Designing and Developing  
Enterprise Applications Using the  
Microsoft®  
**.NET FRAMEWORK**

Self-Paced

*Bruce Johnson and Brian C. Lanham  
of GrandMasters, with Shawn Wildermuth*

# Training Kit

# Table of Contents

Introduction .....	xxi
Hardware Requirements .....	xxi
Software Requirements .....	xxi
Using the CD and DVD .....	xxiii
How to Install the Practice Tests .....	xxiii
How to Use the Practice Tests .....	xxiii
How to Uninstall the Practice Tests .....	xxv
Microsoft Certified Professional Program .....	xxv
Technical Support .....	xxv
Evaluation Edition Software Support .....	xxvi
<b>1 Evaluating the Technical Feasibility of an Application .....</b>	<b>1</b>
Before You Begin .....	2
Lesson 1: Evaluating Requirements and Proposing a Design .....	3
What Makes a Good Set of Application Requirements? .....	4
Evaluating the Requirements for the Application .....	7
Recommending Best Technologies .....	8
Investigating Existing Solutions for Similar Business Problems .....	15
Creating a High-Level Application Design .....	16
Lab: Evaluating Requirements and Recommending Technology .....	18
Lesson Summary .....	19
Lesson Review .....	20
Lesson 2: Creating a Proof-of-Concept Prototype to Refine an Application's Design .....	22
What Constitutes a Good Prototype? .....	23

 **What do you think of this book? We want to hear from you!**

Microsoft is interested in hearing your feedback so we can continually improve our books and learning resources for you. To participate in a brief online survey, please visit:

	Mockups and Proof-of-Concept Prototypes . . . . .	23
	Creating a Prototype to Evaluate Key Design Decisions . . . . .	24
	Demonstrating the Feasibility of the Design . . . . .	29
	Lab: Creating a Proof-of-Concept Prototype . . . . .	30
	Lesson Summary . . . . .	31
	Lesson Review . . . . .	31
	Chapter Review . . . . .	33
	Chapter Summary . . . . .	33
	Key Terms . . . . .	34
	Case Scenario . . . . .	34
	Case Scenario: Evaluate Requirements and Propose an Application Design . . . . .	34
	Suggested Practices . . . . .	36
	Evaluating Requirements and Proposing a Design . . . . .	36
	Creating a Proof-of-Concept Prototype to Refine an Application's Design . . . . .	37
	Take a Practice Test . . . . .	37
<b>2</b>	<b>Creating Specifications for Developers . . . . .</b>	<b>39</b>
	Before You Begin . . . . .	39
	Lesson 1: Create a Logical Model . . . . .	41
	Object Role Modeling . . . . .	41
	The ORM Notation . . . . .	42
	Driving ORM Diagrams from Requirements and Use Cases . . . . .	47
	Using ORM Diagrams to Identify Objects, Properties, Methods, Entities, and Fields . . . . .	48
	Lab: Create a Logical Model . . . . .	49
	Lesson Summary . . . . .	50
	Lesson Review . . . . .	51
	Lesson 2: Define Application Layers . . . . .	53
	Define the Layers of Your Application . . . . .	53
	Define Communication Between Layers . . . . .	57
	Lab: Define Logical Application Layers . . . . .	58
	Lesson Summary . . . . .	59

Lesson Review . . . . .	59
Lesson 3: Create Physical Models for Developers . . . . .	61
Create a Component Diagram . . . . .	62
Create a Class Diagram . . . . .	64
Create a Sequence Diagram . . . . .	67
Create an Activity Diagram . . . . .	69
Create an Entity-Relationship Diagram . . . . .	70
Create Pseudocode . . . . .	73
Lab: Create Physical Models . . . . .	73
Lesson Summary . . . . .	77
Lesson Review . . . . .	77
Chapter Review . . . . .	79
Chapter Summary . . . . .	79
Key Terms . . . . .	80
Case Scenario . . . . .	80
Case Scenario: Evaluate User Inputs and Create Physical Models . . . . .	80
Suggested Practices . . . . .	82
Define Objects and their Relationships (Create a Logical Model) . . . . .	82
Create a Logical Architecture . . . . .	83
Create Physical Models for Developers . . . . .	83
Take a Practice Test . . . . .	83
<b>3 Design Evaluation . . . . .</b>	<b>85</b>
Before You Begin . . . . .	86
Lesson 1: Evaluating the Logical Design . . . . .	87
Evaluation of the Logical Design . . . . .	87
Lesson Summary . . . . .	92
Lesson Review . . . . .	92
Lesson 2: Evaluating the Physical Design . . . . .	93
Evaluation of the Physical Design . . . . .	93
Lesson Summary . . . . .	96
Lesson Review . . . . .	96
Chapter Review . . . . .	98

