Preface

vii

1	Introduction	1
1.1	The Sun	1
1.2	The Earth	2
1.3	Solar Spectrum	2
1.4	Solar Radiation	7
	Terrestrial and Extraterrestrial Regions	8
	Solar Time	13
1.5	Instruments	15
	Pyrheliometer	15
	Pyranometer	16
	Sunshine Recorder	16
1.6	Sun–Earth Angles	16
1.7	Availability of Solar Radiation on an Inclined Surface	23
	Monthly Average Daily Radiation on Sloped Surfaces	27
1.8	Solar Radiation on Horizontal Surface	28
	Estimation of Average Solar Radiation	30
	Distribution of Clear and Cloudy Days and Hours	30
	Estimation of Beam and Diffuse Components of Hourly Radiation	31
	Estimation of Beam and Diffuse Components of Daily Radiation	31
	Estimation of the Monthly Average of Daily Total Radiation on a Horizontal Surface	32
	Estimation of the Monthly Average of Daily Diffuse Radiation on a Horizontal Surface	32
	Estimation of Hourly Radiation from Daily Data	33
	Problems	37
2	Heat Transfer: Concepts and Definitions	41
2.1	Introduction	41
2.2	Conduction	42
	Temperature Field	42
	Fourier's Law	42
	Thermal Conductivity	42

	Differential Equation of Conduction	43	
	Solution of Heat Conduction in a Medium	45	
2.3	Boundary Conditions	47	
2.4	Overall Heat Transfer	49	
	Single and Parallel Slabs	49	
	(a) Parallel Slabs with Air Cavity	51	
	(b) Heat Transfer in Parallel Paths	53	
	Coaxial Cylinders	54	
	Concentric Spheres	55	
2.5	Dimensionless Heat-conduction Parameters	57	
2.6	Convection	58	
	Dimensionless Heat-Convection Parameters	59	
	Bulk Temperature	60	
	Free Convection	61	
	Empirical Relations	61	
	Free Convection from Inclined Surfaces	61	
	Forced Convection	72	
	Combined Free and Forced Convection	74	
	Convective Heat Transfer Due to Wind	74	
2.7	Radiation	77	
	Radiation Involving Real Surfaces	78	
	Kirchoff's Law	78	
	Laws of Thermal Radiation	78	
	Radiative Heat Transfer Coefficient	80	
	Radiation Shape Factor	81	
2.8	Heat and Mass Transfer	88	
	<i>Problems</i>	90	
3	Flat-plate Collectors		94
3.1	Introduction	94	
3.2	Flat-plate Collector	94	
	Glazing Materials	95	
	Collector Plates	98	
3.3	Classification	99	
	Evacuated Tubular Collectors	99	
	Type of Flat-plate Collectors	100	
3.4	Testing of Collector	102	
	Orientable Test Rig	102	
	Series-connected Test Rig	103	
	Testing of Solar Collector with Intermittent Output	103	
	The ASHRAE Method	105	
3.5	Heat Transfer Coefficients	107	
	Top Loss Coefficients	107	
	Back Loss Coefficient	113	
	Edge Loss Coefficient	113	
	Overall Heat Loss Coefficient	113	

