

DVD Included!

- Examples and content from the book
- Models and textures you can customize
- Searchable PDF of book

Full-color Insert

- 16-page full-color insert with cutting-edge examples

----------------------------------	------------

Part I: Learning the Max Interface **1**

Quick Start: Animating a Dancing Cartoon Moose **3**

3D Cartoons — Planning the Production	3
Modeling the Character	5
Tutorial: Loading reference sketches.....	5
Tutorial: Creating the moose's leg and foot	6
Tutorial: Extruding the moose's torso, arms, and hands	8
Tutorial: Mirroring the body.....	9
Tutorial: Adding a head	10
Tutorial: Editing the body	11
Tutorial: Adding materials	12
Tutorial: Creating and fitting a biped	14
Tutorial: Attaching the character skin to a biped	15
Tutorial: Animating a character's motion	16
Summary	18

Chapter 1: Exploring the Max Interface **19**

The Interface Elements	20
Using the Menus	22
Using the Toolbars	23
Docking and floating toolbars	23
Using tooltips and flyouts	24
Learning the main toolbar	24
Using the Viewports	27
Using the Command Panel	27
Working with rollouts	28
Increasing the Command Panel's width	28
Tutorial: Rearranging the interface for lefties	30
Using the Lower Interface Bar Controls	31
Interacting with the Interface	32
Gaining quick access with the right-click quadmenus	32
Understanding the button color cues	33
Using drag-and-drop features.....	34
Controlling spinners	34
Understanding modeless and persistent dialog boxes	34

Getting Help.....	34
Browser-based reference guides	36
Online help	36
Summary	37
Chapter 2: Controlling and Configuring the Viewports	39
Understanding 3D Space	39
Axonometric versus Perspective.....	40
Orthographic and Isometric views	40
Learning viewports in Max.....	41
Using the Viewport Navigation Controls	42
Zooming a view	43
Panning a view.....	43
Walking through a view	43
Rotating a view	43
Controlling viewports with a scroll wheel	44
Controlling camera and spotlight views	45
Tutorial: Navigating the active viewport	45
Undoing and saving Viewport changes.....	46
Disabling and refreshing viewports	47
Maximizing the active viewport	48
Configuring the Viewports	49
Setting the viewport rendering method	50
Altering the Viewport layout	56
Using Safe Frames	57
Understanding Adaptive Degradation	58
Defining regions.....	60
Viewing statistics	62
Working with Viewport Backgrounds.....	63
Loading viewport background images	63
Loading viewport background animations	64
Tutorial: Loading reference images for modeling	65
Summary	66
Chapter 3: Working with Files and XRefs.	67
Working with Max Scene Files	67
Saving files.....	68
Opening files	69
Setting a Project Folder	70
Merging and replacing objects	70
Archiving files	71
Getting out.....	71
Setting File Preferences.....	72
Handling files.....	72
Backing up files	74
Tutorial: Setting Auto Backup.....	74
Maintaining log files.....	75
Importing and Exporting	75
Importing supported formats	75
Import preference	76

Exporting supported formats	76
Exporting utilities	79
Using the File Utilities	82
Using the Asset Browser utility	82
Finding files with the Max File Finder utility	83
Collecting files with the Resource Collector utility	84
Using the File Link Manager utility	84
Using i-drop	85
Accessing File Information	85
Displaying scene information	85
Viewing file properties	86
Viewing files	86
Referencing External Objects	87
Using XRef scenes	88
Using XRef objects	91
Using material XRefs	93
Merging modifiers	94
Using proxies	94
Controller XRefs	94
Tutorial: Using an XRef proxy	94
Configuring XRef paths	96
Summary	97
Chapter 4: Using Vault and the Asset Tracking System.	99
Setting Up Asset Tracking	99
Checking in and checking out	100
Logging in	100
Selecting a working folder	101
Using Autodesk Vault	101
Opening Vault files	101
Using the Asset Tracking interface	102
Getting and adding Vault files	104
Loading older file versions	104
Changing asset paths	104
Working with proxies	105
Tutorial: Editing a Vault asset	105
Summary	106
Chapter 5: Customizing the Max Interface and Setting Preferences	107
Using the Customize User Interface Window	107
Customizing keyboard shortcuts	107
Tutorial: Assigning keyboard shortcuts	108
Customizing toolbars	109
Tutorial: Creating a custom toolbar	110
Customizing quadmenus	112
Customizing menus	114
Tutorial: Adding a new menu	115
Customizing colors	116
Customizing Modify and Utility Panel Buttons	116

Working with Custom Interfaces	117
Saving and loading a custom interface	117
Tutorial: Saving a custom interface	119
Locking the interface	120
Reverting to the startup interface	120
Switching between default and custom interfaces.....	120
Tutorial: Creating custom initial settings	121
Configuring Paths.....	121
Configuring user paths.....	121
Configuring system paths.....	123
Selecting System Units	123
Using Custom and Generic units	124
Rescaling world units.....	125
Setting Preferences	125
General preferences	125
Files panel preferences	128
Viewport preferences	128
Gamma preferences	133
Other preference panels	134
Summary	134