Chapter Summary	98
Key Terms	98
Case Scenarios	98
Case Scenario 1: Review the Logical Design of an Enterprise Application	98
Case Scenario 2: Review the Physical Design of an Enterprise Application	99
Suggested Practices	99
Evaluate an Existing Logical Design	99
Evaluate an Existing Physical Design	100
Take a Practice Test	100
<b>4 Component Design</b>	<b>101</b>
Before You Begin	102
Lesson 1: Database Design	103
Database Design Basics	103
Data Entities	104
Primary Keys	106
Entity Relationships	109
Entity Attributes	111
Recommend a Data Schema	115
Lab: Defining Entity Relationships	117
Lesson Summary	118
Lesson Review	118
Lesson 2: Designing a Component	120
Component Characteristics	120
High-Level Design	123
Lab: Design a Database Logging Component	130
Lesson Summary	131
Lesson Review	131
Lesson 3: Component Features	133
Component Interfaces	133
Lab: Determine Component Features	137
Lesson Summary	138

Lesson Review .....	138
Chapter Review .....	139
Chapter Summary .....	139
Key Terms .....	139
Case Scenarios .....	140
Case Scenario 1: Design an Employee Component .....	140
Case Scenario 2: Design a Database for the Company Library .....	140
Suggested Practices .....	141
Create a Database Schema .....	141
Design Components .....	141
Take a Practice Test .....	142
<b>5 Component Development .....</b>	<b>143</b>
Before You Begin .....	144
Lesson 1: Implementing Component Features .....	145
Extend, Compose, or Implement? .....	145
Building Class Hierarchies .....	146
Component State .....	147
Multithreading .....	148
Handling Unmanaged Resources .....	149
Lab: Add Handling of Unmanaged Resources .....	150
Lesson Summary .....	154
Lesson Review .....	154
Lesson 2: Data Access in Components .....	156
Data Access .....	156
Business Logic .....	161
Lab: Choosing a Data Access Methodology .....	161
Lesson Summary .....	162
Lesson Review .....	162
Lesson 3: Component Infrastructure .....	164
Exceptions .....	164
Profiling Components .....	167
Lab: Propagating an Exception with Context .....	168
Lesson Summary .....	170

	Lesson Review . . . . .	170
	Chapter Review . . . . .	172
	Chapter Summary . . . . .	172
	Key Terms . . . . .	172
	Case Scenarios . . . . .	172
	Case Scenario 1: Choose a Data Access Methodology . . . . .	173
	Case Scenario 2: Search for Resource Leaks . . . . .	173
	Suggested Practices . . . . .	173
	Consume an Unmanaged Resource . . . . .	174
	Create a Data Access Component . . . . .	174
	Take a Practice Test . . . . .	174
<b>6</b>	<b>Multimedia in Distributed Applications . . . . .</b>	<b>175</b>
	Before You Begin . . . . .	175
	Lesson 1: How to Choose a Delivery Mechanism . . . . .	176
	What Are the Choices? . . . . .	176
	Which Standard to Use? . . . . .	182
	Lab: Using MTOM to Deliver Multimedia . . . . .	187
	Lesson Summary . . . . .	191
	Lesson Review . . . . .	191
	Lesson 2: Challenges in Multimedia Delivery . . . . .	193
	Bandwidth Restrictions . . . . .	193
	Client Requirements . . . . .	194
	Audio and Video Options . . . . .	195
	Digital Rights Management . . . . .	196
	Lesson Summary . . . . .	196
	Lesson Review . . . . .	197
	Chapter Review . . . . .	198
	Chapter Summary . . . . .	198
	Key Terms . . . . .	198
	Case Scenarios . . . . .	199
	Suggested Practices . . . . .	199
	Create a Web Service That Delivers Dynamic Graphics . . . . .	200
	Take a Practice Test . . . . .	200