	Film Heat Transfer Coefficient	116	
3.6	Optimization of Heat Losses	117	
	Transparent Insulating Material (Honeycomb)	118	
	Selective Surface	119	
3.7	Determination of Fin Efficiency	119	
3.8	Thermal Analysis of Flat-plate Collectors	121	
	Basic Energy Balance Equation	121	
	Effective Transmittance-Absorptance Product ($\tau_0\alpha_0$) _e	122	
	Collector Efficiency Factor F'	123	
	Temperature Distribution in Flow Direction	130	
	Collector Heat Removal Factor, F_R	131	
	Threshold Radiation Flux	134	
3.9	Configuration of FPC Connection	135	
	Collectors Connected in Series	135	
	Outlet Temperature at N th Collector	137	
	Collectors Connected in Parallel	139	
	Collectors Connected in Mixed Mode	140	
3.10	Effect of Heat Capacity in Flat-plate Collector	140	
3.11	Optimum Inclination of Flat-plate Collector	142	
3.12	Effect of Dust in Flat-plate Collector	142	
	<i>Problems</i>	146	
4	Evacuated Solar Collector		149
4.1	Introduction	149	
4.2	Evacuated-tube Cover Collector	150	
	Solaron Collector	150	
	Phillips (Germany) Collector	150	
	Thermal Efficiency	151	
4.3	Evacuated-tubular Collector	154	
	Sanyo Evacuated-tube Collector	155	
	Corning Evacuated-tube Collector	155	
	Phillips (Germany) Evacuated-tube Collector	156	
	Roberts Evacuated-tube Collector	156	
	Owens-Illinois (OI) Evacuated-tube Collector	158	
	General Electric (GE) TC-100 Evacuated-tube Collector	158	
4.4	Analysis of Owens-Illinois (OI) Collector	158	
4.5	Evacuated-tube Collector with Heat Pipe	163	
	Heat Pipe	163	
	Corning Collector with Internal Reflector	164	
	Gumman Evacuated-tube Collector	165	
	Thermal Analysis	165	
	<i>Problems</i>	168	
5	Solar Water Heating System		169
5.1	Introduction	169	
5.2	Heat Exchanger	170	

Choice of Fluid	170	
Analysis of Heat Exchanger	170	
Heat Exchanger Factor	175	
Natural Convection Heat Exchanger	177	
5.3 Heat Collection in a Storage Tank	179	
Heat Collection with Stratified Storage Tank	179	
Heat Collection with Well-mixed Storage Tank	181	
Effect of Heat Load	183	
<i>Problems</i>	186	
6 Solar Air Heaters		187
6.1 Introduction	187	
6.2 Description and Classification	188	
Non-porous Type	188	
Porous Type	189	
6.3 Conventional Heater	189	
Thermal Analysis	189	
6.4 Double Exposure Heaters	195	
6.5 Air Heater with Flow above the Absorber	196	
Steady State Analysis	196	
Transient Analysis	199	
6.6 Air Heater with Flow on Both Sides of the Absorber	200	
6.7 Two Pass Solar Air Heater	202	
6.8 Comparison with Experimental Results	204	
6.9 Heater with Finned Absorber	205	
6.10 Heater with Vee-corrugated Absorber	205	
6.11 Reverse Absorber Heater	207	
Working Principle	207	
Energy Balance	208	
Performance Study	208	
6.12 Air Heaters with Porous Absorbers	209	
Matrix Air Heaters	209	
Materials for Matrix Absorber	212	
Overlapped Glass Plate Air Heaters	212	
Air Heater With Honeycomb Absorber	213	
6.13 Testing of Solar Air Collector	213	
6.14 Parametric Studies	214	
Effect of Air Leakage	214	
Effect of Particulate	216	
6.15 Comparison of Performance of Liquid and Air Collector	216	
6.16 Applications of Air Heater	216	
Heating and Cooling	217	
Drying	217	
<i>Problems</i>	218	
7 Solar Crop Drying		220
7.1 Introduction	220	

- 7.2 Working Principle 220
 - Open Sun Drying (OSD) 221
 - Direct Solar Drying (DSD) 222
 - Indirect Solar Drying (ISD) 223
- 7.3 Thermal Modelling of Open Sun Drying (OSD) 226
 - Introduction 226
 - Computational Procedure for Convective Heat Transfer 227
 - Prediction of Crop Temperature and Moisture Evaporation 229
 - Analysis for Steady State Condition 232
 - Experimental Setup for Open Sun Drying (OSD) 232
 - Methodology and Input Parameters for Computation 234
 - Results and Discussion 237
- 7.4 Thermal Analysis of Cabinet Dryer 240
- 7.5 Energy Balance for Reverse Absorber Cabinet Dryer (RACD) 241
 - Thin Layer Drying 241
 - Deep Bed Grain Drying 245
- 7.6 Energy Balance for Indirect Solar Drying (ISD) System 247
 - Solar Air Heater 248
 - Drying Chamber 248
 - Problems 249

