Introduction xxix

Part I Overview

1	Overview of Windows Vista Improvements	3
	What's New	3
	User Interactions	5
	Performance	13
	Mobility	16
	Tablet PC	20
	Deployment	22
	Reliability and Supportability	23
	Troubleshooting	28
	Architecture Improvements	30
	Windows Vista Editions	32
	Windows Vista Starter	34
	Windows Vista Home Basic	35
	Windows Vista Home Premium	35
	Windows Vista Business	35
	Windows Vista Enterprise	36
	Windows Vista Ultimate	36
	Choosing Hardware	37
	Windows Vista Logos	37
	Hardware Requirements	38
	Summary	38
	Additional Resources	39
2	Security in Windows Vista	41
	Addressing Specific Security Concerns with Windows Vista	41
	Wireless Networks	42
	Help Desk Calls Related to Malware	42
	Data Theft	47
	New and Improved Windows Vista Security Features	50
	User Account Control (UAC)	50
	Windows Defender	54
	Windows Firewall	55
	Internet Explorer Security Features	58

What do you think of this book? We want to hear from you!

Microsoft is interested in hearing your feedback so we can continually improve our books and learning resources for you. To participate in a brief online survey, please visit:

BitLocker	60
Encrypting File System (EFS)	63
Auditing Enhancements	64
Smart Card Improvements	65
Credential Manager Enhancements	66
Architectural and Internal Windows Vista Security Improvements	66
Code Integrity (CI)	67
Windows Resource Protection (WRP)	68
Kernel Patch Protection	70
Required Driver Signing	71
Windows Service Hardening	71
Authorization Manager	73
Network Access Protection Client	74
Web Services for Management	74
Crypto Next Generation (CNG) Services	74
Data Execution Prevention (DEP)	75
Address Space Layout Randomization (ASLR)	76
New Logon Architecture	76
Rights Management Services (RMS)	77
Multiple Local Group Policy Objects	78
Summary	78
Additional Resources	79

Part II Deployment

3	Deployment Platform	83
	Tools Introduction	83
	Windows Vista Deployment Terminology	85
	Platform Components	87
	Windows Imaging	88
	Answer Files	89
	Windows SIM	90
	Windows Setup	91
	Sysprep	91
	Windows PE	92
	Other Tools	93
	Windows DS	94
	ImageX	95
	Basic Deployment Process	96
	BDD 2007 Deployment Process	97
	Summary	102
	Additional Resources	102
4	Planning Deployment	105
	Using BDD 2007 for Deployment Planning	105
	Planning Guide	107
	Feature Team Guides	112
	Solution Framework	114
	Job Aids	114
	Planning Low-Volume Deployment	115

Scope and Objectives	116
Current Environment	116
Configuration Plan	117
Testing and Piloting	117
Rolling Out	118
Windows Vista Requirements	119
Hardware Requirements	119
Upgrade Paths	119
Preparing for Development	120
Application Compatibility	120
Application Management	122
Computer Imaging System	123
Deployment	124
Infrastructure Remediation	125
Operations Readiness	125
Security	126
User State Migration	126
Installing BDD 2007	127
Program Folders	129
Distribution Share	129
Starting Deployment Workbench	130
Updating BDD 2007 Components	130
Summary	132
Additional Resources	132
5 Automating Installation	133
Deployment Scenarios	133
Upgrade Computer Scenario	134
New Computer Scenario	135
Replace Computer Scenario	135
Understanding Setup	136
Preinstallation Phase	137
Online Configuration Phase	138
Windows Welcome Phase	139
Preparing the Environment	141
Planning Installation	141
Configuring the Technician Computer	143
Using Windows SIM	145
Building Distribution Shares	147
Creating an Answer File	150
Adding Files to Answer Files	153
Converting Windows XP Answer Files	155
Unattend.txt	155
Sysprep.inf	156
WinBOM.ini	156
OEMInfo.ini	156
Oobeinfo.ini	156
Choosing Installation Methods	157

