Contents

PART A Wind Power Systems

Chapter 1	Introduction	3
1.1	Industry Overview	3
1.2	Incentives for Renewables	5
1.3	Utility Perspective.....	6
1.3.1	Modularity for Growth.....	7
1.3.2	Emission Benefits	8
1.3.3	Consumer Choice	8
	References.....	10
Chapter 2	Wind Power.....	11
2.1	Wind Power in the World.....	11
2.2	U.S. Wind Power Development.....	15
2.3	Europe and the U.K.....	19
2.4	India	21
	References.....	23
Chapter 3	Wind Speed and Energy	25
3.1	Speed and Power Relations	25
3.2	Power Extracted from the Wind.....	27
3.3	Rotor-Swept Area	30
3.4	Air Density	30
3.5	Global Wind Patterns.....	31
3.6	Wind Speed Distribution	33
3.6.1	Weibull Probability Distribution	34
3.6.2	Mode and Mean Speeds.....	36
3.6.3	Root Mean Cube Speed	39
3.6.4	Mode, Mean, and RMC Speeds.....	39
3.6.5	Energy Distribution	41
3.6.6	Digital Data Processing.....	43
3.6.7	Effect of Hub Height.....	44
3.6.8	Importance of Reliable Data	46
3.7	Wind Speed Prediction	47

3.8	Wind Energy Resource Maps.....	48
3.8.1	U.S. Wind Resource Map	48
3.8.2	U.K. and Europe Wind Resources	52
3.8.3	Mexico Wind Resource Map	54
3.8.4	Wind Mapping in India.....	55
3.8.5	Wind Mapping — Other Countries	57
	References.....	60

Chapter 4 Wind Power Systems 61

4.1	System Components	61
4.1.1	Tower	63
4.1.2	Turbine.....	65
4.1.3	Blades	66
4.1.4	Speed Control	68
4.2	Turbine Rating	69
4.3	Power vs. Speed and TSR	70
4.4	Maximum Energy Capture	74
4.5	Maximum Power Operation	75
4.5.1	Constant-TSR Scheme	75
4.5.2	Peak-Power-Tracking Scheme	75
4.6	System-Design Trade-offs	76
4.6.1	Turbine Towers and Spacing	76
4.6.2	Number of Blades	78
4.6.3	Rotor Upwind or Downwind	79
4.6.4	Horizontal vs. Vertical Axis	79
4.7	System Control Requirements.....	80
4.7.1	Speed Control.....	80
4.7.2	Rate Control	81
4.8	Environmental Aspects	82
4.8.1	Audible Noise.....	82
4.8.2	Electromagnetic Interference (EMI)	83
4.8.3	Effects on Birds.....	83
4.8.4	Other Impacts	84
4.9	Potential Catastrophes	84
4.9.1	Fire.....	84
4.9.2	Earthquake	85
4.10	System-Design Trends	86
	References.....	86

Chapter 5 Electrical Generators..... 87

5.1	DC Generator.....	87
5.2	Synchronous Generator	89
5.3	Induction Generator	89
5.3.1	Construction	90

5.3.2	Working Principle.....	90
5.3.3	Rotor Speed and Slip	92
5.3.4	Equivalent Circuit.....	94
5.3.5	Efficiency and Cooling.....	97
5.3.6	Self-Excitation Capacitors.....	97
5.3.7	Torque-Speed Characteristic	99
5.3.8	Transients.....	100
5.4	Doubly Fed Induction Generator	102
5.5	Direct-Driven Generator.....	102
	References.....	103

Chapter 6 Generator Drives 105

6.1	Speed Control Regions	106
6.2	Generator Drives.....	108
6.2.1	One Fixed-Speed Drive.....	108
6.2.2	Two Fixed-Speed Drive.....	111
6.2.3	Variable-Speed Gear Drive	113
6.2.4	Variable-Speed Power Electronics	113
6.2.5	Scherbius Variable-Speed Drive.....	114
6.2.6	Variable-Speed Direct Drive	115
6.3	Drive Selection	116
6.4	Cutout Speed Selection	116
	References.....	118

Chapter 7 Offshore Wind Farms..... 119

7.1	Offshore Projects	121
7.2	Legal Aspects in the U.S.....	122
7.3	Environmental Impact.....	125
7.4	Offshore Costs	126
7.5	Power Transmission to Shore.....	127
7.5.1	AC Cable.....	128
7.5.2	DC Cable.....	128
7.6	Ocean Water Composition.....	129
7.7	Wave Energy and Power.....	130
7.8	Ocean Structure Design.....	133
7.8.1	Forces on Ocean Structures	133
7.9	Corrosion.....	134
7.10	Foundation	134
7.10.1	Monopile.....	135
7.10.2	Gravitation.....	135
7.10.3	Tripod	135
7.11	Materials	136
7.12	Maintenance.....	138
	References.....	139

