

Microbiological analysis of red meat, poultry and eggs

Edited by G. C. Mead

Contents

<i>Contributor contact details</i>	<i>xi</i>
<i>Introduction</i>	<i>xv</i>
1 Microbiological testing in food safety and quality management	1
<i>C. de W. Blackburn, Unilever Colworth, UK</i>	
1.1 Introduction	1
1.2 Control systems used in the food industry	2
1.3 Role of microbiological testing	9
1.4 Applying microbiological testing	21
1.5 Future trends	24
1.6 Sources of further information and advice	26
1.7 References	27
2 Legislation for red meat, poultry and eggs: which way forward?	33
<i>M. Fogden, Consultant, UK</i>	
2.1 Introduction	33
2.2 Codex Alimentarius (food code)	34
2.3 Regulation in the EU	40
2.4 EU regulation on microbiological criteria	43
2.5 Annex I: criteria	46
2.6 Future trends	49
2.7 Sources of further information and advice	51
2.8 References	52

3	<i>Escherichia coli</i> O157 and other VTEC in the meat industry	55
	<i>I. D. Ogden, University of Aberdeen, UK</i>	
3.1	Introduction	55
3.2	Pathogenic potential	58
3.3	Key outbreaks of <i>E. coli</i> O157 and other VTEC	61
3.4	Occurrence in red meat and poultry	64
3.5	Regulatory measures	66
3.6	Laboratory methods of isolation and identification	67
3.7	Industry measures	68
3.8	Consumer responses	72
3.9	Future trends	73
3.10	Sources of further information and advice	75
3.11	References	76
4	Faecal indicator organisms for red meat and poultry	83
	<i>G. C. Mead, Consultant, UK</i>	
4.1	Introduction	83
4.2	Origins and terminology of the indicator concept	84
4.3	Enterobacteriaceae, coliforms and <i>E. coli</i>	85
4.4	Monitoring faecal contamination of meat	92
4.5	Other indicator organisms	95
4.6	Use of <i>E. coli</i> for determining cross-contamination	95
4.7	Sources of further information	96
4.8	References	97
5	Spoilage organisms of red meat and poultry	101
	<i>J. E. L. Corry, University of Bristol, UK</i>	
5.1	Introduction	101
5.2	Microflora of raw meat immediately after slaughter (red meat and poultry)	102
5.3	Factors affecting flora development and changes leading to spoilage	103
5.4	Spoilage of vacuum-packed red meat of normal pH due to psychophilic or psychrotrophic <i>Clostridium</i> spp.	108
5.5	Bone taint	109
5.6	Spoilage of unviscerated poultry	109
5.7	Effect of storage temperature on spoilage	110
5.8	Metabolic products responsible for spoilage	110
5.9	Isolation and identification of spoilage organisms	112
5.10	Future trends	115
5.11	Sources of further information and advice	115
5.12	References	116