	Staging Distribution Shares	157
	Using Windows DS	157
	Using SMS OSD and BDD	157
	Summary	157
	Additional Resources	158
6	Developing Disk Images	159
	Getting Started	160
	Prerequisite Skills	161
	Lab Requirements	161
	Capturing Images with BDD 2007	164
	Navigating Deployment Workbench	165
	Configuring the Lab Distribution Share	166
	Adding Windows Vista	167
	Adding Applications	169
	Adding Packages	175
	Adding Out-of-Box Drivers	177
	Creating Image Builds	179
	Editing a Build's Task Sequence	183
	Configuring Group and Task Properties	186
	Configuring the Options Tab	186
	Creating the Lab Deployment Point	191
	Configuring the Deployment Point	193
	Updating the Deployment Point	197
	Capturing a Disk Image for LTI	197
	Capturing a Disk Image for ZTI	199
	Creating an Image Capture CD	199
	Preparing the Image for Capture	199
	Capturing the Image	201
	Manually Preparing Images	201
	Customizing BDD 2007	203
	Summary	203
	Additional Resources	204
7	Migrating User State Data	207
	Evaluating Migration Technologies	208
	Windows Easy Transfer	208
	User State Migration Tool	208
	Microsoft IntelliMirror	209
	Using Windows Easy Transfer	209
	Planning User State Migration Using USMT	210
	Choosing Subject Matter Experts	211
	Identifying User State Data	212
	Prioritizing Migration Tasks	213
	Choosing a Data Store Location	214
	Automating USMT	215
	Installing USMT	216
	Local Installation	217
	Network Staging	218

BDD 2007	218
SMS 2003 OSD	218
Understanding USMT Components	218
Scanstate.exe	219
Loadstate.exe	220
XML Migration Files	220
Developing Migration Files	221
Customizing USMT	221
Control File Syntax	221
Deploying Migration Files	222
Using USMT in BDD 2007	222
Downloading USMT Components	223
Specifying the Data Store Location	224
Adding Custom Migration Files	226
Summary	227
Additional Resources	227
8 Deploying Applications	229
Preparing the Lab	230
<i>Planning Deployment</i>	231
Priorities	232
Categories	233
Installation Methods	234
Subject Matter Experts	235
Configurations	236
Mitigating Compatibility Issues	236
Choosing a Deployment Strategy	239
Thick Images	240
<i>Thin Images</i>	241
Hybrid Images	243
Automating Installation	243
Windows Installer	244
FLEXnet InstallShield	246
Legacy InstallShield	246
Legacy InstallShield PackageForTheWeb	247
Legacy Wise Installation System	247
Windows Script Host	248
Repackaging Legacy Applications	248
The Repackaging Process	249
Repackaging Tools	249
Injecting in a Disk Image	250
Adding Applications	251
Creating Dependencies	253
Installing Applications	254
Installing from an Answer File	256
Adding Applications in Audit Mode	257
Summary	258
Additional Resources	258

9	Preparing Windows PE	261
	Exploring Windows PE	262
	Capabilities	263
	Limitations	265
	New Features	266
	Setting up the Environment	267
	Installing the Windows AIK	267
	Configuring the Build Environment	268
	Removing the Build Environment	269
	Working with Windows PE	270
	Applying Windows PE	270
	Adding Optional Components	270
	Copying Applications	273
	Adding Device Drivers	273
	Installing Updates	273
	Prepping the Image	273
	Capturing the Image	274
	Creating Bootable Media	275
	Customizing Windows PE	278
	Automating Windows PE	280
	Automating with Unattend.xml	280
	Adding Images to Windows DS	280
	Using Windows PE with BDD	281
	Summary	283
	Additional Resources	284
10	Deploying with Windows DS	285
	Introducing Windows DS	286
	Service Architecture	286
	Operating Modes	291
	Planning for Windows DS	293
	Server Requirements	293
	Client Requirements	294
	DHCP Requirements	295
	Routing Requirements	296
	Capacity Requirements	296
	Installing Windows DS	297
	Windows Server 2003	297
	Windows Server Code Name "Longhorn"	298
	Configuring Windows DS	299
	Preparing Discover Images	301
	Importing Images	302
	Importing Boot Images	303
	Importing Install Images	303
	Managing Image Security	304
	Installing Windows Vista	307
	Capturing Custom Images	308
	Using Windows DS with BDD 2007	309

	Summary	311
	Additional Resources	311
11	Using Volume Activation	313
	Introduction	313
	Volume Activation	314
	Activation Options	315
	Activation Terminology	319
	Planning an Activation Infrastructure	320
	Analyzing Activation Options	321
	Mapping Computers to Activation Options	322
	Implementing OEM Activation	322
	Installing Volume-Licensed Images on OEM Systems	323
	OEM Imaging of Volume Editions	324
	Implementing MAK Activation	324
	Obtaining MAKs	324
	Managing MAKs	324
	Obtaining Additional MAK Activations	325
	Assigning MAKs to Windows Vista Systems	325
	Volume Activation Management Tool	327
	Implementing KMS Activation	328
	Installing a KMS Computer	329
	Installing KMS Client Computers	332
	KMS Integration with the Deployment Workbench	333
	KMS Reporting	333
	Configuring KMS Activation	334
	Using Slmgr.vbs to Configure KMS	334
	Using Registry Entries to Configure KMS	335
	KMS Computer Configuration	335
	KMS Client Configuration	336
	Using WMI to Configure KMS	336
	Activation in BDD 2007	337
	Using the Windows Deployment Wizard	338
	Automating the Windows Deployment Wizard	339
	Troubleshooting Volume Activation	339
	Common Problems	339
	Event Log Entries	341
	Resolving RFM	341
	Summary	344
	Additional Resources	345
12	Deploying with BDD 2007	347
	Introducing BDD 2007 Deployment	348
	Deployment Scenarios	348
	Comparing LTI and ZTI	348
	Preparing the Distribution Share	349
	Creating the Additional Deployment Points	350
	Preparing Windows PE for ZTI	355