PART B Photovoltaic Power Systems

Chapter 8	Photovoltaic Power	143
8.1	PV Projects	148
8.2	Building-Integrated PV System	151
8.3	PV Cell Technologies	152
8.3.1	Single-Crystalline Silicon	153
8.3.2	Polycrystalline and Semicrystalline Silicon	153
8.3.3	Thin-Film Cell	153
8.3.4	Amorphous Silicon	155
8.3.5	Spherical Cell	155
8.3.6	Concentrator Cell	156
8.3.7	Multijunction Cell	157
8.4	Solar Energy Maps	157
8.5	Technology Trends	159
	Reference	161

Chapter 9	Photovoltaic Power Systems	163
9.1	PV Cell	163
9.2	Module and Array	164
9.3	Equivalent Electrical Circuit	166
9.4	Open-Circuit Voltage and Short-Circuit Current	167
9.5	I-V and P-V Curves	168
9.6	Array Design	170
9.6.1	Sun Intensity	171
9.6.2	Sun Angle	172
9.6.3	Shadow Effect	172
9.6.4	Temperature Effects	174
9.6.5	Effect of Climate	175
9.6.6	Electrical Load Matching	175
9.6.7	Sun Tracking	176
9.7	Peak-Power Operation	179
9.8	System Components	180
	Reference	181

PART C System Integration

Chapter 10	Energy Storage	185
10.1	Battery	185
10.2	Types of Battery	187
10.2.1	Lead-Acid	187
10.2.2	Nickel-Cadmium	188

10.2.3	Nickel-Metal Hydride	188
10.2.4	Lithium-Ion.....	189
10.2.5	Lithium-Polymer	189
10.2.6	Zinc-Air	189
10.3	Equivalent Electrical Circuit	189
10.4	Performance Characteristics	191
10.4.1	C/D Voltages.....	191
10.4.2	C/D Ratio.....	192
10.4.3	Energy Efficiency	192
10.4.4	Internal Resistance	193
10.4.5	Charge Efficiency	193
10.4.6	Self-Discharge and Trickle-Charge.....	194
10.4.7	Memory Effect	194
10.4.8	Effects of Temperature	195
10.4.9	Internal Loss and Temperature Rise	196
10.4.10	Random Failure	198
10.4.11	Wear-Out Failure	199
10.4.12	Battery Types Compared.....	200
10.5	More on the Lead-Acid Battery	200
10.6	Battery Design	203
10.7	Battery Charging.....	204
10.8	Charge Regulators.....	204
10.8.1	Multiple Charge Rates	205
10.8.2	Single-Charge Rate	205
10.8.3	Unregulated Charging	205
10.9	Battery Management.....	206
10.9.1	Monitoring and Controls.....	206
10.9.2	Safety	207
10.10	Flywheel.....	208
10.10.1	Energy Relations	208
10.10.2	Flywheel System Components.....	210
10.10.3	Benefits of Flywheel over Battery	213
10.11	Superconducting Magnet.....	214
10.12	Compressed Air	217
10.13	Technologies Compared	219
	References.....	220
Chapter 11	Power Electronics.....	221
11.1	Basic Switching Devices	221
11.2	AC-DC Rectifier.....	224
11.3	DC-AC Inverter	225
11.4	Cycloconverter	227
11.5	Grid Interface Controls.....	228
11.5.1	Voltage Control	228
11.5.2	Frequency Control.....	229

11.6	Battery Charge/Discharge Converters	229
11.6.1	Battery Charge Converter	230
11.6.2	Battery Discharge Converter	232
11.7	Power Shunts	233
	References	234

Chapter 12 Stand-Alone Systems 235

12.1	PV Stand-Alone	235
12.2	Electric Vehicle	236
12.3	Wind Stand-Alone	238
12.4	Hybrid Systems	239
12.4.1	Hybrid with Diesel	239
12.4.2	Hybrid with Fuel Cell	241
12.4.3	Mode Controller	247
12.4.4	Load Sharing	248
12.5	System Sizing	249
12.5.1	Power and Energy Estimates	250
12.5.2	Battery Sizing	251
12.5.3	PV Array Sizing	252
12.6	Wind Farm Sizing	254
	References	255

Chapter 13 Grid-Connected Systems 257

13.1	Interface Requirements	258
13.2	Synchronizing with the Grid	261
13.2.1	Inrush Current	261
13.2.2	Synchronous Operation	263
13.2.3	Load Transient	264
13.2.4	Safety	264
13.3	Operating Limit	265
13.3.1	Voltage Regulation	265
13.3.2	Stability Limit	266
13.4	Energy Storage and Load Scheduling	268
13.5	Utility Resource Planning Tools	269
13.6	Wind Farm–Grid Integration	270
13.7	Grid Stability Issues	271
13.7.1	Low-Voltage Ride-Through	271
13.7.2	Energy Storage for Stability	272
13.8	Distributed Power Generation	273
	References	274

