

ELECTRO-OPTICAL INSTRUMENTATION

SENSING AND MEASURING WITH LASERS

SILVANO DONATI

Contents

| | |
|--|------------|
| Preface | vii |
| Chapter 1 Introduction | 1 |
| 1.1 Looking Back to Milestones | 2 |
| References | 10 |
| Chapter 2 Alignment, Pointing, and Sizing Instruments | 11 |
| 2.1 Alignment | 12 |
| 2.2 Pointing and Tracking | 16 |
| 2.2.1 The Quadrant Photodiode | 16 |
| 2.2.2 The Position Sensing Detector | 19 |
| 2.2.3 Position Sensing with Reticles | 22 |
| 2.3 Laser Level | 24 |
| 2.4 Wire Diameter Sensor | 27 |
| 2.5 Particle Sizing | 30 |
| References | 38 |
| Chapter 3 Laser Telemeters | 39 |
| 3.1 Triangulation | 40 |
| 3.2 Time-of-Flight Telemeters | 43 |
| 3.2.1 Power Budget | 44 |
| 3.2.2 System Equation | 46 |
| 3.2.3 Accuracy of the Pulsed Telemeter | 51 |
| 3.2.4 Accuracy of the Sine-Wave Telemeter | 59 |
| 3.2.5 The Ambiguity Problem | 61 |
| 3.2.6 Intrinsic Precision and Calibration | 63 |
| 3.2.7 Transmitter and Receiver Optics | 64 |
| 3.3 Instrumental Developments of Telemeters | 66 |
| 3.3.1 Pulsed Telemeter | 66 |
| 3.3.2 Sine-Wave Telemeter | 74 |
| 3.4 Imaging Telemeters | 80 |
| 3.5 The LIDAR | 81 |
| References | 87 |

| | |
|---|------------|
| Chapter 4 Laser Interferometry | 89 |
| 4.1 Overview of Interferometry Applications | 91 |
| 4.2 The Basic Laser Interferometers | 93 |
| 4.2.1 The Two-Beam Laser Interferometer | 94 |
| 4.2.2 The Two-Frequency Laser Interferometer | 101 |
| 4.2.3 Measuring with the Laser Interferometer | 107 |
| 4.3 Performance Parameters | 112 |
| 4.4 Ultimate Limits of Performance | 113 |
| 4.4.1 Quantum Noise Limit | 114 |
| 4.4.2 Temporal Coherence | 116 |
| 4.4.3 Spatial Coherence and Polarization State | 118 |
| 4.4.4 Dispersion of the Medium | 118 |
| 4.4.5 Thermodynamic Phase Noise | 119 |
| 4.4.6 Brownian Motion, Speckle-Related Errors | 120 |
| 4.5 Read-Out Configurations of Interferometry | 122 |
| 4.5.1 Internal Configuration | 124 |
| 4.5.2 Injection (or Self-Mixing) Configuration | 126 |
| 4.6 Laser Vibrometry | 146 |
| 4.6.1 Short-Distance Vibrometry | 146 |
| 4.6.2 Medium-Distance Vibrometry | 151 |
| 4.6.3 Long-Distance Vibrometry | 157 |
| 4.7 Other Applications of Injection Interferometry | 163 |
| 4.7.1 Absolute Distance Measurements | 163 |
| 4.7.2 Angle Measurements | 166 |
| 4.7.3 Detection of Weak Echos | 168 |
| 4.8 White Light Interferometry | 172 |
| 4.8.1 Application to Profilometry | 175 |
| References | 178 |
| Chapter 5 Speckle-Pattern Instruments | 181 |
| 5.1 Speckle Properties | 182 |
| 5.1.1 Basic Description | 182 |
| 5.1.2 Statistical Analysis | 186 |
| 5.1.3 Speckle Size from Acceptance | 191 |
| 5.1.4 Joint Distributions of Speckle Statistics | 192 |
| 5.1.5 Speckle Phase Errors | 197 |
| 5.1.6 Speckle Errors due to Target Movement | 198 |
| 5.1.7 Speckle Errors due to Beam Movement | 199 |
| 5.1.8 Speckle Errors with a Focussing Lens | 199 |
| 5.1.9 Phase and Speckle Errors due to Detector Size | 200 |
| 5.2 Speckle in Single-Point Interferometers | 201 |
| 5.2.1 Speckle Regime in Vibration Measurements | 201 |
| 5.2.2 Speckle Regime in Displacement Measurements | 203 |
| 5.2.3 The Problem of Speckle Phase Error Correction | 210 |
| 5.3 Electronic Speckle Pattern Interferometry | 214 |