To Prepare the Windows PE Images	355
Customizing Windows PE	356
Providing Access to Windows PE Image	359
Importing Windows PE in to SMS 2003 OSD	360
Creating the SMS 2003 OSD Image Installation CD	360
Preparing Windows DS	361
Selecting an Operational Mode	362
Adding Images to Windows DS	362
Pre-staging Destination Computers	363
Configuring Resource Access	364
Creating Shared Folders	364
Configuring Share Permissions	364
Configuring Other Resources	365
Configuring ZTI Package Selection	367
Configuring SMS 2003 for ZTI	368
Configuring the ZTI Operating System Image	368
Creating a ZTI User State Migration Package	372
Customizing BDD 2007 Deployment	374
Configuring Multiple Computers	374
Configuring Individual Computers	377
Customizing CustomSettings.ini	378
Customizing BootStrap.ini	379
Using the BDD 2007 Database	380
Configuring for Common Scenarios	385
Typical Settings for LTI	385
Typical Settings for ZTI	387
Automated Settings for LTI	388
Performing LTI Deployments	391
Performing ZTI Deployments	401
Summary	402
Additional Resources	402

Part III Desktop Management

13	Managing the Desktop Environment	407
	Understanding Group Policy in Windows Vista	407
	Group Policy Issues on Earlier Versions of Windows	408
	New Group Policy Features in Windows Vista	410
	New Group Policy Settings in Windows Vista	411
	Understanding ADMX Template Files	417
	Understanding Multiple Local Group Policy	422
	Managing Windows Vista Computers Using Group Policy	424
	Configuring the Central Store	424
	Creating and Editing GPOs	426
	Using ADMX Migrator	430
	Configuring Group Policy Processing	432
	Using Advanced Group Policy Management	432
	Troubleshooting Group Policy	433
	Using Event Viewer	433

	Enabling Debug Logging	435
	Using GPLogView	435
	Summary	437
	Additional Resources	437
14	Managing Users and User Data	439
	Understanding User Profiles in Windows Vista	439
	Types of User Profiles	439
	User Profile Namespace	441
	Application Compatibility Issues	446
	Implementing Corporate Roaming	450
	Understanding Roaming User Profiles and Folder Redirection	450
	Implementing Folder Redirection	454
	Implementing Roaming User Profiles	466
	Working with Offline Files	475
	How Offline Files Works in Windows Vista	477
	Managing Offline Files	479
	Summary	483
	Additional Resources	483
15	Managing Disks and File Systems	485
	Overview of Partitioning Disks	486
	How to Choose Between MBR or GPT	486
	Converting from MBR to GPT Disks	487
	GPT Partitions	488
	Choosing Basic or Dynamic Disks	489
	Working with Volumes	489
	How to Create a Simple Volume	489
	How to Create a Spanned Volume	490
	How to Create a Striped Volume	491
	How to Resize a Volume	492
	How to Delete a Volume	493
	File System Fragmentation	494
	Backup and Restore	496
	How File Backups Work	498
	File and Folder Backup Structure	499
	How Complete PC Backups Work	501
	How to Start a Complete PC Backup from the Command Line	501
	How to Restore a Complete PC Backup	502
	Complete PC Backup Structure	505
	Best Practices for Computer Backups	505
	How to Manage Backup Using Group Policy Settings	506
	Previous Versions and Shadow Copies	508
	Windows ReadyBoost	513
	BitLocker Drive Encryption	516
	How BitLocker Encrypts Data	516
	How BitLocker Protects Data	517
	BitLocker Phases	520
	BitLocker Requirements	522
	How to Configure BitLocker Partitions	523