Chapter 14 Electrical Performance 277

14.1	Voltage Current and Power Relations	277
14.2	Component Design for Maximum Efficiency	278

14.3	Electrical System Model	280
14.4	Static Bus Impedance and Voltage Regulation	281
14.5	Dynamic Bus Impedance and Ripples	283
14.6	Harmonics	284
14.7	Quality of Power	285
14.7.1	Harmonic Distortion Factor	286
14.7.2	Voltage Transients and Sags	287
14.7.3	Voltage Flickers	288
14.8	Renewable Capacity Limit	290
14.8.1	System Stiffness	290
14.8.2	Interfacing Standards	293
14.9	Lightning Protection	295
14.10	National Electrical Code®	297
	References	297

Chapter 15 Plant Economy 299

15.1	Energy Delivery Factor	299
15.2	Initial Capital Cost	301
15.3	Availability and Maintenance	302
15.4	Energy Cost Estimates	303
15.5	Sensitivity Analysis	305
15.5.1	Effect of Wind Speed	305
15.5.2	Effect of Tower Height	305
15.6	Profitability Index	307
15.6.1	Wind Farm Screening Chart	308
15.6.2	PV Park Screening Chart	308
15.6.3	Stand-Alone PV vs. Grid Line	311
15.7	Hybrid Economics	312
15.8	Project Finance	313
	References	316

Chapter 16 The Future 317

16.1	World Electricity Demand up to 2015	317
16.2	Kyoto Treaty	318
16.3	Future of Wind Power	320
16.4	PV Future	326
16.5	Wind and PV Growth	327
16.6	Declining Production Cost	329
16.7	Market Penetration	331
16.8	Effect of Utility Restructuring	333
16.8.1	Energy Policy Act of 1992	334
16.8.2	Impact on Green Power	336
16.8.3	Green-Power Marketing	336
16.9	Strained Grids	337
	References	338

PART D Ancillary Power Technologies

Chapter 17	Solar Thermal System.....	341
17.1	Energy Collection	342
17.1.1	Parabolic Trough	342
17.1.2	Central Receiver	342
17.1.3	Parabolic Dish	343
17.2	Solar-II Power Plant	343
17.3	Synchronous Generator	345
17.3.1	Equivalent Electrical Circuit	348
17.3.2	Excitation Methods	348
17.3.3	Electric Power Output	349
17.3.4	Transient Stability Limit	351
17.4	Commercial Power Plants	352
17.5	Recent Trends	353
	References.....	354
Chapter 18	Ancillary Power Systems	355
18.1	Heat-Induced Wind Power.....	355
18.2	Marine Current Power	355
18.3	Ocean Wave Power	358
18.4	Piezoelectric Generator.....	360
18.5	Jet-Assisted Wind Turbine.....	361
18.6	Solar Thermal Microturbine.....	362
18.7	Thermophotovoltaic System	363
	References.....	364
Chapter 19	Contrarotating Wind Turbines.....	365
19.1	Introduction.....	365
19.2	Potential Applications.....	366
19.3	Mathematical Model	367
19.3.1	Velocity Components	368
19.3.2	Force Components.....	369
19.4	Prototype Design	371
19.4.1	Design Method	372
19.4.2	Selection of Sensors	375
19.5	Prototype Tests.....	377
19.5.1	Generator Performance Tests	377
19.5.2	Turbine Performance Tests.....	377
19.5.3	Field-Test Instrumentation	379
19.5.4	Discussion of Field-Test Data.....	382
19.5.5	Buffeting.....	386

19.6	Wind Farm Power Density	388
19.7	Retrofit Implementation and Payback	389
19.7.1	Dual Wind Turbines Back-to-Back in Tandem	389
19.7.2	Contrarotating Rotors on a Single Generator	390
19.7.3	Retrofit Cost and Payback Period	390
19.8	Conclusions	390
	Acknowledgment	392
	References	392

Appendices

Appendix 1: National Electrical Code® (Article 705)	395
Appendix 2: Sources of Further Information on Renewable Energy	401
Solar Energy Information Sources	403
Manufacturers of Solar Cells and Modules in the U.S.	403
Wind Energy Information Sources	405
University Wind Energy Programs in the U.S.	406
Periodicals on Wind Energy	408
International Wind Energy Associations	410
Wind Power System Suppliers in the U.S.	412
European Wind Energy Manufacturers and Developers	414
Research and Consultancy	419
National Associations	422
Acronyms	427
Prefixes:	428
Conversion of Units	429
Further Reading	431

<i>Index</i>	433
