<b>1 Light and colour</b>	<b>1</b>
<i>Arthur Tarrant</i>	
1.1 Luminous Flux	1
1.2 Illuminance	4
1.3 Luminous Intensity	6
1.4 Luminance	7
1.5 Units	8
1.5.1 Obsolete units	8
1.5.2 Radiometric units	8
1.6 Transmission Measurements	9
1.6.1 Direct transmission	9
1.6.2 Diffuse transmission	10
1.6.3 Transmittance	10
1.6.4 Optical density and absorbance	11
1.6.5 The Beer–Lambert law	11
1.7 Reflection Measurements	12
1.7.1 Specular and diffuse reflection	12
1.7.2 Surface texture	13
1.7.3 Reflectance	13
1.8 Colour Rendering and Metamerism	14
1.8.1 Colour rendering	14
1.8.2 Metamerism	16
References	17
<b>2 Instruments and methods for colour measurement</b>	<b>19</b>
<i>Danny Rich</i>	
2.1 Introduction	19
2.1.1 The need for colorimetry	19

2.1.2	The principles of colorimetry	20
2.1.3	Making the transition from what we 'see' to quantifying how we 'match' a colour	20
2.2	Visual Colorimetry	21
2.2.1	A method to uniquely map the colour of lights and objects	21
2.2.2	Development of the CIE method of visual colorimetry	22
2.2.3	Applications of visual colorimetry	25
2.2.4	Disadvantages of visual colorimetry	27
2.3	Analogue Simulation of Visual Colorimetry	27
2.3.1	Replacing the human eye with an optoelectronic sensor	27
2.3.2	Substituting coloured filters to approximate the CIE colour-matching functions	27
2.3.3	Assessing the 'goodness of fit' of a set of colorimeter filters	30
2.3.4	Schematic description of analogue filter colorimeters	30
2.3.5	Disadvantages of analogue filter colorimeters	31
2.4	Digital Simulation of Visual Colorimetry	32
2.4.1	Replacing the analogue filters with an abridged spectrometer	32
2.4.2	Assessing the 'goodness of fit' of abridged spectrometers	33
2.4.3	Schematic description of digital spectrocolorimeters	34
2.4.4	Advantages and disadvantages of digital spectrocolorimeters	34
2.5	Selecting and Using Colorimeters and Spectrocolorimeters	35
2.5.1	Reading and understanding specifications and technical literature	35
2.5.2	Verifying performance specifications	38
2.5.3	Standards of colour and colour-difference	38
2.5.4	Sources of error and uncertainty in the measurement of reflectance, transmittance and radiance	39
2.6	Geometric Requirements for Colour Measurements	40
2.6.1	Colour measurements from self-luminous objects	40
2.6.2	Colour measurements from reflecting or transmitting objects	41
2.7	Conclusions and Expectations	45
2.7.1	Current CIE activities in colour and colour-difference measurements	45
2.7.2	Quality management systems and colour measurements	45
	References	46
<b>3</b>	<b>Colorimetry and colour difference</b>	<b>49</b>
	<i>Phil Green</i>	
3.1	Introduction	49
3.2	Colorimetry	49
3.2.1	Calculation of chromaticity	52
3.2.2	Calculation of CIE 1976 $L^* a^* b^*$	53
3.2.3	Inversion of colorimetric transforms	55
3.2.4	Implementation issues	56

3.3	Colour Difference	56
3.3.1	Problems with using UCS colour difference	58
3.3.2	Acceptability of colour differences	59
3.4	Overcoming the Limitations of UCS Colour Difference with Advanced Colour Difference Metrics	60
3.4.1	CMC	60
3.4.2	BFD	61
3.4.3	CIE94	63
3.4.4	CIEDE2000	65
3.5	Advanced Colour Difference Metrics in Colour Imaging	67
3.5.1	Basis conditions	67
3.5.2	Colour difference in complex images	68
3.5.3	Acceptability and perceptibility	69
3.5.4	Large vs. small differences	70
3.6	Deriving Colour Difference Tolerances	70
3.6.1	Sample preparation	71
3.6.2	Psychophysical experiments	71
3.6.3	Observer variability and experience	71
3.6.4	Calculating colour tolerances from experimental data	72
3.6.5	Calculation of discrimination ellipsoids and tolerance distributions	72
3.6.6	Calculation of parametric constants in weightings functions	73
3.6.7	Calculation of acceptability thresholds	74
3.7	Conclusion	74
	References	75
<b>4</b>	<b>The CIE 1997 colour appearance model: CIECAM97s</b>	<b>79</b>
	<i>M. Ronnier Luo</i>	
4.1	Introduction	79
4.2	CIE 1997 Colour Appearance Model: CIECAM97s	81
4.2.1	Structure of the model	81
4.2.2	Colour attributes	83
4.2.3	Colour appearance phenomena predicted by the model	84
4.3	Testing Colour Appearance Models Using Colour Appearance Data Sets	89
4.3.1	Colour appearance data sets	89
4.3.2	Psychophysical methods	89
4.3.3	Testing colour appearance models' performance	91
4.4	Recent Modifications to CIECAM97s	95
4.5	Conclusion	95
	References	95