	How to Enable the Use of BitLocker on Computers Without TPM	523
	How to Enable BitLocker Encryption	524
	How to Manage BitLocker Keys on a Local Computer	527
	How to Manage BitLocker from the Command Line	527
	How to Recover Data Protected by BitLocker	529
	How to Disable or Remove BitLocker Drive Encryption	530
	How to Permanently Decommission a BitLocker Drive	531
	How to Prepare Active Directory for BitLocker	532
	How to Manage BitLocker with Group Policy	532
	The Costs of BitLocker	533
	Encrypting File System	534
	How to Export Personal Certificates	534
	How to Import Personal Certificates	535
	How to Grant Users Access to an Encrypted File	535
	Symbolic Links	536
	How to Create Symbolic Links	537
	How to Create Relative or Absolute Symbolic Links	538
	How to Create Symbolic Links to Shared Folders	539
	How to Use Hard Links	541
	Disk Quotas	541
	How to Configure Disk Quotas on a Single Computer	542
	How to Configure Disk Quotas from a Command Prompt	543
	How to Configure Disk Quotas by Using Group Policy Settings	544
	Summary	545
	Additional Resources	545
16	Managing Devices and Services	547
	Managing Devices	547
	Changes to Device Management in Windows Vista	547
	Understanding Device Installation in Windows Vista	549
	Managing Devices Using Group Policy	558
	Troubleshooting Device Installation	568
	Understanding Power Management	574
	Configuring Power Management Settings	576
	Understanding Services	586
	Changes to Services in Windows Vista	587
	Managing Services	589
	Summary	593
	Additional Resources	593
17	Managing Sharing	595
	Managing File Sharing	595
	Understanding Local Sharing	596
	Understanding Network Sharing	600
	Implementing File Sharing	607
	Managing File Sharing Using Group Policy	624
	Creating and Managing Shares Using the Net Commands	624
	Creating and Managing Shares Using Scripts	626
	Troubleshooting File Sharing	632

	Best Practices for Implementing File Sharing in a Workgroup Environment	634
	Best Practices for Implementing File Sharing in a Domain Environment	635
	Managing Media Sharing	636
	Media Sharing and Windows Firewall	638
	Media Sharing and Windows Firewall in Windows XP	639
	Limitations of Media Sharing	640
	Media Sharing and Network Categories	641
	Using Media Sharing	642
	Managing Media Sharing with Group Policy	645
	Troubleshooting Media Sharing	646
	Best Practices for Media Sharing	647
	Summary	647
	Additional Resources	647
18	Managing Windows Meeting Space	649
	Understanding How Meeting Space Works	650
	Meeting Space and Microsoft P2P Collaboration Services	650
	Meeting Space and IPv6	651
	Meeting Space and the Peer Name Resolution Protocol (PNRP)	653
	Meeting Space and People Near Me	654
	Meeting Space Services	655
	Meeting Space and Windows Firewall	655
	Meeting Space and Security	657
	How a Meeting Works	659
	Limitations of Meeting Space	660
	Deploying and Managing Meeting Space	662
	Managing Meeting Space in a Workgroup Environment	662
	Managing Meeting Space in a Domain Environment	662
	Managing Meeting Space in an Ad-Hoc Wireless Environment	664
	Using Meeting Space	664
	Setting Up Meeting Space	665
	Configuring People Near Me	667
	Starting a New Meeting	670
	Joining a Meeting	670
	Inviting Others to Your Meeting	672
	Collaborating Within a Meeting	673
	Troubleshooting Meeting Space	673
	Summary	674
	Additional Resources	674
19	Managing Printing	677
	Enhancements to Printing in Windows Vista	677
	Understanding Printing in Windows Vista	679
	Understanding the XML Paper Specification	679
	Understanding the Windows Vista Print Subsystem	680
	Understanding Print Management	683
	Enhancements to Print Management in Windows Vista	683
	The Print Management Console	684

