

ORACLE PRESS® — EXCLUSIVELY FROM MCGRAW-HILL/OSBORNE

HANDS-ON

ORACLE DATABASE 10g EXPRESS EDITION for Linux

**Your Complete Oracle
Database XE Starter Kit**

STEVE BOBROWSKI

CEO, 4SKWare Technologies, Inc./DBDomain.com

Foreword by **TOM KYTE** of asktom.oracle.com

Includes full version of Oracle Database 10g
Express Edition for Linux and all
code examples from the book on CD-ROM

ORIGINAL • AUTHENTIC

Oracle Press

ONLY FROM OSBORNE

FOREWORD	xxi
ACKNOWLEDGMENTS	xxiii
INTRODUCTION	xxv

PART I

Getting Started

1 Introduction to Databases and Oracle	3
Information Management	4
Databases	4
Database Management Systems	5
Database Applications	6
Oracle Database 10g	6
Oracle Fundamentals	7
Databases and Instances	7
Tables	9
SQL and Data Access	9
Database Users and Sessions	10
SQL*Plus	10
Oracle Application Express	11
Chapter Summary	11
2 Install and Start Using Oracle Database 10g Express Edition	13
Installation Overview	14
Database Server System Requirements	15
EXERCISE 2.1: Check System Requirements	17
Oracle Database 10g Express Edition Software	18
Installation	19
EXERCISE 2.2: Confirm Administrative Access with sudo	19
EXERCISE 2.3: Install Oracle XE Step-by-Step	19

Post-Installation Exercises	22
EXERCISE 2.4: Accessing the Documentation	22
EXERCISE 2.5: Registering for the Discussion Forum	24
EXERCISE 2.6: Accessing the Support Forum	25
Basic Oracle XE Skills	26
Oracle Startup and Shutdown	26
EXERCISE 2.7: Check the Status of Oracle XE	27
EXERCISE 2.8: Start Oracle Manually	28
EXERCISE 2.9: Stop Oracle Manually	29
EXERCISE 2.10: Using Shell Scripts to Manage Oracle Availability on Linux	29
EXERCISE 2.11: Automate Oracle Startup	31
Database Connections	31
EXERCISE 2.12: Connect to Oracle with SQL*Plus	33
EXERCISE 2.13: Disconnect from Oracle and Exit SQL*Plus ..	35
EXERCISE 2.14: Launch the Database Home Page	35
Troubleshooting Tips	37
Confirm Existence of Oracle XE Software and Database	38
Check Oracle-Related Processes	38
Permit Network Access	39
Web Browser Configuration	40
Oracle Database 10g Express Edition Updates	41
Using This Book's Support Files	42
Chapter Summary	43

PART II

Fundamentals of Application Development

3 Access Database Data with SQL	47
Chapter Prerequisites	48
What Is SQL?	48
Types of SQL Commands	48
Application Portability and the ANSI/ISO SQL Standard	49
Ad Hoc SQL Tools	50
Retrieving Data with Queries	50
The Structure of a Query	51
Building Basic Queries	52
EXERCISE 3.1: Retrieving All Columns and Rows	52
EXERCISE 3.2: Retrieving Specific Columns	52
EXERCISE 3.3: Using the SQL*Plus DESCRIBE Command	53
EXERCISE 3.4: Specifying an Alias for a Column	54
Building Expressions in a Query's SELECT Clause	54
EXERCISE 3.5: Building SELECT Clause Expressions with the Concatenation String Operator	55