Part II: Working with Objects

137

Chapter 6: Creating and Editing Primitive Objects 139

Creating Primitive Objects	139
Using the Create menu.....	139
Using the Create panel.....	140
Naming and renaming objects	141
Assigning colors.....	142
Using the Color Clipboard	144
Using different creation methods	144
Using the Keyboard Entry rollout for precise dimensions.....	147
Altering object parameters	147
Recovering from mistakes and deleting objects	147
Tutorial: Exploring the Platonic solids	148
Exploring the Primitive Object Types	149
Standard Primitives	149
Extended Primitives	154
Modifying object parameters	163
Tutorial: Filling a treasure chest with gems.....	164
Architecture Primitives	165
Using AEC Objects	165
Tutorial: Add stairs to a clock tower building.....	167
Summary	168

Chapter 7: Selecting Objects, Setting Object Properties, and Using Layers 169

Selecting Objects	169
Selection filters.....	170
Select buttons	171

Selecting with the Edit menu	172
Selecting multiple objects.....	175
Using the Paint Selection Region tool.....	175
Tutorial: Selecting objects.....	176
Locking selection sets.....	177
Using named selection sets.....	178
Editing named selections	178
Isolating the current selection	179
Selecting objects in other interfaces	179
Setting Object Properties	180
Viewing object information	180
Setting display properties.....	181
Setting rendering controls	183
Enabling Motion Blur.....	184
Using the Advanced Lighting and mental ray panels	184
Using the User-Defined panel.....	184
Hiding and Freezing Objects	184
Using the Display Floater dialog box	185
Using the Display panel	185
Object Culling utility	187
Tutorial: Hidden toothbrushes	188
Using Layers.....	189
Using the Layer Manager	189
Using the Layer List	191
Tutorial: Dividing a scene into layers	192
Summary	193

Chapter 8: Transforming Objects — Translate, Rotate, and Scale 195

Translating, Rotating, and Scaling Objects	195
Translating objects	195
Rotating objects	196
Scaling objects	196
Using the transform buttons	197
Working with the Transformation Tools	197
Working with the Transform Gizmos	197
Using the Transform Type-In dialog box.....	200
Using the status bar Type-In fields	201
Understanding the Transform Managers.....	201
Tutorial: Landing a spaceship in port	206
Using Pivot Points	207
Positioning pivot points	207
Aligning pivot points	208
Transform adjustments.....	208
Using the Reset XForm utility	209
Tutorial: A bee buzzing about a flower	209
Using the Align Commands	211
Aligning objects	211
Using the Quick Align tool.....	211
Aligning normals	212

Tutorial: Aligning a kissing couple	212
Aligning to a view	213
Using Grids	214
The Home Grid	214
Creating and activating new grids	214
Using AutoGrid	215
Tutorial: Creating a spyglass	215
Using Snap Options	216
Setting snap points	217
Setting snap options	218
Using the Snaps toolbar	219
Tutorial: Creating a lattice for a methane molecule	219
Summary	220

Chapter 9: Cloning Objects and Creating Object Arrays. 221

Cloning Objects	221
Using the Clone command	221
Using the Shift-clone method	222
Tutorial: Cloning dinosaurs	222
Understanding Cloning Options	224
Working with copies, instances, and references	224
Tutorial: Creating instanced doughnuts	224
Tutorial: Working with referenced apples	225
Mirroring Objects	227
Using the Mirror command	227
Tutorial: Mirroring a robot's leg	227
Cloning over Time	229
Using the Snapshot command	229
Tutorial: Create a path through a maze	229
Spacing Cloned Objects	230
Using the Spacing tool	230
Tutorial: Stacking a row of dominoes	232
Using the Clone and Align Tool	233
Aligning source objects to destination objects	233
Tutorial: Cloning and aligning objects	234
Creating Arrays of Objects	235
Linear arrays	235
Tutorial: Building a white picket fence	236
Circular arrays	236
Tutorial: Building a Ferris wheel	237
Working with a ring array	239
Tutorial: Using Ring Array to create a carousel	239
Summary	240

Chapter 10: Grouping and Linking Objects. 241

Working with Groups	241
Creating groups	241
Ungrouping objects	242
Opening and closing groups	242

Attaching and detaching objects.....	242
Tutorial: Grouping a plane's parts together	242
Building Assemblies	243
Adding lights to assemblies	244
Wiring Luminaire helper objects to light objects	244
Tutorial: Creating a flashlight assembly	245
Understanding Parent, Child, and Root Relationships	246
Building Links between Objects	247
Linking objects	247
Unlinking objects.....	247
Tutorial: Linking a family of ducks.....	247
Displaying Links and Hierarchies	249
Displaying links in the viewport.....	249
Viewing hierarchies	249
Working with Linked Objects.....	250
Selecting hierarchies.....	250
Linking to dummies.....	251
Tutorial: Circling the globe.....	251
Summary	252

Chapter 11: Working with the Schematic View. 253

Using the Schematic View Window	253
The Graph Editors menu options.....	253
The Schematic View interface.....	254
Working with Schematic View nodes	257
Working with Hierarchies.....	262
Using the Display floater	262
Connecting nodes	263
Copying modifiers and materials between nodes	263
Assigning controllers and wiring parameters	264
Tutorial: Linking a character with the Schematic View	264
Setting Schematic View Preferences	265
Limiting nodes.....	266
Working with grids and backgrounds	267
Display preferences	267
Tutorial: Adding a background image to the Schematic View	268
Using List Views.....	269
Summary	270

Chapter 12: Introducing Modifiers and Using the Modifier Stack. 271

Exploring the Modifier Stack	271
Understanding Base Objects.....	271
Applying modifiers	272
Other Modifier Stack entities	272
Using the Modifier Stack	272
Reordering the Stack	275
Tutorial: Creating a molecular chain.....	276
Holding and fetching a scene	277
Collapsing the Stack.....	277