Adding and Removing Print Servers	686
Adding Printers Using the Network Printer Installation Wizard	687
Creating and Using Printer Filters	688
Managing Printers Using Print Management	690
Configuring Properties of Printers	690
Publishing Printers in Active Directory	691
Managing Printer Drivers	692
Exporting and Importing Print Server Configurations	694
Performing Bulk Actions Using Print Management	695
Client-Side Management of Printers	696
Installing Printers Using the Printers CPL	697
Searching for Printers	698
Installing Printers Using Point and Print	700
Using Printers Explorer	701
Using the Color Management CPL	701
Managing Client-Side Printer Experience Using Group Policy	702
Configuring the Add Printer Wizard	702
Disable Client-Side Printer Rendering	704
Configuring Package Point and Print Restrictions	705
Deploying Printers Using Group Policy	707
Preparing to Deploy Printers	707
Deploying a Printer Connection	708
Limitations of Deploying Printers Using Group Policy	710
Assigning Printers Based on Location	710
Migrating Print Servers	712
Migrate Print Servers Using Print Management	712
Migrating Print Servers Using Printbrm.exe	714
Monitoring and Troubleshooting Printers	714
Configuring E-Mail Notifications	715
Configuring Print Server Notifications	715
Configuring Script Actions	716
Configuring Detailed Event Logging	716
Summary	717
Additional Resources	717
20 Managing Search	719
Search and Indexing Enhancements in Windows Vista	719
Issues in Previous Windows Platforms	719
Design Goals and New Features	720
How Search and Indexing Works in Windows Vista	721
Understanding Search Engine Terminology	722
Windows Search Engine Processes	723
Windows Search Engine Architecture	726
Understanding the Catalog	727
Understanding the Indexing Process	732
Understanding Remote Search	740
Managing Indexing	741
Configuring the Catalog	741
Configuring Offline Files Indexing	743

	Configuring Indexing of Encrypted Files	744
	Configuring Indexing of Similar Words	744
	Other Configuration Options	745
	Using Search	746
	Configuring Search Using Folder Options	746
	Search Integration in the Shell	748
	Using Instant Search	748
	Using the Search Explorer	750
	Other Search and Organization Features	753
	Troubleshooting Search	753
	Summary	754
	Additional Resources	754
21	Managing Internet Explorer	757
	Non-Security Internet Explorer Improvements	757
	User Interface Changes	757
	Tabbed Browsing	758
	Search Bar	758
	RSS Feeds	760
	Improved Standards Support	761
	Expanded Group Policy Settings	762
	Internet Explorer 7 Security Features	762
	Defending Against Malware	765
	Protecting Against Data Theft	774
	Security Zones	784
	Managing Internet Explorer with Group Policy	788
	Using the Internet Explorer Administration Kit	791
	Troubleshooting Internet Explorer Problems	792
	Internet Explorer Does Not Start	793
	An Add-on Does Not Work Properly	793
	Some Webpages Do Not Display Properly	794
	An Unwanted Toolbar Appears	796
	The Home Page or Other Settings Have Changed	796
	Summary	797
	Additional Resources	797
Part IV	Desktop Maintenance	
22	Maintaining Desktop Health	801
	Monitoring Reliability and Performance	801
	Component Binaries	802
	Opening the Reliability and Performance Monitor	802
	Using Resource Overview	803
	Using Performance Monitor	806
	Using Reliability Monitor	824
	Understanding Windows Eventing	831
	Overview of Windows Eventing	831
	Windows Eventing Capabilities	832
	Event Viewer User Interface	838

Understanding the Windows System Assessment Tool	851
Overview of WinSAT	851
How Desktop Window Manager Performs Composition	855
Troubleshooting Aero Glass	857
Overriding Windows Vista Automatic Detection Mechanisms	858
Using Performance Information And Tools	860
Accessing Performance Information And Tools	860
Configuring Performance Information And Tools Using Group Policy	862
Understanding Each Section of the Tool	862
Understanding Windows Error Reporting	865
Overview of Windows Error Reporting	866
Error Reporting Cycle	867
Report Data Overview	868
Conceptual Components	869
Architecture of Windows Error Reporting	873
Configuring Windows Error Reporting	875
Using the Problem Reports And Solutions Control Panel	879
Using Task Scheduler	884
Task Scheduler Enhancements and Improvements	884
Operational Overview	886
Task Scheduler Architecture	886
Task Scheduler Security	888
AT and Task Scheduler v1.0 Compatibility Modes	889
Task Scheduler User Interface	890
Creating New Tasks	891
Managing Tasks	901
Using the SchTasks.exe Command	903
Scheduled Tasks Events	906
Troubleshooting Task Scheduler	906
Interpreting Result and Return Codes	908
Summary	909
Additional Resources	909
23 Supporting Users Using Remote Assistance	911
Understanding Remote Assistance	911
Improvements to Remote Assistance in Windows Vista	912
How Remote Assistance Works	913
Using Remote Assistance in the Enterprise	922
Interoperability with Remote Assistance in Windows XP	924
Implementing and Managing Remote Assistance	925
Initiating Remote Assistance Sessions	925
Scenario 1: Offering Remote Assistance Using DCOM	927
Scenario 2: Soliciting Remote Assistance by Creating RA Tickets and Saving Them on Monitored Network Shares	929
Managing Remote Assistance Using Group Policy	933
Additional Registry Settings for Configuring Remote Assistance	936
Summary	941
Additional Resources	942

