AUTODESK® MAYA PRESS

Contents

Introduction	xvii
Chapter 1 The Maya Interface	**1**
The Interface	2
Working in View Panels	19
The Main Maya Windows	29
Customizing the Interface	47
Summary	52
Chapter 2 Quick Start: Creating an Animation in Maya 8.5	**53**
Maya Project Structure	54
Creating and Editing Objects	55
Pivots and Placement	62
Maya Node Structure	65
Assigning Materials Using the Hypershade	72
Keyframe Animation	78
Basic Lighting	89
Rendering Frames	91
Summary	94
Chapter 3 Polygonal Modeling	**95**
What Is a Polygon?	96
Polygonal Modeling Principles	97
Creating Machismo	98
Modeling Machismo's Body	106
Summary	139
Chapter 4 NURBS Modeling	**141**
Understanding NURBS	142
Modeling the MacGizmo	148
Summary	186

Chapter 5 ■ Subdivision Surfaces **187**

Understanding Subdivision Surfaces 188

Start with a Template 189

Modeling the Head 191

Details, Details, and Subdivision Surfaces 203

Summary 208

Chapter 6 ■ Blend Shapes: Advanced Modeling **209**

About Blend Shapes 210

Assembling Machismo 211

Off with His Head! 213

The Incredible (Edible) Blend Shape Machine 217

Blend Shapes: Sneers, Blinks, and Smiles 221

Molding the Full-Head Blend Shapes 229

The Paint Blend Shape Weights Tool 235

Summary 236

Chapter 7 ■ Basic Animation **237**

Animation Types 238

Keyframe Animation 238

Understanding Animation Work Flow 242

Hands On: Bouncing a Ball 242

Converting Cycled Animation to Curves 254

Summary 257

Chapter 8 ■ Character Setup and Rigging **259**

Deformer Types 260

Forward and Inverse Kinematics 264

Hands On: Creating a Skeleton 272

Creating a Full Body IK Skeleton 279

Binding and Weighting the Character 285

Summary 290

Chapter 9 Character Animation **291**

Step Away from the Computer! 292

The Animation Process 295

Hands-On: Animating Joe Generic 296

Establishing Timings 306

Refining Your Animation 312

Summary 318

Chapter 10 Nonlinear Animation **319**

What Is a Character? 320

Working with Poses 321

Working with Clips 323

Using the Geometry Cache 337

Hands On: Working with a Full Body IK Animation Rig 338

Summary 344

Chapter 11 Lighting for Animation **345**

Understanding Lighting 346

Basic Lighting Work Flow 347

Types of Lights 349

Light Manipulator 356

Using Shadows 357

Light Effects 362

Summary 370

Chapter 12 Shading and Texturing for Animation **371**

Understanding Maya Textures 372

Shading the MacGizmo 379

Shading Machismo: The UV Foundation 403

Creating Machismo's Texture 433

Summary 438

Chapter 13 Rendering Basics 439

Rendering an Object 440

Creating and Animating Cameras 440

Setting the Camera and Resolution 446

Adding Depth of Field 451

Adding Motion Blur 453

Using the Render Settings Window 455

Rendering with Maya Software 460

Hardware Render and Hardware Render Buffer 465

Vector Rendering 467

Working in the Render View Window 469

Layer Rendering, Compositing, and Editing 472

The Ultimate Rendering Checklist 482

Summary 482

Chapter 14 Advanced Rendering with mental ray 483

Introduction to mental ray 484

Understanding Render Settings 485

mental ray Custom Shaders 489

mental ray Lights, Shadows, and Fog 492

mental ray Motion Blur 500

Indirect Illumination 504

Image-Based Lighting, Physical Lighting, and HDRI 519

Scattering 525

Surface Approximation and Displacement Maps 528

Summary 533

Chapter 15 Toon Shading 535

Understanding Toon Shading 536

Applying Fills 536

Generating Toon Lines 540

Toon Line Techniques 542

Using Paint Effects Strokes with Toon Outlines 545

Toon Line Modifiers 548

Summary 552

Chapter 16 Maya Embedded Language (MEL) 553

MEL Is Fundamental 554

What Is a Scripting Language? 554

The Script Editor 554

What Is an Attribute? 558

How to Get Help with MEL 562

Hands On: Creating a Light Setup Using MEL 565

Variables, Loops, and Branching 567

Debugging MEL Scripts 574

A Comment on Commenting 575

Creating a GUI 576

Using Procedures and Scripts 580

Summary 584

Chapter 17 Paint Effects 585

Understanding Paint Effects 586

Painting with Paint Effects 591

2D Canvas Painting 595

3D Paint Effects 602

Paint Effects and Animation 615

Understanding Tubes: A Rose Tree Tutorial 617

Summary 628

Chapter 18 ■ Rigid Body Animation **629**

Rigid Body Dynamics Basics 630

Creating a Simple Rigid Body 631

Using the Rigid Body Solver 634

Working with Fields and Impulses 641

Animating between Active and Passive Modes 646

Adding Constraints to a Rigid Body 651

Converting (Baking) a Rigid Body Animation into Keyframes 655

Summary 656

Chapter 19 ■ Using Particles **657**

What Are Particles? 658

Using Particles for Effects 659

Manipulating Particles with Fields and Goals 668

Advanced Particle Expressions 685

Summary 694

Chapter 20 Fluid Effects **695**

What Is a Maya Fluid? 696

Drag-and-Drop Fluids 699

Creating and Editing Fluids 702

Painting into Containers 714

Creating an Ocean Effect 717

Creating a Pond Effect 722

Hands On: Creating a Disappearing Cloud Effect for Machismo 723

Summary 726

Chapter 21 ■ Maya Hair **727**

Fundamentals of Hair Systems 728

How to Make Hair 729

Hands On: Apply Hair to a Head 734

Hair Dynamics and Collisions 747
General Work Flow Speedups 748
Cache 749
Rendering Hair 750
Using Hair to Drive a Skeletal System 753
Summary 756

Chapter 22 ■ Maya Fur **757**

Creating Fur 758
Fur Attribute Maps 769
Adding Fur to a Character 776
Summary 790

Chapter 23 ■ Cloth Simulation with nCloth **791**

What Is nCloth? 792
Creating an nCloth Simulation 793
Nucleus Solver Properties 796
nCloth Properties 798
Painting nCloth Properties 805
Constraints 806
Fields 808
nCloth Caches 810
Hands-On: Creating a Tattered Shirt and Pants Simulation with nCloth 812
Summary 822
Index 823