Using the Collapse utility	277
Using gizmo subobjects	278
Tutorial: Squeezing a plastic bottle	278
Modifying subobjects	279
Topology dependency	279
Exploring Modifier Types	280
Object-Space versus World-Space modifiers	281
Selection modifiers	281
Parametric Deformer modifiers	283
Free Form Deformer modifiers	299
Summary	301

Part III: Modeling

303

Chapter 13: Learning Modeling Basics and Working with Subobjects . . . 305

Exploring the Model Types	305
Parametric objects versus editable objects	305
Converting to editable objects	307
Understanding Normals	308
Viewing normals	308
Tutorial: Cleaning up imported meshes	308
Working with Subobjects	310
Using Soft Selection	311
Tutorial: Soft selecting a heart shape from a plane	312
Applying modifiers to subobject selections	314
Tutorial: Building a superhero logo	314
Modeling Helpers	315
Using Dummy and Point objects	315
Measuring coordinate distances	316
Summary	318

Chapter 14: Drawing and Editing 2D Splines and Shapes 319

Drawing in 2D	319
Working with shape primitives	320
Tutorial: Drawing a company logo	330
Tutorial: Viewing the interior of a heart	331
Editing Splines	333
Editable Splines versus the Edit Spline modifier	333
Making splines renderable	333
Selecting spline subobjects	334
Controlling spline geometry	336
Editing vertices	339
Editing segments	345
Editing Spline subobjects	347
Using Spline Modifiers	352
Spline-specific modifiers	352
Moving splines to 3D	355
Summary	360

Chapter 15: Modeling with Polygons 361

Understanding Poly Objects	361
Creating Editable Poly Objects	363
Converting objects	363
Collapsing to a mesh object	363
Applying the Edit Poly modifier	363
Editing Poly Objects	364
Editable Poly subobject modes	364
Selection rollout	365
Tutorial: Modeling a clown head	366
Edit Geometry rollout	367
Editing Vertex subobjects	375
Editing Edge subobjects	378
Editing Border subobjects	380
Editing Polygon and Element subobjects	382
Surface properties	386
Tutorial: Modeling a tooth	388
Summary	390

Chapter 16: Deforming Surfaces and Using the Mesh Modifiers 391

The Basics of Deformation Painting	391
Painting deformations	391
Accessing brush presets	393
Using the Deformation Brushes	394
Controlling the deformation direction	394
Limiting the deformation	394
Committing any changes	394
Using the Relax and Revert brushes	394
Tutorial: Adding veins to a forearm	394
Setting Brush Options	396
Primitive Maintenance Modifiers	397
Edit Mesh modifier	397
Edit Poly modifier	397
Edit Geometry Modifiers	398
Cap Holes modifier	398
Delete Mesh modifier	398
Extrude modifier	398
Face Extrude modifier	399
Tutorial: Extruding a bullet	399
Optimize modifier	401
MultiRes modifier	401
Tutorial: Creating a MultiRes hand	402
Smooth modifier	402
Symmetry modifier	402
Tutorial: Creating symmetrical antlers	403
Tessellate modifier	404
Vertex Weld modifier	404

Miscellaneous Modifiers	404
Edit Normals	405
Normal modifier	406
STL Check modifier	406
Subdivision Surface Modifiers	406
MeshSmooth modifier	406
TurboSmooth modifier	407
Tutorial: Smoothing a birdbath.....	407
HSDS modifier	408
Summary	408

Chapter 17: Modeling with Patches and NURBS 409

Introducing Patch Grids	409
Creating a patch grid	410
Tutorial: Creating a checkerboard.....	410
Editing Patches.....	411
Editable patches versus the Edit Patch modifier	412
Selecting patch subobjects	412
Working with Patch Geometry	414
Editing vertices	415
Editing handles	418
Editing edges	419
Editing patch and element subobjects	421
Tutorial: Creating a maple leaf from patches.....	424
Using Modifiers on Patch Objects.....	425
Patch Select modifier	425
Edit Patch modifier	426
Delete Patch modifier.....	426
Using the Surface tools.....	426
Creating NURBS Curves and Surfaces	430
NURBS curves	430
NURBS surfaces	431
Converting objects to NURBS	432
Editing NURBS.....	434
Attach and Import	434
Display options	434
Surface and Curve Approximation	435
The NURBS Creation Toolbox	436
Using NURBS subobject editing tools.....	438
Working with NURBS.....	438
Lofting a NURBS surface	438
Tutorial: Creating a U Loft NURBS spoon.....	440
Creating a UV Loft surface	440
Lathing a NURBS surface	441
Tutorial: Lathing a NURBS CV curve to create a vase	442
Creating a 1-rail and 2-rail sweep surface.....	442
Tutorial: Creating a flower stem	443
Sculpting a rectangular NURBS surface	444
Tutorial: Creating a NURBS leaf	444