24	Managing Software Updates	943
	Update Improvements to Windows Vista	944
	Methods for Deploying Updates	946
	Windows Update Client	946
	Windows Server Update Services	947
	Systems Management Server	949
	Manually Installing, Scripting, and Removing Updates	950
	Overview of Windows Vista Update Files	950
	How to Script Update Installations	951
	How to Remove Updates	951
	Deploying Updates to New Computers	952
	Managing BITS	956
	BITS Behavior	956
	BITS Group Policy Settings	957
	The BITSAdmin.exe Tool	959
	Windows Update Group Policy Settings	963
	Configuring Windows Update to Use a Proxy Server	965
	Tools for Auditing Software Updates	966
	The MBSA Console	966
	MBSACLI	968
	SMS	970
	Troubleshooting the Windows Update Client	970
	The Process of Updating Network Software	973
	Assembling the Update Team	973
	Inventorying Software	974
	Creating an Update Process	976
	How Microsoft Distributes Updates	981
	Security Updates	982
	Update Rollups	983
	Service Packs	983
	Microsoft Product Life Cycles	985
	Summary	985
	Additional Resources	986
25	Managing Client Protection	987
	Understanding the Risk of Malware	987
	User Account Control	988
	UAC for Standard Users	991
	UAC for Administrators	992
	UAC User Interface	993
	How Windows Vista Determines Whether an Application Needs	
	Administrative Privileges	995
	UAC Virtualization	998
	UAC and Startup Programs	999
	Compatibility Problems with UAC	999
	How to Configure User Account Control	1002
	How to Configure Auditing for Privilege Elevation	1007
	Other UAC Event Logs	1008
	Best Practices for Using UAC	1008

Using Windows Defender	1009
Understanding Windows Defender	1010
Windows Defender Alert Levels	1013
Understanding Microsoft SpyNet	1014
Configuring Windows Defender Using Group Policy	1015
Configuring Windows Defender on a Single Computer	1017
Windows Defender Tools	1017
How to Determine if a Computer Is Infected with Spyware	1019
Best Practices for Using Windows Defender	1020
How to Troubleshoot Problems with Unwanted Software	1021
Microsoft Forefront Client Security	1022
Summary	1024
Additional Resources	1025

Part V Networking

26	Configuring Windows Networking	1029
	Usability Improvements	1029
	Network And Sharing Center	1030
	Network Explorer	1032
	Network Map	1035
	Networking Icons in the System Tray	1036
	The Set Up A Connection Or Network Wizard	1037
	Manageability Improvements	1037
	Network Access Protection (NAP)	1038
	Network Location Types	1039
	Policy-based QoS	1041
	Windows Firewall and IPsec	1044
	Windows Connect Now	1044
	Core Networking Improvements	1045
	Efficient Networking	1046
	Improved Reliability	1050
	IPv6 Support	1051
	802.1X Network Authentication	1053
	Server Message Block (SMB) 2.0	1056
	Strong Host Model	1056
	Wireless Networking	1057
	Improved APIs	1059
	Network Awareness	1059
	Improved Peer Networking	1060
	EAPHost Architecture	1062
	Layered Service Provider (LSP)	1063
	Windows Sockets Direct Path for System Area Networks	1064
	How to Configure Wireless Settings	1065
	Manually Configuring Wireless Settings	1065
	Using Group Policy to Configure Wireless Settings	1067
	Configuring Wireless Settings from the Command Line or a Script	1069
	How to Configure TCP/IP	1071
	DHCP	1071

	Manually Configuring IP Addresses	1074
	Command Line and Scripts	1075
	How to Connect to Active Directory Domains	1078
	Summary	1079
	Additional Resources	1080
27	Configuring Windows Firewall and IPsec	1083
	Understanding Windows Firewall	1083
	Understanding the Windows Filtering Platform	1085
	Understanding Windows Service Hardening	1087
	Understanding Windows Firewall Profiles	1090
	Understanding Windows Firewall Policy Storage and Rule Merge Logic	1093
	Understanding Windows Firewall Rules	1094
	Understanding IPsec Integration	1115
	Understanding Windows Firewall Logging and Auditing	1128
	Managing Windows Firewall	1131
	Managing Windows Firewall Using the Windows Firewall With Advanced Security Snap-in	1133
	Managing Windows Firewall Using Group Policy	1137
	Managing Windows Firewall Using netsh	1140
	Managing Windows Firewall Using Scripts	1140
	Common Management Tasks	1142
	Summary	1145
	Additional Resources	1145
28	Connecting Remote Users and Networks	1147
	Understanding Connection Types	1147
	Outgoing Connection Types	1148
	Incoming Connection Types	1149
	Deprecated Connection Types	1149
	Configuring Virtual Private Network Connections	1150
	Supported Tunneling Protocols	1150
	Enhancements to VPN Security in Windows Vista	1150
	VPN Connection Negotiation Process	1155
	Creating and Configuring VPN Connections	1156
	Configuring Dial-up Connections	1170
	Creating a Dial-up Connection	1171
	Configuring a Dial-up Connection	1172
	Advanced Connection Settings	1173
	Configuring Incoming Connections	1173
	Managing Connections Using Group Policy	1175
	Using Remote Desktop	1178
	Understanding Remote Desktop	1178
	Steps for Using Remote Desktop	1182
	Enabling Remote Desktop and Authorizing Users on a Single Computer	1182
	Enabling Remote Desktop using Group Policy	1185
	Configuring and Deploying Remote Desktop Connection	1185