| | |
|---|------------|
| References | 221 |
| Chapter 6 Laser Doppler Velocimetry | 223 |
| 6.1 Principle of Operation | 224 |
| 6.1.1 The Velocimeter as an Interferometer | 227 |
| 6.2 Performance Parameters | 229 |
| 6.2.1 Scale Factor Relative Error | 229 |
| 6.2.2 Accuracy of the Doppler Frequency | 230 |
| 6.2.3 Size of the Sensing Region | 231 |
| 6.2.4 Alignment and Positioning Errors | 233 |
| 6.2.5 Placement of the Photodetector | 235 |
| 6.2.6 Direction Discrimination | 237 |
| 6.2.7 Particle Seeding | 238 |
| 6.3 Electronic Processing of the Doppler Signal | 239 |
| 6.3.1 Time-Domain Processing | 240 |
| 6.3.2 Frequency-Domain Processing | 242 |
| 6.4 Optical Configurations | 244 |
| References | 246 |
| Chapter 7 Gyroscopes | 247 |
| 7.1 Overview | 248 |
| 7.2 The Sagnac Effect | 252 |
| 7.2.1 The Sagnac Effect and Relativity | 253 |
| 7.2.2 Sagnac Phase Signal and Phase Noise | 255 |
| 7.3 Basic Gyro Configurations | 259 |
| 7.4 Development of the RLG | 265 |
| 7.4.1 The Dithered Laser Ring Gyro | 268 |
| 7.4.2 The Ring Zeeman Laser Gyro | 270 |
| 7.4.3 Performances of RLGs | 274 |
| 7.5 Development of the Fiber Optics Gyro | 277 |
| 7.5.1 The Open-Loop Fiber Optic Gyro | 277 |
| 7.5.2 Requirements on FOG Components | 282 |
| 7.5.3 Technology to Implement the FOG | 289 |
| 7.5.4 The Closed-Loop FOG | 291 |
| 7.6 The Resonant FOG and Other Configurations | 295 |
| 7.7 The 3x3 FOG for the Automotive | 297 |
| 7.8 The MEMS Gyro and Other Approaches | 301 |
| 7.8.1 MEMS | 303 |
| 7.8.2 Piezoelectric Gyro | 307 |
| References | 308 |
| Chapter 8 Optical Fiber Sensors | 311 |
| 8.1 Introduction | 312 |
| 8.1.1 OFS Classification | 313 |
| 8.1.2 Outline of OFS | 314 |
| 8.2 The Optical Strain Gage: A Case Study | 316 |

| | |
|---|------------|
| 8.3 Readout Configuration | 318 |
| 8.3.1 Intensity Readout | 318 |
| 8.3.2 Polarimetric Readout | 328 |
| 8.3.3 Interferometric Readout | 345 |
| 8.4 Multiplexed and Distributed OFS | 352 |
| 8.4.1 Multiplexing | 353 |
| 8.4.2 Distributed Sensors | 357 |
| References | 361 |
| Appendix A0 Nomenclature | 363 |
| Appendix A1 Lasers for Instrumentation | 365 |
| A1.1 Laser Basics | 367 |
| A1.1.1 Conditions of Oscillation | 370 |
| A1.1.2 Coherence | 371 |
| A1.1.3 Types of He-Ne Lasers | 372 |
| A1.2 Frequency Stabilization of the He-Ne Laser | 375 |
| A1.2.1 Frequency Reference and Error Signal | 376 |
| A1.2.2 Actuation of the Cavity Length | 381 |
| A1.2.3 Ultimate Frequency Stability Limits | 382 |
| A1.2.4 A Final Remark on He-Ne Lasers | 382 |
| A1.3 Semiconductor Narrow-Line and Frequency Stabilized Lasers | 383 |
| A1.3.1 Types and Parameters of Semiconductor Lasers | 383 |
| A1.3.2 Frequency-Stabilized Semiconductor Lasers | 388 |
| A1.4 Diode-Pumped Solid-State Lasers | 390 |
| A1.5 Laser Safety Issues | 393 |
| References | 395 |
| Appendix A2 Basic Optical Interferometers | 397 |
| A2.1 Configurations and Performances | 397 |
| A2.2 Choice of Optical Components | 403 |
| References | 406 |
| Appendix A3 Propagation through the Atmosphere | 407 |
| A3.1 Turbidity | 407 |
| A3.2 Turbulence | 415 |
| References | 418 |
| Appendix A4 Optimum Filter for Timing | 419 |
| Appendix A5 Propagation and Diffraction | 421 |
| A5.1 Propagation | 421 |
| A5.2 The Fresnel Approximation | 423 |
| A5.3 Examples | 424 |
| References | 428 |
| Appendix A6 Source of Information on Electro-Optical Instrumentation | 429 |
| Index | 431 |