Tutorial: Sculpting a flower petal	446
NURBS modifiers	446
Summary	448

Chapter 18: Working with Compound Objects. 449

Understanding Compound Object Types	449
Morphing Objects	450
Creating Morph keys	450
Morph objects versus the Morph modifier	451
Tutorial: Morphing a woman's face	451
Creating Conform Objects	452
Setting a vertex projection direction	453
Tutorial: Placing a facial scar	454
Creating a ShapeMerge Object	455
Cookie Cutter and Merge options	455
Tutorial: Using the ShapeMerge compound object	456
Creating a Terrain Object	457
Coloring elevations	458
Tutorial: Creating an island with the Terrain compound object	458
Using the Mesher Object	460
Working with BlobMesh Objects	460
Setting BlobMesh parameters	461
Tutorial: Creating icy geometry with BlobMesh	461
Creating a Scatter Object	462
Working with Source objects	463
Working with Distribution objects	464
Setting Transforms	465
Speeding updates with a proxy	465
Loading and saving presets	465
Tutorial: Covering the island with trees	465
Creating Connect Objects	466
Filling object holes	466
Tutorial: Creating a park bench	467
Creating a Loft Object	468
Using the Get Shape and Get Path buttons	468
Controlling surface parameters	468
Changing path parameters	468
Setting skin parameters	469
Tutorial: Designing a slip-proof hanger	470
Deforming Loft objects	471
The Deformation window interface	471
Scale Deformation	473
Twist Deformation	473
Teeter Deformation	473
Bevel Deformation	474
Fit Deformation	475
Modifying Loft subobjects	475
Comparing shapes	476
Editing Loft paths	477

Tutorial: Creating drapes	477
Loft objects versus surface tools	478
Working with ProBoolean and ProCutter Objects	479
Using ProBoolean	479
Tutorial: Creating a keyhole	480
Using ProCutter	481
Tutorial: Creating a jigsaw puzzle	482
Summary	483

Chapter 19: Adding and Styling Hair, Fur, and Cloth. 485

Understanding Hair	485
Working with Hair	486
Growing hair	486
Setting hair properties	486
Tutorial: Adding a spline fringe to a quilt	489
Styling Hair	490
Using the Style interface	491
Tutorial: Creating a set of fuzzy dice	493
Using hair presets	493
Using hair instances	495
Rendering Hair	495
Understanding Cloth	496
Creating Cloth	496
Using Garment Maker to define cloth	496
Creating cloth from geometry objects	498
Tutorial: Clothing a 3D model	499
Summary	502

Part IV: Materials and Maps 503

Chapter 20: Exploring the Material Editor 505

Understanding Material Properties	505
Colors	505
Opacity and transparency	506
Reflection and refraction	506
Shininess and specular highlights	507
Other properties	507
Working with the Material Editor	507
Using the Material Editor controls	507
Using the sample slots	511
Naming materials	513
Getting new materials	514
Assigning materials to objects	514
Picking materials from a scene	514
Selecting objects by material	514
Previewing materials and rendering maps	515
Setting Material Editor options	515
Resetting materials	517
Removing materials and maps	517

Using the Fix Ambient utility	518
Tutorial: Coloring Easter eggs.....	518
Using the Material/Map Browser.....	519
Working with libraries	521
Tutorial: Loading a custom material library	522
Using the Material/Map Navigator	522
Summary	524
Chapter 21: Creating and Applying Simple Materials	525
Using the Standard Material	525
Using Shading Types	525
Blinn shader.....	526
Phong shader	528
Anisotropic shader	528
Multi-Layer shader.....	529
Oren-Nayar-Blinn shader	529
Metal shader	530
Strauss shader	530
Translucent shader	530
Tutorial: Making curtains translucent	530
Accessing Other Parameters	531
Extended Parameters rollout	531
SuperSampling rollout	533
Maps rollout.....	534
Dynamic Properties rollout	534
DirectX Manager rollout.....	534
mental ray connection rollout	534
Tutorial: Coloring a dolphin.....	534
Using External Tools	536
Creating material textures using Photoshop	536
Capturing digital images	538
Scanning images	538
Tutorial: Creating a fishing net	538
Summary	540
Chapter 22: Creating Advanced Multi-Layer Materials.	541
Using Compound Materials	541
Blend	542
Composite	543
Double Sided	544
Multi/Sub-Object	544
Tutorial: Creating a patchwork quilt.....	545
Morpher.....	545
Shell.....	546
Shellac	547
Top/Bottom	547
Tutorial: Surfing the waves.....	547
Using the Matte/Shadow Material	548
Matte/Shadow Basic Parameters rollout	548
Tutorial: Ballooning in New York	549

Using the Ink 'n' Paint Material	550
Controlling paint and ink.....	550
Tutorial: Cartooning a turtle.....	551
Using Architectural Materials	553
Using the DirectX Shader Material	554
Applying Multiple Materials	554
Using material IDs	554
Tutorial: Mapping die faces	555
Using the Clean MultiMaterial utility	555
Material Modifiers	556
Material modifier	556
MaterialByElement modifier.....	557
Tutorial: Creating random marquee lights with the MaterialByElement modifier	557
Disp Approx and Displace Mesh modifiers.....	557
Tutorial: Displacing geometry with a bitmap	558
Summary	560

Chapter 23: Adding Material Details with Maps 561

Understanding Maps	561
Different map types	561
Using Real-World maps	562
Understanding Material Map Types	562
2D maps	562
3D maps	572
Compositor maps.....	579
Color Modifier maps	581
Miscellaneous maps	582
Using the Maps Rollout	585
Tutorial: Creating space textures	587
Tutorial: Aging objects for realism	589
Using the Map Path Utility	591
Using Map Instances	591
Summary	592

Chapter 24: Unwrapping UVs and Pelt Mapping 593

Mapping Modifiers	593
UVW Map modifier	593
Tutorial: Using the UVW Map modifier to apply decals	595
UVW Mapping Add and Clear modifiers	596
UVW XForm modifier	596
Map Scaler modifier	596
Camera Map modifier	597
Using the Unwrap UVW modifier	597
The Edit UVWs interface	597
Tutorial: Controlling the mapping of a covered wagon	603
Relaxing vertices	605
Using the Quick Planar Map	605
Tutorial: Creating a mapping for a swan mesh	606
Using Pelt Mapping	607
Selecting seams	607
Positioning the projection gizmo	608