EXERCISE 3.6: Building SELECT Clause Expressions with Arithmetic Operators	55
EXERCISE 3.7: Building SELECT Clause Expressions with SQL Functions	56
EXERCISE 3.8: Working with Nulls in SELECT Clause Expressions	58
EXERCISE 3.9: Implementing Conditional Logic in SELECT Clause Expressions	59
Retrieving Specific Rows from Tables	61
EXERCISE 3.10: Building WHERE Clause Conditions with Relational Operators	61
EXERCISE 3.11: Building WHERE Clause Conditions with Subqueries	66
EXERCISE 3.12: Building Composite WHERE Clause Conditions with Logical Operators	68
Grouping and Sorting Data Within a Query's Result Set	69
EXERCISE 3.13: Grouping Records in a Query's Result Set	69
EXERCISE 3.14: Rolling Up Groups into Supergroups	70
EXERCISE 3.15: Ordering Records in a Query's Result Set	73
Joining Data in Related Tables	74
EXERCISE 3.16: Building an Inner Join of Two Tables	75
EXERCISE 3.17: Building an Outer Join of Two Tables	76
Inserting, Updating, and Deleting Rows in Tables	78
EXERCISE 3.18: Inserting New Rows into a Table	78
EXERCISE 3.19: Updating Rows in a Table	79
EXERCISE 3.20: Deleting Rows from a Table	79
Committing and Rolling Back Transactions	79
EXERCISE 3.21: Committing and Rolling Back Transactions	79
Transaction Design	80
Units of Work	80
Read-Write Transactions	82
Read-Only Transactions	82
Building SQL with Oracle Application Express	82
Introducing Oracle Application Express's Query Builder	83
Exercise 3.22: Using Query Builder	83
Chapter Summary	92
4 Code Database Access Programs with PL/SQL	93
Chapter Prerequisites	94
What Is PL/SQL?	94
PL/SQL Blocks	95
Program Declarations	96
The Program Body	96
Exception Handlers	96
Program Comments	97

The Fundamentals of PL/SQL Coding	97
Working with Program Variables	97
EXERCISE 4.1: Declaring Variables and Constants	
with Basic Datatypes	98
EXERCISE 4.2: Assigning Values to Variables	102
Controlling Program Flow	104
EXERCISE 4.3: Using PL/SQL Loops	104
EXERCISE 4.4: Using the PL/SQL Command	
IF ... ELSIF ... ELSE	105
Interacting with Databases	107
EXERCISE 4.5: Manipulating Table Data	
with DML Statements	107
EXERCISE 4.6: Assigning a Value to a	
Variable with a Query	108
Declaring and Using Subprograms: Procedures and Functions	109
EXERCISE 4.7: Declaring and Using a Procedure	109
EXERCISE 4.8: Declaring and Using a Function	110
Working with Record Types	112
EXERCISE 4.9: Declaring and Using Record Types	112
Using the %TYPE and %ROWTYPE Attributes	114
EXERCISE 4.10: Using the %TYPE Attribute	114
EXERCISE 4.11: Using the %ROWTYPE Attribute	115
Working with Cursors	116
EXERCISE 4.12: Declaring and Using a Cursor	117
EXERCISE 4.13: Manipulating a Cursor's Current Row	119
Working with Collections	121
EXERCISE 4.14: Declaring and Initializing a Nested Table	121
EXERCISE 4.15: Using Collection Methods	
with a Nested Table	122
Handling Program Exceptions	125
EXERCISE 4.16: Handling Predefined Exceptions	126
EXERCISE 4.17: Declaring and Handling	
User-Defined Exceptions	128
Types of PL/SQL Programs	129
Anonymous PL/SQL Blocks	129
Stored Procedures and Functions	129
EXERCISE 4.18: Creating and Using Stored Procedures	129
EXERCISE 4.19: Creating and Using Stored Functions	131
Packages	132
EXERCISE 4.20: Declaring and Using a Package	132
Database Triggers	137
EXERCISE 4.21: Creating and Using Database Triggers	138
Chapter Summary	140

5	Build a Basic Relational Schema	141
	Chapter Prerequisites	142
	Schemas	142
	Schemas, an Entirely Logical Concept	143
	The Correlation of Schemas and Database User Accounts	144
	Database Tables	144
	Columns and Datatypes	145
	Data Integrity and Integrity Constraints	149
	Creating Tables and Integrity Constraints	152
	EXERCISE 5.1: Start the Object Browser	153
	EXERCISE 5.2: Create the PARTS Table	154
	EXERCISE 5.3: Create the CUSTOMERS Table	158
	EXERCISE 5.4: Modify a Column's Datatype	160
	EXERCISE 5.5: Add a Primary Key to a Table	161
	EXERCISE 5.6: Add a Composite Unique Key to a Table	162
	EXERCISE 5.7: Add a Not Null Constraint to a Table	162
	EXERCISE 5.8: Create the SALESREPS Table	163
	EXERCISE 5.9: Create the ORDERS Table	164
	EXERCISE 5.10: Create the ITEMS Table	167
	EXERCISE 5.11: Add a Column and Referential Integrity Constraint to a Table	170
	EXERCISE 5.12: Test Integrity Constraints	173
	Views	178
	Creating Views	178
	EXERCISE 5.13: Create and Use a Read-Only View	179
	EXERCISE 5.14: Create an Updateable View	180
	EXERCISE 5.15: Create an Updateable Join View	182
	EXERCISE 5.16: Create an INSTEAD OF Trigger for a View	184
	Sequences	186
	Creating and Using Sequences	187
	EXERCISE 5.17: Create a Sequence	187
	EXERCISE 5.18: Use and Reuse a Sequence Number	188
	Synonyms	189
	Private and Public Synonyms	189
	Creating Synonyms	190
	EXERCISE 5.19: Create a Private Synonym	190
	EXERCISE 5.20: Using a Synonym	190
	Indexes	191
	Normal (B*) Indexes	192
	Using Normal Indexes Appropriately	192
	Creating Normal Indexes	193
	EXERCISE 5.21: Create a Normal Index	193

