

# Innovation on Demand

New Product Development Using TRIZ

Victor Fey and Eugene Rivin

CAMBRIDGE

# Contents

*Preface*

*page ix*

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Product development process	1
1.2	Stumbling blocks in PDP	3
1.3	TRIZ	7
1.4	Summary	10
<b>2</b>	<b>Resolving system conflicts</b>	<b>11</b>
2.1	Technological systems	11
2.2	Functions	14
2.3	Ideal technological system	17
2.4	Mini- and maxi-problems	18
2.5	System conflicts	19
2.6	Resolving system conflicts	21
2.7	Summary	43
2.8	Exercises	43
<b>3</b>	<b>Basics of the substance–field analysis</b>	<b>47</b>
3.1	Minimal technological system. Substance–field models	47
3.2	Modeling physical effects as sufields	51
3.3	Using sufield models of physical effects	54
3.4	Typical sufield transformations: the Standards	56
3.5	How to introduce new substances into sufields	70
3.6	How to introduce new fields into sufields	74

---

3.7	Summary	78
3.8	Exercises	78
<hr/>		
<b>4</b>	<b>Algorithm for inventive problem solving (ARIZ)</b>	<b>82</b>
<hr/>		
4.1	Goals of ARIZ	82
4.2	Structure of ARIZ	83
4.3	Text of ARIZ	88
4.4	Summary	109
4.5	Exercises	109
<hr/>		
<b>5</b>	<b>Laws of technological system evolution</b>	<b>112</b>
<hr/>		
5.1	Laws of technological system evolution	112
5.2	Law of increasing degree of ideality	115
5.3	Law of non-uniform evolution of subsystems	117
5.4	Law of increasing dynamism (flexibility)	120
5.5	Law of transition to higher-level systems	132
5.6	Law of transition to micro-levels	145
5.7	Law of completeness	147
5.8	Law of shortening of energy flow path	149
5.9	Law of increasing controllability	153
5.10	Law of harmonization of rhythms	157
5.11	Interplay of the laws and lines of evolution	162
5.12	Summary	162
5.13	Exercises	163
<hr/>		
<b>6</b>	<b>Guiding technology evolution</b>	<b>167</b>
<hr/>		
6.1	Phase 1: analysis of the past and current system's evolution	167
6.2	Phase 2: determination of high-potential innovations	175
6.3	Phase 3: concept development	176
6.4	Phase 4: concept selection and technology plan	181
6.5	Summary	186
	<b>Appendix 1</b> Genrikh Altshuller – the creator of TRIZ	188
	<b>Appendix 2</b> System conflict matrix and inventive principles	192

<b>Appendix 3</b>	Standard approaches to solving inventive problems	196
<b>A3</b>	Algorithm for using the Standards	197
<b>A3.1</b>	Class 1: synthesis of sufields	200
<b>A3.2</b>	Class 2: evolution of sufield systems	205
<b>A3.3</b>	Class 3: transition to a higher-level system and to micro-level	211
<b>A3.4</b>	Class 4: standards for detecting and measurement	212
<b>A3.5</b>	Class 5: standards on application of the standards	218
<b>Appendix 4</b>	Using TRIZ in management practice	223
<b>A4.1</b>	Tools of TRIZ and management issues	223
<b>A4.2</b>	Applications	225
<b>A4.3</b>	Summary	228
<b>Appendix 5</b>	Glossary	229
	<i>References</i>	237
	<i>Index</i>	240
