yet Imperfect Tools	414
Box 14-4 Possible Consequences of Climate Change on the United States	422
Box 14-5 Polar Warming and the Collapse of the Antarctic Ice Shelves	425

## 15 WORLD CLIMATES 428

Climate Classification	430
Climate Controls: A Summary	432
Latitude	432
Land and Water	432
Geographic Position and Prevailing Winds	432
Mountains and Highlands	433
Ocean Currents	433
Pressure and Wind Systems	436
World Climates—An Overview	436
The Wet Tropics ( <i>Af, Am</i> )	436
Temperature Characteristics	438
Precipitation Characteristics	439
Tropical Wet and Dry ( <i>Aw</i> )	441
Temperature Characteristics	441
Precipitation Characteristics	441
The Monsoon	442
The <i>Cw</i> Variant	442
The Dry Climates ( <i>B</i> )	443
What Is Meant by “Dry”?	444
Subtropical Desert ( <i>BWh</i> ) and Steppe ( <i>BSh</i> )	445
West Coast Subtropical Deserts	447
Middle-Latitude Desert ( <i>BWk</i> ) and Steppe ( <i>BSk</i> )	449
Humid Middle-Latitude Climates with Mild Winters ( <i>C</i> )	450
Humid Subtropical Climate ( <i>Cfa</i> )	450
The Marine West Coast Climate ( <i>Cfb</i> )	452
The Dry-Summer Subtropical (Mediterranean) Climate ( <i>Csa, Csb</i> )	453
Humid Continental Climates with Severe Winters ( <i>D</i> )	455
Humid Continental Climate ( <i>Dfa</i> )	455
The Subarctic Climate ( <i>Dfc, Dfd</i> )	458
The Polar Climates ( <i>E</i> )	459
The Tundra Climate ( <i>ET</i> )	459
The Ice-Cap Climate ( <i>EF</i> )	461

Highland Climates	462
Chapter Summary	465
Vocabulary Review	466
Review Questions	467
Problems	468
Atmospheric Science Online	469
Box 15-1 Climate Diagrams	433
Box 15-2 Clearing the Tropical Rain Forest—The Impact on Its Soils	438
Box 15-3 The Disappearing Aral Sea	448
Box 15-4 Atmospheric Hazard: Understanding Drought	456

## 16 OPTICAL PHENOMENA OF THE ATMOSPHERE 470

Nature of Light	472
Reflection	472
Refraction	473
Mirages	474
Rainbows	476
Halos, Sun Dogs, and Solar Pillars	479
The Glory	482
The Corona	483
Chapter Summary	485
Vocabulary Review	485
Review Questions	486
Atmospheric Science Online	486
Box 16-1 Are Highway Mirages Real?	476
Box 16-2 Iridescent Clouds	484
APPENDIX A	
METRIC UNITS	487
APPENDIX B	
EXPLANATION AND DECODING OF THE DAILY WEATHER MAP	490
APPENDIX C	
RELATIVE HUMIDITY AND DEW-POINT TABLES	497
APPENDIX D	
LAWS RELATING TO GASES	499
APPENDIX E	
NEWTON'S LAWS OF MOTION	500
APPENDIX F	
CLIMATE DATA	501
Glossary	506
Index	515