The Data Dictionary: A Unique Schema	195
Categories of Data Dictionary Views	195
EXERCISE 5.22: Query the Data Dictionary	196
Exploring Other Object Browser Features	200
EXERCISE 5.23: Reveal Object Dependencies	200
EXERCISE 5.24: Gather Object Statistics	203
EXERCISE 5.25: Generate Object DML	204
Chapter Summary	205
6 Build an Application with Oracle Application Express	207
Chapter Prerequisites	208
Introducing the Application Development Lifecycle	209
Analyzing Processes and Defining Requirements	210
Designing the Application to Meet the Requirements	211
Implementing the Application Using the Design	211
Testing That the Application Meets the Requirements	212
Deploying the Application	212
Maintaining the Application	213
Software Modeling and the Unified Modeling Language	213
Use Case Diagrams	214
Class Diagrams	215
Building the Application Schema	217
EXERCISE 6.1: Upload and Run a SQL Script	217
EXERCISE 6.2: Set User Interface Defaults	219
Loading Schema Data	223
Loading Data Manually	223
EXERCISE 6.3: Manually Enter Data	223
EXERCISE 6.4: Create Triggers to Generate Primary Keys	224
Loading Spreadsheet and Text File Data	227
EXERCISE 6.5: Load Data from a Text File	227
Loading XML Data	229
EXERCISE 6.6: Load Data from an XML File	229
Creating the SysMgmt Application	230
EXERCISE 6.7: Create the SysMgmt Application with the Create Application Wizard	231
Running and Testing the Application	236
EXERCISE 6.8: Run and Test the SysMgmt Application	236
EXERCISE 6.9: Navigate Application Report Pages	237
EXERCISE 6.10: Understand Oracle Application Express URLs	238
EXERCISE 6.11: Browse and Review Application Pages	238
Refining the Application	240
EXERCISE 6.12: Create Lists of Values (LOVs) for Forms	240
EXERCISE 6.13: Add LOVs to Forms	241

EXERCISE 6.14: Modify a Report's Query and Make New Columns Searchable	244
Maintaining the Application	248
EXERCISE 6.15: Create a New Table	250
EXERCISE 6.16: Set UI Defaults for the New Table	253
EXERCISE 6.17: Create a New Trigger	254
EXERCISE 6.18: Add Rows to the DATABASE_SERVICE_REQUESTS Table	255
EXERCISE 6.19: Add New Application Pages	256
EXERCISE 6.20: Add a Navigation Menu	259
EXERCISE 6.21: Copy Breadcrumbs to the New Report and Form Pages	261
EXERCISE 6.22: Add Search and Display Controls to the New Report	264
EXERCISE 6.23: Add an Analysis Page to the Application	273
Deploying the Application	278
EXERCISE 6.24: Modify Application Attributes for Deployment	278
EXERCISE 6.25: Deploy the Application on Another Computer	279
Managing Application Access and Application Users	281
EXERCISE 6.26: Create an Application Express User	282
Chapter Summary	282

PART III

Database Administration

7 Secure Database Access	287
Chapter Prerequisites	288
User Management	289
Oracle Database Users and Oracle Application Express Users	289
Default Database User Accounts	289
Database User Properties	290
EXERCISE 7.1: Display Information About Database Users	292
EXERCISE 7.2: Create a Database User	293
EXERCISE 7.3: Test the New Database User Account	296
EXERCISE 7.4: Modify Your Own Password	297
EXERCISE 7.5: Alter or Drop a Database User	298
Privilege Management	299
Types of Database Privileges	299
Granting and Revoking Privileges	301
EXERCISE 7.6: Grant System Privileges to a User	301
EXERCISE 7.7: Revoke System Privileges from a User	303