Stretching the pelt mapping	608
Tutorial: Using pelt mapping	610
Rendering UV Templates	611
Summary	612

Chapter 25: Creating Baked Textures and Normal Maps 613

Using Channels	613
Using the Map Channel Info dialog box	614
Select by Channel modifier	615
Rendering to a Texture	615
General Settings	616
Selecting objects to bake	616
Output settings	617
Baked Material and Automatic Mapping settings	617
Tutorial: Baking the textures for a dog model	618
Creating Normal Maps	619
Using the Projection modifier	619
Setting Projection Mapping options	620
Tutorial: Creating a normal map for a spikey sphere	621
Using Vertex Colors	622
Assigning vertex colors	622
Painting vertices with the Vertex Paint modifier	622
Tutorial: Marking heart tension	625
The Assign Vertex Color utility	626
Summary	626

Part V: Cameras and Lighting 627

Chapter 26: Configuring Cameras 629

Learning to Work with Cameras	629
Creating a camera object	630
Creating a camera view	630
Tutorial: Setting up an opponent's view	631
Controlling a camera	632
Aiming a camera	633
Tutorial: Watching a rocket	634
Aligning cameras	634
Tutorial: Seeing the dinosaur's good side	635
Setting Camera Parameters	636
Lens settings and field of view	636
Camera type and display options	637
Environment ranges and clipping planes	637
Camera Correction modifier	638
Creating multi-pass camera effects	638
Using the Depth of Field effect	639
Tutorial: Applying a Depth of Field effect to a row of windmills	640
Using the Motion Blur effect	641
Tutorial: Using a Motion Blur multi-pass camera effect	642
Summary	643

Chapter 27: Using Lights and Basic Lighting Techniques 645

Understanding the Basics of Lighting	645
Natural and artificial light	645
A standard lighting method	646
Shadows	647
Getting to Know the Light Types	648
Default lighting	648
Ambient light	649
Standard lights	649
Photometric lights	650
Creating and Positioning Light Objects	651
Transforming lights	651
Listing lights	651
Placing highlights	652
Tutorial: Lighting the snowman's face	652
Viewing a Scene from a Light	653
Light viewport controls	653
Tutorial: Lighting a lamp	654
Altering Light Parameters	655
General parameters	655
The Intensity/Color/Attenuation rollout	657
Spotlight and directional light parameters	657
Advanced Effects	657
Shadow parameters	658
Optimizing lights	658
Manipulating Hotspot and Falloff cones	659
Photometric light parameters	659
Using the Sunlight and Daylight Systems	660
Using the Compass helper	661
Understanding Azimuth and Altitude	662
Specifying date and time	662
Specifying location	662
Tutorial: Animating a day in 20 seconds	662
Using Volume Lights	664
Volume light parameters	664
Tutorial: Showing car headlights	665
Tutorial: Creating laser beams	666
Using projector maps and raytraced shadows	667
Tutorial: Projecting a trumpet image on a scene	668
Tutorial: Creating a stained-glass window	669
Summary	670

Chapter 28: Working with Advanced Lighting, Light Tracing, and Radiosity 671

Selecting Advanced Lighting	671
How light tracing works	672
Enabling light tracing	673
Tutorial: Viewing color bleeding	675
Using Local Advanced Lighting Settings	676
Tutorial: Excluding objects from light tracing	676

Understanding Radiosity	677
Lighting for radiosity	678
Tutorial: Lighting an archway with radiosity.....	682
Using Local and Global Advanced Lighting Settings.....	683
Working with Advanced Lighting Materials	684
Advanced Lighting Override	684
Lightscape material	684
Using Lighting Analysis	685
Summary	685

Part VI: Animation

687

Chapter 29: Understanding Animation and Keyframe Basics 689

Using the Time Controls.....	689
Setting frame rate	690
Setting speed and direction	690
Using Time Tags.....	691
Working with Keys	691
Auto Key mode	692
Set Key mode	692
Tutorial: Rotating a windmill's blades	693
Creating keys with the Time Slider	693
Copying parameter animation keys	694
Deleting all object animation keys	695
Using the Track Bar	695
Viewing and Editing Key Values	696
Using the Motion Panel	697
Setting parameters	697
Using trajectories	698
Tutorial: Making an airplane follow a looping path	699
Using the Follow/Bank utility.....	700
Using Ghosting	701
Animation Preferences	702
Animating Objects	703
Animating cameras.....	703
Tutorial: Animating darts hitting a dartboard	703
Animating lights.....	704
Animating materials	704
Tutorial: Dimming lights	706
Creating Image File Lists	706
Generating IFL files with the IFL Manager Utility.....	707
Tutorial: What's on TV?	708
Baking Animation Keys	709
Tutorial: Trees in a hurricane	710
Working with Previews.....	711
Creating previews	711
Viewing previews.....	713
Renaming previews	713
Summary	714