<b>7</b>	<b>Reusable Software Components</b>	<b>201</b>
	Before You Begin	202
	Lesson 1: Consuming Reusable Software Components	203
	Identifying Reusable Components	203
	Extending and Restricting Reusable Components	205
	Lab: Consume a Reusable Software Component	220
	Lesson Summary	227
	Lesson Review	228
	Chapter Review	231
	Chapter Summary	231
	Key Terms	231
	Case Scenarios	232
	Case Scenario 1: Extending a Reusable Component	232
	Case Scenario 2: Restricting a Reusable Component	232
	Case Scenario 3: Restricting a Reusable Component	232
	Suggested Practices	233
	Consume a Reusable Software Component	233
	Take a Practice Test	234
<b>8</b>	<b>Design Logic Implementation</b>	<b>235</b>
	Before You Begin	236
	Lesson 1: Implementation Approach Philosophies	237
	Waterfall Approach	237
	Agile Development	238
	Lesson Summary	239
	Lesson Review	239
	Lesson 2: Program Flow Control	240
	Organizing Code	240
	Creating the Blueprint	240
	Decision Flow	243
	Lab: Designing Application Flow Control	244
	Lesson Summary	245
	Lesson Review	245
	Lesson 3: Data Structure Designs	246

Choosing a Data Storage Mechanism . . . . .	246
Designing the Data Flow . . . . .	251
Lesson Summary . . . . .	255
Lesson Review . . . . .	255
Lesson 4: State Management Design . . . . .	257
Stateful . . . . .	257
Stateless . . . . .	258
Web Services . . . . .	259
.NET Remoting . . . . .	259
Lesson Summary . . . . .	259
Lesson Review . . . . .	259
Lesson 5: Components versus Services . . . . .	261
Loose Coupling . . . . .	261
Performance . . . . .	262
Platform Independence . . . . .	262
Lesson Summary . . . . .	263
Lesson Review . . . . .	263
Lesson 6: Security Implementation . . . . .	264
Authentication . . . . .	264
Authorization . . . . .	264
Lesson Summary . . . . .	268
Lesson Review . . . . .	268
Chapter Review . . . . .	269
Chapter Summary . . . . .	269
Key Terms . . . . .	269
Case Scenarios . . . . .	270
Case Scenario 1: Scaling Out . . . . .	270
Case Scenario 2: Services . . . . .	270
Suggested Practices . . . . .	271
Designing Application Logic . . . . .	271
Take a Practice Test . . . . .	271
<b>9 Logging and Monitoring . . . . .</b>	<b>273</b>
Before You Begin . . . . .	274

Lesson 1: Logging in Distributed Applications . . . . .	275
Who Needs Logging? . . . . .	275
What Data Is Required? . . . . .	276
Data Storage Choices . . . . .	281
System-Wide Logging . . . . .	286
Lab: Common Logging Issues . . . . .	287
Lesson Summary . . . . .	289
Lesson Review . . . . .	290
Lesson 2: Monitoring Distributed Applications . . . . .	291
Who Needs Monitoring? . . . . .	291
Data Storage . . . . .	292
System-Wide Monitoring . . . . .	297
Lab: Monitoring Applications . . . . .	300
Lesson Summary . . . . .	305
Lesson Review . . . . .	305
Chapter Review . . . . .	306
Chapter Summary . . . . .	306
Key Terms . . . . .	306
Case Scenarios . . . . .	307
Case Scenario 1: Instrumenting a Distributed Application . . . . .	307
Suggested Practice . . . . .	307
Logging Application Events . . . . .	307
Monitoring the Application . . . . .	308
Take a Practice Test . . . . .	308
<b>10 Planning for Testing . . . . .</b>	<b>310</b>
Before You Begin . . . . .	310
Lesson 1: Creating a Unit Test Framework . . . . .	312
What Makes a Good Framework? . . . . .	312
The Properties of a Good Unit Test . . . . .	315
What Should Be Tested? . . . . .	317
Lab: Creating Unit Tests . . . . .	320
Lesson Summary . . . . .	323
Lesson Review . . . . .	324