EXERCISE 7.8: Grant Object Privileges to a User	304
EXERCISE 7.9: Revoke Object Privileges from a User	309
Privilege Management with Roles	309
EXERCISE 7.10: Create a Role	312
EXERCISE 7.11: Grant System Privileges and Roles to a Role	313
EXERCISE 7.12: Grant Object Privileges to a Role	313
EXERCISE 7.13: Grant a Role to a User	314
EXERCISE 7.14: Set a User's Default Role	315
EXERCISE 7.15: Enable and Disable a Role	316
Resource Limitation	318
Tablespace Quotas	318
EXERCISE 7.16: Providing Specific Tablespace Quotas for a User	318
Resource Limit Profiles	319
Managing Resource Limit Profiles	320
EXERCISE 7.17: Enable Resource Limitation	320
EXERCISE 7.18: Create a Profile	321
EXERCISE 7.19: Alter Profile Settings	322
EXERCISE 7.20: Manually Force a User's Password to Expire	323
EXERCISE 7.21: Use Password Complexity Checking	324
EXERCISE 7.22: Set a User's Profile	325
EXERCISE 7.23: Experiment with Password Management Settings	325
EXERCISE 7.24: Alter the Default Database Profile	326
Displaying Security Information	327
EXERCISE 7.25: Display Information About Users	327
EXERCISE 7.26: Display Information About Roles	327
EXERCISE 7.27: Display Information About Tablespace Quotas	328
EXERCISE 7.28: Display Information About Profiles	328
Chapter Summary	329
8 Manage Database Space	331
Chapter Prerequisites	332
Logical vs. Physical Storage Structures	332
Tablespaces and Data Files	334
Permanent, Temporary, and Undo Tablespaces	335
The SYSTEM Tablespace	335
The SYSAUX Tablespace	336
Other Tablespaces	336
Online and Offline Tablespaces	338
Read-Only and Read-Write Tablespaces	338
A Tablespace's Data Files	339
Use of Data File Space	340

Data File Sizes	340
Online and Offline Data Files	341
Creating and Managing Permanent Tablespaces and Data Files	341
EXERCISE 8.1: Display Database Storage Utilization	341
EXERCISE 8.2: Display Tablespace Information	342
EXERCISE 8.3: Display Data File Information	343
EXERCISE 8.4: Create a Permanent Tablespace	344
EXERCISE 8.5: Modify the Storage Properties of a Data File	346
EXERCISE 8.6: Control Tablespace Availability	346
Segments, Extents, and Data Blocks	349
Types of Segments in an Oracle Database	349
Data Blocks	350
Managing Storage for Tables and Indexes	352
EXERCISE 8.7: Display the Data Block Size Information	352
EXERCISE 8.8: Display the Segments in a Schema	353
EXERCISE 8.9: Compact (Shrink) Segments Wasting Space	354
EXERCISE 8.10: Create a Table in a Specific Tablespace	357
EXERCISE 8.11: Reserve Space for Updates to Existing Table Rows	357
EXERCISE 8.12: Manage Space for LOBs	359
EXERCISE 8.13: Perform Miscellaneous Space Management Tasks	361
Undo Tablespaces	364
Undo Segments	365
Undo Segments Are Multipurpose	365
Managing Undo Tablespaces and Retention Times	365
EXERCISE 8.14: Display and Modify Automatic Undo Management Parameters	366
Temporary Segments, Tablespaces, and Groups	367
Managing Temporary Tablespaces	368
EXERCISE 8.15: Reveal a Database's Default Temporary Tablespace	368
EXERCISE 8.16: Display Information About Temporary Tablespaces	368
EXERCISE 8.17: Display Information About Temp Files	368
Chapter Summary	369
9 Protect Your Oracle XE Database	371
About This Chapter's Practice Exercises	372
An Overview of Database Problems and Solutions	373
Instance Crashes and Crash Recovery	373
Media (Physical) Failures, Backups, and Recovery Manager	375
Logical Errors and Oracle Flashback	376
Devising a Database Protection Policy	378

