WILEY-VCH

# Essentials of Carbohydrate Chemistry and Biochemistry

Third, Completely Revised and Enlarged Edition

*With  
150 new  
exercises*

# Contents

## Abbreviations

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Structure of saccharides</b>	<b>5</b>
2.1	Structure of monosaccharides	5
2.2	Structure of simple oligosaccharides	28
2.3	Structure of polysaccharides	34
2.4	Conformational analysis of saccharides	43
	<i>Exercises and problems</i>	49
<b>3</b>	<b>Protecting groups for carbohydrates</b>	<b>53</b>
3.1	Protection of the anomeric center	54
3.2	Acyl protecting groups	61
3.3	Ether protecting groups	70
3.4	Acetal protecting groups	78
3.5	Orthoesters as protecting groups	91
3.6	<i>N</i> -Protection for amino sugars	93
3.7	Enynes in protecting group chemistry	97
3.8	Carbohydrate scaffolds and orthogonality of protecting groups	98
3.9	Protecting group patterns for allyl $\alpha$ -D-mannosides	101
	<i>Exercises and problems</i>	104
<b>4</b>	<b>Important modifications and functionalizations of the sugar ring</b>	<b>107</b>
4.1	Activation–substitution reactions at the carbohydrate ring	108
4.2	Deoxyhalo derivatives	112
4.3	Synthesis and reactions of anhydro sugars	117
4.4	Deoxygenation of carbohydrates	121
4.5	Functionalization at the anomeric center	127
4.6	Unsaturated saccharides – Glycals	130
4.7	Epimerizations	138
4.8	Carbohydrates as chiral pool materials	143
	<i>Exercises and problems</i>	154

<b>5</b>	<b>O–Glycoside synthesis</b>	157
5.1	1,2– <i>trans</i> Glycosidation	160
5.2	1,2– <i>cis</i> Glycosidation	162
5.3	Participation of the solvent	163
5.4	The Koenigs–Knorr method	166
5.5	The trichloroacetimidate method	168
5.6	Thioglycosides	174
5.7	<i>n</i> –Pentenyl glycosides	178
5.8	Synthesis of 2–deoxy glycosides	180
5.9	Synthesis of $\beta$ –mannopyranosides	183
5.10	Synthesis of 2–deoxy–2–acetamido–glycopyranosides	188
5.11	Synthesis of glycopeptides	191
5.12	Solid phase oligosaccharide synthesis	193
5.13	Glycoside synthesis employing enzymes	195
5.14	Glycosylation strategies	199
	<i>Exercises and problems</i>	209
 <b>6</b>	 <b>Structure and biosynthesis of glycoconjugates</b>	 213
6.1	Structural diversity of oligosaccharides	213
6.2	Structures of glycoconjugates	215
	6.2.1 Structures of glycoproteins	218
	6.2.2 Structures of glycolipids	224
6.3	Biosynthesis of oligosaccharides	229
6.4	Biosynthesis of <i>N</i> –glycoproteins	232
6.5	Biosynthesis of <i>O</i> –glycoproteins	234
6.6	Biosynthesis of glycosphingolipids	235
	<i>Exercises and problems</i>	238

<b>7</b>	<b>Glycobiology</b>	241
7.1	Blood group specificities	242
7.2	Lectins	243
7.3	Oligosaccharide epitopes critical in cell biology	249
7.4	Understanding of the molecular interactions of the glycocalyx	255
7.5	Carbohydrate microarrays	256
7.6	Glycomimetics	259
7.7	Biochemical engineering	267
7.8	Microbial adhesion	271
7.9	Carbohydrate drugs	275
	<i>Exercises and problems</i>	284
<b>8</b>	<b>Purification and analysis of carbohydrates</b>	287
8.1	Chromatography and polarimetry	287
8.2	NMR spectroscopy	291
8.3	Mass spectrometry	300
<b>9</b>	<b>The literature of carbohydrate chemistry</b>	303
	<b>List of experimental procedures</b>	307
	<b>List of tables</b>	309
	<b>Subject index</b>	311