Lesson 2: System-Level Testing	325
Integration Testing	325
Performance Testing	328
Stress Testing	332
Lab: System-Level Testing	334
Lesson Summary	337
Lesson Review	337
Lesson 3: The Testing Environment	339
Hardware Environment	339
Software Environment	340
Data	340
Random Generation Techniques	341
Lesson Summary	344
Lesson Review	344
Chapter Review	346
Chapter Summary	346
Key Terms	346
Case Scenarios	347
Case Scenario 1: Choosing the Tests	347
Case Scenario 2: Choosing the Tests	347
Suggested Practices	347
Evaluate the Testing Strategy	347
Take a Practice Test	348
<b>11 Unit Testing: The First Line of Defense</b>	<b>350</b>
Before You Begin	350
Lesson 1: Identifying Testing Scenarios	352
Anatomy of a Unit Test Suite	352
What to Test	354
Test Scenarios and Use Cases	356
Lab: Identifying Test Scenarios	360
Lesson Summary	363
Lesson Review	363
Lesson 2: Testing the Component Thoroughly	365

	Code Coverage . . . . .	365
	Black-Box Testing . . . . .	367
	Isolating Components . . . . .	371
	Lab: Testing with Mock Objects . . . . .	374
	Lesson Summary . . . . .	377
	Lesson Review . . . . .	377
	Chapter Review . . . . .	379
	Chapter Summary . . . . .	379
	Key Terms . . . . .	379
	Case Scenarios . . . . .	380
	Suggested Practices . . . . .	380
	Take a Practice Test . . . . .	381
<b>12</b>	<b>Stabilizing the Application . . . . .</b>	<b>383</b>
	Before You Begin . . . . .	383
	Lesson 1: The Code Review Process . . . . .	385
	Why Review Code? . . . . .	385
	Code Review Excuses . . . . .	389
	What Should a Review Look For? . . . . .	390
	Lesson Summary . . . . .	394
	Lesson Review . . . . .	394
	Lesson 2: Integration Testing . . . . .	396
	Integration Testing Defined . . . . .	396
	Steps in Integration Testing . . . . .	397
	Component Dependencies . . . . .	399
	Lab: Identifying Dependent Assemblies . . . . .	401
	Lesson Summary . . . . .	404
	Lesson Review . . . . .	404
	Chapter Review . . . . .	406
	Chapter Summary . . . . .	406
	Key Terms . . . . .	406
	Case Scenarios . . . . .	407
	Case Scenario 1: Determine the Code Review Requirements . . . . .	407
	Case Scenario 2: Integration Testing for a Web Application . . . . .	407

	Suggested Practices .....	408
	Perform a Code Review .....	408
	Perform Integration Testing .....	408
	Take a Practice Test .....	408
<b>13</b>	<b>Evaluating Application Performance .....</b>	<b>409</b>
	Before You Begin .....	410
	Lesson 1: Evaluating Application Performance .....	411
	Why Track Application Performance? .....	411
	Lab 1: Documenting Application Performance Metrics .....	415
	Lesson Summary .....	416
	Lesson Review .....	416
	Lesson 2: Analyzing Monitoring Data .....	418
	Monitoring Resource Use .....	418
	Monitoring Security .....	430
	Lab 2: Monitoring and Instrumentation .....	436
	Lesson Summary .....	441
	Lesson Review .....	441
	Lesson 3: Evaluating the Deployment Plan .....	443
	What Is a Deployment Plan? .....	443
	Identifying Component Dependencies .....	446
	Identifying Scripting Requirements .....	447
	Lab 3: Creating a Setup Project .....	449
	Lesson Summary .....	451
	Lesson Review .....	451
	Lesson 4: Understanding an Application Flow-Logic Diagram .....	453
	Software Diagrams .....	453
	Application Flow-Logic Diagrams .....	454
	Identifying Component Complexity .....	455
	Lesson Summary .....	456
	Lesson Review .....	456
	Lesson 5: Validating the Production Configuration Environment .....	458
	Validate a Deployed Application .....	458
	Production Monitoring .....	460

Lesson Summary . . . . .	460
Lesson Review . . . . .	460
Chapter Review . . . . .	462
Chapter Summary . . . . .	462
Key Terms . . . . .	463
Case Scenarios . . . . .	463
Suggested Practices . . . . .	464
Deploy and Monitor an Application . . . . .	464
Take a Practice Test . . . . .	464
<b>Answers . . . . .</b>	<b>465</b>
<b>Glossary . . . . .</b>	<b>501</b>
<b>Index . . . . .</b>	<b>507</b>