	Establishing a Remote Desktop Session	1193
	Improving Remote Desktop Performance	1193
	Troubleshooting Remote Desktop	1194
	Summary	1195
	Additional Resources	1195
29	Deploying IPv6	1197
	Understanding IPv6	1197
	Understanding IPv6 Terminology	1198
	Understanding IPv6 Addressing	1199
	Understanding ICMPv6 Messages	1204
	Understanding Neighbor Discovery	1204
	Understanding Address Autoconfiguration	1206
	Understanding Name Resolution	1208
	IPv6 Enhancements in Windows Vista	1211
	Configuring and Troubleshooting IPv6 in Windows Vista	1214
	Displaying IPv6 Address Settings	1214
	Configuring IPv6 in Windows Vista Using the User Interface	1218
	Configuring IPv6 in Windows Vista Using Netsh	1219
	Other IPv6 Configuration Tasks	1220
	Troubleshooting IPv6 Connectivity	1224
	Planning for IPv6 Migration	1226
	Understanding ISATAP	1227
	Migrating an Intranet to IPv6	1228
	Summary	1231
	Additional Resources	1231
Part VI	Troubleshooting	
30	Configuring Startup and Troubleshooting Startup Issues	1235
	What's New with Windows Vista Startup	1235
	Boot Configuration Data	1236
	System Recovery	1239
	Windows Boot Performance Diagnostics	1240
	Understanding the Startup Process	1241
	Power-on Self Test Phase	1242
	Initial Startup Phase	1242
	Windows Boot Manager Phase	1245
	Windows Boot Loader Phase	1246
	Kernel Loading Phase	1247
	Logon Phase	1251
	Important Startup Files	1253
	How to Configure Startup Settings	1254
	How to Use the Startup And Recovery Dialog Box	1254
	How to Use the System Configuration Tool	1254
	How to Use BCDEdit	1256
	How to Remove the Windows Vista Boot Loader	1261
	The Process of Troubleshooting Startup	1262
	Startup Troubleshooting Before the Progress Bar Appears	1262

Startup Troubleshooting After the Progress Bar Appears	1272
Troubleshooting Startup Problems After Logon	1284
Summary	1288
Additional Resources	1289
31 Troubleshooting Hardware, Driver, and Disk Issues	1291
Windows Vista Improvements for Hardware and Driver Troubleshooting	1291
Windows Memory Diagnostics	1292
Disk Failure Diagnostics	1292
Self-Healing NTFS	1293
Reliability Monitor	1294
Improved Driver Reliability	1294
Improved Error Reporting	1295
The Process of Troubleshooting Hardware Issues	1295
How to Troubleshoot Problems That Prevent Windows from Starting	1295
How to Troubleshooting Problems Installing New Hardware	1295
How to Troubleshooting Problems with Existing Hardware	1296
How to Troubleshoot Unpredictable Symptoms	1298
How to Diagnose Hardware Problems	1299
How to Use Device Manager to Identify Failed Devices	1299
How to Check the Physical Setup of Your Computer	1300
How to Check the Configuration of Your Hardware	1301
How to Verify That System Firmware and Peripheral Firmware Are Up to Date	1302
How to Test Your Hardware by Running Diagnostic Tools	1302
How to Simplify Your Hardware Configuration	1303
How to Diagnose Disk-Related Problems	1304
How to Use Built-in Diagnostics	1305
How to Use Problem Reports and Solutions	1305
How to Use Reliability Monitor	1305
How to Use Event Viewer	1306
How to Use Data Collector Sets	1306
How to Use Windows Memory Diagnostics	1307
How to Troubleshoot Disk Problems	1315
How to Prepare for Disk Failures	1315
How to Use Chkdsk	1316
How to Use the Disk Cleanup Wizard	1322
How to Disable Non-volatile Caching	1322
How to Troubleshoot Driver Problems	1323
How to Find Updated Drivers	1323
How to Roll Back Drivers	1324
How to Use the Driver Verifier	1324
How to Use the File Signature Verification	1326
How to Use Device Manager to View and Change Resource Usage	1327
How to Use System Restore	1328
How to Troubleshoot USB Problems	1329
How to Troubleshoot Bluetooth Problems	1333
Summary	1334
Additional Resources	1334