Oracle Database Backup and Recovery Overview	379
The Flash Recovery Area	379
The Transaction Redo Log	381
The Database Control File	385
Database Backups	386
Recovery Manager	388
Configuring Oracle XE Database Protection	394
EXERCISE 9.1: Display Information About the Flash Recovery Area	394
EXERCISE 9.2: Display Information About the Control File	396
EXERCISE 9.3: Display Information About the Redo Log	396
EXERCISE 9.4: Create a Cold Database Backup	398
EXERCISE 9.5: Establish a Privileged Administrator Session with SQL*Plus	404
EXERCISE 9.6: Move the Flash Recovery Area and Online Redo Logs	405
EXERCISE 9.7: Enable Media Recovery	406
EXERCISE 9.8: Create a Hot Database Backup	408
EXERCISE 9.9: Confirm Successful Log Archiving	412
EXERCISE 9.10: Create Log Groups with Multiple Members	413
EXERCISE 9.11: Mirror the Database Control File	416
Backing Up Databases with Recovery Manager	418
EXERCISE 9.12: Start Recovery Manager	418
EXERCISE 9.13: Connect to the Target Database	419
EXERCISE 9.14: Display and Configure Persistent Recovery Manager Settings	419
EXERCISE 9.15: Back Up a Database	422
EXERCISE 9.16: Back Up an Individual Tablespace	423
EXERCISE 9.17: Back Up Archived Log Files	424
EXERCISE 9.18: List Information About Backup Sets	426
EXERCISE 9.19: Report Important Status Information for a Database	428
EXERCISE 9.20: Delete Obsolete Backup Sets	430
EXERCISE 9.21: Understand Flash Recovery Area Space Usage	431
EXERCISE 9.22: Build a New Backup Script	432
Additional Database Backup Topics	436
Backups of Other Database-Related Files	436
Logical Database Backups	436
More Database Recovery Options	437
Complete Recovery	438
Incomplete Recovery	439
What About Damage to Log Groups and the Control File?	440

Recovering Databases from Problems	440
EXERCISE 9.23: Simulate a System Crash and Perform Crash Recovery	441
EXERCISE 9.24: Simulate a Lost Data File and a Database Recovery	443
Using Oracle Flashback Features	448
EXERCISE 9.25: Restore a Dropped Table Using Oracle Flashback Drop	448
EXERCISE 9.26: Restore Lost Data Using Oracle Flashback Query	449
Chapter Summary	454
10 Tune Application and Database Instance Performance	455
Chapter Prerequisites	456
Oracle Tuning Concepts	456
Measures of Oracle Database Application Performance	457
Realistic and Unrealistic Performance Goals	457
Tunable Components	458
Tuning Methodologies	459
The Cost of Work	461
Tuning Statistics	462
Commonly Referenced Tuning Statistics	462
Instance Efficiency Ratios	464
The V\$ Views	465
Statspack	465
Application Tuning	466
Complex SQL Statements	467
Data Access Methods and Indexes	468
Data Concurrency and Locking	468
Application-Tuning Exercises	470
EXERCISE 10.1: Install Statspack	471
EXERCISE 10.2: Take a Default Snapshot	473
EXERCISE 10.3: Simulate and Investigate the Problem	474
EXERCISE 10.4: Take Another Default Snapshot	478
EXERCISE 10.5: Review Statspack Snapshots	478
EXERCISE 10.6: Create a Statspack Report	478
EXERCISE 10.7: Analyze a Statspack Report	481
EXERCISE 10.8: Create Indexes for Filter Predicate Columns	483
EXERCISE 10.9: Explain the New Results	484
EXERCISE 10.10: Discover and Display Unindexed Foreign Keys	485
EXERCISE 10.11: Explain the New Execution Plan	487

XX Hands-On Oracle Database 10g Express Edition for Linux

EXERCISE 10.12: Gather New Statistics	488
EXERCISE 10.13: Analyze Other Application-Related Statistics	489
Database Instance Tuning	492
The System Global Area	492
Program Global Areas	494
Database Instance Tuning Exercises	495
EXERCISE 10.14: Display Current Overall Memory Utilization	495
EXERCISE 10.15: Display Information About the SGA	495
EXERCISE 10.16: Modify the Size of the SGA	498
EXERCISE 10.17: Display Information About PGA Memory	499
EXERCISE 10.18: Modify the Allowable PGA Memory	500
Chapter Summary	501
 Index	 503