Chapter 30: Using Animation Layers	715
Using the Animation Layers Toolbar	715
Working with Animation Layers	717
Enabling animation layers	717
Setting animation layers properties	717
Collapsing animation layers	717
Tutorial: Using animation layers for a plane takeoff	718
Summary	719
Chapter 31: Using Animation Modifiers and Wiring Parameters	721
Using the Animation Modifiers	721
Morpher modifier	722
Tutorial: Morphing facial expressions	723
Using the Flex Modifier	723
Melt modifier	728
PatchDeform and SurfDeform modifiers	728
Tutorial: Deforming a car going over a hill	729
PathDeform modifier	730
Linked XForm modifier	730
SplineIK Control modifier	731
Attribute Holder modifier	731
Wiring Parameters	732
Using the Parameter Wiring dialog box	732
Manipulator helpers	734
Tutorial: Controlling a crocodile's bite	734
Collecting Parameters	735
Adding Custom Parameters	738
Summary	739
Chapter 32: Animating with Constraints and Controllers	741
Restricting Movement with Constraints	741
Using constraints	742
Working with the constraints	742
Understanding Controller Types	751
Assigning Controllers	751
Automatically assigned controllers	751
Assigning controllers with the Animation menu	752
Assigning controllers in the Motion panel	753
Assigning controllers in the Track View	753
Setting Default Controllers	754
Examining the Various Controllers	754
Transform controllers	754
Position track controllers	756
Rotation and Scale track controllers	767
Parameter controllers	767
Working with Expressions in Spinners	775
Understanding the Expression Controller Interface	776
Defining variables	777
Building expressions	777
Debugging and evaluating expressions	778

Managing expressions	779
Tutorial: Creating following eyes	779
Using Expression Controllers	780
Animating transforms with the Expression controller	780
Animating parameters with the Float Expression controller	781
Tutorial: Inflating a balloon	781
Animating materials with the Expression controller	781
Tutorial: Controlling a stoplight	782
Summary	784

Chapter 33: Working with Function Curves in the Track View. 785

Learning the Track View Interface	785
The Track View layouts	785
Track View menus and toolbars	786
Controller and Key panes	792
Lower interface toolbars	794
Working with Keys	795
Selecting keys	795
Using soft selection	796
Adding and deleting keys	796
Moving, sliding, and scaling keys	796
Editing keys	797
Using the Randomize Keys utility	797
Displaying keyable icons	797
Editing Time	798
Selecting time and the Select Keys by Time utility	799
Deleting, cutting, copying, and pasting time	799
Reversing, inserting, and scaling time	799
Setting ranges	799
Editing Curves	799
Inserting new keys and moving keys	800
Tutorial: Animating a monorail	800
Drawing curves	802
Reducing keys	804
Working with tangents	804
Tutorial: Animating a flowing river	805
Applying out-of-range, ease, and multiplier curves	806
Tutorial: Animating a wind-up teapot	807
Filtering Tracks and Creating Track Sets	810
Using the Filters dialog box	810
Creating a Track Set	811
Working with Controllers	811
Using visibility tracks	812
Adding Note Tracks	812
Tutorial: Animating a hazard light	812
Tutorial: Animating a checkers move	814
Synchronizing to a Sound Track	818
Using the Sound Options dialog box	818
Tutorial: Adding sound to an animation	818
Summary	820

Chapter 34: Combining Animations in the Motion Mixer 821

Saving Animation Files.....	821
Saving biped animations	821
Saving general animations	822
Using the Motion Mixer	823
Learning the Motion Mixer interface	824
Adding layer and transition tracks	825
Editing clips.....	826
Editing track weights	826
Adding Time Warps	826
Copying mixed animation to a biped	826
Saving and loading Mix files.....	827
Tutorial: Mixing biped animations	827
Loading Animation Sequences	828
Mapping animated objects	829
Using the Map Animation dialog box	829
Retargeting animations.....	830
Summary	830

Part VII: Dynamic Animation

831

Chapter 35: Creating Particles and Particle Flow. 833

Understanding the Various Particle Systems	833
Creating a Particle System	834
Using the Spray and Snow Particle Systems	835
Tutorial: Creating rain showers.....	836
Tutorial: Creating a snowstorm	837
Using the Super Spray Particle System	838
Super Spray Basic Parameters rollout	838
Particle Generation rollout	839
Particle Type rollout	840
Rotation and Collision rollout	844
Tutorial: Basketball shooting practice	845
Object Motion Inheritance rollout	847
Bubble Motion rollout	848
Particle Spawn rollout	848
Load/Save Presets rollout	849
Using the Blizzard Particle System	850
Using the PArray Particle System	850
Splitting an object into fragments.....	851
Tutorial: Creating rising steam	851
Using the PCloud Particle System.....	852
Using Particle System Maps	853
Using the Particle Age map	853
Using the Particle MBlur map	853
Tutorial: Creating jet engine flames	853
Controlling Particles with Particle Flow	854
The Particle View window	855
The Standard Flow.....	856

