<i>Preface</i>	v
<b>1. INTRODUCTION</b>	<b>1</b>
History of Environmental Microbiology; Interrelations with Other Fields of Microbiology; Modern Environmental Microbiology	
<b>2. MICROBIAL DIVERSITY IN THE ENVIRONMENT</b>	<b>6</b>
Viruses; Bacteria; Fungi; Algae; Protozoa	
<b>3. AQUATIC ENVIRONMENTS</b>	<b>13</b>
How Do Microbes Grow in Aquatic Environments?; Types of Aquatic Environments	
<b>4. TERRESTRIAL ENVIRONMENTS</b>	<b>27</b>
The Solid Phase; The Liquid Phase or Soil Solution; The Gas Phase or Soil Atmosphere; Environment and Microorganisms in Surface Soil and Subsurface Habitats	
<b>5. AEROMICROBIOLOGY</b>	<b>52</b>
Allergic Disorders by Air Microflora; Distribution of Microbes in Air; Aeromicrobiological Pathway; Outdoor Aeromicrobiology; Indoor Aeromicrobiology; Bioaerosol Control in Laboratory	
<b>6. EXTREME ENVIRONMENTS</b>	<b>66</b>
What is an Extreme Environment?; Types of Extreme Environments; Archaeobacteria—the Heros of Extreme Environments	
<b>7. DEVICES FOR SAMPLING AND PROCESSING OF MICROBES</b>	<b>79</b>
Soils and Sediments; Water; Air	

<b>8. METHODS OF ENUMERATION AND ACTIVITY OF MICROORGANISMS</b>	<b>94</b>
Cultural Methods; Physiological Methods; Immunological Methods; Nucleic Acid-Based Methods	
<b>9. BIOGEOCHEMICAL CYCLES</b>	<b>118</b>
Carbon Cycle; Methane-the Central Molecule of Carbon Cycle; Nitrogen Cycle; Sulphur Cycle	
<b>10. DETRIMENTAL IMPACTS OF DIVERTED BIOGEOCHEMICAL CYCLES</b>	<b>136</b>
Greenhouse Effect (Global Warming) and Ozone Depletion; Nitrate Contamination of Groundwater (Eutrophication and Blue Baby Syndrome); Acid Mine Drainage; Metal and Concrete Corrosion	
<b>11. MICROBIAL BIODEGRADATION OF ORGANIC POLLUTANTS</b>	<b>147</b>
Microbial Biodegradation; Biodegradation of Organic Pollutants; Pesticides; Microbial Biodegradation of Pesticides; Microbial Bioremediation to Clean Up the Environment	
<b>12. MICROBIAL INTERACTIONS WITH METAL POLLUTANTS</b>	<b>159</b>
Sources and Emissions; Biomagnification; Metal Toxicity on Microbes; Microbial Metal Resistance and Detoxification; Detrimental Impacts of Metal-Microbe Interactions; Beneficial Metal-Microbe Interactions; Enhanced Recovery of Metals (Bioleaching); Enhanced Recovery of Petroleum	
<b>13. MICROBIAL BIOREMEDIATION OF POLLUTED ENVIRONMENTS—CURRENT STATUS</b>	<b>174</b>
What is Bioremediation?; Environmental Applications of Bioremediation; Foci of R & D for Bioremediation; Current Status	
<b>14. MICROBES AND AGRICULTURE</b>	<b>196</b>
Biological Nitrogen Fixation; Mycorrhizal Associations; Biological Control of Plant Diseases; Microbial Pesticides to Control Insects, Nematodes and Weeds; Microbial Biodeterioration	
<b>15. ENVIRONMENTAL TRANSMISSION OF PATHOGENS</b>	<b>227</b>
Transmission of Pathogens; Bacterial Diseases of Man; Viral Diseases of Man; AIDS: A Death Warrant; Ebola Haemorrhagic Fever; Protozoan and Helminths Parasites	

<b>16. INDICATOR MICROORGANISMS IN POLLUTED WATERS</b>	<b>266</b>
Microbial Components of Water; What is an Indicator?; Groups of Indicator Microbes; Water Treatment	
<b>17. DOMESTIC WASTES AND WASTE TREATMENT</b>	<b>278</b>
Components of Domestic Wastewater; Small Scale Sewage Treatment; Modern Large Scale Sewage Treatment; Land Application of Wastewater; Solid Waste Disposal	
<b>18. CONTROL OF MICROORGANISMS</b>	<b>296</b>
Physical Control; Chemical Control; Chemotherapeutic Agents; Sites of Action of Antibacterial Agents; Antibiotic Sensitivity Assays	
<b>19. MICROBIAL SAFETY AND RISK ASSESSMENT</b>	<b>314</b>
What is Risk and Risk Assessment?; Elements of Risk Assessment; Microbial Risk Assessment	
<b>20. LABORATORY EXERCISES</b>	<b>319</b>
Exercises 1—17	
<i>Glossary</i>	<i>358</i>
<i>Recommended Readings</i>	<i>366</i>