8 Solar Concentrators

251

- 8.1 Introduction 251
- 8.2 Characteristic Parameters 252
 - Aperture Area (A_a) 252
 - Acceptance Angle ($2\theta_c$) 252
 - Absorber Area (A_{abs}) 252
 - Geometric Concentration Ratio (C) 252
 - Local Concentration Ratio or Brightness Concentration Ratio 253
 - Intercept Factor (γ) 253
 - Optical Efficiency (η_0) 253
 - Thermal Efficiency (η_c) 253
 - Concentration Ratio (C) 253
- 8.3 Classification 254
- 8.4 Types of Concentrators 254
 - Tracking Concentrators 254
 - Non-tracking Concentrators 261
- 8.5 Geometrical Optics in Concentrators 264
 - Ray Tracing in a Reflecting Surface 265
 - Ray Tracing in a Refracting Surface 265
- 8.6 Theoretical Solar Image 265
- 8.7 Thermal Analysis 266
 - Cylindrical Parabolic Concentrator 271
 - Three Dimensional Concentrator 272
 - Hemispherical Bowl Mirror 272
 - V-trough 273
- 8.8 Tracking Methods 273

	Three Dimensional Concentrators	273
	Two Dimensional Concentrators	274
8.9	Materials for Concentrators	274
	Reflecting and Refracting Surfaces	274
	Receiver Cover and Surface Coatings	275
	Working Fluids	275
	Insulation	275
	Problems	275

9 Solar Distillation

278

9.1	Introduction	278
9.2	Working Principle	278
9.3	Thermal Efficiency	282
	Instantaneous Efficiency	282
	Overall Thermal Efficiency	282
9.4	Heat Transfer	283
9.5	External Heat Transfer	283
	Top Loss Coefficient	283
	Bottom and Side Loss Coefficient	286
9.6	Internal Heat Transfer	287
	Radiative Loss Coefficient	287
	Convective Loss Coefficient	287
	Evaporative Loss Coefficient	288
9.7	Overall Heat Transfer	290
	Top Loss Coefficient	290
	Bottom Loss Coefficient	291
9.8	Determination of Distillate Output	291
9.9	Passive Solar Stills	291
	Conventional Solar Still	291
	Basin Construction	291
	Thermal Analysis of Conventional Solar Still	292
	Approximate Solution For T_w	294
9.10	Effect of Various Parameters	297
	Effect of Wind Velocity	297
	Effect of Ambient Temperature	297
	Effect of Solar Radiation and Loss Coefficient	297
	Effect of Double-glass Cover and Cover Inclination	298
	Effect of Salt Concentration on Output	298
	Effect of Thermal Capacity on Output	298
	Effect of Charcoal Pieces on the Performance of a Still	299
	Effect of the Formation of Algae and Mineral Layers on Water and Basin Liner Surface on the Performance of a Still	299
9.11	Other Design of Solar Still	299
	Single Slope Solar Still with Condenser	299
	Hybrid Single Slope Solar Still	300

- Reverse Absorber Solar Still 300
- Multi-Wick Solar Still 301
- Conical Solar Still 302
- Active Single Slope Solar Still 302
- 9.12 Modified Internal Heat Transfer 303
- Methodology to Evaluate 'C' and 'n' 304
- Experimental Setup 305
- Problems 306*

10 Solar House

310

- 10.1 Introduction 310
 - Physical Parameters 311
 - Physiological Parameters 315
 - Intermediate Parameters 316
- 10.2 Solair Temperature and Heat Flux 317
 - For Bare Surface 318
 - For Wetted Surface 320
 - For Blackened/Glazed Surface 322
- 10.3 Thermal Gain 323
 - Direct Gain 323
 - Indirect Gain 326
 - Isolated Gain 335
- 10.4 Various Thermal Cooling Concepts 336
 - Evaporative Cooling 336
 - Infiltration/Ventilation 336
 - Wind Tower 337
 - Earth-air Tunnel 337
 - Air Vent 339
 - Shading 340
 - Rock Bed Regenerative Cooler 341
 - Radiative Cooling 342
 - Heating and Cooling 342
- 10.5 Time Constant 343
- 10.6 Approximate Methods 344
- 10.7 Solar-load Ratio Method 345
- Problems 348*