Working with actions	856
Tutorial: Creating an avalanche	859
Using Particle Flow helpers	860
Wiring events.....	860
Tutorial: Moths chasing a light	860
Debugging test actions	862
Tutorial: Firing at a fleeing spaceship	862
Tutorial: Creating a black hole using Particle Flow	864
Summary	866
Chapter 36: Using Space Warps	867
Creating and Binding Space Warps.....	867
Creating a Space Warp	867
Binding a Space Warp to an object.....	868
Understanding Space Warp Types.....	868
Force Space Warps	868
Deflector Space Warps	877
Geometric/Deformable Space Warps	880
Modifier-Based Space Warps	886
Combining Particle Systems with Space Warps.....	887
Tutorial: Shattering glass	887
Tutorial: Exploding a planet.....	888
Tutorial: Making water flow down a trough	890
Summary	891
Chapter 37: Simulating Physics-Based Motion with reactor	893
Understanding Dynamics	893
Using reactor	894
The reactor process	894
Tutorial: Filling a glass bowl.....	895
Using reactor Collections	897
Collection modifiers.....	898
Setting object properties.....	898
Tutorial: Throwing a shirt over a chair	900
Creating reactor Objects	902
Springs and dashpots.....	903
Plane	903
Motor and Wind	903
Toy Car	904
Tutorial: Driving a monster truck over a hill.....	904
Fracture	905
Tutorial: Smashing a gingerbread house	906
Water.....	906
Tutorial: Working with water	907
Calculating and Previewing a Simulation	908
Using the Preview window.....	909
Creating animation keys.....	910
Analyzing the scene	910
Tutorial: Dropping a plate of donuts.....	910

Constraining Objects	911
Using a Constraint Solver.....	912
Rag Doll constraint	913
Tutorial: Swinging into a wall.....	913
reactor Troubleshooting	915
Summary	916

Chapter 38: Animating Hair and Cloth 917

Using Hair Dynamics	917
Making Hair Live	917
Setting properties.....	918
Enabling collisions.....	918
Enabling forces	919
Running a simulation.....	919
Tutorial: Simulating hair dynamics.....	919
Simulating Cloth Dynamics	920
Defining cloth properties and forces.....	920
Creating a Cloth simulation	921
Viewing cloth tension.....	922
Tutorial: Draping cloth over a jet	923
Summary	924

Part VIII: Characters 925

Chapter 39: Understanding Rigging and Working with Bones 927

Creating a Rigging Workflow	927
Building a Bones System.....	928
Assigning an IK Solver	928
Setting bone parameters.....	929
Tutorial: Creating a bones system for an alligator	929
Using the Bone Tools	931
Reordering bones.....	931
Refining and mirroring bones.....	932
Coloring bones	932
Adjusting fins.....	933
Making objects into bones	933
Summary	934

Chapter 40: Adding Inverse Kinematics 935

Forward Kinematics versus Inverse Kinematics	935
Creating an Inverse Kinematics System	936
Building and linking a system	936
Selecting a terminator	937
Defining joint constraints.....	937
Copying, pasting, and mirroring joints.....	937
Binding objects	937
Understanding precedence.....	938
Tutorial: Controlling a backhoe	938

Using the Various Inverse Kinematics Methods.....	940
Interactive IK	940
Applied IK	942
History Independent IK solver	943
History Dependent IK solver	946
Tutorial: Animating a spyglass with the HD IK solver	947
IK Limb solver	949
Tutorial: Animating a character's arm with the IK Limb solver	949
Spline IK solver	949
Tutorial: Building an IK Spline alligator	950
Summary	952
Chapter 41: Skinning Characters	953
Understanding Your Character	953
The curse and blessing of symmetry	954
Dealing with details	954
Animated Skin Modifiers	955
Understanding the Skinning Process	955
Binding to a skeleton	955
Using the Skin Wrap modifiers	966
Tutorial: Making a simple squirt bottle walk	966
Using the Skin Morph modifier	967
Tutorial: Bulging arm muscles	967
Using Character Animation Techniques	969
Summary	969
Chapter 42: Creating and Animating Bipeds	971
Character Creation Workflow	972
Creating a Biped	972
Customizing a biped	974
Modifying a biped	975
Setting the Biped display options	978
Selecting tracks	978
Bending links	980
Working with postures and poses	981
Tutorial: Creating a four-footed biped	983
Animating a Biped	985
Using Footstep Mode	985
Tutorial: Making a biped jump on a box	986
Converting biped animation clips	987
Using Freeform Mode	987
Setting Freeform keys	988
Using the Keyframing Tools, Layers, and Motion Capture	988
Loading and saving biped animation clips	989
Using Motion Flow Mode	989
Previewing a biped animation	990
Moving a biped with its footsteps	990
Creating Crowds	990
Using Crowd and Delegate helpers	991
Scattering delegates	991

Setting delegate parameters	991
Assigning behaviors	992
Solving the simulation	993
Tutorial: Rabbits in the forest	994
Creating a Crowd of Bipeds	995
Associating delegates with objects	995
Associating delegates with bipeds.....	996
Summary	996

Part IX: Rendering

997

Chapter 43: Learning Rendering Basics 999

Previewing with ActiveShade	999
Render Parameters	1001
Initiating a render job	1002
Common parameters	1003
E-mail notifications	1006
Adding pre-render and post-render scripts	1006
Assigning renderers	1006
Scanline A-Buffer renderer	1007
Rendering Preferences	1009
Creating VUE Files	1010
Using the Rendered Frame Window	1011
Using the RAM Player	1012
Reviewing the Render Types	1014
Using Command-Line Rendering	1015
Creating Panoramic Images	1015
Getting Printer Help	1016
Creating an Environment	1017
Defining the rendered environment	1017
Setting exposure.....	1019
Summary	1021

Chapter 44: Using Atmospheric and Render Effects 1023

Creating Atmospheric Effects	1023
Working with the Atmospheric Apparatus	1024
Adding effects to a scene	1024
Using the Fire Effect	1025
Tutorial: Creating the sun.....	1027
Tutorial: Creating clouds	1028
Using the Fog Effect	1030
Using the Volume Fog effect.....	1031
Tutorial: Creating a swamp scene	1032
Using the Volume Light effect	1032
Adding Render Effects	1033
Creating Lens Effects	1035
Global Lens Effects Parameters.....	1035
Glow	1037
Tutorial: Creating shocking electricity from a plug outlet	1040

