# Character Animation

2D Skills for Better 3D

Steve Roberts

Second Edition

# contents

foreword	xi
preface	xiii
acknowledgements	xv
chapter 1	
<b>introduction to 2D-animation working practice</b>	<b>1</b>
how animation works the	2
basics	2
frames per second	2
what you need for your studio	3
animation paper	3
peg bar	3
light box	4
x-sheets	4
line tester	9
pencils	11
let's get animating	11
key to key animation	11
animating straight ahead	13
flipping, flicking and rolling	13
flipping	13
flicking	14
rolling	17
how to use a line tester to help your animation	18
how this book works	19
chapter 2	
<b>matter and the animation of inanimate objects</b>	<b>28</b>
inanimate objects	29
weight	29
environment	30
solidity	30
force	30
construction	30
how to animate inanimate objects	30
the animation of solids	31
a bowling ball	31

a soccer ball	32
a balloon	33
a water-filled balloon	33
the animation of liquids	35
a drip	35
a splash	36
object falling into water	36

### chapter 3

<b>the construction of a simple character, its articulation and balance</b>	<b>48</b>
<i>basic human anatomy</i>	49
the spine	50
the rib cage	50
the pelvic girdle	51
the skull	51
the shoulders	51
joints	52
plane joints	52
pivot joints	53
hinge joints	53
ball-and-socket joints	53
saddle joints	53
condyloid joints	54
moving in arcs	54
how to design a basic human character	55
complexity	56
the graphic nature of characters	56
<i>strong silhouettes</i>	57
weight and balance	57
how to design a 3D character	59
<i>planning a scene</i>	61
animating your characters	62
how to build and rig a simple 3D character	80
skin and bones	81
child of the joint	81
first get your body parts	83
putting bones in your man	83
setting up eye controls	85
setting up the legs	85

### chapter 4

<b>timing, anticipation, overshoot, follow-through and overlapping action with an animated character</b>	<b>87</b>
timing	88
anticipation	90

---

how much anticipation	91
force	92
acting and anticipation	93
double takes!	93
speed and surprise	94
anticipation during a move	94
varying the amount of anticipation	95
other ways of using anticipation	96
follow-through	96
follow-through of inanimate objects	97
follow-through of animate (living) objects	98
overlapping action or overshoot	101
vibration	103
chapter 5	
<b>human walks and runs</b>	<b>113</b>
walk cycles!	114
walking	115
pace	115
walking mechanics	116
the four basic positions of a walk	116
the stride positions	116
the cross over positions	117
shoulder movement	118
arm movement	120
up and down movement of the body	120
walk cycles displaying different moods	121
external influences	128
two people walking together	129
running	129
chapter 6	
<b>animal walks and runs</b>	<b>136</b>
the four types of animal locomotion	137
construction of an animal	137
pantomime horse	137
cartoon four-legged walks	139
correct four-legged animal construction	140
animal leg and foot construction	140
animals with paws	140
a dog walk	141
a cat walk	145
animals with cloven feet	146
animals with hooves	146
flat feet	147
animal runs	148

trotting	148
cantering	149
galloping	150
transverse or rotary gallops and canters	151
 chapter 7	
<b>animation of fish and snakes</b>	<b>158</b>
fish	158
how they swim	159
drag	159
two swimming types of fish	160
schooling (shoaling)	160
swimming mammals and flatfish	161
rays	161
fins	161
snakes	162
basic movement	162
concertina movement	163
crotaline (sidewinder) movement	163
 chapter 8	
<b>animation of birds</b>	<b>170</b>
flying	170
wings – insects and humming bird	172
 chapter 9	
<b>animation of acting – body language</b>	<b>178</b>
acting	179
method acting	180
theatrical acting	180
consequence	180
emotions	181
introduction to Laban Movement theory	182
kinesphere	182
space, time, weight and flow continuums	183
eight basic efforts	183
pressing	183
flicking	183
wringing	184
dabbing	184
slashing	184
gliding	184
thrusting	184
floating	184

general body language	185
basic body postures	186
open body postures	186
closed body postures	187
forward body postures	187
back body postures	187
responsive	187
reflective	189
fugitive	190
combative	191
palm, hand, arm and leg gestures	192
palm gestures	192
hand gestures	192
arm crossing	193
leg crossing	194
acting out a scene in animation	195
the use of video footage to help your animation	198
the seven questions of character	199
the different sorts of animation acting	200
animated radio	200
pose-to-pose animation acting	201
full animation acting	201
mime	202
analysis of a character	203
building a more sophisticated character	208
 chapter 10	
<b>animation of acting – facial expressions</b>	<b>214</b>
emotions	215
the eyes	217
facial expressions	219
happiness	219
a smile	219
sadness	220
surprise	221
fear	222
anger	222
disgust and contempt	223
interest	223
pain and distress	224
combination of facial expressions	225
head angle	226
hand-to-face gestures	226
evaluation	227
deceit	227
stress	228

---

extreme close-ups	228
how to animate a piece of facial acting	228
how to add a simple mouth and eyebrows to your basic	
3D character	238
the eyebrows	239
the mouth	239
 chapter 11	
<b>animation of acting – two or more characters</b>	<b>241</b>
two characters on screen together	241
the use of ‘beats’ to break up a scene	242
objective	242
obstacle	242
action	242
personal space	243
mirroring	244
how characters look at each other	245
two characters acting with each other while talking	246
two characters alternating from one shot to another	247
a large group of characters on screen at the same time	248
 chapter 12	
<b>lip-sync</b>	<b>255</b>
recording and breaking down a dialogue track	256
how we speak	257
acting with dialogue	259
quick from pose to pose	260
slow from pose to pose	260
erratically from pose to pose	260
mouth shapes	261
mouth shut consonants	261
the vowels	263
the quieter vowels and consonants	264
teeth	264
animating the mouth shapes early	265
creating a more sophisticated character’s face and expressions	269
eyebrow movements	270
mouth and jaw movements	271
cheek movements	273
nose movements	273
 index	 275