11 Other Applications

351

- 11.1 Collection-cum-storage Water Heater 351
 - Built-in Storage Water Heater 351
 - Shallow Solar Pond Water Heater 353
- 11.2 Non-convective Solar Pond 358
 - Salt-stabilized Pond 359
 - Partitioned Salt-stabilized Pond 361
 - Viscosity Stabilized Pond 362
 - Stability Criteria 363

	Applications of Non-convective Solar Pond	364
11.3	Solar Water Heating System	365
	Natural Circulation	365
	Forced Circulation Water Heater	369
11.4	Heating of Swimming Pool by Solar Energy	375
	Passive Heating of Swimming Pools	375
	Active Heating of Swimming Pool	375
	Description of Indoor Swimming Pool	375
11.5	Controlled Environment Greenhouse	380
	Working Principle of a Greenhouse	381
	Energy Balance	382
	Cooling	386
11.6	Heating of Biogas Plant by Solar Energy	389
	Introduction	389
	Classification	391
	Heating Process	392
	Design of Digester	394
11.7	Solar Cooker	396
11.8	Design Method	401
	Hourly Utilizability	401
	Daily Utilizability	402
	Hybrid System	402
11.9	Solar Fraction	403
11.10	Solar Cooling	404
	Introduction	404
	Solar Absorption Cooling	404
	COP of Absorption Cooling	406
	<i>Solar Desiccant Cooling and Absorption Cooling</i>	407
	Solar-mechanical Cooling	407
	<i>Problems</i>	409

12 Energy Storage

412

12.1	Introduction	412
12.2	Sensible Heat Storage	412
12.3	Liquid Media Storage	413
	Well Mixed Liquid Storage	414
	Space Heat and Hot Water	418
12.4	Solid Media Storage	420
	Packed-bed Storage	420
12.5	Dual Media Storage	423
	Ground Collector	425
12.6	Basics of Latent Heat Storage	427
	Heat Transfer in PCM	428
	Thermal Analysis of Freezing of Top of Ponds	428
	Analysis of Phase Change Material (PCM)	429
12.7	Chemical Storage	432
	<i>Problems</i>	433

13	Photovoltaic Systems	435
13.1	Introduction	435
13.2	Doping	436
13.3	Fermi Level	437
13.4	<i>p-n</i> Junction	438
13.5	<i>p-n</i> Junction Characteristics	439
13.6	Photovoltaic Effect	441
13.7	Photovoltaic Material	442
	Single Crystal Solar Cell	442
	Thin Film Solar Cell	448
	Amorphous Si Solar Cells (a-SiH)	448
	Tandem Solar Cell	448
	Concentrating Solar Cell	448
13.8	Module	448
	Single Crystal Solar Cells Module	448
13.9	Cell Temperature	449
	Problems	450
14	Economic Analysis	452
14.1	Introduction	452
14.2	Cost Analysis	452
	Capital Recovery Factor	452
	Unacost	456
	Sinking Fund Factor	457
14.3	Cash-flow Diagrams	464
14.4	Cost Comparisons with Equal Duration	467
14.5	Cost Comparisons with Unequal Duration	468
	Single Present Value Method (First Method)	468
	Cost Comparison by Annual Cost Method (Second Method)	469
	Cost Comparison by Capitalised Cost (Third Method)	470
	Fourth Method	471
14.6	Payback Time/Payment Time/Payback Period	471
	Payout Time without Interest	472
	Payout Time with Interest	473
	Analytical Expression for Payout Time	473
14.7	Benefit-cost Analysis	475
14.8	Effect of Depreciation	479
	Expression for Book Value	480
	Straight Line Depreciation	481
	Sinking Fund Depreciation	482
14.9	Cost Comparison After Taxes	483
	Without Depreciation	483
	With Depreciation	484
	Problems	486
	Appendix I	489
	Appendix II	494