Tutorial: Creating neon	1041
Ring	1042
Ray	1042
Star	1043
Streak	1043
Auto Secondary	1043
Manual Secondary	1044
Tutorial: Making an airplane sparkle	1046
Using Other Render Effects	1047
Blur render effect	1047
Brightness and Contrast render effect	1048
Color Balance render effect	1049
File Output render effect	1049
Film Grain render effect	1049
Motion Blur render effect	1049
Depth of Field render effect	1050
Summary	1051

Chapter 45: Raytracing and mental ray 1053

Understanding Global Raytracing Settings	1053
Controlling the raytracer	1054
Excluding objects	1056
Using Raytrace Materials	1057
Raytrace Basic Parameters	1058
Extended Parameters rollout	1059
Raytracer Control rollout	1059
Additional rollouts	1060
Tutorial: Coming up roses	1060
Using a Raytrace Map	1061
Setting raytrace parameters	1062
Tutorial: Raytracing a wine glass	1062
Enabling mental ray	1063
mental ray preferences	1064
Understanding shaders	1065
mental ray materials and shaders	1065
mental ray lights and shadows	1068
Controlling Indirect Illumination	1073
Rendering control	1074
Advanced mental ray	1075
Summary	1075

Chapter 46: Batch and Network Rendering 1077

Batch Rendering Scenes	1077
Using the Batch Render tool	1077
Managing scene states	1078
Creating a stand-alone executable	1078
Understanding Network Rendering	1079
Network Requirements	1080
Setting up a Network Rendering System	1080
Setting up the network	1081
Tutorial: Locating TCP/IP and gathering IP addresses	1081

Tutorial: Installing and configuring TCP/IP	1083
Tutorial: Setting up Max on the networked computers	1085
Configuring shared directories	1085
Tutorial: Sharing directories	1085
Tutorial: Choosing shared directories	1088
Starting the Network Rendering System	1088
Tutorial: Initializing the network rendering system	1088
Tutorial: Completing your first network rendering job	1090
Job assignment options	1092
Configuring the Network Manager and Servers	1093
The network manager settings	1093
The network servers settings	1094
Logging Errors	1095
Using the Monitor	1096
Jobs	1096
Servers	1097
Summary	1098

Part X: Post Processing 1101

Chapter 47: Compositing and Render Elements 1103

Using External Compositing Packages	1103
Compositing with Photoshop	1103
Video editing with Premiere	1105
Tutorial: Creating a montage of Space Warp animations	1106
Video compositing with After Effects	1106
Tutorial: Adding animation effects using After Effects	1107
Introducing Combustion	1108
Using other compositing solutions	1111
Using Render Elements	1111
Summary	1113

Chapter 48: Using the Video Post Interface 1115

Completing Post-Production with the Video Post Interface	1115
The Video Post toolbar	1116
The Video Post Queue and Range panes	1117
The Video Post status bar	1118
Working with Sequences	1118
Adding and Editing Events	1119
Adding an image input event	1119
Adding scene events	1120
Adding image filter events	1121
Adding image layer events	1126
Adding external events	1126
Using loop events	1127
Adding an image output event	1128
Working with Ranges	1128

Working with Lens Effects Filters	1129
Adding flares	1130
Adding focus	1131
Adding glow	1132
Adding highlights	1133
Tutorial: Making a halo shine	1133
Adding backgrounds and filters using Video Post.....	1134
Summary	1136

Part XI: MAXScript and Plug-Ins **1137**

Chapter 49: Automating with MAXScript 1139

What Is MAXScript?	1139
MAXScript Tools	1140
The MAXScript menu	1140
The MAXScript Utility rollout	1141
Tutorial: Using the SphereArray script	1142
The MAXScript Listener window	1142
Tutorial: Talking to the MAXScript interpreter	1144
MAXScript Editor windows	1146
The Macro Recorder	1147
Tutorial: Recording a simple script	1148
The MAXScript Debugger	1149
Setting MAXScript Preferences	1152
Types of Scripts	1152
Macro scripts	1153
Scripted utilities	1153
Scripted right-click menus	1153
Scripted mouse tools	1153
Scripted plug-ins	1153
Writing Your Own MAXScripts.....	1153
Variables and data types.....	1154
Tutorial: Using variables.....	1155
Program flow and comments	1156
Expressions	1157
Conditions	1159
Collections and arrays	1159
Loops.....	1160
Functions.....	1162
Tutorial: Creating a school of fish.....	1163
Learning the Visual MAXScript Editor Interface	1169
The Editor interface	1169
The menus and the main toolbar	1170
Toolbar elements	1170
Laying out a Rollout	1171
Aligning and spacing elements	1172
Tutorial: Building a custom rollout with the Visual MAXScript Editor	1172
Summary	1175

Chapter 50: Expanding Max with Third-Party Plug-Ins	1177
Working with Plug-Ins	1177
Installing plug-ins	1178
Viewing installed plug-ins	1178
Managing plug-ins	1179
Tutorial: Installing and using the AfterBurn Plug-in Demo	1180
Locating Plug-Ins	1181
Summary	1182
 Appendix A: What's New with Max 9	 1183
Appendix B: Installing and Configuring 3ds Max 9	1187
Appendix C: Max Keyboard Shortcuts	1195
Appendix D: What's on the DVD.	1211
 Index.	 1215