32	Troubleshooting Network Issues	1337
	Tools for Troubleshooting	1337
	Arp	1340
	Event Viewer	1341
	Ipconfig	1342
	Nlookup	1343
	Nbtstat	1344
	Net	1346
	Netstat	1348
	Network Monitor	1349
	Nslookup	1351
	PathPing	1354
	Performance Monitor	1357
	Ping	1360
	Portqry	1361
	Reliability and Performance	1363
	Resource Monitor	1365
	Route	1366
	Task Manager	1368
	Telnet Client	1370
	Test TCP	1372
	Windows Network Diagnostics	1374
	The Process of Troubleshooting Network Problems	1374
	How to Troubleshoot Network Connectivity Problems	1376
	How to Troubleshoot Application Connectivity Problems	1381
	How to Troubleshoot Name-Resolution Problems	1384
	How to Troubleshoot Performance Problems and Intermittent Connectivity Issues	1388
	How to Troubleshoot Joining or Logging on to a Domain	1391
	How to Troubleshoot Network Discovery	1394
	How to Troubleshoot File and Printer Sharing	1395
	How to Troubleshoot Wireless Networks	1397
	How to Troubleshoot Firewall Problems	1399
	Summary	1401
	Additional Resources	1401
33	Troubleshooting Stop Messages	1403
	Stop Message Overview	1403
	Identifying the Stop Error	1404
	Finding Troubleshooting Information	1404
	Stop Messages	1405
	Types of Stop Errors	1408
	Memory Dump Files	1408
	Configuring Small Memory Dump Files	1410
	Configuring Kernel Memory Dump Files	1411
	Configuring Complete Memory Dump Files	1412
	How to Manually Initiate a Stop Error and Create a Dump File	1413
	Using Memory Dump Files to Analyze Stop Errors	1413

Being Prepared for Stop Errors	1419
Prevent System Restarts After a Stop Error	1419
Record and Save Stop Message Information	1420
Check Software Disk Space Requirements	1421
Install a Kernel Debugger and Symbol Files	1421
Common Stop Messages	1421
Stop 0x0A or IRQL_NOT_LESS_OR_EQUAL	1421
Stop 0x1E or KMODE_EXCEPTION_NOT_HANDLED	1423
Stop 0x24 or NTFS_FILE_SYSTEM	1425
Stop 0x2E or DATA_BUS_ERROR	1426
Stop 0x3F or NO_MORE_SYSTEM_PTES	1427
Stop 0x50 or PAGE_FAULT_IN_NONPAGED_AREA	1428
Stop 0x77 or KERNEL_STACK_INPAGE_ERROR	1429
Stop 0x7A or KERNEL_DATA_INPAGE_ERROR	1430
Stop 0x7B or INACCESSIBLE_BOOT_DEVICE	1432
Stop 0x7F or UNEXPECTED_KERNEL_MODE_TRAP	1434
Stop 0x9F or DRIVER_POWER_STATE_FAILURE	1436
Stop 0xBE or ATTEMPTED_WRITE_TO_READONLY_MEMORY	1437
Stop 0xC2 or BAD_POOL_CALLER	1437
Stop 0xCE or DRIVER_UNLOADED_WITHOUT_CANCELLING_PENDING_OPERATIONS	1439
Stop 0xD1 or DRIVER_IRQL_NOT_LESS_OR_EQUAL	1440
Stop 0xD8 or DRIVER_USED_EXCESSIVE_PTES	1440
Stop 0xEA or THREAD_STUCK_IN_DEVICE_DRIVER	1441
Stop 0xED or UNMOUNTABLE_BOOT_VOLUME	1441
Stop 0xFE or BUGCODE_USB_DRIVER	1442
Stop 0xC000021A or STATUS_SYSTEM_PROCESS_TERMINATED	1443
Stop 0xC0000221 or STATUS_IMAGE_CHECKSUM_MISMATCH	1444
Hardware Malfunction Messages	1445
Stop Message Checklist	1445
Check Your Software	1446
Check Your Hardware	1448
Summary	1450
